Option 16:	Knock-Back Damage	51

1.0 INTRODUCTION

"...And I ended up in the room with the vampire and the titan! I happily hoisted my shield and bastard sword and attacked the titan. Unfortunately, it was like a fly hitting an elephant ... in two combat rounds I was reduced to under 80 hits, and then the vampire attacked ... I knew I was in big trouble.

However, the god of death smiled on her champion that day, and the next round the titan fumbled... On the next attack by the vampire, he fumbled one of his swords, which only left him one attack that missed... I attacked the titan twice. The first attack did nothing. The second attack killed him with a sword strike that went through his armpit and skewered his brain; I then turned to the vampire who still only had one sword and prepared for the next round.

The next round, I inflicted eight criticals on the vampire and he had to flee for his life, leaving me victorious against two considerably more powerful characters.

*My hands were shaking so much from the ten-minute fight that I could barely pick up my dice! Only in **Rolemaster** could you have a moment like that!*

Mark W. (from ICE Rolemaster Moments)

Arms Law is about FRPG combat – the kind that leaves you shaking and bragging to your friends about your character's exploits. If you prefer safe, ho hum, by-the-numbers RPG combat then *Arms Law* is not for you. If you are looking for FRP combat that leaves you breathless read on...

What makes *Arms Law* special? Lots, but we'll go straight to the heart of *Arms Law*: Criticals and Fumbles. Let's take a look at a sample Critical and Fumble result:

From the 'E' Puncture Critical Table:

"Strike through foe's kidneys. Foe dies after 6 rnds of very intense agony".

Two-Handed Arms Fumble:

"Stumble over an imaginary dead turtle. You lose two rounds of attack, but can still parry."

Once you start using *Arms Law*, your RPG combat crosses into new waters. There will no longer be such a thing as a certain victory for your character or their foes. Your warrior will triumph in the face of incredible odds. On the other hand, that bunny your character just annoyed may well sever an artery in your character's neck and be having you for dinner.

WHAT IS ARMS LAW?

Arms Law covers armed and unarmed combat into a fantasy role playing environment, and is designed as one of the three cornerstones of the *Rolemaster (RM)* system. *Arms Law* can also be used as the melee and missile combat system for other Fantasy Role Playing (FRP) games to make FRPG combat fun and exciting, and to let your characters do things they couldn't do in the other FRPGs – parrying, for example.

Now reformatted and reorganized, *Rolemaster Classic: Arms Law* can add flavor, realism, and depth to your campaign without sacrificing playability.

AL is designed to simulate a wide variety of FRPG combat. Using this book players and GMs should be able to handle most RPG combat situations.

KEY FEATURES

- A fantastic medieval melee and missile combat system with individual attack tables for thirty weapons and statistics for dozens more.
- “*Claw Law*”: A dozen attack tables that integrate the size, instincts, and fighting patterns of a wide variety of animals, monsters, and practitioners of the martial arts.
- Ten Critical Strike Tables for: Slashing, Puncturing, Krushing, Grappling, Unbalancing, Tiny Animal Attacks, Large Creatures, Super-Large Creatures, Martial Arts Striking, and Martial Arts Sweeps & Throws.
- A Fumble table and a Moving Maneuver table.
- Comprehensive rules cover every essential aspect of armed and unarmed combat in a FRP environment: fumbles, parrying, moving, maneuvering, critical damage, initiative determination, orientation, armor, and much more.

The *Arms Law* rules often try to simulate combat situations that have never actually occurred. The last dragon in England was reputedly killed in 1063 AD or thereabouts. Other monsters have proved equally shy about answering our calls for test subjects. (We've had no takers in over twenty years.) So we were unable to study combat with monsters first hand. In creating the attack, critical, and fumble tables, we had to use our imaginations, film and fiction as our inspiration. I suspect our

combat rules might make many arms and armor experts cringe, but the goal of this product is believable fun, not drab realism.

There will be times when fun, believability, and the attack and critical results collide. In those cases, we encourage players and GMs to balance fun and common sense. The rules within this book are not written in stone, nor are they the “Law.” These rules are guidelines meant for your use and enjoyment. Please change them as needed to suit your campaign and play style, and have fun with them.

OPTIONAL RULES

This book provides some optional rules for use with *RM*. They can provide more flexibility and detail within the framework of the basic rules. However, they can involve complications and additional bookkeeping. A GM should examine these rules and determine which ones are appropriate for the pace, flavor, and detail they wish to inject into their game. All optional rules are separated from the main text by a special symbol, just like this paragraph. The options will be numbered and a full list is given just after the table of contents.

1.1 A WORD FROM THE RMC TEAM

Welcome to the beginning; *Arms Law*, where it all started. This was the first ever *Rolemaster* book, and was sold as an add-on realistic combat system for FRP systems well before *Rolemaster* became a game system.

Though there have been various versions of *Arms Law* produced over the last 26 years, the basic mechanics of rolling dice and looking up results on Attack Tables and Critical Tables has remained constant and is probably the portion of *Rolemaster* that most often gets adapted to other game systems.

Brent Knorr (Oblknorr)
Marian Münch (Munchy)
Andrew Ridgway (Ictus)
Marc Rosen (LordMiller)

1.2 ROLEMASTER

Rolemaster (RM) is ICE's complete fantasy role playing system, combining *Arms Law (AL)*, *Spell Law (SL)*, and *Character Law (ChL)*. The rules in *AL* can be used with the *Rolemaster* system or as an add-on set of combat rules for other game systems. The rules in *ChL* are intended to coordinate and combine all of the individual *RM* rules. Thus the rules in *ChL* should take precedence over the rules in the other individual products when the complete *RM* system is used. To compliment the rules set, there is *Creatures & Treasure (CT)*, ICE's compendium of information and statistics for three key elements of fantasy role playing: creatures, treasures, and encounters. It also includes guidelines and statistics for dozens of new races.

Thus, *Rolemaster Classic (RMC)* has four separately indexed sets of rules:

References to a specific rules "section"

01-01 INDEXED SET OF RULES	
<i>Character Law</i>	(ChL)
<i>Arms Law & Claw Law</i>	(AL)
<i>Spell Law</i>	(SL)
<i>Creatures & Treasures</i>	(CT)

in *Rolemaster* are done using the abbreviation for the appropriate set of rules, the word "Section", and the appropriate section number (or numbers or range of numbers). For example, this text is in *AL* Section 1.2.

If a section is referenced without an abbreviation, that section can be found in the same set of rules as the reference. For example, this text is in Section 1.2.

Other FRPG Systems: If you wish to use *AL* with another FRP system, check on the ICE Online Forums for conversion materials – the Forum link is on the Iron Crown homepage at www.ironcrown.com.

1.3 DIE ROLLING CONVENTIONS

Each die used in *AL* is a 10-sided die that gives a result between 0 and 9. If two of these dice are used, a variety of results can be obtained. However, results between 1 and 100 are the primary basis of the *AL* system (i.e. *RM* is a "percentile" system).

Note: 10-sided dice can be obtained at your local hobby and game stores, or online.

PERCENTILE ("1-100") ROLLS

1-100 Roll – Most of the rolls in *Rolemaster* are "1-100" rolls (also called "D100" rolls). To obtain a 1-100 result roll two dice together – one die is treated as the "ten's" die and the other as the "one's" die (designate before rolling, please). Thus a random result between 01 and 100 (a "00" is treated as 100) is obtained.

Example: *The GM asks a player to make a 1-100 roll. The two dice are rolled; the ten's die is a "4" and the one's die is a "7". Thus the result is "47".*

Low Open-ended Roll – To obtain a "low open-ended roll" first make a 1-100 roll. A roll of 01-05 indicates a particularly unfortunate occurrence for the roller. The dice are rolled again and the result is subtracted from the first roll. If the second roll is 96-00, then a third roll is made and subtracted, and so on until a non 96-00 roll is made. The total sum of these rolls is the result of the low open-ended roll.

Example: *The GM asks a player to make a low open-ended roll, and the initial roll is a 04 (i.e. between 01 and 05). A second roll is made with a result of 97 (i.e. between 96 and 100); so a third roll is made, resulting in a 03. Thus, the low open-ended roll that the GM requested is -96 (= 04 - 97 - 03).*

High Open-ended Roll – To obtain a "high open-ended roll" first make a 1-100 roll. A roll of 96-00 indicates a particularly fortunate occurrence for the roller. The dice are rolled again and the result is added to the first roll. If the second roll is 96-00, then a third roll is made and added, and so on until a non 96-00 roll is made. The total sum of these rolls is the result of the high open-ended roll.

Example: *The GM asks a player to make a high open-ended roll, and the initial roll is a 99 (i.e. between 96 and 100). A second roll is made with a result of 96; so a third roll is made with a result of 04. Thus, the high open-ended roll that the GM requested is 199 (= 99 + 96 + 04).*

Open-ended Roll – An open-ended roll is both high open-ended and low open-ended.

NON-"1-100" ROLLS

1-10 Roll – In instances when a result (roll) between 1 and 10 is required, only one die is rolled. This gives a result between 0 and 9, but the 0 is treated as a 10. Such a roll is referred to as "1-10" or "D10".

1-5 Roll – Roll one die, divide by 2 and round up ("1D5").

1-8 Roll – Roll one die; if the result is 9 or 10, re-roll until a 1 to 8 result occurs ("1D8").

2-10 Roll – Roll two dice, divide each result by 2 (round up), and then add the two results to obtain the "2-10" ("2D5") result.

Other Required Rolls – Any other required rolls are variants of the above.

Unmodified Rolls (UM): Certain results on some rolls indicate an immediate effect and no modifications are considered. These rolls are marked on the appropriate charts as "UM". For example, all weapon attacks result in a fumble if the initial unmodified 01-100 roll falls within the fumble range of the weapon.

1.4 DEFINITIONS

The majority of unique terms found in *AL* are not described below; rather they are usually described when they are used in the text. The terms defined below are frequently used or they are very important for using and understanding *AL*.

Action: An action is part of the activity that a character may perform during a round (10 seconds). Characters may often take multiple actions during a round, so long as the activity percentage does not exceed 100%.

Attack Roll: A "Roll" that is used to determine the results of a melee or missile attack.

Chance: Often in *AL* an action or activity has a "chance" of succeeding or occurring, and this chance is usually given in the form of # %. This means that if a roll (1-100) is made (see below) and the result is less than #, then the action or activity succeeds (or occurs); otherwise it fails. Alternatively, you can roll (1-100) and add the result to the #; if the result is greater than 100, then the action or activity succeeds (or occurs); otherwise it fails.

Combat Roll: See "Attack Roll".

Combatant: Participant in a combat, including player characters, and beings or creatures controlled by the GM.

Concussion Hits: See "Hits".

Critical Strike: Unusual damage due to particularly effective elemental attacks. Note: The term "critical" will often be used instead of "critical strike".

Defensive Bonus (DB): The total subtraction from the combat roll due to the defender's advantages, including bonuses for the defender's quickness, shield, armor, position, and magic items.

Dice Roll: See "Roll."

Experience Level (Level): A character's level is a measure of their current stage of skill development, and usually is representative of their capabilities and power.

Fire: To make a missile attack (verb) or missile attack(s) (noun).

Fumble: An especially ineffective attack or mishandling of a weapon that yields a result that is disadvantageous for the attacker.

Gamemaster (GM): The Gamesmaster, judge, referee, dungeon-master, etc. The person responsible for giving life to a FRP game by creating the setting, world events and other key ingredients. They interpret situations and rules; control non-player characters, and resolve conflicts.

Hits (Concussion Hits): Accumulated damage, pain, and bleeding, which can lead to shock, unconsciousness, and sometimes death (also called Concussion Hits). Each character can take a certain number of hits before passing out (determined by their "Body Development" skill).

Initiative: The factor that determines the order in which combatants resolve their attacks, i.e. the combatant with the highest initiative attacks first.

Level: See "Experience Level".

Maneuver Roll: A roll that is used to determine the results of a maneuver.

Maneuver: An action performed by a character that requires unusual concentration, concentration under pressure, or a risk (e.g. climbing a rope, balancing on a ledge, picking a lock, etc.). Maneuvers requiring movement are "Moving Maneuvers" (MM), and other maneuvers are called "Static Maneuvers" (SM).

Melee: Hand-to-hand combat (i.e. combat not using projectiles, spells, or missiles) where opponents are physically engaged – be it a fistfight, a duel with rapiers, or a wrestling match.

Missile weapon: In *Rolemaster* this indicates a low velocity airborne projectile, usually from a manually fired weapon. Such weapons include an arrow from a bow, a quarrel from a crossbow, a stone from a sling, etc. Thrown weapons are also included in this area. Normally, missile weapons do not include projectiles fired by explosions or other high-velocity propulsion means (e.g. guns are “projectile weapons”).

Non-Player Character (NPC): This is a character that is controlled by the GM. It is normally either a supporting character or a foe of the player’s characters.

Offensive Bonus (OB): Each character has an “offensive bonus” when they are using a weapon – this OB includes bonuses for the character’s stats, superior weapon, skill rank, magic items, etc. This OB is added to any attack rolls that are made when they are using that weapon.

Orientation Roll: An Orientation Roll is a Quick Perception maneuver. Sometimes characters will perform actions in which their situation or location suddenly changes, such as with a Long Door spell or an Acrobatics or Tumbling maneuver. In such cases, the character is required to make an Orientation Roll to get their bearings prior to being allowed to act.

Parry: The use of part of a character’s offensive capability to affect an opponent’s attack.

Profession (Character Class): A character’s profession is a reflection of their training and thought patterns; in game terms, it affects how much effort is required to develop skill in various areas of expertise.

Projectile weapon: As opposed to a missile weapon, this indicates a device that mechanically fires a high-velocity projectile (e.g. a gun).

Realm: All spells and the power required to cast spells are classified in the three “realms” of power: Essence, Channeling, and Mentalism.

Resistance Roll (RR): A dice roll which determines whether or not a character successfully resists the effect of a spell, poison, disease, or some other form of adversity.

Roll: In *AL* two different colored 20-sided or 10-sided dice are used to resolve any activity requiring a “Roll”; such dice are available in most hobby and toy stores. Each of these dice has two sets of the numbers: 0, 1, 2, 3, 4, 5, 6, 7, 8 and 9. These dice can be used to obtain a variety of results. These various results are described in Section 1.3.

Round: The basic tactical period of RM is 10 seconds long. Combatants normally have 100% activity per round.

Self-reloading: Refers to any weapon that reloads (or recharges) itself and is ready for another shot almost immediately (i.e. it is capable of two attacks in the same round). Most projectile weapons fall into this category, while normal bows and thrown weapons do not. Normally self-reloading weapons only occur in FRP games in the form of magic items.

Shot: A missile attack.

Simultaneous Actions: These are actions that are performed at the same time. Most often, Simultaneous Actions are comprised of a normal action combined with movement.

Skill: Training in an area which influences how effectively a character is able to perform a particular action or activity. “Skill Rank” is a measure of the effectiveness of a specific skill.

Stat (Characteristic): One of 10 physical and mental attributes that are considered most important to an adventurer in a FRP game. Stats dictate how well a character develops their skills, moves, fights, takes damage, absorbs information, etc.

Static Action (Static Maneuver): An action performed by a character that requires unusual concentration, or thought under pressure, and does not involve pronounced physical movement.

Swing: A melee attack (noun) or to make a melee attack (verb).

Target: The term “target(s)” refers to the being(s), animal(s), object(s), and/or material that a melee attack, missile attack, or spell attempts to affect.

2.0 HOW TO USE ARMS LAW

2

The basics of *Arms Law* are very simple; combat will always involve the steps given below. To resolve combat, you will need the following for each combatant:

Armor: What kind of armor is the combatant wearing? *Arms Law* has 20 different armor types divided into 5 categories. Note that the primary effect of armor is to define the way that a given weapon damages you; normal armor does not directly affect your defensive bonus. Rather than offering a modifier to attack rolls, it changes which column of the attack table is being used against you. However, exceptional quality or magical armor can contribute to your defensive bonus. To determine your armor type, and armor bonuses, see Sections 2.1 and 2.2.

Defensive Bonus (called DB): Basically, this is any factor that keeps a character from being hit. Many factors can contribute to DB: a character's quickness, special armor bonuses, a shield, special items, skill, even a character's position. Note that heavy armors can impede your DB! To determine your total DB see Section 2.2.

Offensive Bonus (called OB): A measure of the character's offensive ability. Character OB includes weapon skill, strength and agility bonuses, special weapons and equipment, and sheer, dumb luck. To determine your total OB see Section 2.3.

Attack Type: What kind of attack is the character going to make? Note that this book only covers physical attacks (not magical ones). *Arms Law* contains 30 weapon attack tables, 13 attack tables that simulate monster, animal, and martial arts attacks. Determining your attack type is simple; either choose the appropriate weapon table or consult the "Unusual Weapons" in Section 2.4, which lists additional weapons and which attack table they use.

Concussion Hits: A measure of how much concussive damage the character can withstand before falling unconscious (this will be called "concussion hits" and in some systems is known as Hit Points or simply Hits). Most starting fighter-types will have 30-45 hits when they

10

02-01 ARMOR MANEUVER MODIFICATION TABLE					
Armor Base	Armor Type	Minimum Maneuver Mod.*	Maximum Maneuver Mod.†	Missile Attack Penalty ‡	Quickness Penalty §
Cloth or Skin Base	1	0	0	0	0
	2	0	0	0	0
	3	0	0	0	0
	4	0	0	0	0
Soft Leather Base	5	0	0	0	0
	6	0	-20	5	0
	7	-10	-40	15	10
	8	-15	-50	15	15
Rigid Leather Base	9	-5	-50	0	0
	10	-10	-70	10	5
	11	-15	-90	20	15
	12	-15	-110	30	15
Chain Mail Base	13	-10	-70	0	5
	14	-15	-90	10	10
	15	-25	-120	20	20
	16	-25	-130	20	20
Plate Base	17	-15	-90	0	10
	18	-20	-110	10	20
	19	-35	-150	30	30
	20	-45	-165	40	40

* —Minimum maneuver modification applied to a combatant fully trained in maneuvering while wearing the given armor type.

† —Maximum maneuver modification applied to a combatant totally untrained in maneuvering while wearing the given armor type.

‡ —The missile attack penalty acts as a modification to the missile OB for a combatant wearing the given armor. This is meant to reflect the disadvantageous effect of armor worn on the arms of a combatant.

§ —An armor Quickness penalty can reduce or cancel a combatant's Quickness stat bonus for his DB. Unlike those penalties above, this penalty can only reduce the armor wearer's Quickness stat bonus. It will not reduce a combatant's overall DB below the level that it would be at with a zero Quickness stat bonus.

start out. Non-fighter types will have 10-20 hits when they start out. In this system, losing all of your concussion hits simply causes unconsciousness (you can die from concussion damage, but it is rare).

Once you have this information, you are ready to begin.

Whenever you would normally make an attack, do the following:

1. Make an attack roll.
2. If the initial die roll falls within the failure/fumble range for the attack, resolve the fumble/failure. The attack procedure ends here. Otherwise, continue with Step 3. (For more on fumbles see Section 5.1).
3. Add your character's OB (offensive bonus) to the final die result.
4. Subtract your foe's DB (defensive bonus) from the adjusted die total.
5. Look up the modified result on the appropriate attack table. There will be three possible results, a miss (denoted by a "-" in the table), a normal hit (denoted by a number; e.g. 8), or a critical hit (denoted by a number and a letter; e.g. 10D). For more information on making an attack and reading the attack tables, see Section 5.

PUTTING IT ALL TOGETHER

So how do you determine armor, defensive bonus, and offensive bonus? Basically this breaks down into the following simple steps:

PRIOR TO COMBAT:

- Determine the character's armor type (Section 2.1).
- Determine the character's general Defensive Bonus from stats, skills, special equipment, shield, etc. (Section 2.2).
- Determine the character's general Offensive Bonus from stats, skills, special equipment, weapons, etc. (Section 2.3).

During Combat: Apply situational modifiers, parrying modifiers, and any modifications that are the result of criticals.

2.1 ARMOR

Rolemaster armor is the basic protective capability assigned to the material covering the body, and is divided into five categories of four Armor Types (ATs) each (for a total of 20 types):

CLOTH-SKIN BASE

Normal cloth attire, robes, and normal animal hides.

Skin (AT 1): Normal clothing, assumed if other covering is not specified.

Robes (AT 2): Full-length robes normally worn by spell users and certain other combatants; e.g. a spell user might wear robes that are their spell bonus item (see *SL*).

Light Hide (AT 3): The natural hide of certain classes of animals, both normal and unusual (e.g. Deer, Dog, Wolf). ‡

Heavy Hide (AT 4): The natural hide of certain classes of animals, both normal and unusual (e.g. Buffalo, Elephant, Bear). ‡

SOFT LEATHER BASE

The heavy outer garments normally worn as weather protection by certain civilians and as combat protection by some militia and irregulars. Thick leather garments, heavy furs, thick layers of woolen clothing, and the quilted cloth padding worn under some chain or plate armors are examples of this AT.

