Description: The character has the power to affect undead creatures by channeling the power of his faith through his unholy symbol (see Turn or Rebuke Undead in the System Reference Document).

The character may attempt to rebuke undead a number of times per day equal to 3 + his Charisma modifier. A character with 5 or more ranks in Knowledge (religion) gets a +2 bonus on rebuke checks against undead.

SMITE CHAOS I

Prerequisites: Aura of Alignment (Lawful).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite chaos with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not chaotic, the smite has no effect, but the ability is still used up for that day.

SMITE EVIL I

Prerequisites: Aura of Alignment (Good).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite evil with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not evil, the smite has no effect, but the ability is still used up for that day.

SMITE GOOD I

Prerequisites: Aura of Alignment (evil).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite good with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not good, the smite has no effect, but the ability is still used up for that day.

SMITE LAW I

Prerequisites: Aura of Alignment (Chaotic).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite law with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not lawful, the smite has no effect, but the ability is still used up for that day.

SNEAK ATTACK I

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character's attack deals 1d6 extra damage any time her target would be denied a Dexterity bonus to AC (whether the target actually has a Dexterity bonus or not), or when the rogue flanks her target. Should the character score a critical hit with a

sneak attack, this extra damage is not multiplied.

Ranged attacks can count as sneak attacks only if the target is within 30 feet.

With a sap (blackjack) or an unarmed strike, the character can make a sneak attack that deals nonlethal damage instead of lethal damage. She cannot use a weapon that deals lethal damage to deal nonlethal damage in a sneak attack, not even with the usual -4 penalty.

The character can sneak attack only living creatures with discernible anatomies—undead, constructs, oozes, plants, and incorporeal creatures lack vital areas to attack. Any creature that is immune to critical hits is not vulnerable to sneak attacks. The character must be able to see the target well enough to pick out a vital spot and must be able to reach such a spot. A character cannot sneak attack while striking a creature with concealment or striking the limbs of a creature whose vitals are beyond reach.

SUMMON FAMILIAR

Prerequisites: Ability to cast arcane spells.

Ability Type: Spell-Like.

Class Levels: Sorcerer and Wizard.

Description: The character can obtain a familiar. Doing so takes 24 hours and uses up magical materials that cost 100 gp. A familiar is a magical beast that resembles a small animal and is unusually tough and intelligent. The creature serves as a companion and servant.

The character chooses the kind of familiar he gets. As the character gains sorcerer and wizard class levels, his familiar also increases in power.

If the familiar dies or is dismissed by the character, the character must

attempt a DC 15 Fortitude saving throw. Failure means he loses 200 experience points for every sorcerer and wizard class level; success reduces the loss to one-half that amount. However, a character's experience point total can never go below zero as the result of a familiar's demise or dismissal. A slain or dismissed familiar cannot be replaced for a year and day. A slain familiar can be raised from the dead just as a character can be, and it does not lose a level or a Constitution point when this happy event occurs.

TRACK

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Track as a bonus feat. This does not count as a base feat for the purposes of level determination.

TRAPFINDING

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character can use the Search skill to locate traps when the task has a Difficulty Class higher than 20.

Finding a nonmagical trap has a DC of at least 20, or higher if it is well hidden. Finding a magic trap has a DC of 25 + the level of the spell used to create it.

The character can use the Disable Device skill to disarm magic traps. A magic trap generally has a DC of 25 + the level of the spell used to create it.

A character who beats a trap's DC by 10 or more with a Disable Device check can study a trap, figure out

how it works, and bypass it (with her party) without disarming it.

TURN UNDEAD

Prerequisites: Non-evil alignment, cannot have Rebuke Undead special ability.

Ability Type: Supernatural.

Class Levels: Cleric and Paladin.

Description: The character has the power to affect undead creatures by channeling the power of his faith through his holy symbol (see Turn or Rebuke Undead in the System Reference Document).

The character may attempt to turn undead a number of times per day equal to 3 + his Charisma modifier. A character with 5 or more ranks in Knowledge (religion) gets a +2 bonus on turning checks against undead.

UNARMED STRIKE I

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Improved Unarmed Strike as a bonus feat. This does not count as a base feat for the purposes of level determination. The character's attacks may be with either fist interchangeably or even from elbows, knees, and feet. This means that the character may even make unarmed strikes with her hands full. There is no such thing as an off-hand attack for the character when striking unarmed. The character may thus apply her full Strength bonus on damage rolls for all her unarmed strikes.

Usually the character's unarmed strikes deal lethal damage, but she can choose to deal nonlethal damage instead with no penalty on her attack roll. She has the same

choice to deal lethal or nonlethal damage while grappling.