Leather Jerkin (AT 5): A leather vest-like covering without arms and reaching only to the waist or mid-thigh.

Leather Coat (AT 6): A leather coat covering the arms and to mid-thigh.

Reinforced Leather Coat (AT 7): A leather coat covering the arms and to mid-thigh, but with either rigid-leather sections or metal sections sewn in for reinforcement.

Reinforced Full-Length Leather Coat (AT 8): A reinforced leather coat (as above) that covers to the lower leg.

RIGID LEATHER BASE

Rigid leather armor and the rigid hide covering of creatures like certain reptiles and of fantastic creatures such as Dragons.

Leather Breastplate (AT 9): A rigid breastplate covering the torso to mid-thigh and part of the upper arms.

Leather Breastplate and Greaves (AT 10): As above, but with leather greaves covering the forearms and lower legs.

Half-Hide Plate (AT 11): Rigid leather armor that covers the body completely, and the hide of certain creatures that contain at least a few rigid plates (e.g. Rhinoceros, Alligator). ‡

Full-Hide Plate (AT 12): As half-hide plate above, except that the rigid leather or plates are harder and/or more plentiful (e.g. Turtles, certain Dragons, Giant Crabs). ‡

CHAIN MAIL BASE

Metal chain link armor, metal scale armor, and the hides of certain fantastic creatures.

Chain Shirt (AT 13): A chain mail shirt covering the torso to mid-thigh and half of the upper arms.

Chain Shirt and Greaves (AT 14): As above, but with greaves on the forearms and lower legs.

Full Chain (AT 15): Chain mail covering most of the body and legs in the form of a shirt and leggings.

Chain Hauberk (AT 16): A full-length chain mail coat split from the waist in the front and back to facilitate movement. Certain Dragons may be of this armor type.

PLATE BASE

Rigid metal armor made up of plates and the heaviest animal hides.

Metal Breastplate (AT 17): A metal breastplate plus smaller plates covering the torso to mid-thigh and part of the upper arms.

Metal Breastplate and Greaves (AT 18): As above, but with greaves on the forearms and lower legs.

Half Plate (AT 19): Rigid plate armor covering the body, but with chain mail between the plates, at the joints, and covering the legs.

Full Plate (AT 20): Rigid plate armor as half plate above, but with plates overlapping at joints, and plate armor covering the legs.

‡ – Armor types 3, 4, 11, and 12 are animal armors, natural body coverings with no normal armor equivalents. One cannot achieve such an AT without acquiring some enchanted and specially designed armor (e.g. magic, fell beast skin).

Armor Penalties: Due to its weight and constrictive nature, there are penalties associated with wearing armor while attempting to maneuver, defend, and throw/fire missiles. These penalties are detailed in the Armor Table (02-01).

2.2 DEFENSIVE BONUS

The sum of all bonuses and penalties that affect the defender's susceptibility to being hit and damaged in combat is called the *Defensive Bonus* (DB). This number is subtracted from the attacker's combat roll. The defender's DB is composed of bonuses for superior/inferior armor, quickness, position and cover, and special items. A defender may also parry (i.e. dodge, block and deflect.) incoming attacks by forgoing a portion of their own attack ability. The Defensive Modification Chart summarizes the factors that affect a defender's DB.

02-02 DEFENSIVE MODIFICATIONS TABLE	
Effect	Category and Notes
+ (variable)	Armor quality bonus, Adrenal Defense bonus, (Quickness stat bonus - armor Qu penalty), spell bonuses, special item bonuses. These factors are usually fixed for a given character. (See Section 2.1)
+ (variable)	Shield bonus (see the Shield-Parry Table 02-04).
+ (variable)	Parrying bonus (see Section 2.2)
+20	Half "Soft" cover (see Section 2.2) *.
+40	Full "Soft" cover (see Section 2.2) *.
+50	Half "Hard" cover (see Section 2.2) *.
+100	Full "Hard" cover (see Section 2.2) *.
± (variable)	Miscellaneous (determined by Gamemaster).
Note: Modifications are cumulative unless noted otherwise. * —Only one of these modifications can be applied at any given time.	

Defensive Bonus Summary:

Defensive Bonus = Armor Quality Bonus
+ (Quickness Stat Bonus - Armor Quickness Penalty)
+ Adrenal Defense Skill Bonus
+ Position and Cover Bonuses
+ Spells or Special Item Bonuses
+ Shield Bonus
+ Parrying Bonus

Quickness Bonus: A combatant's DB is modified by their quickness stat bonus or penalty. If the defender is wearing certain

types of cumbersome armor, their quickness stat bonus may be reduced or eliminated completely (but never below zero); see the Armor Chart. A defender only has their quickness stat bonus factored into their DB if they are aware that they are in a combat situation and are free to move.

Example: Lotus, a T'sbalic warrior, has a quickness stat score of 98, which gives a stat bonus of +20. Unencumbered by armor, Lotus is AT 1(20) (i.e. her DB is 20) when in a combat situation and free to move. Lotus now puts on a metal breastplate that reduces her quickness stat bonus by 10. Now when she is in combat, barring other modifiers, Lotus is AT 17(10).

Adrenal Defense: Adrenal Defense is a skill that adds to a defender's DB (see *ChL* Section 7.7). Normally, the combatant must be aware of their attacker, may not be carrying any heavy items or any weapons, and may not be wearing armor. If a defender is using Adrenal Defense, the full skill bonus may be used against Melee attacks, while only half of the normal skill bonus may be used against missile attacks.

Position and Cover: The GM may award a variable bonus to a defender if their position is judged to be advantageous. Penalties due to a defender's disadvantageous position are reflected in modifications to the attacker's Offensive Bonus.

Cover bonuses against missile attacks should be based upon the percentage of the defender's body protected and the ability of cover to stop incoming fire. Here are some sample missile attack cover bonuses.

02-03 POSITION & COVER	
Half "Soft" Cover	+20
Full "Soft" Cover	+40
Half "Hard" Cover	+50
Full "Hard" Cover	+100

Note: If a combatant is completely protected by cover, and is making no attacks, the GM may rule that no attack may be made against them.

Example: Muldek, wondering why he ever joined the Confused Young Lords, finds himself defending behind a low stone wall against the combined forces of Mormiresul and Arxdukanga. During combat, Muldek stands to fire his bow. The wall rises to his waist, protecting him from his foes' missile fire. The GM awards Muldek a cover bonus of 50 to his DB (maybe overly generous, but the GM knows that Muldek is going to need every bit of it).

Spells: Certain spells may increase a combatant's DB. These spells are described in *Spell Law*.

Special Items: There may be special items (usually magic items) in a GM's campaign that will impart a DB bonus to their possessors. These may range from unique magical artifacts to lucky charms. Their design/strength is subject to the GM's devising.

Armor Quality: Especially good armor in terms of material, construction, or enchantment does not change that armor's basic type, but rather adds a bonus to the wearer's DB. Conversely, shoddy armor will incur a penalty to the wearer's DB. It is

highly recommended that Superior Armor bonuses rarely exceed +10 or +15. See Section 8.3 in *ChL*.

Example: Joscelin, a rather successful Ranger, wears a Chain Shirt and Greaves (AT 14) taken from the lifeless body of a follower of the Bearer of the Root. The GM has decided that this armor is of superior construction (being made by a highly revered Dwarven smith) and so awards it a +10 quality bonus. This armor is thus AT 14(10).

Shields: Shields are represented in combat by a bonus to the wielder's Defensive Bonus. In addition, when fighting with one or two weapons, one weapon may be used as a "shield," but may not be used for an attack in the same round. A shield bonus may only be used against one opponent's attack(s) per round.

These bonuses and other factors concerning shields and parrying are summarized in the Shield-Parry Table 02-04.

PARRYING

A combatant can increase their defensive bonus by allocating some or all of their Offensive Bonus (OB) to increase their DB. This is called parrying, although it can also be defined as fighting more defensively, or even dodging. The premise of sacrificing offensive capabilities in order to increase

02-04 SHIELD-PARRY TABLE

Shield Type	Bonus Versus Melee	Bonus Versus Missile	Weight In Pounds	Parry Limitations
Wall Shield	30	40	45-50	None
Full Shield	25	25	25-30	None
Normal Shield	20	20	15-20	None
Target Shield	20	10	5-10	None
Maine Gauche	15*	0	1-3	Cannot parry missile attacks.
One-Handed Arms	5*	0	—	Cannot parry missile attacks.
Two-Handed Arms	5*	0	—	Cannot parry missile attacks. Against One-handed weapons a maximum of 50% of wielder's OB may be used to melee parry.
Pole Arms	5*	0	—	Cannot parry missile attacks. Against non-pole arms a maximum of 50% of wielder's OB may be used to melee parry.
Terrain	(variable)		—	To be determined by the referee (e.g., a stone wall could be used to "parry" a missile attack).
* - Can only be used if weapon is not used to attack or if 100% of OB is used to parry.				

one's defensive capability is a fundamental component in *Arms Law*.

Parrying Melee Attacks: A defender may parry a melee attack during combat round by declaring any or all of their OB (with the melee weapon they are using) to DB. All points of OB so switched are converted to enhance DB.

- The designation of this "OB/DB split" is done for all combatants when they declare a melee attack (See Section 3.2.) (**Exception:** The defender may cancel any action to parry if they have at least 60% activity left.)
- To parry a Melee attack, the defender must be aware that they will be subject to the attack.
- They must also have a shield, suitable terrain, or a Melee weapon to get full benefit of parry. Some weapons may only be used to parry with a certain percentage of the wielder's OB.
- A combatant may only parry the foe that they attack. (Unless Option 9: Multiple Parry is in use)
- If a combatant elects to parry with a weapon with their entire OB, they receive the "shield" bonus for their weapon. However, they must still make an attack with a +0 OB. These bonuses are listed on the Shield-Parry Table 02-04.

Parrying Missile Fire: As with melee parrying, a defender parrying a missile may reduce their OB, in whole or in part, and shift that bonus to their DB. To parry a missile attack:

- The defender must be aware that they will be subject to the attack.
- They must also have a shield (a weapon won't do) or suitable terrain with which to parry the missile.
- When parrying missile fire, the shift must be declared before the attack and is only applicable against missile attackers on one facing. (**Exception:** defender may cancel any action to missile parry if they have at least 60% activity left.)
- Parrying a missile attack requires 50% of a character's normal activity for a round.

Parrying Limitations: A combatant may use part of their OB for missile parrying, another part for melee parrying, and

another part for a melee attack; but the sum of these may not exceed their normal OB total. A summary of parrying limitations may be found in the Shield-Parry Table 02-04, detailed descriptions are listed by attack type in Section 5

The Importance of Parrying: *AL* is based upon the assumption that combatants will use the option of parrying to protect themselves. In a face-to-face battle, only berserkers, idiots, and desperate combatants always use their entire offensive bonus in attack. Such combatants usually do not last long unless they have something special going for them (e.g. incredible armor, incredible luck, super healing facilities, etc.). In most situations a combatant will and should use part of their offensive bonus to attack with and the rest to increase their defensive bonus and thus protect himself. Of course, in certain situations it is often wise for a combatant to attack with their entire offensive bonus; for example, when attacking a foe that cannot attack back, or perhaps when facing multiple opponents.

2.3 OFFENSIVE BONUS

The success of an attack will depend heavily on the weapon or weapon combination used and the offensive capabilities possessed by the attacker. The offensive factors that can affect an attack roll include: expertise, physical prowess, experience, superior/inferior weapon(s), weapon combination, special equipment, position, and status of the defender and status of the attacker. The sum of all bonuses and penalties related to the attacker is called the Offensive Bonus (OB). The Offensive Modification Chart summarizes the factors that affect a defender's DB.

Offensive Bonus Summary:

Offensive Bonus = Skill Bonus (expertise)
+ Stat Bonus + Profession/Level Bonus
+ Weapon Bonus + Special Item Bonuses
+ Position Bonuses (Offensive Modifications Chart)
± Status Bonuses/Penalties (Offensive Modifications Chart)
- Parrying Bonus - 20 if weapon used in non-dominant hand
± Range Modifications (on attack table)
- Reloading Penalty
- Armor Missile Attack Penalty (Armor Chart)

Skill Expertise: A combatant with expertise in handling a certain weapon receives a “skill bonus” for their OB. Expertise in *Rolemaster* is measured in terms of skill ranks (see *ChL* Section 7.0). The higher the number of skill ranks one possesses in a given weapon skill, the higher the resultant OB will be.

Example: A combatant with Skill Rank 13 with a mace would have a skill bonus with the mace of $56 = (10 \times 5) + (3 \times 2)$.

02-05 SKILL EXPERTISE

- +5 for each of skill ranks 1 to 10
- +2 for each of 10 skill ranks 11 to 20
- +1 for each of 10 skill ranks 21 to 30
- +1/2 for every skill rank over Skill Rank 30.

Stats/Physical Prowess: A combatant with extraordinary physical strength and/or agility may receive a “stat bonus” to their OB. For unusually weak and/or clumsy characters this bonus may actually be negative. See the Bonuses for Unusual Stats Chart below and *ChL* Section 5.0.

Example: Elor has Strength of 95, so his melee stat bonus is +15.

02-06 PHYSICAL PROWESS

Weapon Type	Applicable Stats
Melee	Agility/Strength/Strength
Bows, Slings	Agility/Agility/Strength
Thrown	Agility/Strength

Profession/Level Bonus: Certain character professions get a bonus to their OB based on their level of experience. See the descriptions of character professions to determine if a given combatant is entitled to such a bonus to the OB (see *ChL* Section 9.0).

Example: A 23rd level Fighter would have a Level Bonus of $+63 = (20 \times 3) + (3 \times 1)$, while a 23rd level Thief would only have a Level Bonus of $+40 = (20 \times 2)$.

02-07 BONUSES FOR UNUSUAL STATS

1-100 Stat	D100 Bonus	D20 Bonus	3-18 Stat	2-12 Stat
102+	+35	+7	20+	17+
101	+30	+6	19	15-16
100	+25	+5	18	13-14
98-99	+20	+4	17	12
95-97	+15	+3	16	11
90-94	+10	+2	15	11
85-89	+5	+1	14	10
75-84	+5	+1	13	9
60-74	0	0	12	8
40-59	0	0	10-11	7
25-39	0	0	9	6
15-24	-5	-1	8	5
10-14	-5	-1	7	4
5-9	-10	-2	6	3
3-4	-15	-3	5	2
2	-20	-4	4	2
1	-25	-4	4	2

Weapon Quality: Weapons remarkable in material, construction, or workmanship may add a bonus to a combatant’s OB (or a penalty for inferior weapons). It is strongly suggested that bonuses for superior quality weapons rarely exceed +10 or +15 (see Section 8.3 in *ChL*).

To determine the weapon bonus for a non-thrown missile attack, average the firing device’s (i.e. bow or sling) bonus with missile (i.e. arrow, quarrel, or stone) bonus and round up.

Example: A +10 composite bow firing a +5 arrow would have a weapon bonus of $+8 = (10 + 5) / 2$.

02-08 LEVEL (EXPERIENCE)

Profession	Bonus per Level of Experience
Fighter	+3/level up to 20th, +1/level over 20th
Thief	+2/level up to 20th (max. of 40)
Rogue	+3/level up to 20th (max. of 60)
Warrior Monk	+2/level up to 20th (max. of 40)
Monk, Ranger, Bard	+1/level up to 20th (max. of 20)
Other Professions	no level bonus

02-09 OFFENSIVE MODIFICATIONS TABLE	
Effect	Category and Notes
+ (variable)	Skill bonus, stat bonus, level bonus, weapon quality bonus, spell bonuses, special item bonuses. These factors are usually fixed for a given character.
- (variable)	Parrying bonus.
-20	If weapon used in left hand / Off-hand.
± (variable)	Range modifications (see individual attack tables).
- (variable)	Reloading penalty.
- (variable)	Armor missile attack penalty.
+15	Flank attack.*
+25	Rear Flank attack.*
+35	Rear attack.*
+20	Surprise.
+20	Stunned foe **.
+30	Downed foe **.
+50	Helpless foe **.
-10	Wounded more than 25% (concussion hits).
-10	Wounded more than 50% (concussion hits).
-10	Wounded more than 75% (concussion hits).
-20	Drawing a weapon (also applies to movement).
-50	Changing weapons (also applies to movement).
- (variable)	Moving (normally the % of possible movement equals the penalty).
- (variable)	Attacking (the % less then 100% activity declared for the attack).
± (variable)	Miscellaneous (to be determined by the GM).
Note: Modifications are cumulative unless noted otherwise.	
* — Only one of these modifications can be applied at any given time.	
** — Only one of these modifications can be applied at any given time.	

OPTION 1: GENEROUS WEAPON BONUSES FOR MISSILE WEAPONS

Apply both weapon bonuses. GMs should handle this option carefully as it can lead to large missile OBs. For example, a +10 bow firing a +5 arrow gives a +15 bonus to the attack's OB.

OPTION 2: CONSERVATIVE WEAPON BONUSES FOR MISSILE WEAPONS

The weapon quality bonus for a bow and arrow attack is the smaller of the bow bonus and the arrow bonus. For example, a +10 bow firing a +5 arrow only gives a +5 bonus to the attack's OB.

Spells: Certain spells may increase a combatant's OB. Such spells are described in *Spell Law*.

Special Items: There may be special items (usually magic items) in a GM's campaign that will impart an OB modification to their possessors. These may range from unique magical artifacts to lucky charms. Their design/strength is subject to the GM's devising.

Position & Facing: At the GM's discretion, a bonus or penalty may adjust a combatant's OB if their position is determined to be somehow superior or inferior to their opponent's. See the Offensive Modifications Table (02-09).

The facings in combat are based on hexes, so the six facings of a combatant represent 60-degree arcs. The rules on bonuses relating to position assume human-like forms, with human limitations for range of perception or movement. (A creature with dozens

of eyes on mobile stalks and 12 tentacles evenly spaced around its torso might consider all facings as "front")

The six facings, going clockwise from front are:

- Front
- Right Flank
- Right Rear Flank
- Rear
- Left Rear Flank
- Left Flank

Status: A summary of the various status modifiers to OB is listed in the Offensive Modifications Table 02-09. This includes

injuries, movement, activity, changing weapons and other factors.

Parrying: As discussed in Section 2.2, a combatant's OB is lowered for a specific attack by the amount they used to parry.

Left Hand/Off-Hand Use: A weapon used in the left hand/off-hand receives a special -20 OB modification.

Range: There is a modification to the firer's OB based upon the distance from the attacker to the target. These modifications range from +30 to -75 and are provided on the individual Weapon Attack Tables.

The missile ranges given on each of the attack tables are the maximum ranges for which each of the given OB modifications applies. For example on the Composite Bow Attack Table, attacks made at a range of 0'-10' are modified by +25, attacks at a range of 11'-100' receive no modification, attacks at 101'-200' are modified by -35, attacks at 201'-300' are modified by -60, and attacks over 300' are not allowed.

Armor Missile Attack Penalties: A combatant making a missile attack receives a penalty to their OB if they are wearing armor that covers their arms. This includes armor types 6, 7, 8, 10, 11, 12, 14, 15, 16, 18, 19, and 20. The specific penalties are summarized on the Armor Table 02-01.

Note: *Unless stated otherwise, bonuses are cumulative. For example, a surprise rear attack on a stunned foe would get a total bonus of +75: +20 for surprise, +35 for rear attack and +20 for a stunned foe. A non-surprise rear attack on a stunned foe would get a total bonus of +55.*

2.4 WEAPON & ATTACK BONUSES & MODIFICATIONS

A combatant's capabilities in combat often depend upon what weapons they use. The normal weapon combinations are: a one-handed weapon, a one-handed weapon with a shield, a two-handed weapon, two one-handed weapons, or unarmed.

One-Handed Weapons: A combatant armed with a single one-handed weapon may attack once per round and parry normally (see Section 2.2).

One-Handed Weapons with a Shield: A combatant armed with a one-handed weapon and a shield may attack normally once per round and parry normally (see Section 2.2). Such a combatant may use their shield bonus for DB against one foe and then use their parry bonus against the foe they attack. Alternatively, they may use both bonuses against the same foe.

OPTION 3: SHIELD BASH

When using this optional rule, a character may use their shield to attack (called a "shield bash"). This attack is treated as a Small "Bash" attack for shields with a DB bonus of +25 or less, and a medium Bash attack for shields with a DB bonus higher than +25 (Shield size bonus only, not including magical, quality, or any other bonus). If using skill development for expertise, using "One Handed Concussion" weapon costs. If this skill is used in combination with a weapon, skill with this attack must be developed separately from the weapon used in the other hand and all of the "Two One-Handed Weapon" rules apply.

Pole Arms: Normal human-sized creatures must use both hands to wield these types of weapons. Pole arms cannot be used with a shield. A combatant using a pole arm may only use 50% of their OB to parry an opponent using a weapon that is not a pole arm.

Combatants in the second line should be allowed to strike past friendly combatants (front line) if they are using pole arms. This serves to simulate the effectiveness of organized groups of fighters with pole arms. The GM should determine whether the front line combatants and second line combatants are adequately trained for this type of combat.

OPTION 4: ONE-HANDED SPEARS

Spears have been used one-handed often in history, so the GM may wish to allow spears and javelins to be useable one-handed (Still considered Pole Arm class weapons for costs.). One-handed attacks are made on the appropriate table with a -10 modifier.

Two-Handed Weapons: Normal human-sized creatures must use both hands to wield these types of weapons. Two-handed weapons cannot be used with a shield. A combatant using a two-handed weapon may only use 50% of their OB to parry an opponent using a one-handed weapon.

OPTION 5: TWO-HANDED WEAPONS IN ONE HAND

Characters cannot normally use two-handed weapons in one hand (except for bastard swords, jo's, and nunchaku). But if a character of great strength and/or size wanted to do so, a GM might allow them to develop separate skill with a Two-handed weapon used in one hand and then apply a special penalty of between -20 and -50 depending upon the weapon. (GMs should apply this penalty to maximum possible results on the chart too, so a -30 would mean the weapon could at most inflict a 120 result on the attack chart.)

Two One-Handed Weapons: A combatant may use a one-handed weapon in each of their hands. They are assumed to be right-handed (the same rules apply in reverse for left-handed combatants). When a combatant develops skill with (i.e. trains with) a weapon, they must develop the skill with their right hand and skill with the left hand separately (see ChL Section 7.0).

- Any weapon used in the left hand automatically gets a -20 modification to the combatant's OB with that weapon.
- The combatant may attack with both weapons in the same round, or they may attack with only one and use the other for its "shield" bonus versus melee (see Table 02-04). (In which case use the "One-Handed Weapons with a Shield" rules above)
- A combatant must direct both their attacks (and parry) against the same target.
- If a combatant uses part of their offensive bonus for parrying, they must decrease **both** their weapon OBs by that amount.
- Parry DB from the two weapons does not stack. (So if the combatant devotes 30 OB to parry, they get +30 DB, not +60).

Thrown Weapons: The GM should use their judgment based on the weapon. (Most are one-handed, but it is possible to throw a two-handed weapon). This matters because it determines if the combatant is able to hold another item – like a shield, a melee weapon, or another thrown weapon – in their other hand.

If a stationary combatant is trained with a one-handed throwing weapon, they may throw that weapon using 50% of their normal OB and still melee in the same round with a -50 modification to their melee OB (or throw a second one handed melee weapon from their off hand.). Such a combatant may only use a one-handed weapon or a shield on the round that they throw the weapon. They are assumed to be holding their other weapon in their non-throwing hand. (Remember to apply the -20 "off hand" penalty to one of the attacks).

A combatant may not parry with a weapon they intend to throw in the same round. They can cancel a declared throwing attack to melee and then use it to parry. (See Section 2.6)

Missile Weapons: Fantasy missile weapons are generally two-handed. Missile weapons are not designed to parry melee weapons, and are easily damaged if used in this way. If a combatant uses a missile weapon to parry a melee weapon, the GM should check for breakage (see ChL Section 8.6). Missile weapons can be used to parry unarmed attacks normally, though "Natural Weapons" (see below) count as melee weapons per above. Combatants not wishing to risk breakage suffer the same DB penalty as unarmed parry (OB used for parry is halved as DB).

Example: *Darjoul has just shot the mayor with his crossbow, when a guard suddenly attacks him. Not wanting to die, he parries, but not wanting to see his precious crossbow damaged, he chooses not to put it in harm's way. His full 100 OB for crossbow goes to parry, but he only gets 50 DB from it.*

UNARMED COMBAT

Engaging in combat without weapons falls under "unarmed" combat. Since attempting to stop a weapon with your body is essentially the same as being struck, unarmed

combatants have limits to how they can parry. To reflect this difficulty, any OB used to parry a weapon is cut in half. (So 50 points of unarmed OB used to parry a weapon would only grant 25 points of DB.). This does not apply against other unarmed attackers.

Certain natural attacks should be considered "Natural Weapons," both allowing both normal parrying and considered a "weapon" vs. unarmed. Any attack using an armored or inert body part that can block damage without automatic injury qualifies. A crab's pincers or a spider's web are examples of natural weapons.

If the unarmed attacker is holding an object or wearing armor that can be used to deflect weapons, then they can parry normally without penalty. The GM must decide if the object or armor is suitable. As a rule of thumb, it should either be mobile enough to put into the way of a blow, like a buckler, arm armor or a stool, or it should be large enough to hide behind, like a shield or the shell of a creature like a turtle. (The object need not be rigid, a cloak wrapped around your arm would do against a light weapon.)

A combatant may "parry" with suitable terrain features (e.g. dodge around a tree, duck under a large branch, or step behind a door). The GM is the final judge as to the appropriateness of such "terrain parrying" situations.

NATURAL ATTACKS

The attack charts in the "Claw Law" section of this book cover natural attacks. The size and type of the attack is given as part of the creature description. The type of attack determines which table you use, and the size determines the maximum possible result. Thus, a Large Bite attack would use the "Bite" attack table, with a maximum possible result of 135.

OPTION 6: NATURAL ATTACKS AS A SKILL

GMs may wish to allow the development of natural attacks for PCs or NPCs. These skills would typically be found among more primitive cultures. Use Martial Arts or Weapon Class 1 for the DP cost of these skills, whichever is lower for the character's profession. Each individual attack must be purchased separately, its size determined by the specifics of the attack, and the character's race and size. OB skill is gained at the same rate as weapon skill, and

the stat bonus is almost always St/St/Ag. (If the natural attack involves a ranged strike like thrown quills, spun web or poison spit, the stat bonus is St/Ag.)

Example: *Urgo the War Troll is a large creature, and a prized shock trooper in a goblin army. He has 10 ranks in large bite, 10 ranks in Large Claw, 8 ranks in Large Bash (full body ram), 6 ranks in Medium Bash (punch, kick), 4 ranks in Large Grapple (Bear hug), 5 ranks in Medium Trample (Stomp) and 8 ranks in Large Trample (Over run).*

Note: *Attacks at Large/Huge sizes are roughly equal to weapons and martial arts, and most PC races make Medium, Small or Tiny sized natural attacks. Between that and unarmed parry restrictions, these attacks will almost always be distinctly inferior.*

Note: *If either of the similar weapon options is being used, all natural attacks using the same table can be considered similar.*

MARTIAL ARTS

When trained and perfected over generations, unarmed combat becomes martial arts. The rigorous training involved in these forms teach not only raw fighting ability, but also maneuvering, discipline, and how best to exploit the weaknesses of your foe. Serious students of these arts can refine this skill and discipline to perform almost superhuman feats in combat. A major improvement over natural attacks, the martial arts charts are significantly more lethal.

These attacks are roughly broken into two categories, each with its own skill:

Martial Arts Strikes: punches, kicks, elbows, knees, head-butts, and other such striking attacks.

Martial Arts Sweeps & Throws: Sweeps, trips, throws, and other such unbalancing or throwing attacks.

OPTION 7: MARTIAL ARTS GRAPPLING

GMs may wish to make it possible for martial arts to include grappling styles similar to Greco-Roman style wrestling or Sumo, in addition to the wrestling throws, trips and takedowns possible with the Martial Arts: Sweeps and Throws, which are more like Judo. This option adds a third skill, Martial Arts: Grappling.

Costs by profession are the same as Martial Arts: Sweeps & Throws. You use the Grapple attack table, with the following maximum result limits:

- Tier 1:** Small Grapple
- Tier 2:** Medium Grapple
- Tier 3:** Large Grapple
- Tier 4:** Huge Grapple

The skill purchasing limits are the same as for the other two martial arts skills; Tier 2 ranks may not exceed Tier 1 ranks, Tier 3 ranks may not exceed Tier 2 ranks, and Tier 4 ranks may not exceed Tier 3 ranks.

UNUSUAL WEAPONS

GM may wish to introduce weapons other than the ones listed in the weapon tables in Section 5. Creating a new weapon table involves balancing the weapon's attack power versus the defensive properties of armor. Since generating a new weapon table is tricky, it is easier to use one of the existing attack tables, and apply appropriate modifications. For example, a kitchen knife might be a Dagger -25 (Roll on the Dagger attack chart, and apply a -25 to the result). A few examples of unusual weapons are listed on the chart below.

The weapons given in the historical section of the Weapon Statistics Chart are historical weapons that have actually been made and used in our world. The statistics given are suggested values for their use with AL. They indicate which *Arms Law* attack tables to use and what modifications to make. These weapons are intended to be examples of how to use the AL system to simulate any weapon.

The weapons in the fantasy section of the Weapon Statistics Chart are fantasy (made up) weapons. They are very powerful and depend on special design and material. They are included to illustrate how you can make up your own weapons using this system.

The GM should be careful when allowing/introducing unusual weapons – a lot of care was taken in generating the attack tables in this book – so it is easy to create overpowered weapons through the application of modifications to existing tables.

Sometimes, a weapon is so unusual that none of the weapon charts seem to fit. In these instances, the GM may need to mix and match armed and unarmed combat charts, and/or generate a completely new mechanic to make the weapon work.

Example 1: A Player wants his Common Man character to develop ranks in throwing rocks.

The GM decides that the character could develop ranks of OB with "thrown rock" (as a thrown weapon). Depending on the size of the rocks, the size of the attack would vary. Common men are medium sized, so the GM decides that a rock you can throw with one hand would be a small attack, and a larger rock you need both hands to throw would be a medium attack. The GM decides these would be two separate skills for development purposes, though "similar" if either of those options is in use. He decides that the sling ranges work for a one handed rock, and the war hammer thrown ranges for a two handed rock.

Looking over the attack tables, the GM decides that thrown rocks would use the Ram/Butt/Bash chart.

Example 2: A player wants his character to develop the ability to throw sand in an opponents face during combat.

The GM decides that the character could develop Ranks of OB with "thrown sand" (as a thrown weapon). He would use the Grapple Attack Table (Small attack maximum) with double normal shield DB and no weapon DB; and the target may parry normally if he is aware the attack is coming. The range would be limited, 0'-2' (0), 3'-4' (-25), 5-8 (-75) 9-10 (-100). A non-zero result would deliver no normal damage but it would force the target to make a Resistance Roll against a 1st level attack (see SL or ChL), modified by -1 per hit delivered and -10 for each severity of any critical (i.e. -10 for an 'A' -20 for a 'B', etc.). A failed RR would cause a "Must Parry" result. (The GM may decide that thrown salt or an even more caustic or toxic substance would be a higher level attack or cause penalties to the target's RR.)

Completely new weapon mechanics like the two examples above are totally untested for game balance, and should be tested in mock RPG combat before introducing them. (Players tend to get surly if you give them something, and then are forced to take it away or modify it after it's been used in actual play.)

IMPROVISED WEAPONS

Combatants can pick up nearby objects and use them as weapons. The GM should decide if any of the skills the character has are appropriate to wielding the improvised weapon. Taking into account the shape, weight, size and characteristics of the actual weapon the skill applies to, the GM should then impose a penalty. For example, a length of firewood might be a -10 club attack, or a -25 mace attack, or a -50 broadsword attack. These penalties also apply to the maximum

possible result on the attack table, so that using a piece of firewood as broadsword give a maximum possible result of 100 (150-50) on the table. Modify the critical inflicted by the attack appropriately. For example, with the length of firewood using Broadsword attack table at -50, the Slash and Puncture criticals should be changed to Krush and Unbalancing criticals. An object used like this can be broken or damaged more easily than an actual weapon; the GM should keep this in mind. (See *ChL* Section 8.6).

Weapon	Type	Wt	Len	Fum	Range Mod (in feet)					Table Used	Armor Modifications					Special
					10	25	50	100	150		20-17	16-13	12-9	8-5	4-1

3.0 THE TACTICAL COMBAT SEQUENCE

The *Rolemaster* tactical combat sequence is based on 10-second battle rounds. Normally, each combatant is allowed one attack roll per round, whether it be a spell, missile (bow or thrown fire), or melee. The character may actually make more than a single swing or shot during this time period, but with everything going on, only one such swing/shot is considered to be effective enough to cause damage. A shield, sudden movement, a weapon, fate and/or luck are presumed to have intervened and rendered the rest of the swings/shots ineffective, and the one for which the player rolls is the best of the lot.

The basic principle of this system is that each action takes a percentage of the character's activity to accomplish. Characters may normally use up to a total of 100% activity in a single round. Certain skills or spells may grant a character extra activity that can be used. Should a character use less than a full 100% activity in a given round, they are considered to be idle and/or waiting until the next round.

Some actions will require a set activity percentage, while others will have a percentage range. Characters may select which percentage from that range to use, however, using less than the full percentage means that the action receives a modifier of -1 for every point below the full, maximum percentage that the character uses.

Example: A full attack requires between 50% and 100% activity. If a character decides to make an attack using 80% of his activity, that means that they receive a modifier of -20 to their attack since they are using 20 points less than the maximum activity percentage for the action.

3.1 INITIATIVE

Initiative is the order in which actions are resolved. There are several specific places where it is used within the tactical combat sequence, and this section covers how to determine initiative for both characters, and their foes.

There are many different ways that initiative can be determined, however, the default method is **2d10 + Quickness Bonus + Modifiers**. Various modifiers to initiative can be found on the *Initiative Determination Table*.

Initiative is rolled for each round as changing conditions can alter the order in which the characters resolve their actions.

The default method for rolling initiative allows for a wide range of numbers. The GM will start at the highest number rolled, or *Initiative Point*, and work their way down to the lowest number, resolving actions in that order. If there are two or more characters or foes that act at the same initiative point, the GM should compare their Quickness Bonuses; the character, monster or npc with the highest Quickness bonus will act first, followed the character or foe with the second highest quickness bonus, and so on.

03-01 INITIATIVE DETERMINATION TABLE	
Effect	Category and Notes
+/- (variable)	Quickness Bonus
+20	Weapon ready (only on first round of combat)
+0	One-handed weapon.
-5	Two-handed weapon.
+20	Pole Arm, on 1st round of combat between 2 opponents.
-10	Pole Arm, after 1st round of combat between 2 opponents.
+5	Longer weapon when neither opponent is charging.
+15	Longer weapon when one or both opponents are charging.
-5	Two weapon combination.
-5	Shield.
-25	Surprised.
-20	Encumbered.
-25	Wounded more than 50% (concussion hits).
Note: Total all applicable modifications; the melee combatant with the highest total attacks first.	

Initiative & Monsters: The GM will also roll initiative for monsters as well. However, they will use the following table, Monster Initiative, to determine their base modifiers. Monsters are given two quickness values. The GM should the AQ rating

under a monster's Speed (MS/AQ) stat to determine which code is used to determine initiative for attacks. The AQ column is used in place of the "Quickness Bonus" initiative modifier. For initiative in movement or moving maneuvers, use the MS column to determine the bonus.

03-02 INITIATIVE & MONSTERS			
Code	Rating	(MS) DB	AQ (Init)
IN	= Inching	-25	-25
CR	= Creeping	-20	-20
VS	= Very Slow	-10	-10
SL	= Slow	+0	+0
MD	= Medium	+10	+10
MF	= Moderately Fast	+20	+20
FA	= Fast	+30	+30
VF	= Very Fast	+40	+40
BF	= Blindingly Fast	+50	+50

3.2 COMBAT RESOLUTION

Combat is divided into three specific steps. These steps are meant to provide the GM with a method of providing structure and order to the round, to make it easier to resolve the actions of the various characters.

STEP 1: DECLARE INITIAL ACTION(S)

During this step each player must declare the initial action(s) of their character and what percentage activity is devoted to that action.

1. The first thing that the player does is to state their overall intentions regarding the actions to be performed by their character during the round. The player then declares his character's first action for the round.
2. Next, the GM has to determine whether or not the initial action(s) constitute a normal action or a Simultaneous Action. If the declaration is a Simultaneous Action, then the GM must determine the activity percentage involved. Refer to Declaring Simultaneous Actions under Section 3.3 Special Situations.

3. Once initial actions have been declared, along with the activity percentage the action will require, each player must also declare any OB/DB splits for Parrying as well who the Parry will be against. At this point the GM will also declare the initial actions for any NPCs or creatures involved in the combat.

Table 03-03 shows the most common actions during melee and the percentages required by those actions. As you can see, most of the listed actions require a majority of the activity percentage that the character has available each round.

Note: *Players may only declare 1 melee attack action and/or 1 spell casting action per round. Even if a player declares a 50% activity spell or melee attack, they may still only declare one of each per round.*

Note: *For the first round of combat, combatants with ready weapons must declare their OB/DB split as*

they enter into combat. (This reflects their posture in the moments before combat started.) At all other times, OB/DB split remains the same until the player declares a new melee attack, changes weapons, is stunned, or otherwise falls out of "combat posture". (At the judgment of the GM.)

STEP 2: ROLL INITIATIVE

Once all players have declared their initial actions, and the GM has declared the actions of all NPCs and creatures, it is time to determine the order in which the characters actually perform these actions. Use the guidelines presented in Section 3.1 for determining the initiative order for the round.

STEP 3: RESOLVE ACTIONS

Once it has been determined in which order the characters will resolve their actions, it is time to actually start resolving actions. The actions are resolved in two steps; in order of the character's initiative. The GM starts with the highest initiative point total and works their way down to the lowest.

03-03 ACTIVITY PERCENTAGE TABLE

Cast Spell	75%	Moving **	Minimum 10%
Cast from Item*	75%	Static Action/Skill Use (most skills)	Minimum 100%
Concentration**	50%	Dodge**	50%-100%
Instantaneous Spell (No prep needed)	75%	Shifting a Weapon	10%
Spell Preparation (for each round)	90%	Draw Weapon	20%
Melee Attack	50%-100%	Changing Weapons	50%
Missile Attack	50%	Riding **	Minimum 15%
Multiple Attacks 1 round (i.e. TWC)	90%-100%	Mounted Combat**	100%
Disengage from Melee (move up to 10')	30%	Rapid Dismount of Riding Animal	20%
Reloading/Loading Sling	50%	Careful Dismount of Riding Animal	50%
Reloading/Loading Short Bow	60%	Mount a Riding Animal	50%
Reloading/Loading Composite Bow	70%	Taking a Prepared Herb	20%
Reloading/Loading Long Bow	80%	Drinking a Potion	40%
Reloading/Loading Light Crossbow	170%	Applying First Aid (per pt. of bleeding)	100%
Reloading/Loading Heavy Crossbow	230%	Apply Prepared Herb	100%
Quick Perception/Orientation Roll (-20)	10%	Recover Item from Belt Pouch	20%
Full Perception Roll	30%	Pick Item up from the Ground	30%
Relaxed Swim	50%	Drop Held Item	0%
Hard Swim	90%	Hiding	20%
Standing up from Seated Position	10%	Stalking	Minimum 50%
Standing up from "on knees/crouch"	20%	Climbing	60%-100%
Moving up from prone to knees/crouch	30%	Rapid Drop to Ground	10%
Standing up from prone	50%	Careful Drop to Ground	20%
Other Actions (GM Discretion)**	10%-100%	Simultaneous Actions (GM Discretion)**	20%-100%

* Spells from items take same amount of prep and casting time as equivalent spell.

** Refer to Section 3.3 Special Situations for more information.

Example: John, Mark, and Andy are playing fighters, and they have encountered a band of 3 Orcs while exploring an abandoned underground complex. After declaring their actions, the GM calls for initiative order. John gets a total of 14, Mark gets a 19, and Andy gets a 15. The GM rolls a 12, 15, and 9 for the Orcs. This means that Mark goes first, followed by Andy (who has a Quickness stat of 73) and then Orc #2 (who has a Quickness stat of 60), then John, followed by Orc #1 and Orc #3 goes last.

Step 3A: Resolve Short Actions: Starting at the top of the initiative order, the GM resolves the actions of characters who have declared actions that require less than 50% activity. The GM will then repeat this cycle for those players whose characters have completed their initial actions, allowing them to declare another action and resolve it, so long as the total activity percentage for the newly declared action does not have the character meet or exceed a total of 50% activity for the round. If a newly declared action causes the character's total activity for the round to be equal to or greater than 50%, then the player must wait until the Step 3B to complete their action.

Note: *Instantaneous Spells are considered Short Actions, no matter how much activity is required for them. The activity percentage required is considered to be recovery time from the sudden casting.*

Step 3B: Resolve Long Actions: The GM now begins again from the top of the initiative order, resolving the character's actions as they occur. The GM then repeats this cycle, allowing characters who have not used 100% of their activity to declare and resolve new actions, so long as those actions do not make the character exceed 100% activity for the round.

Actions such as reloading missile weapons or specific uses of skills, which take multiple rounds, are also allowed, they merely carry over from one round to the next until the percentage of activity needed is reached.