The character's unarmed strike is treated both as a manufactured weapon and a natural weapon for the purpose of spells and effects that enhance or improve either manufactured weapons or natural weapons.

A character also deals more damage with her unarmed strikes than a normal person would. A small character deals 1d4 damage, a medium character deals 1d6 damage, and a large character deals 1d8.

WILD EMPATHY

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: Druid and Ranger.

Description: The character can improve the attitude of an animal. This ability functions just like a Diplomacy check made to improve the attitude of a person. The character rolls 1d20 and adds her druid and ranger class levels along with her Charisma modifier to determine the wild empathy check result.

The typical domestic animal has a starting attitude of indifferent, while wild animals are usually unfriendly.

To use wild empathy, the character and the animal must be able to study each other, which means that they must be within 30 feet of one another under normal conditions. Generally, influencing an animal in this way takes 1 minute but, as with influencing people, it might take more or less time.

The character can also use this ability to influence a magical beast with an Intelligence score of 1 or 2, but she takes a -4 penalty on the check.

WIZARDRY I

Prerequisites: Ability to cast arcane spells.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Scribe Scroll as a bonus feat. This does not count as a base feat for the purposes of level determination.

2ND-LEVEL SPECIAL ABILITIES

All 2nd-Level Special Abilities have "Character Level 1" as a prerequisite.

COMBAT STYLE: ARCHERY

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Rapid Shot feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

COMBAT STYLE: TWO-WEAPON

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Two-Weapon Fighting feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of

the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

DEADLY TOUCH

Prerequisites: Character Level 1, Cha 12, Aura of Alignment (Evil).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character can cause wounds with a successful touch attack. Each day she can deal a total number of hit points of damage equal to her paladin class level x her Charisma bonus. An opponent subjected to this attack can make a Will save (DC 10 + 1/2 paladin class level + character's Cha modifier) to halve the damage dealt.

Alternatively, the character can use any or all of this power to cure damage to undead creatures, just as an inflict wounds spell does. This power otherwise functions identically to the lay on hands ability.

DIVINE GRACE

Prerequisites: Character Level 1, Aura of Alignment (Any).

Ability Type: Supernatural.

Class Levels: None.

Description: The character gains a bonus equal to her Charisma bonus (if any) on all saving throws.

EVASION

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can avoid even magical and unusual attacks with great agility. If the character makes a successful Reflex saving throw against an attack that normally deals half damage on a successful save, she instead takes no damage. Evasion can be used only if the character is wearing light armor or no armor. A helpless character does not gain the benefit of evasion.

FIGHTING MASTERY II

Prerequisites: Character Level 1, Fighting Mastery I.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

LAY ON HANDS

Prerequisites: Character Level 1, Cha 12, Aura of Alignment (Good).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character can heal wounds (her own or those of others) by touch. Each day she can heal a total number of hit points of damage equal to her paladin class level x her Charisma bonus. The character may choose to divide her healing among multiple recipients, and she doesn't have to use it all at once. Using lay on hands is a standard action.

Alternatively, the character can use any or all of this healing power to deal damage to undead creatures. Using lay on hands in this way

requires a successful melee touch attack and doesn't provoke an attack of opportunity. The character decides how many of her daily allotment of points to use as damage after successfully touching an undead creature.

MARTIAL ARTS II: COMBAT REFLEXES

Prerequisites: Character Level 1, any Martial Arts I special ability.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Combat Reflexes as a bonus feat. This does not count as a base feat for the purposes of level determination.

MARTIAL ARTS II: DEFLECT ARROWS

Prerequisites: Character Level 1, any Martial Arts I special ability.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Deflect Arrows as a bonus feat. This does not count as a base feat for the purposes of level determination.

UNCANNY DODGE

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can react to danger before his senses would normally allow him to do so. The character retains his Dexterity bonus to AC (if any) even if he is caught flat-footed or struck by an invisible attacker. However, he still loses his Dexterity bonus to AC if immobilized.

WOODLAND STRIDE

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may move through any sort of undergrowth (such as natural thorns, briars, overgrown areas, and similar terrain) at her normal speed and without taking damage or suffering any other impairment. However, thorns, briars, and overgrown areas that have been magically manipulated to impede motion still affect her.

3RD-LEVEL SPECIAL ABILITIES

All 3rd-Level Special Abilities have "Character Level 2" as a prerequisite.

AURA OF COURAGE

Prerequisites: Character Level 2, lawful good alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character is immune to fear (magical or otherwise). Each ally within 10 feet of her gains a +4 morale bonus on saving throws against fear effects.