Example: Marc's character Athlon has just fired his long bow at a foe. He declares his next action to consist of reloading his bow, an 80% activity

action. This is more activity than Athlon has left in the round, so it carries over to the next round. In the next round, the 30% of the reloading action that was unable to be completed in the previous round is treated as a separate action requiring 30% activity. Once that 30% activity has been resolved, Athlon may then make another missile attack with his bow, a 50% action.

Actions such as spell casting, melee attacks and other actions that require less than 100% activity cannot be carried over from one round to the next.

Step 3C: Upkeep: The GM resolves any ongoing effects after 100% activity has been reached. This includes applying any hits per round from Bleeding or marking off rounds of stun. Refer to *Critical Damage Resolution* under Section 3.3 Special Situations for more information.

OPTION 8: SMALLER STEPS

Instead of working with 2 steps, the GM may use 4 steps of 25% activity each if they want a more granular round.

Snap actions: Up to 25%
Short actions: Up to 50%
Normal Actions: Up to 75%
Long actions: Up to 100%

3.3 SPECIAL SITUATIONS

As with all systems, there are a few special situations or conditions that merit an extra note or a more detailed explanation. This section provides it.

Canceling an Action: There may be times when a player, after declaring their action, may decide that they need to cancel their declared action and declare a different action. There are several guidelines to be followed when canceling actions.

- Actions may only be canceled only during the player's turn.
- Only actions that have not been resolved may be canceled.
- The character loses 10% of their remaining activity for canceling an action.
- The character may declare a new action, so long as they have enough percentage of activity to complete the new action.

Note: This supercedes the rules for Canceling an Action found with Character Law.

Charging: Charging is the act of moving into combat and attacking at the end of that move. As noted in Table 03-01, a Charge can impact the combatant's initiative. It can also impact the combatant's OB and DB.

- The combatant must use a Pace of at least Run to close with their foe.
- They may make turns while running, but only the distance in Final Approach is used to determine the bonus to OB.
- Final Approach is the distance between the combatant's last turn and their foe.
- The bonus to OB is equal to the number of feet of the final approach; it cannot be greater than +50.
- The charging combatant also receives a penalty to their DB equal to the OB bonus.

Example: Marc's character Athlon is in a tavern that has an extremely large common room, over 50' long, when trouble starts down near the far end. Athlon stands up and spots one of his friends caught up in the trouble, which is easy to do since the tavern is not crowded at the moment. Athlon decides that he is going to go to his friend's aid against the 4 thugs with weapons drawn that are causing his friend problems.

Marc declares that Athlon will charge the guy closest to himself. The GM tells Marc that the closest guy is about 35' feet away, easy to reach at a run with his BMR of 50'. Unfortunately, it is not a straight run from Athlon's position to the position of his target. He has to go around several tables first, but after that, he has a straight run of about 20' to his target.

Athlon begins his run. He runs 15' to get around the tables, and then the 20' (the Final Approach) directly at his foe. Athlon gains a bonus of +20 for to his OB for only that last 20' since there were no turns made during that portion of the run. He also receives modifier of -20 to his DB for the Charge as well.

Combat Perception: As a general rule, a combatant is going to be aware of everything going on within a 10' radius hemisphere that is directly to their sides and in front of them (i.e. they are not automatically aware of what is to their rear flanks or rear). The two Perception actions listed in Table 03-03 specifically to allow the character to discover more than what is going on directly around them.

Concentration: In most instances, Concentration will refer to concentrating on maintaining a spell, but it can occasionally refer to skill use as well. On Table 03-03, the Activity Percentage Table, Concentration is listed as requiring 50% activity. This is not quite accurate. Concentration does not actually require any actual activity, but while a combatant is Concentrating, all other actions will require double their normal activity percentages to reflect that they are using only a portion of their attention on what they are attempting to accomplish.

Critical Damage Resolution: When an attack or a spell is resolved it may cause the target damage of some type. For specific information on the meanings of the types of damage involved, refer to Section 5.4. The following list related to how and when damage is resolved.

- **Hits** - Hits are applied to the character who received the damage immediately.
- **Penalties** - Penalties are also applied immediately, and they will affect any relevant maneuvers or actions that the target may already have in progress.
- **Bleeding** - Any criticals that call for a number of hits per round or other specific instances of bleeding take place in *Step 3C: Upkeep*.
- **Stuns** - If the target receives the stun before they have accomplished 50% of the activity for the round, then they are considered stunned for the rest of the round, losing whatever activity they had been attempting to accomplish and the current round counts as one stun round. If the stun occurs after 50% activity has been expended, then the character is able to finish his action with a -25 modifier and this round does NOT count as one of their rounds of stun.

All other sorts of damage or specific conditions that last for one or more rounds will be marked off or applied during Upkeep as needed.

Disengage from Melee: Sometimes a character will want to remove themselves from combat. This action will allow them to do so safely. It is basically a small feint intended to distract the foe and to allow the character to safely move away. This action cannot be used in the same round that a character makes an attack. Moving away from a foe without using this action allows the foe to make an attack on the foe normally, if they have an appropriate amount of activity percentage remaining.

Dodging: Parrying includes small blocks, dodges, and other movements designed avoid being hit. Parrying also requires that the character be wielding a weapon.

However, there are likely to be times when a character does not have a weapon or cannot use their weapon for, or they just want to avoid combat. In these

instances, a character can attempt to Dodge an attack. This is a dedicated attempt to avoid being hit by getting out of the way of the incoming attack.

To Dodge, the player must roll and add the average of their character's Agility and Quickness bonuses, or the character's Acrobatics skill. This roll is made on the Extremely Hard column of the Movement & Maneuver Table, and any numeric results are applied to the character's DB. If the result falls on the low end of the column, then the character has fumbled their attempt to Dodge and the results are applied. If the result falls on the high end of the table, then the character receives the highest numeric result on that chart column to their DB and the prose result is also applied accordingly.

A Dodge is considered 100% activity, if this exceeds the character's activity for the current round, then the action carries over into the next round. So a character who dodges with 40% activity left begins the next round spending the first 60% activity of the next round still dodging—and still getting the DB bonus, if any. Canceling any action to dodge is therefore 110% activity in total.

In either case, the bonus to DB from the Dodge roll applies equally against all foes.

Haste & Speed: These effects give combatants 200% activity. They perform actions up to 99% as short actions, and complete activity to 200% in long actions. (This will allow melee and fire attacks during short actions.)

Melee Range: A melee combatant move and in a 5' radius. A weapon extends this range. Combatants still need to be able to see their opponents, so melee range is usually a semi-circle extending out to the front, and front flanks, unless the combatant can extend their perception beyond that 180 degree arc. A combatant can declare a melee attack on anyone within their melee range without expending movement to "close to melee range". (Thus, two combatants might be 8' apart and still able to attack each other.)

Melee Range = 5'+Weapon Length
(From the Weapon Charts.)

MOUNTED COMBAT

Controlling a mount in combat requires attention (and therefore activity) unless the

mount is not moving. For combatants on stationary mounts, just apply common sense to limit actions. (No cartwheels for instance.) If a Combatant is on a moving mount, they must devote a certain amount of activity to controlling their mount. This activity is equal to 100% - riding skill (minimum 0%). This activity is deducted from the total available before any actions are declared, and is not considered an action. Thus, a rider will need at least a riding bonus of 50 before they can make attacks from their mount, and a rider with a bonus of 100 will be able to act and attack as naturally from the saddle as on foot.

The mount and rider should be considered separate combatants. The mount can move 100% without affecting the rider's activity (beyond the control issue described above). Mounts capable of attacks are restricted to the same activity limits as any other combatant. So a warhorse could move 50% and make a kick attack for 50% (at -50). (Remember that wounds and other penalties may reduce riding bonus, this being one benefit of having a riding bonus higher than +100)

The Riding skill bonus is described in *ChL* Section 7.5. The first chart presented in this section includes some suggested special bonuses based upon the mount. The second chart gives suggested bonuses if you are not using *Character Law*.

Mount Quality Riding Bonuses

(Numbers are cumulative.)

Wild horse	-20
Farm horse	-10
Riding horse	+5
War horse	+20
Intelligent horse	+10

The chart below gives some rider percentages for those not using *ChL*.

Untrained rider	-30 and 0% of bonus
Novice rider	10% of bonus
Trained rider	50% of bonus
Expert rider	80% of bonus
Master rider	100% of bonus

Certain weapons are at maximum effectiveness only when used mounted on a moving animal. The mounted lance falls into this category. As a result, the spear table should be used if a lance is used on foot or on an animal that is not moving faster than a walk. A full gallop (Sprint or faster) should give a special +20 modification to the OB for an attack by a mounted lance.

MOVEMENT GUIDELINES

There are some special considerations to keep in mind when adjudicating Moving maneuvers. In general, a character is practically limited to moving at no greater Pace than a Run while moving and fighting. This is because of the sheer difficulty of performing other actions while moving. It is recommended that movement not be allowed exceed the Pace of Run while attempting to perform other actions. (Such as melee attacks).

Some actions are better performed with a running start, such a jumping, leaping, or certain acrobatic/tumbling maneuvers. For these skills it is recommended that movement Paces of up to Dash be allowed.

A character is required to spend 10% activity for each 10% of their BMR rate (times their Pace Multiplier) that they move.

Unlike other actions, it is possible for Movement to be interrupted before it is completed. This interruption could be either voluntary or not depending upon the circumstances. If movement is interrupted, the combatant will have expended a percentage of activity equal to the movement completed. The character also expends an additional 10% activity to reorient themselves from the canceled movement. They may then declare and take action normally from that point forward.

Example: Joe's character Grog has a BMR of 50'. Grog's friend, Geoff is 45' away, down a tunnel, fighting an Orc. Joe tells the GM that Grog will Run the 45', and when he arrives he wants to make an attack against the Orc with his remain 55% activity. What Grog doesn't know is that another Orc has come up a side tunnel between Grog and Geoff and has declared a Waiting Action of making a 90% activity grappling attack against any non-Orc who passes by in the main tunnel. Grog begins his first action, the 45% move (45' is 45% of 50' x 2 (Run Pace)). As he reaches the side tunnel, 25' down from his original position, the hidden Orc attacks him. Since the Orc has interrupted his movement, Grog's movement ends at 25% activity since that would be the amount of activity required to Run that distance. Grog also loses another 10% activity because of his canceled

action. This leaves him with 65% activity left to use fighting the Orc who has grappled him.

Orientation Roll: Sometimes characters will perform actions in which their situation or location suddenly changes, such as with a Long Door spell or an Acrobatics or Tumbling maneuver. In such cases, the character is required to make an Orientation Roll to get their bearings prior to being allowed to act. An Orientation Roll is a Quick Perception maneuver. Should the character fail the Quick Perception maneuver, they can expend another 10% activity and be fully oriented without having to roll a second time.

Parrying: When a character declares a melee attack, they must also declare how much of their OB will be applied to their DB. *Arms Law* assumes that most combatants will be shifting at least some of their OB to their DB.

Calculating a character's OB/DB split is done **after** the modifiers for activity percentage and character condition have been applied. Situational Modifiers, such as for foe's position, are applied after the OB/DB split has been made. The DB

modifier from Parrying applies only to one foe, which is designated at the time that the Parry is declared.

In all cases, the bonus to DB from the Parrying applies for the entire round, until the next Declaration Phase. The character may be the last one to go in initiative order, but their bonus to DB from Parry still applies against all attacks from the designated foe.

OPTION 9: MULTIPLE PARRY

Normally a foe may Parry all attacks from a single foe that they are aware of. Using this option, they may parry multiple foes that they are aware of. To use this option, the character must expend 10% of their activity to engage and parry each foe beyond the first. The character is required to have enough activity remaining to perform the full parry (i.e. a minimum of 50% activity). They are also limited to parrying only those foes of which they are aware, thus foes that are to the rear or rear flank normally cannot be parried unless they have some form of extra normal perception.

SIMULTANEOUS ACTIONS

There are times when players will want to attempt to perform more than one action

at a time. Usually, this is a combination of wanting to perform an action while moving, though other combinations of actions are possible as well. Simultaneous Actions often combine two or more normal actions; most often actions that do not normally require a maneuver roll to perform; actions such as moving across the room or picking up an item off the floor.

Simultaneous Actions often require maneuver rolls to succeed. They are often comprised of multiple single actions that can be performed at the same time, or nearly the same time. When creating declarations for simultaneous actions, the GM should keep in mind the Activity Percentage system and only combine those actions that need to be combined. Players may then declare additional Simultaneous Actions during the rest of the round if enough activity percentage remains.

As mentioned above, actions require a specific percentage of a character's activity to accomplish. All actions are required to take a minimum of 10% of a character's activity.

As stated above, simultaneous actions normally consist of multiple normal actions. The GM needs to look at the various actions that the player wants their character to accomplish and to see which, if any of those actions may be performed at the same time. Often this usually includes movement along with another action. The GM also need to determine the overall difficulty of the simultaneous action and whether or not

The following example shows how one GM works this out.

Example: John, Mark, and Andy are playing *Fighters*. John and Mark are in a 20' x 20' room. In the center of the room is an opening down to the next level. Andy has recently fallen through it. To one side of the opening, our intrepid heroes have begun to attach a rope to a spike driven into the floor to rescue Andy. Unfortunately, the hammering has attracted the attention of a small group of Orcs. Hearing them coming, John's character has already scrambled to the door to attempt to hold them off while Mark continues to finish attaching the rope. Mark is 10' from the door, and the coil of rope is halfway between where Mark is

attaching it to the spike and the doorway. The GM has determined that is now time to begin using the Tactical Combat Sequence, and he calls for the actions of the players. John and Andy have already declared their actions.

Mark: "I want to run to the door, kicking the rope into the hole for Andy along the way, and drawing my sword at the same time and then melee attack the Orcs with whatever percentage I have left."

The GM's thought process: "Well, drawing your sword is 20%, and running to the door (10' away - and presuming Mark has BMR of 50') is a 20% action. Since neither interferes with the other (i.e. feet and hands), I will let him do both at the same time as a 25% action and not require a maneuver roll. Kicking the rope into the hole on his way across the room will slow him down a bit more, but not much, so we add in the base activity cost for a Simple Action of 10% to bring the total move across the room to 35% activity. However, I am going to require him to make a Light Agility Based Maneuver roll to accomplish this as kicking the rope could throw him off balance and mess up his later attack. Any results of less than 100 on the Movement & Maneuver Table will subtract from the 65% activity he have left. However, if this causes his activity percentage for the attack to drop below 50%, he will still be allowed to attack."

What the GM says: "Okay, you can run to the door, kicking the rope into the opening as a 35% action, however, you will need to make a Light Agility-based Maneuver Roll. You can then make your attack at 65% activity, giving you a -35 modifier to your OB. If your total result from the table is less than 100, then the difference between 100 and your result is the extra activity required by the maneu-

ver because of slight stumbling. Now, if this extra activity on the first maneuver causes the amount of activity for the attack to drop below the minimum of 50%, I will still allow you to attack at the lower OB.

As we can see from the example, the GM determined that drawing a sword and moving at the same time could be done at the same time, and only slows each other down slightly without requiring a maneuver roll. Kicking the rope into the opening as he is moving is what requires the maneuver roll, according to the GM's reasoning. Moving and performing an action with his feet could upset his balance, thus the need for the maneuver roll. At least the GM thinks it is only a Light Maneuver.

Situational Modifiers: Sometimes situations can interrupt the normal flow of activity. If one combatant is holding a sword to the neck of another, and declares they will cut their head off if they move, or any of their friends get closer, then they should get significant bonuses to their initiative and OB. It's entirely possible that the hostage taker in this for instance will move first regardless of activity levels or initiative. So even though a "Melee attack" is 50+% activity, it may end up resolving first in the round. These sorts of situations are too varied to be described or codified in rules, so the GM will have to use their judgment. (Bonuses or penalties larger than +/-100 imply situations beyond normal

ability, so the GM should generally keep special bonuses within that range unless they have good reason to exceed them.)

SURPRISE

When two or more groups meet up with one another and one or neither is explicitly aware of the other, both groups are required to make a single perception roll, using the character with the highest skill bonus. The results are determined as follows:

- Groups A & B both succeed: Neither group surprised.
- Group A succeeds, Group B doesn't: Group A surprises Group B.
- Group B succeeds, Group A doesn't: Group B surprises Group A.
- Groups A & B both fail Perception roll: Both groups are surprised.

The rule above applies to two groups stumbling onto each other. If one group is aware of the other more than a round before combat starts, they can set up to ambush the other group. Depending on the success of the surprise attack, they may just get surprise bonuses to initiative and OB, or an entire free round of activity and attacks before the surprised group can respond. (This is up to the judgment of the GM, based on how much time the attacking group has to set up the ambush, how good their plan is, and how badly the surprised group failed their perception.)

If both groups are surprised and stumble into combat, then everyone gets surprise penalties and bonuses applied to their initiatives and OB.

OPTION 10: RESETTING INITIATIVE

To do this, the character uses 80% of their activity in one round order not have to roll for initiative the next round. Instead of rolling for their initiative, the character would automatically receive an initiative equal to **20 + Quickness Bonus + all appropriate modifiers**. This action must be the last action that the character performs for the round.

OPTION 11: SINGLE INITIATIVE COMBAT

With this option, players only roll for initiative for their character once a combat. All other rounds skip the rolling of initiative in Phase 2. However, items from the *Initiative Determination Table* may still alter the character's initiative as the combat progresses.

ACTIVITY PERCENTAGES FOR OTHER OPTIONS

The following table shows some activity percentages associated with some of the options available within the other rulebooks for *Rolemaster Classic*.

03-04 OPTIONAL ACTIVITY PERCENTAGE TABLE

Faster Instantaneous Spells	50%
Fast Instantaneous Spells	10%
Faster Item Casting (no prep rounds)	75%
Fast Item Casting (Instantaneous Spells only)	10%
Making 2 attacks at -50 Option	100%

3.4 COMBAT EXAMPLE

Example: Our three heroes, Gauth the Fighter, Athlon the Rogue, and Aurin the Magician, exit a small canyon into a mountain pass, only to find themselves confronted by two Lesser Orcs, led by a Greater Orc, blocking their path. Two Goblins with short bows crouch on a ledge 30' above and to the left of the Orc position. The Greater Orc bellows and points, and Combat time starts.

Declare Initial Actions Step:

Aurin: I'll cast Sleep VII on those goblins, then wait.

Athlon: I'll fire on lesser Orc 1, then reload.

Gauth: I advance on the orcs 50% activity and attack 50%. (90/20 OB/DB)

Greater Orc: Throws a spear at the one with the bow (Athlon)

Goblin 1: Fires on the one with the bow (Athlon)

Goblin 1: Fires on the one with the bow (Athlon)

Lesser Orc 1: advance 30% and attack Gauth. (30/10 OB/DB)

Lesser Orc 2: advance 30% and attack Gauth. (30/10 OB/DB)

The GM combines Gauth and the Lesser Orc's actions into 100% "move up and attack" actions. Gauth chooses to run, but not charge, not wanting the DB penalties.

Determine Initiative Step:

Order is Aurin, Greater Orc, Athlon, Gauth, Lesser Orc 1, Lesser Orc 2, Goblin 1, Goblin 2.

Resolve Short Actions (Step 3A)

Everyone's actions exceed 49% activity.

Resolve Long Actions (Step 3B):

Aurin rolls a 55 on his Base Attack Roll, +10 because he is level 10; the range is 50' so there is no modifier. Total BAR of 65, so the Leather clad Goblins will have a -10 to their Resistance rolls. Consulting the Resistance Roll chart, the Goblins need an 80 to resist. Neither gets any stat/race bonus. Goblin 1 rolls a 07 (-10 for Aurin's BAR) for a total of -3 and fails.

Goblin 2 rolls an 87 (-10) for a total of 77, and just barely fails. Both slump unconscious. The GM decides that Goblin 1 tumbles right off the ledge they were crouched on, while Goblin 2 slumps on the ledge, asleep.

Goblin 1 falls 30', taking a Medium Fall/Crush attack. GM rolls a 95, which results in a 16 B Krush. The GM then rolls an 82 on the B Krush chart. Goblin 1 lands on his side on the rocks, breaking ribs, taking another +12 hits, and is Stunned and Unable to Parry for 2 rounds, and at -25 due to pain.

Goblin 1 has taken 28 hits of his total of 40, so he is also at -20 for having taken more than half of his hits. Stunned no Parry means -75 to all actions. The

modifiers come to a total of -120 to all actions. The damage does break Goblin 1 out of the Sleep spell. Goblin 1 last remembers sitting on a ledge, when his master shouted, and saw some humans coming into the pass... The next thing he remembers, he's laying on his side in a lot of pain. GM decides he needs an orientation to even figure out where he is or what's going on. The GM rolls a 36 for Goblin 1, and at -120, a result of -84 means Goblin 1 will take no actions for the remainder of the round, other than moaning.

Aurin has cast his spell, and depleted 75% of his activity, leaving him with 25%. The Greater Orc cancels his attack on Athlon, and re-directs it on Aurin. (The mod causes him to loose initiative to Athlon.)

The Greater Orc has expended 10% activity in canceling his previous action, and has 90% activity left.

Athlon's player rolls a 39 on his short bow attack. His OB is 110 and the range is 35' (+0). Lesser Orc 1 has a DB of 30. The net roll is 129 (39 + 110 - 30). Lesser Orc 1 is AT 8, so the result is a 12 C Puncture. The arrow strikes the Lesser Orc 1 in the head but since he's wearing a helm he is not killed, and instead takes 6 more hits and is Down for 2 rounds.

The Lesser Orc 1 has taken 18 hits of his 50 total, so he is at -10 to all actions for hits taken, he is "Down" and therefore at -100 to all actions. Lesser Orc 1 is at a total penalty of -110 to all actions.

Athlon has expended 50% of his activity, and has 30% left.

The Greater Orc Declares he will throw his spear (50% activity) at the nasty spell caster (Aurin), despite the extreme range.

JD

The GM rolls a 99 for the Greater Orc's thrown spear attack, since this is above 95, he rolls again, getting a 51. The Greater Orc has an OB of 60, The Range is 50' (-30), and Aurin has 30 DB. The Net attack roll is 90 (99 + 51 - 30 - 30). A 90 on the spear chart for AT 1 means Aurin takes an 11 A Puncture. The GM rolls a 67 for the A puncture. The spear glances by the side of Aurin's neck, inflicting +5 more hits, and Stunning him for 3 rounds. Aurin cannot parry next round.

Aurin has Taken 16 of his 30 hits, and is at -20 to all actions due to hits taken. He is Stunned, so he is at -50 to all actions. His total modifiers are -70.

The Greater Orc has expended 50% activity, and has 40% left.

The GM informed everyone that the rough terrain limits movement. Any movement at Running or faster pace will require a Maneuver roll. Gauth's player decided he will run anyway, closing with the Orcs with his Broadsword ready. His movement rate in armor is 50'; 100' running, he used 50% of his activity to run 50'. The GM has Gauth's player make a Hard Maneuver roll. He rolls a 94, Gauth's +20 agility modifier makes that a 104. Gauth successfully moves 70% of his 50' move, or 35'.

Lesser Orc 1 and Lesser Orc 2 decided to close also, at a walking pace. Their movement rate is 50'; they expend 30% action to move forward 15'.

Unfortunately for Lesser Orc 1, he's down before his activity came up for initiative and does nothing. Gauth and Lesser Orc 2 are in melee range of one another.

Gauth's player rolls a 41. He has 140 OB devoted to the attack, but he only used 50% activity (-50) in the attack because he had to run to reach melee. Lesser Orc 2 has 30 DB plus 10 DB parry. The net roll is 91 (41 + 90 - 50 - 30 - 10). The Lesser Orc 2 is wearing AT 8, so the result is an 11 A Krush. Gauth's player rolls a 15 and groans. Glancing blow, +3 hits and initiative next round.

Lesser Orc 2 has taken 14 hits of his 50 total, and is at -10 to all actions due to hits taken.

The GM rolls Lesser Orc 2's spear attack, and gets a 37. Lesser Orc 2 put 30 OB into the attack, but only acted with 70% activity (-30), he is also at -10 due to hits taken. Gauth's DB is 0, but he used 20 OB for parry. The net attack roll is 07 (37 + 30 - 30 - 10 - 20). Gauth is wearing AT 16, this attack is a miss.

Gauth has expended 50% activity in moving and 50% activity in the attack, and has 0% remaining.

Lesser Orc 2 has expended 30% activity in moving and 70% activity in his attack, and has 0% remaining.

Aurin, Athlon, and the Greater Orc still have activity left.

Aurin expends his remaining 25% to take cover behind a rock.

Athlon begins reloading his Short bow, a 60% activity action that will carry over into the next round.

Greater Orc, with 40% activity left picks up another spear (20% - Draw Weapon) and looks for a target by making a Quick Perception Roll (10% activity). This leaves the Greater Orc with 10% activity remaining. The GM decides that the Greater Orc is just idle for that remaining activity percentage since he cannot declare another attack until the following round.

Upkeep Phase: The GM rolls for goblin 1, getting an 80. At -120 that's a -40. Goblin 1 sits up on the rocks below the ledge, but continues to moan, confused as to how he got there.

Goblin 1 has one round of Stunned no Parry wear off, with one more remaining.

Aurin had expended more than 50% of his activity before being stunned, so none wears off this round.

Lesser Orc 1 has one round of Down wear off, with one remaining.

Goblin 2 has one round of Sleep wear off.

Goblin 1 has 100% activity that is lost as "Moaning" time.

End of Round 1.

Aurin is hurting and out of the fight, but not dying. Athlon is ready to draw another arrow, and Gauth is in melee with Lesser Orc 2.

The Greater Orc is OK, and looking to throw another spear. Goblin 1 is moaning on the ground, seriously injured, Goblin 2 is sleeping. Lesser Orc 1 is down and hurt but alive, and Lesser Orc 2 is hurt but still in the Melee with Gauth.

Things seem to be turning in favor of the PCs, but you never know.

4.0 MANEUVERING AND MOVEMENT

Complete maneuvering guidelines can be found in *ChL* Section 10.5. In this section we present guidelines for moving maneuvers and how they apply to combat.

Assigning a Degree of Difficulty: When a combatant indicates that they wish to attempt a specific maneuver, the GM should assign a degree of difficulty and any special modifications they feel apply. The degree of difficulty is chosen from those listed across the top of the Maneuver/Movement Table and listed below:

04-01 DEGREES OF DIFFICULTY
Routine
Easy
Light
Medium
Hard
Very Hard
Extremely Hard
Sheer Folly
Absurd

If the combatant decides not to proceed with the maneuver, they may cancel their action as described in Section 3.3. Otherwise, the combatant makes a maneuver roll. After the maneuver roll is modified by applicable bonuses and penalties (see Table 04-02), the net maneuver roll is cross-indexed with the degree of difficulty on the Maneuver/Movement Table to obtain the result. It is included at the very end of this product for completeness.

Note: *It is important to remember that the GM may deem certain maneuvers impossible. The player should be advised that such a maneuver is doomed to failure.*

Assigning Activity Percentage: If the maneuver is being performed in combat, the GM must assign an activity percentage to complete the maneuver; this may take the action into the next round. Some common maneuvers and actions are listed in the Tactical Section (Table 03-03) anything else must be assigned at the GMs discretion. Also Section 3.3 also includes guidelines for determining the activity percentage required for Simultaneous Actions.

Maneuver Roll: The outcome of an attempted maneuver is resolved by making a 1-100 open-ended roll (see Section 1.4 for a description of "rolls"). The result of this roll is the maneuver roll.

Maneuver Bonuses and Penalties: Maneuvers can be affected by various factors such as skills, armor and special equipment. Bonuses and penalties for these factors are outlined in Maneuver Modifications Table 04-02. The sum of these bonuses and penalties is added to the maneuver roll to determine the net maneuver roll.

04-02 MANEUVER MODIFICATIONS TABLE

Effect	Category and Notes
-35 to +35	Applicable stat bonus (usually Agility).
-10	Wounded more than 25% (concussion hits).
-10	Wounded more than 50% (concussion hits).
-10	Wounded more than 75% (concussion hits).
- (variable)	Armor, see Table (03-01) for maneuver mod.
± (variable)	Applicable skill bonus (see CL).
± (variable)	Bonuses due to spells (see SL).
± (variable)	Unusual absurdities (determined by GM).
± (variable)	Miscellaneous (determined by GM).
Note: Modifications are cumulative unless noted otherwise.	

Maneuver Results: The net maneuver roll is cross-indexed with the degree of difficulty on the Maneuver/Movement Table. The result is usually self-explanatory, but the GM can interpret a percentage result (i.e. a number) in several ways:

- In the case of an all-or-nothing maneuver (i.e. no partial success) a second dice roll must be made. If this second roll is equal to or less than the original percentage result, then the maneuver succeeds. Otherwise, the maneuver fails.
- If a maneuver can be partially successful, then the original percentage result is the degree of success.

MANEUVER PROCEDURE SUMMARY

- 1) The character states the nature of their maneuver.
- 2) The GM assigns a degree of difficulty and any special modifications to the maneuver.

- 3) The character decides whether or not to cancel the maneuver.
- 4) If they decide not to cancel the maneuver, an open-ended maneuver roll is made.
- 5) All applicable modifications are made to the maneuver roll.
- 6) The net maneuver roll is cross-indexed with the degree of difficulty on the Maneuver/Movement Table.

Example: Suppose a combatant attempts to leap 15' over a chasm 11' wide. The GM assigns the leap a degree of difficulty of "Medium." If the combatant does not cancel his maneuver, his roll will be modified by -10 for wearing a chain shirt (AT 13; see Table 02-01), by +25 for an excellent Agility, and by -10 for being wounded (over 25% of hits). He rolls a 91 for a net maneuver roll of 96 (91 -10 + 25 -10). Cross-indexing on the Maneuver/Movement Table, we get a result of "80". This means that the combatant has leaped 12' (15' x 80%) and therefore has crossed the chasm safely.

If this maneuver had been to throw a rope around a rock on the other side of the chasm and the same result had been obtained, then a second dice roll would have been required. If the second roll (unmodified) was 80 or less, then the rope throw would be successful; otherwise, it would fail.

4.1 MOVEMENT

These movement guidelines can also be found in *ChL* Section 10.5.

This section deals with tactical movement (i.e. movement on a round by round basis) and the effects of carrying encumbering loads and the results of exertion and exposure to severe elements.

Movement Rate: A character's movement rate in a given round is based upon their Base Movement Rate (Base Rate), their Pace, and possibly a maneuver roll. A character's movement rate for a given round is obtained by multiplying the character's Base Rate by their Pace (and possibly modified by the result of a maneuver roll).

Movement Rate = (Base Movement Rate) x (Pace Multiplier) x (Maneuver Roll Result / 100)

The assumptions made for this movement system are: (1) a 100 Quickness for a 6' tall Common Man will result in a "world class" sprinter; and (2) the average character (Quickness 25-74) walks at 3.43 miles per hour.

Base Movement Rate: The Base Movement Rate for an average Common Man is 50' round. This can be modified for specific characters by a number of factors: the Quickness stat bonus, any race stat bonus modification, any armor Quickness penalty, a "stride" modification, and an encumbrance penalty. Each character should be able to calculate several standard Base Movement Rates for various situations (e.g. carrying all equipment, carrying weapons and armor only, having dropped backpack, etc.).

Quickness Stat Bonus: The chart below can be used for obtaining the Base Movement Rate due to stat alone. Simply use the character's Quickness stat; the resulting figure is the number of feet the character can move at a "walking pace" in a ten second battle round (assuming they are healthy, unencumbered, and have no armor maneuver penalty).

Note: Some GM's may wish to use the average Quickness and Agility when using this chart (see ChL Option 26)

04-03 MOVEMENT RATE CHART

Quickness	Quickness Stat Bonus	Base Movement Rate
102+	+35	85'
101	+30	80'
100	+25	75'
98-99	+20	70'
95-97	+15	65'
90-94	+10	60'
75-89	+5	55'
25-74	0	50'
10-24	-5	45'
5-9	-10	40'
3-4	-15	35'
2	-20	30'
1	-25	25'

Racial Quickness stat bonus modification: This modification is based upon a character's race (see *ChL* Section 4.2 and *ChL* Table 04-01) and is added directly to a character's Quickness stat bonus and thus directly to the character's Base Movement Rate.

Armor quickness penalty: This penalty can modify the Base Movement Rate, but only to the extent of canceling the Quickness stat bonus (and racial bonus). In other words, if only the Quickness stat bonus (and racial bonus) and the armor bonus penalty (see Table 02-01) are considered, the resulting Base Movement Rate can not fall below 50'/rnd. This factor may be partially cancelled by a character's Strength bonus (see Section 2.1). The Base Movement Rate can fall below 50 because of other factors such as stride, encumbrance, etc.

04-04 STRIDE MODIFICATION CHART

Height	Modification Due to Stride
7'10" - 8'3"	+20
7'4" - 7'9"	+15
6'10" - 7'3"	+10
6'4" - 6'9"	+5
5'10" - 6'3"	0
5'4" - 5'9"	-5
4'10" - 5'3"	-10
4'4" - 4'9"	-15
3'10" - 4'3"	-20
3'4" - 3'9"	-25
2'10" - 3'3"	-30
2'4" - 2'9"	-35
1'10" - 2'3"	-40

Stride Modification: The Base Movement Rate is also modified for a character's length of stride. This factor should be used whenever racial adjustments are employed, for shorter beings (e.g. Halflings) often have large Quickness bonuses and will move disproportionately fast considering their short strides. For purposes of this rule, simply note that the stride of the average 6' person is used as the norm: every 6"

difference will result in an addition or subtraction of 5. One of the following stride modifications is added to the Base Movement Rate:

Encumbrance Penalty: A character's Base Movement Rate may be reduced due to the amount of weight they are carrying. This factor is discussed in the next section.

04-05 PACE CHART

Pace	Pace Multiplier	Normal Maneuver Difficulty	Exhaustion Point Cost/Rnd
Walk	1x	none	1 every 30 rnds
Fast Walk/Jog	1.5x	routine	1 every 6 rnds
Run	2x	easy	1 every 2 rnds
Sprint/Fast Run	3x	light	5/rnd
Fast Sprint	4x	medium	25/rnd
Dash	5x	hard	40/rnd

PACE

Each round a character must decide the Pace at which they wish to move. This Pace has three effects on actions during that round:

- Determines the movement rate (pace multiplier x Base Movement Rate)
- Determines the difficulty of any movement maneuver required
- Determines how many "exhaustion points" are expended (see below).

Encumbering loads and armor will prevent anyone from reaching certain speeds (regardless of their bonuses). A super character with racial modifiers of +25 bonuses for Quickness and Strength may move quite far walking even while burdened with armor and a heavy load. Nonetheless, they can not move at either a "Fast Sprint" or "Dash" rate (depending upon their armor). The following prohibitions apply:

04-06 PACE LIMITATIONS CHART

Penalty	Prohibited Pace
Armor Qu Penalties -10 to -15	Dash
Armor Qu Penalties -16 to -45	Dash, Fast Sprint
Armor Qu Penalties -46 plus	Dash, Fast Sprint, Sprint
Up to 2x Weight Allowance	None
From 2x up to 4x Wt. Allowance	Dash
From 4x up to 6x Wt. Allowance	Dash, Fast Sprint
6x Wt. Allowance and up	Dash, Fast Sprint, Sprint

MOVEMENT MANEUVERS

Use the Maneuver Table for movement under pressure. Where an individual or group is “under pressure” from attackers, the weather, or some other perceived threat – or time is a major factor – have them roll on the Maneuver/Movement Table. Simply determine the appropriate difficulty (from the Pace Chart, or by GM assignment); the result is the percentage of the distance they would normally move given their rate of speed. It is possible to move faster than normal due to this process.

Example: *Bandring is fleeing from the dreaded Malevolent Moose. He has a Base Movement Rate of 60' per rnd, he is running, and thus he would normally move 120' per round. Due to the pressure of the chase, however, the GM asks him to roll on the Maneuver/Movement Table. Bandring knows the terrain, so the difficulty is “Easy” (see Pace Chart). Bandring rolls an adjusted D100 and the result is ‘100’. He moves the full 120 feet. Had he rolled lower and gotten a ‘50’ result, he would move but 60’ that round. Had the chase been at night a higher difficulty category may have been applicable.*

ENCUMBRANCE

The problems associated with wearing armor and other coverings (“non-dead”

weight) are covered elsewhere (see the Maneuver/Movement Table and the Armor Table 02-01). Here we are dealing with “dead weight,” that which one carries rather than wears. The encumbrance penalties discussed here apply to the Base Movement Rate (see Section 4.2).

Basically, each character has a “weight allowance” equal to 10% of their own weight. If they are carrying dead weight less than or equal to their weight allowance, they have no encumbrance penalty. A character’s encumbrance penalty is based upon the number of increments of “weight allowance” that the dead weight consists of (see chart below). A character’s Strength stat bonus may cancel some or their entire encumbrance penalty.

The following steps should be taken to calculate encumbrance penalties:

- 1) Calculate the normal body weight for the character.
- 2) Calculate the character’s weight allowance (10% of their weight).
- 3) Determine how much “dead weight” (in pounds) the character is carrying; this is their “load.”
- 4) Divide the load by the weight allowance.
- 5) Determine the encumbrance penalty using the chart below.

Strength Stat Bonus: Once a character has determined their encumbrance penalty, their Strength stat bonus may be used to cancel all or part of this penalty (see *ChL* Section 10.5, p. 142, *Encumbrance*). If their Strength stat bonus is greater than their encumbrance penalty, the difference may be used to cancel all or part of the character’s armor Quickness penalty (see Table 02-01).

EXHAUSTION

Movement under extreme conditions, in rough terrain, and/or at accelerated rates will increase fatigue. For this reason we include rules for exhaustion at this point. We also include provisions for exhaustion due to melee and bow fire.

04-07 ENCUMBRANCE CHART		
Number of weight allowance units in load		Encumbrance Penalty
More Than	Less Than or Equal to	
0x	1x	0
1x	2x	-10
2x	3x	-20
3x	4x	-25
4x	5x	-30
5x	6x	-35
6x	7x	-40
7x	8x	-50
8x	9x	-60
9x	10x	-70
10x	11x	-80
11x	12x	-90
12x	13x	-100
13x	14x	-110
14x and up		-120

Each person has a base number of exhaustion points equal to their Constitution stat. This is the number of points they can expend before they have to rest and/or recuperate, (e.g. when fully rested a character with a Constitution of 90 would have 90 exhaustion points). Characters that have used all of their exhaustion points are at -100 to all activities and must rest. Expended exhaustion points may be recovered at a rate of one per round rested.

Exhaustion due to Pace: Each round that a character moves they expend exhaustion points at a rate determined by their Pace. This rate ranges from 1 every 30 rounds for a Walking Pace to 40 per round for a Dash Pace. These rates are listed in the Pace Chart (Table 04-05). A character without sufficient exhaustion points to complete a full round at a given pace cannot travel at that rate of speed.

Example: *An unencumbered Bandring travels 50' per round (i.e. his Base Movement Rate is 50) when walking. His Constitution is 90 and he can walk for 2700 rounds (450 minutes) without a rest but he would be totally exhausted thereafter. If he were to sprint he could move at a rate of 150' per round; but he would exhaust his 90 exhaustion points in 18 rounds (3 minutes) at that pace (5/round x 18 rounds = 90). If Bandring were moving*

in a breastplate and with a 3x weight allowance load, his Base Movement Rate would be reduced to 20' per round and he would have to "Sprint" (and exhaust himself as indicated) in order to cover 60' per round.

Exhaustion and Combat: When fighting, a character necessarily expends more energy than they would while walking. Thus, the following expenditures should apply.

Exhaustion Modifiers: The following factors may affect the way a character expends exhaustion points. They provide detail, but may be considered optional. Only one modifier of a given type should be applied (e.g. one temperature mod, one terrain mod, one time without sleep mod.).

04-08 COMBAT EXHAUSTION CHART

Character's Situation	Exhaustion Pt. Expenditure
Melee	1 every 2 rnds
Missile Fire	1 every 6 rnds
Concentration	1 every 6 rnds

SUMMARY

Example: *Bandring is a High Man (race Quickness stat bonus of +5) with a Quickness of 90 (stat bonus of +10). He is 6'7" tall so his stride modification is +5. His weight is 220*

pounds and he is carrying 27 pounds of dead weight; thus his encumbrance penalty is -10, since 27 lb. is between 1x and 2x his weight allowance of 22 lb. (10% of his weight of 220). His Strength of 85 (bonus +5) plus his race St stat bonus (+10) will cancel this encumbrance penalty, but it will not add anything to the Base Maneuver Rate. Bandring wears AT 14 with a standard Quickness Penalty of -10. This armor penalty is reduced to -5, since 5 of this penalty is canceled by his Strength bonus of +15 and because his encumbrance penalty was only -10. His armor Qu penalty can never exceed -5 because his total Qu bonus is only +5.

So his Base Movement Rate is:
 $55 = 50$ (standard movement rate) $+10$ (Qu stat bonus) -5 (race Qu stat bonus) $+5$ (stride modification) -10 (encumbrance penalty) -10 (armor penalty) $+5$ (St stat bonus) $+10$ (race St stat bonus)

04-10 BASE MOVEMENT RATE CHART

Base Movement Rate = 50 feet per round

- + Quickness stat bonus
- + race Quickness stat bonus
- + stride modification
- + encumbrance penalty
- + armor Qu penalty
- + Strength bonus (only cancels previous 2 modifiers)

MOVEMENT PROCESS SUMMARY

- 1) Determine current Base Movement Rate (see above).
- 2) Determine Pace (check restrictions).
- 3) $\text{Movement Rate / round} = (\text{Base Movement Rate}) \times (\text{Pace multiplier})$.
- 4) If pressure situation, make a maneuver roll (see above).
- 5) Expend exhaustion points (see above).