This ability functions while the character is conscious, but not if she is unconscious or dead.

AURA OF DEBILITATION

Prerequisites: Character Level 2, chaotic evil alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character radiates a malign aura that causes enemies within 10 feet of her to take a -1 penalty to Armor Class.

This ability functions while the character is conscious, but not if she is unconscious or dead.

AURA OF DESPAIR

Prerequisites: Character Level 2, lawful evil alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character radiates a malign aura that causes enemies within 10 feet of him to take a -2 penalty on all saving throws.

This ability functions while the character is conscious, but not if she is unconscious or dead.

AURA OF RESOLVE

Prerequisites: Character Level 2, chaotic good, alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character is immune to compulsion effects.

Each ally within 10 feet of him gains a +4 morale bonus on saving throws against compulsion effects.

This ability functions while the character is conscious, but not if she is unconscious or dead.

DIVINE HEALTH

Prerequisites: Character Level 2, Aura of Alignment (Any).

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains immunity to all diseases, including supernatural and magical diseases.

ENDURANCE

Prerequisites: Character Level 2.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Endurance as a bonus feat. This feat does not count as a base feat for the purposes of level determination.

INSPIRE CONFIDENCE

Prerequisites: Character Level 2, Bardic Music, Countersong, Fascinate, Inspire Courage I, 6 or more ranks in Perform.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can use his music or poetics to help an ally succeed at a task. The ally must be within 30 feet and able to see and hear the character. The character must also be able to see the ally.

The ally gets a +2 competence bonus on skill checks with a particular skill as long as he or she continues to hear the character's

music. Certain uses of this ability are infeasible. The effect lasts as long as the character concentrates, up to a maximum of 2 minutes. The character can't inspire competence in himself. Inspire competence is a mind-affecting ability.

SPEED BONUS I

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains an enhancement bonus to her speed of +10 ft. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

SNEAK ATTACK II

Prerequisites: Character Level 2, Sneak Attack I.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 2d6 extra damage (instead of 1d6).

STILL MIND

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +2 bonus on saving throws against spells and effects from the school of enchantment.

TRACKLESS STEP

Prerequisites: Character Level 2, Woodland Stride.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character leaves no trail in natural surroundings and cannot be tracked. She may choose to leave a trail if so desired.

TRAP SENSE I

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +1 bonus on Reflex saves made to avoid traps and a +1 dodge bonus to AC against attacks made by traps.

4TH-LEVEL SPECIAL ABILITIES

All 4th-Level Special Abilities have "Character Level 3" as a prerequisite.

FIGHTING MASTERY III

Prerequisites: Character Level 3, Fighting Mastery II.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

KI STRIKE: MAGIC

Prerequisites: Character Level 3.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's unarmed attacks are empowered

with ki. Her unarmed attacks are treated as magic weapons for the purpose of dealing damage to creatures with damage reduction.

RAGE II

Prerequisites: Character Level 3, non-lawful alignment, Rage I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage two times per day. See Rage I for details.

RESIST NATURE'S LURE

Prerequisites: Character Level 3, Nature Sense.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +4 bonus on saving throws against the spell-like abilities of fey.

SLOW FALL I

Prerequisites: Character Level 3.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 20 feet shorter than it actually is.

UNARMED STRIKE II

Prerequisites: Character Level 3, Unarmed Strike I.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in

damage. A small character now deals 1d6 damage with unarmed strikes, a medium character 1d8 damage, and a large character 2d6 damage.

5TH-LEVEL SPECIAL ABILITIES

All 5th-Level Special Abilities have “Character Level 4” as a prerequisite.

FAVORED ENEMY II

Prerequisites: Character Level 4, Favored Enemy I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character’s bonuses do not stack; he simply uses whichever bonus is higher.

FLURRY OF BLOWS II

Prerequisites: Character Level 3, Flurry of Blows I.

Ability Type: Natural.

Class Levels: None.

Description: The character’s Flurry of Blows attack penalty lessens from -2 to -1.

IMPROVED UNCANNY DODGE

Prerequisites: Character Level 4, Uncanny Dodge.

Ability Type: Extraordinary.

Class Levels: Barbarian and Rogue.

Description: The character can no longer be flanked. This defense denies a rogue the ability to sneak attack the character by flanking him, unless the attacker has at least four more rogue class levels than the target has barbarian and rogue class levels.

INTUITIVE DEFENSE II

Prerequisites: Character Level 4, Intuitive Defense I.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +1 bonus to AC.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

PURITY OF BODY

Prerequisites: Character Level 4, Still Mind.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains immunity to all diseases except for supernatural and magical diseases.