04-09 EXHAUSTION MODIFIER CHART

Factor	Modification to Exhaustion Points Expended
Temperature above 100° F	2x
Temperature above 120° F	4x
Temperature above 130° F	8x
Temperature below 20° F	2x
Temperature below -10	3x
Temperature below -30° F	5x
Temperature below -50° F	8x
Rough Terrain	2x
Mountainous Terrain	3x
Sand	3x
Bog	4x
Hits or wounds above 25%	2x
Hits or wounds above 50%	4x
More than 10 hours without sleep	2x
More than 15 hours without sleep	3x
Increase Mod. by 1 for each additional 5 hrs without sleep.	

5.0 COMBAT RESOLUTION

5

A melee swing or missile attack is resolved by cross-indexing the net attack roll with the target's armor type (AT) on the correct Attack Table. The effects of Failures and Critical Strikes are found on the correct Fumble Table or the appropriate Critical Strike Table. In each fire phase, all attacks are treated as simultaneous. For melee, first determine the order in which the combatants will swing, and then resolve each attack in sequence, implementing the results immediately.

5.1 RESOLVING ATTACKS

ATTACK DECLARATION

All combatants should declare the target(s) of their attacks, and OB/DB splits for parrying. The PCs do this for their characters, while the GM does the same for all non-player controlled combatants. This is done before the players are informed of the initiative order, as they cannot be certain of the order in which attacks will resolve.

Once all declarations are made, the GM should then begin initiative determination.

ATTACK RESOLUTION

A roll, modified by bonuses, resolves each attack. The net attack roll representing each swing/missile is the attack roll plus the Attacker's OB minus the Defender's DB. Referring to the Attack Table corresponding to the attacker's weapon or attack type, this result is cross-indexed with the Defender's armor type to arrive at the result of the swing/fire. The armor types are the numbers, 1-20 across the top and bottom of each attack table.

In certain cases where an attack is especially bad or good, another roll may be required to determine the results of a Fumble, Failure or Critical Strike.

The attack tables include 30 weapons and 13 animal, monster, and martial arts attack tables. Each one takes into account the capabilities of the weapon or attack type as well as the protective factor and mobility of the armor type.

The Attack Roll: Combatants make a swing/missile attack by rolling percentile dice (High open-ended, see Section 1.4). The result is the Attack Roll (AR) for that swing/missile.

44

Unmodified Roll Results: An Attack Roll of 01-10 may indicate an immediate effect, in which case, no modifications are applied.

- An unmodified roll of 01-02 for a natural attack or a martial arts attack indicates a "Fumble" (See "Fumbles", below). Such an attack has no effect on the defender or the attacker.
- If a weapon Attack Roll falls within the weapon's "Fumble Range," the attacker fumbles their weapon (See "Fumbles", below). These fumble ranges are printed on the appropriate weapon attack tables. Such an attack has no effect on the defender but may affect the attacker.

"96-100" Attack Roll: An Attack Roll is a "High open-ended roll", as outlined in Section 1.4, if the roll is between 96 and 100, a particularly effective attack has been made. The dice are rolled again and the result is added to the first roll. If the second roll is 96-00, then a third roll is made and added, and so on until a non 96-00 roll is made. The total sum of these rolls is the result of the open-ended roll; in this case it is the result of the Attack Roll.

Example: *An initial Attack Roll is 98, so the dice are rolled again with a result of 99, thus the dice are rolled again with a result of 04. This Attack Roll is 98 + 99 + 04, for a total of 201.*

OPTION 12: FULLY OPEN-ENDED ATTACK ROLLS

An Attack Roll is normally a "High open-ended roll". This option makes it open-ended at the low end as well as the high end. This option increases the chances for combatants with very high OBs to miss attacks without having to fumble.

As outlined in Section 1.4, if such a roll is between 01 and 05, and is not a fumble, a particularly ineffective attack has been made. (If 01-05 is within the attack's fumble range then the attack is a fumble. Ignore this section and see Non-fumble/Failure Results below instead.) The dice are rolled again and the result is subtracted from the first roll. If the second roll is 96-00, then a third roll is made and subtracted, and so on until a non 96-00 roll is made. The total sum of these rolls is the result of the open-ended roll; in this case it is the result of the Attack Roll.

Net Attack Rolls at or below the fumble range are not fumbles, just low net rolls. (You can only fumble on the initial roll).

Example: *An initial natural Attack Roll is 05, (not a 01-02 failure) so the dice are rolled again with a result of 99, thus the dice are rolled again with a result of 04. This Attack Roll is 05 - 99 - 04, for a total of -98.*

The Net Attack Roll: If the Attack Roll does not indicate a fumble or failure, the net attack roll is determined by adding the OB to the Attack Roll and subtracting the defender's DB.

FUMBLE RESULTS

If a weapon attack results in a fumble, a roll must be made and cross-indexed on the Weapon Fumble Table with the column that applies to the weapon being used. The result is immediately applied to the attacker. If the fumbled attack is a natural, animal or martial arts attack, then use the proper column of the Non-Weapon Fumble Table that applies to the given type of attack.

Note: *The Natural Attacks column is used for non-weapon, non-martial arts attacks by intelligent combatants, while the Animal Attacks column is for unintelligent combatants.*

Example: *Coma the Half-Dwarven Fighter playfully swings his battle-axe at "his friend" Trevor. His attack roll is 04 and thus falls into the fumble range for a battle-axe (i.e. 01-05 - Coma fumbles his weapon. As Trevor begins to laugh, Coma makes a roll of 83 and cross-indexes it with the "Hand Arms (2-hand)" column on the Fumble Table. Coma juggles his weapon for 3 rounds and thus may not attack; he can still parry. If Trevor can stop laughing, he can attempt to fry the juggling Half-dwarf with his magic trident. If Coma's initial roll had been a 06 or better, he would not have fumbled and he would have resolved his attack normally.*

NON-FUMBLE RESULTS

If an attack does not result in a fumble, the net attack roll is cross-indexed with the defender's armor type on the appropriate attack table. Treat net attack rolls greater than 150 as 150.

Example: *Mirage makes a net attack roll of 87 and has an OB of 100 with her composite bow. Her target has an AT of 15 and a DB of 30, so her net attack roll is 157. However, since this is greater than 150, it is treated as 150. Cross-indexing AT 15 with a net attack roll of 150, we get a result of "22EP".*

Note that each of the *Claw Law* Attack Tables has four "maximum result" thresholds. An attack's net attack roll cannot exceed the designated threshold; instead, the maximum allowed result is used as the net attack roll.

Example: *An animal makes a Medium Claw attack against AT13. The net attack roll is 132, but the threshold for Medium attacks is 120. Thus, the net attack roll used is 120, and the result is "13CP".*

A typical result from a weapon attack table will have three components, for example:

22 EP

The first component will be a number from 0 on up, which is the number of concussion hits delivered to the target. The second component is a letter describing the severity of a critical strike (no letter indicates that no critical strike was delivered). The third component is only present if the second component is present; it is a letter indicating the type of critical strike. In the example above, the target has taken 22 concussion hits and an 'E' severity, Puncture type critical. If the critical severity is given but not the critical type, the critical type is indicated on the appropriate attack table.

Note: *Krush type criticals are indicated by a 'K' result in order to distinguish them from 'C' level severity results.*

For some animal and martial arts attacks there is no third component. Instead, the critical type is the same for all results from a given attack table and is provided at the bottom of each table.

OPTION 13: WRAPPING THE ATTACK CHARTS

Attacks normally hit a maximum possible result at 150. Using this option, when the net attack roll is over 150, you subtract 150, and apply it again. Thus, a net attack roll of 212 would result in the 150 and the 62 (212-150=62) results on the attack chart. Concussion hits are added together, and if multiple criticals result, they are rolled separately.

If the net attack roll wraps the table again, repeat the process. Thus, a net attack roll of 696 would result in the 150 maximum being applied four times, plus the 96 results.

If the attack has a limit below 150, like a "Medium Claw" attack where the max threshold is 120, then the attack still wraps at intervals of 150. Thus a net attack roll of 382 for a "Medium Claw" attack would result in the 120 maximum being applied two times, plus the 82 results.

CONCUSSION HITS

A number result from an attack indicates that the defender receives that many concussion hits.

Each combatant has a limited number of concussion hits (see *ChL* Section 7.7). When the limit is exceeded, the combatant is rendered unconscious and can take no further action until they are back under the limit. Death may be caused if this limit is exceeded by a certain amount (see *ChL* Section 10.6).

Full injury, death and dying rules for *RM* can be found in *ChL* Section 10.6.

For games not using *ChL*, the point at which death occurs is proportional to the combatant's physical constitution, and depends on the system used in the game for deriving physical characteristics. The GM will have to decide on the point at which death results (e.g. 2 times the number of concussion hits causing unconsciousness could result in the victim's death, or, alternatively, the number of concussion hits causing unconsciousness added to the victim's Constitution on a 1-100 scale).

5.2 CRITICAL STRIKES

A result of a number followed by one or two letters indicates that the defender receives a number of concussion hits and a critical strike.

- The first letter (or the only letter) indicates the severity of the critical. The severity of a critical strike (or just critical) ranges from 'A' (least severe) to 'E' (most severe) with 'F' indicating multiple criticals as detailed on the individual animal attack tables.
- The second letter (if any) indicates the critical type. Criticals of this type are: Slash, Puncture, Krush, Grapple, Unbalance, and Tiny.
- If there is only one letter, the critical type is indicated on the appropriate attack table. Criticals of this type are: Martial Arts Striking, and Martial Arts Sweeps & Throws.
- When a critical is indicated, a second (1-100, not open-ended) roll is then made and the result is cross-indexed with the severity of the critical ('A', 'B', 'C', 'D', or 'E'). The critical table used corresponds to the critical type.
- Certain critical strikes have an 'F' severity, indicating two normal critical strikes should be applied to the target. A separate roll is made for each critical and all results are applied cumulatively. The type and severity of these criticals is provided at the bottom of the appropriate attack table.

CRITICALS AGAINST LARGE AND SUPER-LARGE CREATURES

Certain creatures are so large and/or powerful that the normal critical strike tables are not used when they receive critical strikes. These creatures are separated into two categories:

- Large Creatures (Horses, Trolls, Giants, powerful Demons, and Undead, etc.).
- Super-Large Creatures (Large Whales, Dragons, very powerful Demons, etc.).

Each category has its own critical strike table that is consulted if a

sufficiently severe critical strike is obtained against them. The roll for criticals against Large and Super-Large creatures is high open-ended.

Large and Super Large creatures take concussion hit damage from the attack table regardless of the critical result.

LARGE CREATURE CRITICAL STRIKES

Only critical strikes of severity 'B', 'C', 'D', or 'E' affect large creatures (i.e. 'A' severity criticals are ignored). A high open-ended roll is made and cross-indexed with the weapon type on the Large Creature Critical Strike Table. The result obtained is applied immediately.

SUPER-LARGE CREATURE CRITICAL STRIKES

Only critical strikes of severity 'D' or 'E' affect super-large creatures (i.e. 'A', 'B', and 'C' severity criticals are ignored). A high open-ended roll is made and cross-indexed with the weapon type on the Super-Large Creature Critical Strike Table. The result obtained is applied immediately.

SLAYING CRITICALS

Some Large and Super-Large creatures are especially vulnerable to certain magical weapons (e.g. a Troll is vulnerable to a weapon of "Troll-slaying"). If a critical is obtained with such a weapon against a Large or Super-Large creature, the "Slaying" column on the appropriate table is used.

If a critical strike is obtained when using a weapon of slaying for a man-sized creature (e.g. an Orc-slaying sword used against an Orc), the normal critical is resolved and then a second critical is resolved on the slaying column of the Large Creature Critical Strike Table using the same roll.

Example: *Delanie is playing Frostflower, who has a quarterstaff that is "Slaying vs. Demons". She finds herself face-to-face with a truly ugly minor demon. Her normal attack delivers 14 concussion hits and an 'A' Krush critical. Delanie rolls for Frostflower's Krush critical and gets a 90! After resolving the normal critical, she also looks up 90 on the Slaying column of the Large Creature Critical Strike Table (resulting in the death of the demon and +15 to her next swing).*

HOLY CRITICALS

Some Large and Super-Large creatures are especially vulnerable to certain magical

weapons (e.g. most demons and undead are susceptible to "Holy") If a critical is obtained with such a weapon against a Large or Super-Large creature, the "Holy" column on the appropriate table is used.

Just like with "Slaying," if you are using a "Holy" weapon against a target that is susceptible to Holy attacks, but is not large or super-large, you should resolve the attack normally. However, if the normal attack delivers a critical, the weapon will deliver an additional critical. Cross-index the roll used to resolve the normal critical on the Holy Arms column of the Large Creature Critical Strike Table using the same roll.

MAGIC AND MITHRIL CRITICALS

Magic and Mithril weapons only do extraordinary damage to Large and Super-Large creatures. Do not roll on the Large or Super-Large critical tables when using these types of weapons against normal opponents.

5.3 CRITICAL INTERPRETATIONS

Most of the critical strike results are self-explanatory. However, certain results may have to be modified due to circumstances.

Example: *A target behind a low stone wall is hit by an arrow and receives a critical calling for damage to his ankle. Instead the GM should rule that he is hit in the wrist. Note that he already receives a defensive bonus for being behind the stone wall and was hit in spite of it. If a critical strike calls for an unspecified limb to be broken, the GM should determine the limb affected, based on the circumstances, or randomly.*

OVERALL GUIDELINES

- All damage (including concussion hits), unless otherwise noted, is only applicable to the target combatant.
- Often bleeding, bruises, burns, frostbite, etc. indicated on the critical strike tables are reflected in the form of additional concussion hits. This is meant to show the gradual weakening brought about by shock, bleeding, and pain.
- Next swing/roll can refer to a missile attack, maneuver, and spell attack as well as to a melee attack.

- If a target takes a critical result that lasts for a certain number of rounds and they have performed less than 50% activity for the current round, the current round counts as one of the rounds affected by the result. Otherwise, the effects begin the round after the critical is received.

- If an item is indicated as being destroyed by a critical result, it is automatically destroyed unless it is made of an extraordinary material (e.g. Mithril) or it is incredibly magical (i.e. an Artifact). In this case, if the GM allows it, the item may make a RR as described in *ChL* or *SL* to avoid destruction.

5.4 CRITICAL & FUMBLE RESULTS

Below we provide guidelines for specific criticals/fumbles.

+# Hits—(e.g. “+5 hits”) This many hits (#) are taken in addition to the normal hit result derived from the attack table used. Normally, these hits are not increased (i.e. “multiplied”) by strength factors (e.g. certain creatures do “3x” normal damage, a Strength spell on a character lets them deliver “2x” normal damage, etc).

Hits per round—(e.g. “+3 hits per round”)

Each upkeep phase after the critical is taken, the target takes this many (#) additional hits due to pain and bleeding.

... At -#—(e.g. “Foe fights at -30”) All of the target’s bonuses (except DB and RRs) are modified by this number (#). These penalties are cumulative. Certain of these penalties apply only to specific skills (e.g. fighting, running, etc.).

Must parry # rounds—(e.g. “must parry 2 rounds”) For this number (#) of rounds, the target may not attack; they may only parry with half of their OB, and the only other actions allowed are movement and maneuvers, both modified by -25.

Stunned # rounds—(e.g. “stunned 4 rounds”) For this number (#) of rounds, the target may not attack, they may only parry with half of their Offensive Bonus (Normal DB due to Quickness, shield, etc. is not affected), and the only other actions allowed are movement and maneuvers, both modified by -50.

Stunned and unable to parry # rounds (Stunned-No Parry)—(e.g. “stunned no parry 3 rounds”) For this number (#) of

rounds, the target may not attack, they may not parry (Normal DB due to Quickness, shield, etc. is not affected), and the only other actions allowed are movement and maneuvers, both modified by -75.

Down for # rounds—(e.g. “down 2 rounds”)

The target falls to the floor, and for this number (#) of rounds, the target may not attack or parry, the only actions allowed are movements or maneuvers, both modified by -100. If the result does not specify a number of rounds, then the target is down for one round.

Out for # rounds—(e.g. “out 12 rounds”)

The target falls to the floor, unconscious. They cannot act, and they lose all parry, movement or quickness related DB. They only gain DB from items or magical effects. They are considered “Helpless” for combat purposes. (see Section 5.5).

If the critical does not specify a number of rounds, then the combatant is unconscious until someone performs a successful Very Hard First Aid maneuver on them, or casts a spell (Like “awakening,” see *SL*) on them, or the GM decides sufficient time has passed. If combat is still proceeding, the combatant will be at “Stunned No Parry” until the GM decides they recover their wits.

A combatant prematurely awakened using first aid (or magic) from an out result with an “X rounds” duration will be “Stunned No Parry” until those rounds wear off.

Knocked (back/left/right/etc) # feet -

Target is knocked in the direction indicated by the critical (random if not indicated), and ends up at the destination on their feet or down, as indicated by the critical. (If not indicated, assume they are still standing, if they are still capable.)

Effects of Bleeding: Bleed and pain damage is expressed as #/round, meaning the target loses # concussion hits per round from bleeding, pain or other forms of continuing damage.

Hits per round can normally be stopped with a compress and bandage if the patient does not move at more than a

walking pace for the next 8 hours (up to 1, 2, or 3 hits per round depending upon a maneuver roll). A tourniquet on a limb can stop 4 to 10 hits per round on a limb wound, but until the wound heals the tourniquet must be loosened once every 24 rounds and 3 hits per round taken for 5 rounds. (Full injury and healing rules can be found in *ChL* Section 10.7)

- Bleed damage is taken each round on Upkeep Phase.
- Some creatures, like certain constructs or undead, are immune to the effects of bleeding.

Effects of Must Parry: Being knocked off balance or out of position, either physically, or mentally, results in the target being unable to execute an attack. They can parry with half their OB, or perform a movement/maneuver at -25.

Note: “Must Parry” results are not *stun rounds*.

**OPTION 14: “MUST PARRY”
AS STUN**

Some GMs may wish to treat “Must Parry” results as stun rounds. If so, treat them as a weaker form of stun than “Stun” so that they take effect and wear off last. (Be aware that using this option makes creatures immune to stun more powerful.)

Effects of Stun Rounds: During play a combatant may be “stunned” for a number of rounds due to critical strikes (From least to worst, this includes four critical results; “Stunned”, “Stunned No Parry”, “Down” or “Out” rounds). All of these “stuns” due to multiple critical strikes accumulate. Normally the total number of rounds of “stuns” decreases by one each round, on upkeep phase with the most severe type of “stun” taking effect first, and wearing off first. Any stun rounds inflicted on an already stunned target add into the total. These additional rounds take effect and wear off in order of severity, not in the order in which they were inflicted. Only the worst penalty applies at any time, the penalties do not stack.

Example: *If Drog is struck for multiple criticals in one round, resulting in him being “Stunned” for 4 rounds, “Stunned No Parry” for 2 rounds, “Down” for 1 round, and “Out” for 4 rounds, he has 11 rounds of accumulated stun. Without some form of assistance, Drog*

will be "Out" for 4 rounds, then "Down" for 1 round, then "Stunned No Parry" for 2 rounds, then "Stunned" for 4 rounds, only on the 12th round will he shake off the effects and return to "Normal" status.

In the first round of being "Out" someone falls on Drog, resulting in a critical that inflicts 2 more rounds of "Stun No Parry", while one round of "Out" wears off. Drog now has 12 rounds of accumulated stun; 3 rounds "Out," 1 round "Down," 4 rounds "Stunned no Parry" and 4 rounds of "Stunned".

All stun takes effect immediately upon being inflicted. If a target takes a stun result that lasts for a certain number of rounds and they have performed less than 50% activity for the current round, the current round counts as one of the rounds affected by the result, and one round wears off during the upkeep phase of that round. If the character has already used more than 50% of his activity for the round, then he is at -25 for the remainder of the round, and the stun does not actually take effect until the following round and they begin to wear off during the Upkeep of the round after the stun result was received.

Some creatures, like certain constructs or the undead, are immune to the effects of stun, ignoring it completely.

OPTION 15: ADDITIONAL EFFECTS OF "STUN" ROUNDS

A combatant's total hit points are the number of hits they can take without becoming unconscious (see Section 5.5). A combatant will also lose consciousness if their total number of accumulated rounds of "stuns" exceeds:

$\text{B} = 5 + [\text{the combatant's total hit points} / 10]$ (round off)

If not unconscious due to some other cause, a combatant will regain consciousness when their total accumulated rounds of "stuns" become less than B above.

Example: Coma (often called the "Dwarven Punching Bag") "trips" and falls into an open pit. The fall does not hurt him, but the sudden stop on the solid rock at the bottom delivers two 'B'

severity Krush criticals. In addition, the sharpened spikes someone carelessly left imbedded in the ground deliver five 'A' severity puncture criticals. Coma is lucky, the criticals do not do any significant damage (just a bunch of hits); however, the total number of stun rounds from the seven criticals is 17. Since Coma's can take 77 hits before passing out, he passes out if his stun round total exceeds 13 ($= 5 + (77 / 10)$) rounds of stun. Thus Coma is unconscious. If nothing else happens to him, he will regain consciousness in 4 rounds ($17 - 4 = 13$).

Effects of Knock-back: Some results read "Send target flying 10 feet left/right," "Target thrown back 10", or some similar text indicating they've been pushed, tossed or moved in some direction. The GM should randomly determine direction if not indicated, and resolve any issues that may arise from a "move" in that direction. Being knocked off a drop, into a fire, onto a spear rack, into a vat of acid, etc., can result in additional damage. This involuntary move may also place you unexpectedly into melee range of a foe.

OPTION 16: KNOCK-BACK DAMAGE

Beyond being thrown into an obvious peril per above, some GMs may wish to resolve possible collisions along the way. First, determine direction, and using the distance indicated by the critical, figure out what is in the way of the target's travel.

- If the target's knock-back takes them through empty space, then they are done taking damage for the round, and end the results phase standing or down in the new location (as indicated by the critical and their health status.)
- If the target passes into the space occupied by a soft object (Pile of hay, mound of pillows, hill of loose dirt, pile of manure, etc.) their movement ends with them embedded in the object. (The GM may require an Orientation and/or a maneuver to get back on their feet.)
- If the target passes into the space occupied by a hard object (pile of

barrels, stack of crates, hill of packed earth, etc.) then they will take a Bash attack of their own size (Medium for a human) with a bonus equal to the distance indicated on the critical. For example, if the critical says "Thrown 20 feet" then the bonus to the Bash attack is +20.

- If the target passes into the space occupied by a solid or immovable object (wall, pillar, building, tree, boulder, etc.) then they will take a Fall/Crush attack of a severity and bonus equal to the distance indicated on the critical. Thus, if the critical says "Thrown 20 feet" then it resolves as a Medium (11'-50') Fall/Crush attack with a +20 bonus.
- If the target passes into the space occupied by another combatant, then they each take a bash attack equal to the other's size. Thus, if a human strikes a human, both take Medium Bash attacks, but if a human is thrown into a troll, the human takes a Large Bash attack, while the troll takes a Medium Bash attack. The bonus to the attack is equal to the distance indicated on the critical. So, if the critical says "Thrown 20 feet" then the bonus is +20 for both attacks.

5.5 ATTACKS ON HELPLESS, UNCONSCIOUS OR SLEEPING TARGETS

There is no need to make an attack on a helpless foe—simply make a maneuver roll.

The difficulty is based on the situation. For example, killing a sleeping knight wearing AT 20 with your bare hands might be an Absurd maneuver, while killing an unconscious, unarmored, tied prisoner with a dagger would be a Very Easy Maneuver. Failure only matters if the target might awaken and respond, (Like the sleeping knight), or if you fumble and injure yourself, otherwise you can just repeat the maneuver next round.

If a target has a conscious and mobile defender or is amidst an ongoing melee where you cannot casually strike them, so you must attack them as normally (with a "Helpless" bonuses etc.). They have 0 DB from quickness or parry, only gaining DB from items, cover or magic. A defender can choose to spend OB to parry to protect them.

5.6 DAMAGE TO STRUCTURES

AL does not have a fixed method for handling damage to structures. Most buildings are not susceptible to hand held weapons in the time frames possible in combat rounds. (So, if a player wants to tear down a brick building with just their war hammer, it is best to wait until non-combat time, and then just role play it out). For structures more on a human scale, it's best just to jury-rig something when you need it. For instance, we assign doors an AT of 20 (stone, metal, or metal reinforced) or AT 12 (wood) and a certain number of hits (50-1000) and have characters "attack" them normally. (More detailed rules on structural damage are covered in *Spell Law*.)

Length: 2.5 – 4 feet
Weight: 2 – 3 pounds
Fumble Range: 01 – 04 UM

Range Modifiers: 1' – 10': +25
11' – 100': +0
101' – 200': -35

ALT-06
Composite Bow
Missile

Length: 2 – 3 feet
Weight: 2 – 3.5 pounds
Fumble Range: 01 – 04 UM

Range Modifiers: 1' – 10': -15
11' – 25': -30
26' – 50': -45

ALT -10
Handaxe
One-Handed Edged

Length: 1.5 – 2 feet
Weight: 2 – 3 pounds
Fumble Range: 01 – 02 UM

Range Modifiers: 1' – 10': -35

ALT-16

Mace

One-Handed Concussion

Length: 5 – 7 feet
Weight: 3 – 5 pounds
Fumble Range: 01 – 03 UM

Range Modifiers: —

ALT-20
Quarterstaff
Two-Handed

Length: 2.5 – 3.5 feet
Weight: 1.5 – 2 pounds
Fumble Range: 01 – 04 UM

Range Modifiers: 1' – 10': +10
11' – 100': +0
101' – 180': -40

ALT-23
Short Bow
Missile

Length: 5 – 7 feet
Weight: 3 – 8 pounds
Fumble Range: 01 – 05 UM

Range Modifiers: 1' – 10': -10
11' – 25': -20
26' – 50': -30

ALT-26
Spear
Pole Arm

81	6	6	6	6	8	7	7	7AP	6	5											

Length: 2.5 – 3 feet
Weight: ca.5 pounds
Fumble Range: 01 – 06 UM

Range Modifiers: —

ALT -29

War Mattock
Two-Handed

Length: ca.3 feet
Weight: ca. .5 pounds
Fumble Range: 01 – 06 UM

Range Modifiers: —

ALT -30

Whip

One-Handed Concussion

Maximum Results for Huge Attacks																					

Note: An F-severity critical result indicates an E-critical roll on the Slash Critical Strike Table and a C-critical roll on the Krush Critical Strike Table.

Note: Animals attempting to hold onto a target (on this table) may be given an additional attack on the Grapple Attack Table if they obtain a critical strike result on this table.

Critical Strikes: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

Maximum Results for Huge Attacks																					

Note: Small attacks are objects smaller than a mug (e.g., fists, serving spoon, etc.). Medium attacks are objects the size of a mug (e.g., mugs, bottles, etc.). Large attacks are objects the size of a chair (e.g., chairs, table legs, etc.). Huge attacks are objects that require extraordinary strength to heft (e.g., large table, a person, etc.).

Critical Strikes: Criticals for Brawling attacks should use the critical strike table most suited to the Brawling weapon being used.

Maximum Results for Huge Attacks

Critical Strikes: **P** = *Puncture*, **S** = *Slash*, **K** = *Krush*, **G** = *Grapple*, **U** = *Unbalance*, **T** = *Tiny*

Note: For falls, add 1 to the roll for each foot fallen (other factors may modify this).

Note: An F-severity critical result indicates an E-critical roll and a C-critical roll (both Krush criticals).

Critical Strikes: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

Maximum Results for Huge Attacks																					

Note: An F-severity critical indicates an E-critical roll and a C-critical roll (both Grapple criticals).
Note: For each consecutive round that a creature obtains a critical strike on the same target (on this table), the creature obtains an additional +10 against that target.
Critical Strikes: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

Maximum Results for Huge Attacks																					

Note: An F-severity critical result indicates an E-critical roll on the Puncture Critical Strike Table and a C-critical roll on the Unbalance Critical Strike Table.

Note: If the attacking creature is "charging," it obtains a +20 on this table in addition to its other bonuses.

Critical Strikes: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

Maximum Results for Degree 4 Attacks																					

Note: All critical results are rolled on the Martial Arts Sweeps Critical Table. **Note:** Bare hands attacks by non-martial artists are Rank 1 attacks.

Note: Humanoid type creatures attempting to subdue (without major injury) other humanoid types may use this table or the Grapple Attack Table (both with a maximum result of 105).

Note: A critical result means the attack has injected poison, in addition to a normal critical result (if applicable).

Note: Swarms of very small creatures (i.e., bees) could roll on this table as a small attack. **Note:** A very large stinger (longer than 1') should use the Horn Attack Table.

Critical Strikes: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

Note: This table is used only for very small animals (e.g., house cats).

Note: The maximum result depends upon how many consecutive critical results were achieved in the rounds immediately preceding the attack.

Critical Strikes: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

Maximum Results for Huge Attacks																					

Note: An F-severity critical indicates an E-critical roll and a C-critical roll (both Krush criticals).

Note: If the target is down the attacker obtains +30 in addition to its other bonuses.

Critical Strikes: P = Puncture, S = Slash, K = Krush, G = Grapple, U = Unbalance, T = Tiny

CT-01 GRAPPLING CRITICAL STRIKE TABLE

	A	B	C	D	E
01-05	Weak grip.	Indecisive.	+1 hit.	+2 hits.	+3 hits.
06-10	+1 hit.	+2 hits.	+3 hits.	+4 hits.	Glancing attack. You have initiative next rnd. +5 hits
11-15	Glancing blow. No extra damage, but you have the initiative next rnd. Practice.	Passing strike. You have the initiative next rnd. +2 hits.	Grazing side strike. You have initiative next rnd. +4 hits.	Glancing blow. You have initiative next rnd. +6 hits.	Feeble attack, but foe must parry next rnd. +6 hits.
16-20	Foe is free, but you have initiative next rnd. +3 hits.	Foe fends off attack, but is forced to parry 1 rnd. +2 hits.	Foe recovers but is forced to parry next rnd. +4 hits.	Side strike unbalances foe. You have initiative for 2 rnds. +5 hits.	Strong, passing blow. Foe is stunned for 1 rnd. +3 hits
21-35	Hip strike. You have the initiative next rnd. +5 hits.	Attack has punch. Foe must parry next rnd at -20.	Glancing attack. Foe is stunned for 1 rnd. +2 hits.	Misplaced strike. Foe eludes your grip but is stunned for 1 rnd. +3 hits.	Luck allow foe to escape your grasp. Foe is stunned for 1 rnd. You have initiative 2 rnds.
36-45	Blow to lower back. Foe must parry next rnd.	Unbalance foe. +4 hits. Foe must parry next rnd. You have initiative for 2 rnds.	Flailing attack. Foe is stunned for 1 rnd and must parry next rnd.	Shield arm strike. With shield, +3 hits. Without, one arm is immobilized for 6 rnds and foe stunned 3 rnds.	Attack to upper leg. Foe is spun about and breaks free, but is stunned and unable to parry for 1 rnd.
46-50	Hip strike. Foe must parry next rnd at -20. +3 hits.	Blow to chest stuns foe for 1 rnd. +5 hits.	Weak grasp around foe's waist. Foe is at -25 for 3 rnds.	Weak hold on foe's chest. Foe is at -30 for 3 rnds. You have initiative 4 rnds.	Hold on foe's leg. Foe slips away, but is stunned 2 rnds and unable to parry next rnd.
51-55	Unbalancing blow to chest. Foe must parry next rnd. You have initiative for 2 rnds.	Blow to back stuns foe for 1 rnd. +7 hits.	Slipping grasp around foe's leg. Foe is stunned and unable to parry for 1 rnd.	Slipping grip around foe's waist. Foe is at -50 for 3 rnds.	Foe breaks free of hold on shield arm. He is stunned for 2 rnds and unable to parry next rnd. +5 hits.
56-60	Glancing back blow. Foe must parry next rnd at -25. You have initiative 2 rnds.	Unbalancing strike. Foe spins free but is stunned for 1 rnd and must parry the following rnd.	Foe breaks free of thigh hold, but is stunned and unable to parry 1 rnd. +3 hits.	Leg hold. Grip is slipping but foe stunned 3 rnds. +6 hits.	Grasp foe's leg. Foe is stunned and unable to parry 1 rnd and is at -25 the following 3 rnds.
61-65	Blow to shoulder. Foe is stunned 1 rnd. +3 hits.	Slipping grasp on foe's waist is weak. Foe is stunned for 2 rnds.	Grasp around foe's chest. Foe is at -50 for 3 rnds. +3 hits.	Grasp foe's chest. Foe is stunned and unable to parry for 1 rnd and is at -20 for the following 2 rnds.	Attack foe's shield arm. If foe has shield, +6 hits. If not, foe is stunned and unable to parry for 3 rnds. +7 hits.
66	Grasp on weapon arm disarms foe. +2 hits. Foe is stunned for 2 rnds.	Grasp on weapon arm disarms foe and sprains his wrist. Foe is stunned 2 rnds, and fights at -25.	Grasp foe's legs. Foe slips away, but is knocked down for 1 rnd. +5 hits.	Grasp on leg knocks foe down. Foe is down and immobile for 2 rnds. +6 hits.	Grasp foe's neck and knock him down. Foe is at -20 due to torn neck muscles. Foe is down and immobile for 3 rnds.
67-70	Chest strike. Foe eludes entanglement, but must parry next 2 rnds at -20.	Entangle foe's leg, +4 hits. Foe is stunned and unable to parry for 1 rnd.	Entangle shield arm. If foe has shield, he is at -50 until he drops it. If not, foe is at -50.	Entangle leg. Foe is stunned for 2 rnds and unable to parry next rnd. +7 hits.	Entangle weapon arm. Foe is stunned and unable to parry for 2 rnds, and at -75 the following rnd.
71-75	Uneasy hold on foe's midsection. Foe is at -50 for 2 rnds. +5 hits.	Weak hold on foe's lower chest. Foe is at -50 for 3 rnds. +4 hits.	Loose grasp on foe's midsection. Foe is stunned for 2 rnds and is at -50 for the following 3 rnds.	Loose hold on foe's mid-section. Foe is stunned and unable to parry 1 rnd and is at -70 the following 3 rnds.	Entangle foe's leg. Foe is knocked down, stunned and unable to parry for 2 rnds. +9 hits.
76-80	Weak hold on foe's midsection. Foe is at -50 for the next 3 rnds and you have initiative.	Entangle shield arm. If foe has shield, he is at -30 until he drops it. If not, foe is at -40.	Entangle weapon arm. Foe is stunned and unable to parry for 2 rnds, and is at -50 during the following rnd.	Entangle foe's weapon arm. Foe hangs onto weapon, but the arm is immobilized. +3 hits.	Grapple weapon arm. Foe is disarmed and is left stunned for 3 rnds. Tom ligaments and pulled muscles leave foe at -40.
81-85	Grasp foe's leg. Foe breaks free but is stunned for 2 rnds. +3 hits. You have initiative for 6 rnds.	Weak grasp on foe's midsection. Foe is at -50 For the next 6 rnds and you have the initiative.	Grasp on foe's chest breaks rib and leaves foe stunned and unable to parry for 3 rnds. Foe fights at -5.	Entangle foe's leg. Foe is knocked down, stunned, disarmed, and unable to parry for 2 rnds. Fall breaks shield arm.	Entangle foe's arms and pin them to his chest. Foe cannot move his arms and his mobility is reduced by -75.
86-90	Shield arm blow. If foe has shield, he must parry next rnd. If not, arm is immobilized and foe is at -50.	Entangle foe's leg. Foe is knocked down, stunned and unable to parry for 2 rnds. Pulled muscle leaves foe at -10.	Entangle foe's foot. Foe stumbles, falls, and breaks shoulder. +8 hits. Foe is stunned 6 rnds and fights at -30.	Tie up both of foe's arms so they are immobile. Foe is stunned for 9 rnds and cannot fight. +6 hits.	Entangle foe's foot. Foe stumbles, falls, breaks weapon on impact, and is stunned 2 rnds. If no chest armor, roll "D" crush crit.
91-95	Entangle foe's leg. Foe is knocked down. Stunned and unable to parry for 2 rnds. +3 hits.	Both of foe's legs are tied up. Foe is at -25, downed, disarmed and stunned and unable to parry for 2 rnds.	Pin foe's arms to his chest. Foe is stunned and unable to parry for 4 rnds, then fights at -95.	Entangle and immobilize foe's legs. Foe falls, is stunned and unable to parry for 30 rnds. +10 hits.	Wrap up foe's legs. Foe tumbles to ground and is knocked out. Foe is at -95 due to 2 broken arms and a broken ankle. +20 hits.
96-99	Tie up foe. Foe is completely immobilized for 12 rnds, and is at -60 for the following 3 rnds. +7 hits.	Attack entangles and immobilizes foe. Broken leg leaves foe at -40. The pitiful creature is left down but conscious.	Entangle and immobilize foe's legs. Foe falls, is disarmed, breaks weapon arm, and is knocked out. +20 hits.	Grapple foe's neck. If foe has neck armor, he is disarmed, stunned and unable to parry for 3 rnds. If not, he dies in 6 rnds.	Srangling hold. Foe is unable to break free and dies after 9 rnds of amazingly helpless struggling. Grim.

You are stunned and unable to parry for 3 rnds.	You drop your weapon in one of your lighter moments. Lose 2 rnds drawing a new one.	You drop your weapon. It will take 2 rounds to draw new one or 4 rnds to recover old one.	You fumble your weapon. You are stunned and quite unable to parry for the next 3 rnds.
86-90	Foe's smooth moves leave you stunned for 2 rnds. Hopefully, you will learn.	Incredibly bad move. You are stunned and unable to parry for 3 long rnds.	Drop your weapon. It will take 2 rnds to draw new one or 6 rnds to recover old one.	You break your weapon and lose 2 rnds drawing a new one. You take 10 hits.	You fumble your weapon badly but hang onto it. You are stunned and unable to parry for 6 rnds.	You let your arrow fly much too soon. You strike 20' short of target. You are out for 2 rnds.
91-95	You stumble. The classless display leaves you stunned for 3 rnds. You might still survive.	You stumble and nearly fall down in an apparent attempt to commit suicide. You are stunned 4 rnds.	You trip and fall. It will take 4 rnds to recover. You are unable to parry for 3 rnds.	Your seating is improper and you find yourself stunned and unable to parry for 3 rnds.	You let go of weapon too early and send it off 30' behind you.	Slip and fall down. You are stunned for 6 rnds, and unable to parry for 2 rnds. Your shot goes astray.
96-99	Swallow tongue in the excitement. You are stunned and unable to parry for 3 rnds.	You trip and fall. It will take 4 rnds to recover. You are unable to parry for 3 rnds.	You injure your shoulder. You are stunned and unable to parry for 3 rnds and fight at -25.	Your body takes the impact. You take 20 hits. Stunned and unable to parry 6 rnds.	You fall down. Your shot goes astray. You are stunned for 12 rnds.	Break your bow. You are stunned and unable to parry for 4 rnds of action. Good luck, pal.
100	Bad taste and poor execution. You attempt to maim yourself. Roll on the "D" critical table (Slash).	Worst move seen in ages. 50% chance you are out 2 days with a pulled groin. 50% chance opponent out 3 rnds laughing.	You break your weapon and are stunned and unable to parry for 6 rnds.	You fall off of your mount. Role on the "D" crush critical strike table.	You hit yourself during delivery. Roll on the "D" critical strike table (crushes).	Poor judgment. You let arrow fly and lose an ear. +5 hits. You take 2 hits per rnd.

CT-12 NON-WEAPON FUMBLE TABLE

	MA STRIKES	MA SWEEPS	NATURAL ATTACK	ANIMAL
01-25	Target is very fast. Lose the opportunity to attack.	Your grip on foe's arm is tenuous at best. Try again next rnd.	You stop for a breather. Try again next rnd.	Your foe's defenses seem too formidable. Try again next rnd.
26-30	Stumble on your own two feet. Take the rest of the rnd to regain balance.	Your attack is weak and off-balance. Spend the remainder of the rnd recovering.	You are distracted. Lose your opportunity to attack.	His sudden movement surprised you. You lose the opportunity to attack.
31-40	You thought you knew what you were doing. Spend the rest of the rnd remembering how to do that move.	You stub your toe during delivery. You fail to connect and spend the remainder of this rnd stunned.	Your attack is ineffective, and your attack bends a limb in a painful way. You are stunned for the remainder of this rnd.	You attack too quickly. Coming away with only cloth. You are stunned the remainder of the rnd.
41-50	Overextend yourself. Spend next rnd parrying while your muscles recover.	You lose your balance during the throw. You must parry for 2 rnds while you recover.	You duck just in time! Spend the next rnd parrying while you find a new opening.	You realize that this foe may be too much. You must attack a different foe next rnd.
51-60	In the flurry, you have forgotten your best moves. May only make 1 strike attacks for 2 rnds	Ill-timed sweep results in your attempt to trip the ground. This stuns you for 2 rnds.	You're thrown off balance! You may only make small attacks for the next 2 rnds.	You must change opponents next rnd. In addition, you can only make Small attacks for 2 rnds.
61-65	Mistaken attack causes awkward position and slight muscle spasms. You must parry for 2 rnds.	Foe's deft move leaves you trying to throw the air. You must parry for 2 rnds while looking for the right opening.	Your attack misses widely. You nearly trip yourself and stagger wildly. You must parry for 2 rnds while you recover.	You are confused, all attacks for the next 3 rnds are at half offense while you orient.
66	What were you thinking! You strike the nearest solid object that isn't your opponent. Give yourself an 'A' Krush critical.	Acrobatic move leaves you flat on your back! Take an 'A' Krush critical.	A clean hit, on yourself!. Take an 'A' critical.	The wind changes and you smell food! You must disengage and seek out an easier source of food.
67-70	Bad positioning. You must parry for 2 rnds while you recover.	Foe is just too powerful! You contemplate your last lesson while parrying for the next 2 rnds.	Your left foot finds your right foot and you trip. You can only parry for 2 rnds while you get your feet back into position.	You are distracted by a fly that keeps buzzing your head. You can only use half your normal attack ability for 2 rnds.
71-80	Attempt at an advanced technique stuns you for the remainder of the rnd and the next rnd.	Foe easily avoids your clumsy sweep. You are out of position and stunned and unable to parry for 1 rnd.	Your attack is humorous. You are stunned for 2 rnds as you attack into a solid object just as your foe ducks.	That shiny piece of metal keeps distracting you. You suffer a -50 for 2 rnds.
81-85	Your knee connects with foe's solid bone, causing an interesting sensation. You are stunned for one rnd and unable to parry for 2 rnds.	You've suddenly forgotten the follow through move on that throw. You lose 3 rnds of action while trying to remember it.	Your attack crashes you into a wall (Or similar solid). You lose three rounds of action as you get off the wall and back into the action.	Was that your babies crying? Suffer a -50 for 3 rnds before you discover it was that mocking bird again.
86-90	You "know" that your strike was amazing. However, foe is lucky to have blocked it. You are stunned for 2 rnds by his intuition.	You suddenly understand what your teacher has been telling you all of those years! You are stunned for 2 rnds. Go ahead; reminisce.	Ouch! You are stunned for 2 rnds as a pinched nerve sends agony through your body.	You are intimidated by foe's sudden surge of strength. Perhaps this was a bad idea. Suffer a -50 for 2 rnds while you seek a way to disengage.
91-95	You twist your ankle in a recovery. You fall and manage to stun yourself in the process.	Your "graceful" sweep results in your own fall. You are stunned for 2 rnds, through you quickly jump to your feet.	You slip on a wet spot on the floor. You go down hard. You are stunned for 2 rnds.	Your unexpected jump surprised not only your foe, but also yourself. You land wrong. Take an 'A' Krush critical.
96-99	In the excitement, you try to make your 2 feet be in 3 places at once. You fall, stunning yourself for 3 rnds. You are unable to parry for 2 rnds.	Your indecision causes you to attempt 2 different throws at once. You are stunned and unable to parry for 3 rnds. Quick Thinking!	As you duck a blow, you lose your footing. You fall down for 1 rnd, stunned no parry for the next, and then just stunned on the last.	You duck to one side to avoid foe's attack. Unfortunately, you get tangled up in the underbrush. You suffer a -50 to all actions for 3 rnds.
100	You forget even the most basic of moves. You throw your self at your opponent, giving yourself a "B" Krush critical.	Awkward sweep results in you going down and slamming your head. You are stunned and unable to parry for 6 rnds.	Completely overbalanced during that missed attack. You hit your head on on something solid as you fall. You are stunned and unable to parry for 6 rnds.	Run away! You must turn tail and run. Survival instincts say its time to leave the scene. Foe gets an attack at your back as you leave.

6.0 ANIMAL AND MONSTER STATISTICS

The animal statistics given in the Animal Statistics Chart are for animals that have actually existed on our world. The statistics given are suggested values for their use with *AL*. They indicate which *AL* attack tables to use and what modifications to make. These animals are intended to be examples of how to use the *AL* system to simulate any animal.

Human "Speeds" would normally range from Creeping to Fast in animal terms.

Our assumption for animals having a large number of hits is that: hits only represent pain, shock, and minor damage that result in unconsciousness; they do not represent critical damage. Men (without training) tend to faint, pass out, or go into shock when encountering too much pain, while beasts tend to react to pain instinctively by avoiding it or by attacking the source of the pain. Seldom do aggressive animals "pass out". Animals have other major disadvantages: they tend to act in a predictable manner and they cannot parry attacks.

The creatures in the Monster Statistics Chart are fantasy (made up) creatures. They are very powerful, and their use in play

often depends on special abilities and the world system being used. They are included to illustrate how you can make up your own monsters using this system.

GMs that want more complete creature descriptions (for animals and monsters) should refer to *ICE's Creatures & Treasures* (see Section 1.2). *CT* provides complete descriptions for over 500 animals, races and fantastic beasts.

Note: *The OB's and DB's given to monsters and animals are based upon normal Rolemaster values. In these systems, a fighter can have an offensive bonus as high as 80 to 90 at around 5th level. For use with other systems, the OB's and DB's given should be examined for their relation to character bonuses. It may be that the bonuses given should be cut to between 50-70% for some systems.*

ANIMAL STATISTICS

Most animals will rarely attack a human unless they or their young are threatened. When an attack does occur,

however, it is often sudden and ferocious. The ferocity of animal attacks is reflected to a certain degree by the ten animal attack tables found in *Claw Law*. Some of these tables make huge animals more terrible than the most fearsome weapon in *Arms Law*. The comparative ferocity and prowess of animals is subject to the value judgments of the GM.

The Animal Statistics Chart provides some suggested combat capabilities for common earthly animals using the animal attack charts. Only the broad physical characteristics are presented. The GM should develop the tactical application of the animals' characteristics (as well as any unusual abilities).

MONSTER STATISTICS

A sample of commonly used fantasy monsters is provided on the Monster Statistics Chart. *AL* only provides the Combat capabilities of the listed monsters. Any special abilities (fire-breathing, invisibility, flying,

etc.) must be provided by whatever spell and ability system you use in your game.

DETERMINING THE TYPE OF ATTACK

Each animal described on the Animal Statistics Chart has at least one type of attack and possibly as many as three (Primary, Secondary, and Tertiary). To determine which attack is used, roll percentile dice (1-100). Low (and in the given percent range, the last number) indicates that the primary attack is used while the higher rolls indicate secondary and possibly tertiary attacks.

The GM may always change the given pattern of attack for a given animal or situation; the provided values are only meant to be guidelines for the use of the *Claw Law* tables.

Example: *Examine the Wolverine entry. On a roll of 1-40 the wolverine will use the Bite Attack Table with an offensive bonus of 50 and a Maximum result of Medium (M). On a roll of 41-50, the*

wolverine will use the Claw/Talon Attack Table with an OB of 45 and a Maximum result of Medium. On a roll of 51-100, the Wolverine will make both of the attacks just mentioned.

An attack marked with a « or √ can as a result of another attack by the same animal has already obtained a critical strike this round.

« – If the attack given on the left (i.e. the primary attack for a secondary attack or the secondary attack for a tertiary attack) has obtained a non-Tiny critical this round, then this attack occurs in the same round.

√ – If the attack given on the left (i.e. the primary attack for a secondary attack or the secondary attack for a tertiary attack) has obtained a non-Tiny critical this round, then this attack occurs in the following round.

Opt – The creature may use this attack (usually a weapon) if it desires (usually determined by the GM).

Example: A Gorgon attacks a man. On its first round of attack it has a 100% chance of using its Medium Horn attack with a 40 OB ("40 MHo 100"). It gives the man a "10AP" result. Since it got a non-Tiny critical result, it makes

a Large Bash attack with an OB of 60 ("60 LBa «"); otherwise, it would not have gotten any more attacks in the first round. With the large bash attack, it gives the man an "11BU". Since the Gorgon got a non-Tiny critical with its large bash attack, it will get to make a Large Trample-Stomp attack with a 50 OB next round ("50 LTs √").

Intelligent creatures can parry normally if they have something to parry with (e.g. horns, a shell, armor, etc.) otherwise they use the 2 OB = 1 DB parrying mechanic described in Section 2.2. Unintelligent creatures generally go full OB in a combat situation, unless they are trying to flee, in which case they generally put all activity into movement rather than parry.

CONVERTING AND CREATING CREATURES

Trained or usually intelligent animals may have higher offensive bonuses, and use different combinations of attacks than those presented on the Statistics Charts. These statistics are only meant to be a sample and the GM should feel free to use the provided tables for describing and designing their own animals and monsters.

A good rule of thumb for converting monsters is to:

06-01 SIZE CHART

Size	DB Mod. *
Tiny	+30
Small	+20
Medium	0
Large	-10
Huge	-20

* —These modifications have already been factored into the animal and monster stats given. They are included to facilitate designing your own animals and monsters.

06-02 SPEED CHART

Code	(MS) * Base Rate	DB Modifications		(AQ) Initiative Points
		(MS) † Flee/Evade	(AQ) ‡ Charge/Lunge	
CR Creeping	-20	0	0	-20
VS Very Slow	-10	0	0	-10
SL Slow	0	0	0	+0
MD Medium	10	-5	5	+10
MF Moderately Fast	20	-10	10	+20
FA Fast	30	-15	15	+30
VF Very Fast	40	-20	20	+40
BF Blindingly Fast	50	-20	25	+50

* —These modifications have already been factored into the animal and monster stats given. They are included to facilitate designing your own animals and monsters.

† —This DB Modifier applies if the animal is actively fleeing or evading pursuit. The animal must be moving.

‡ —This DB Modifier is only used when an animal attacks a target from the front without surprise. The animal's DB is only modified with respect to the target's attack. If this modifier is applied, the target gets the first attack.

†, ‡ —Have not been factored into the DBs of the sample animals and monsters, and thus must be applied as the situation calls for.

- Determine the size (Tiny, Small, Medium, Large, or Huge) and type of attack.
- Determine the Maximum damage for each type of attack (usually the size).
- Determine an appropriate offensive bonus. If this cannot be easily set, approximate it by +10 per hit die that the creature normally has under your system.

The following charts can also be useful in handling *AL* creatures during play and in converting other creature statistics into *AL* statistics.

LARGER/SMALLER THAN NORMAL ANIMALS

The statistics given for animals on these charts apply to the size and nature of the

animal found in our world, for creatures smaller than normal (e.g. a baby elephant), decrease the Size, Hits, and Max (on attacks), but leave the pattern of attack the same. Similarly, for larger than normal animals (e.g. giant crabs, huge birds, giant spiders, etc.) increase the Size, Hits, and Max (on attacks), but leave the pattern of attack the same. The OBs for various attacks should be decreased for smaller animals and increased for larger animals.

ATTACKS BY GROUPS OF SMALL ANIMALS

Swarms or groups of tiny creatures (Bees, Ants, etc.) may be given a small attack on the appropriate table. Some of these "swarm" attacks are indicated on the charts (Bees, Birds, Crabs, Lizards, etc.).

06-03 ANIMAL STATISTICS CHART

Name	Size	Hits	AT (DB)	Speed MS/AQ	Level	Primary Attack	Secondary Attack	Tertiary Attack	Special
Alligator (Crocodile)	L	120	7(0)	MD/MD	2	60 LBi 100	—	—	DB = +20, OB = +20 if in water.

Piranha	T	4	1(70)	VF/VF	1	25 Ti 100	6 or more —25 SBi	—	+20 when water bloody.
Rats	S	5	1(30)	MD/MF	1	0 SBi 100	3 or more —30 SBi	—	—
Rhinoceros	L	240	12(0)	MD/MF	7	130 HHo 100	110 Hba «	110 HTs ?	Blind charge, poor eyesight.
Sabertooth Tiger	L	250	8(30)	VF/VF	5	110 LBi 70	70 LCI 20	Both 10	—
Scorpion	T	2	1(40)	MD/VF	1	10 SSt 100	6 or more —50 SSt	—	Very poisonous, 1-50 hits.
Shark	L	250	4(20)	FA/FA	5	100 LBi 100	—	—	+30 when water bloody.
Snake (non-constr.)	S	10	1(50)	FA/VF	1	25 Ti 100	6 or more —0 SHo	—	—
(large, non-constr.)	M	20	1(30)	FA/VF	1	10 SHo 100	3 or more —25 SHo	—	—
Spider (Ants, etc)	T	1	1(10)	CR/FA	1	-50 Ti 100	Swarm —0 Ti	—	Innocuous, possibly poisonous.
Squid (large)	S	20	1(50)	FA/FA	1	50 SGr 100	0 SPi ?	—	—
Tiger	L	150	4(30)	VF/VF	5	75 LCI 40	90 LBa 60	110 LBi ?	Rushes from short range.
Turtle (large)	M	80	12(30)	CR/SL	3	20 MPi 100	—	—	—
(large sea)	L	120	12(40)	FA/MD	3	40 MPi 100	—	—	If not in water, as above.
Weasel	S	35	1(50)	FA/VF	1	50 MBi 100	—	—	Vicious.
Whale (Sperm Whale)	L*	700	8(50)	MF/MF	8	60 SGr 50	75 HBa 50	—	'E' Gr crit means target is swallowed.
Wildcat (many types)	S	60	3(60)	VF/VF	3	30 HCl 30	20 SBi 30	Both 40	Loners, ambushers.
Wolf	M	110	3(30)	FA/FA	3	65 MBi 100	—	—	Pack hunter, intelligent.
Wolverine	S	45	3(50)	FA/VF	2	50 LBi 40	45 MCl 10	Both 50	Extremely vicious and bellicose.

Codes: Most of these statistics are standard AL&CL combat statistics: Hits, AT = Armor Type (Section 2.1), DB = Defensive Bonus (Section 2.2), level (for RRs, see ChL and SL).

Size: T = Tiny, S = Small, M = Medium, L = Large. H = Huge. **L*** = Any criticals against this creature are resolved using the Large Creatures rules (Section 5.4). **H*** = Any criticals against this creature are resolved using the Super-Large Creature rules (Section 5.4).

Speed: See Section 4. MS = Movement Speed, the rate at which the animal is capable of traveling: AQ = Attack Quickness (speed of animal's attack).

Attacks: See Section 5. The attacks are given in the following form: OB - Attack Size - Attack Type - Additional information.

OB: The standard Offensive Bonus for this attack.

Attack Size: Maximum result allowed on attack table (see Section 5.4): S = Small, M = Medium. L = Large. H = Huge; no code for Tiny attacks.

Attack Type: Type of attack: Ba = Bash/Ram/Butt/Knock Down/Slug; Bi = Bite; Cl = Claw/Talon; Cr = Crush/Fall; Gr = Grapple/Envelop/Swallow; Ho = Horn/Tusk; Pi = Pincher/Beak; St = Stinger; Ti = Tiny Animals; Ts = Trample/Stomp; Wp = Weapons.

Additional Information: # = the % chance of this attack being used: « = If the attack given on the left (i.e., the primary attack for a secondary attack or the secondary attack for a tertiary attack) has obtained a non-Tiny critical this round, then this attack occurs in the same round: ? = If the attack given on the left (i.e., the primary attack for a secondary attack or the secondary attack for a tertiary attack) has obtained a non-Tiny critical this round, then this attack occurs in the following round: **opt** = The creature may use this attack (usually a weapon) if it desires (usually determined by the GM).

* —Defensive Bonuses (DB) so marked are obtained from the normal process with an extra bonus for especially tough hides, quickness, stature and general factors concerning the fearsomeness of the creature.

2X Damage: Target receives double the hits by the tables.

06-04 MONSTER STATISTICS CHART

Name	Size	Hits	AT (DB)	Speed MS/AQ	Level	Primary Attack	Secondary Attack	Tertiary Attack	Special
Ant (Giant)	S	25	17(30)	MD/MF	1	15 SPi 100	—	—	Assumes Ant is 1 to 2 feet long.
(Giant Warrior)	S	40	19(40)	MF/FA	2	35 MPi 100	—	—	Assumes Ant is 2 to 3 feet long.
Ape (Giant)	L	120	8(10)	MF/FA	5	55 MC1 100	70 LGr «	60 Wp ?	Can use simple hand weapons.
Basilisk	L	110	12(10*)	MD/MD	6	60LHo 100	—	—	Has special abilities.
Beetle (Giant)	M	50	16(10)	MF/FA	2	60 LPi 100	—	—	Assumes Beetle is 3 feet long.
Centaur	L	80	4(30)	VF/VF	5	50 LBa 100	40 LTs «	50 Wp opt	Intelligent Centaurs may use weapons.
Chimera	L	180	4(30*)	FA/FA	10	90 LBi 50	90 LCl 30	40 MHo 20	Has unusual abilities.
Cockatrice	S	30	3(50)	VF/MF	5	50 MPi 100	—	—	Has unusual abilities.
Crab (Giant)	M	60	16(20)	MF/MF	3	75 LPi 100	—	—	Assumes Crab is 4 feet wide.
Demon (Pale I)	M	35	1(20)	MF/FA	2	20 MBa 100	50 MCr ?	30 Wp opt	Types as given in SL. Demons from other systems may be placed into these classes.

Wyvern	L	150	16(35*)	VF/FA	10	90 LPi 60	60 LCl 20	60 LBa 20	Has unusual abilities.

APPENDIX: WEB EXTRAS

During the editorial process of this book, **ICE** made some very hard choices, to keep the size of this product from getting too large. Part of those choices included removing some options and even whole sections of the product.

Many of the options that we removed will show up in a later *Rolemaster Classic* product that is already in development. I can't really say much more about this product yet as it is, as I said, still in development, and thus some of the details regarding its content have not been finalized yet.

Regarding the whole sections that were removed, there were two. Both of those sections will be released in PDF format as free Web Extras for *Rolemaster Classic*. These PDFs will be available from the **ICE** website. Each of these items are described more fully below:

CONVERSIONS

This section will end up being turned into a PDF giving conversion notes for using *Arms Law* with other systems. Previously, this section has been in nearly every version of *Arms Law*. However, since the popularity of other systems tends to grow and shrink over time, even to the point of a system occasionally disappearing altogether, it was felt that it would be better to present this as a free PDF product, available to those who want it.

By making it into a PDF, it will allow us to update more frequently as guidelines for new system conversions are completed or as other systems decline and are replaced. In short, it will allow us to keep it current in a way that has not been possible before.

ROLEMASTER 2ND EDITION

TACTICAL SEQUENCE

This system was originally introduced in early versions of *Rolemaster*, yet it was, according to many of the people I have talked with over the years, rarely used. In fact, the folks who originally created it rarely used it themselves.

We had originally intended to include it with this product as its core, just as it had been previously. Then, after much discussion, it was decided to replace the original tactical system, which even most of our RM2 die-hard fans didn't use, with a new system and make this system into an option. It was also decided to place it at the end of the book, so that it would cause less confusion overall. In doing so, we ended up removing a number of options created just for the original tactical system. Even so, there were some issues and concerns about the two different tactical systems causing confusion among players due to them having different definitions for concepts having the same name.

Then we ran into the issues causing us to consider trimming this product a bit. **ICE** has decided to go ahead and remove the original tactical system from the book completely. We

have also decided to allow the RMC

Team to put back those options that were removed when this tactical system was turned into an option.

The resulting document will be turned into a PDF and released for free as a Web Extra. This will allow those folks who want it to be able to get it and use it, including with new options created by the RMC Team. And for those folks who don't want to use it, there are no problems or issues at all.

MOVEMENT & MANEUVER TABLE

	Routine	Easy	Light	Medium	Hard	Very Hard	Extremely Hard	Sheer Folly	Absurd
-201	Fall down. +2 Hits. You are out 3 rnds.	Fall. Knock self out. You are out for 12 rnds.+9 Hits.	Fall. Break arms. +10 Hits. You are out for 6 rnds.	Fall. +15 Hits. Break arm. You are out for 9 rnds.	Fall. Break arms. +20 Hits. You are out 18 rnds. Arms useless.	Fall. Break both arms and neck. +30 Hits. You are out 60 rnds.	Fall sends you into a coma for 3 years. +30 Hits. ROLEMASTER CLASSIC

Get Critical

Arms Law is about FRPG combat—the kind that leaves you shaking and bragging to your friends about your character's exploits. If you prefer safe, ho hum, by-the-numbers RPG combat then *Arms Law* is not for you. If you are looking for FRP combat that leaves you breathless, your quest ends here.

Arms Law is a fantasy combat system designed to be used with ICE's Rolemaster Classic rules or the rpg system of your choice.

What makes *Arms Law* special? Criticals and Fumbles.

From the 'E' Puncture Critical Table:

"Strike through foe's kidneys. Foe dies after 6 rnds of very intense agony."

Two-Handed Arms Fumble:

"Stumble over an imaginary dead turtle. You lose two rounds of attack, but can still parry."

Arms Law includes 30 individual weapon attack tables, 13 special attack tables, and dozens of critical strikes and fumbles.

Remember...it's not the bruises that kill!

Critical damage is what wastes your enemies.