SMITE CHAOS II

Prerequisites: Character Level 4, Smite Chaos I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos two times per day (instead of only once per day).

SMITE EVIL II

Prerequisites: Character Level 4, Smite Evil I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil two times per day (instead of only once per day).

SMITE GOOD II

Prerequisites: Character Level 4, Smite Good I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good two times per day (instead of only once per day).

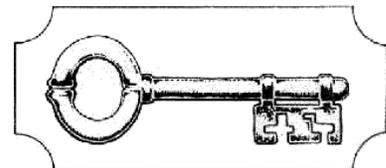

SMITE LAW II

Prerequisites: Character Level 4, Smite Law I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law two times per day (instead of only once per day).

SNEAK ATTACK III

Prerequisites: Character Level 4, Sneak Attack II.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 3d6 extra damage (instead of 2d6).

SPECIAL MOUNT

Prerequisites: Character Level 4, Aura of Alignment (Any).

Ability Type: Spell-Like.

Class Levels: Paladin.

Description: The character gains the service of an unusually intelligent, strong, and loyal steed to serve her in her crusade against evil (or goodness, law, or chaos). This mount is usually a heavy warhorse (for a Medium character) or a warpony (for a Small character).

Once per day, as a full-round action, the character may magically call her mount from the otherworldly realms in which it resides. This ability is the equivalent of a spell of a level equal to one-third the character's paladin class level. The mount immediately appears adjacent to the character and remains for 2 hours per paladin class level; it may be dismissed at any time as a free action. The mount is the same creature each time it is summoned, though the character may release a particular mount from service.

Each time the mount is called, it appears in full health, regardless of any damage it may have taken previously. The mount also appears wearing or carrying any gear it had when it was last dismissed. Calling a mount is a conjuration (calling) effect.

Should the character's mount die, it immediately disappears, leaving behind any equipment it was carrying. The character may not summon another mount for thirty days or until she gains a paladin class level, whichever comes first, even if the mount is somehow returned from the dead. During this thirty-day period, the character takes a -1 penalty on attack and weapon damage rolls.

WILD SHAPE I

Prerequisites: Character Level 4.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to turn herself into any Small or Medium animal and back again once per day. Her options for new forms include all creatures with the animal type. This ability functions like the alternate form special ability, except as noted here. The effect lasts for 1 hour per druid class level, or until she changes back. Changing form (to animal or back) is a standard action and doesn't provoke an attack of opportunity. Each time you use wild shape, you regain lost hit points as if you had rested for a night.

Any gear worn or carried by the character melds into the new form and becomes nonfunctional. When the character reverts to her true form, any objects previously melded into the new form reappear in the same location on her body that they previously occupied and are once again functional. Any new items worn in the assumed form fall off and land at the character's feet.

The form chosen must be that of an animal the character is familiar with.

The character loses her ability to speak while in animal form because she is limited to the sounds that a normal, untrained animal can

make, but she can communicate normally with other animals of the same general grouping as her new form. (The normal sound a wild parrot makes is a squawk, so changing to this form does not permit speech.)

The new form's Hit Dice can't exceed the character's druid class level.

WIZARDRY II

Prerequisites: Character Level 4, Wizardry I.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus feat. She can choose a metamagic feat, an item creation feat, or Spell Mastery. The character must still meet all prerequisites for a bonus feat, including caster level minimums. This feat does not count as a base feat for the purposes of level determination.

6TH-LEVEL SPECIAL ABILITIES

All 6th-Level Special Abilities have "Character Level 5" as a prerequisite.

BESTOW CURSE I

Prerequisites: Character Level 5, Aura of Alignment (Chaos).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, as the spell, once per week.

CAUSE DISEASE I

Prerequisites: Character Level 5, Aura of Alignment (Evil).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), once per week.

DEATH ATTACK

Prerequisites: Character Level 5, evil alignment, Disguise 4 ranks, Hide 8 ranks, Move Silently 8 ranks, the character must kill someone for no other reason than to become an assassin.

Ability Type: Natural.

Class Levels: Assassin.

Description: If the character studies his victim for 3 rounds and then makes a sneak attack with a melee weapon that successfully deals damage, the sneak attack has the additional effect of possibly either paralyzing or killing the target (character's choice). While studying the victim, the character can undertake other actions so long as his attention stays focused on the target and the target does not detect the character or recognize the character as an enemy. If the victim of such an attack fails a Fortitude save (DC 10 + the character's assassin class level + the character's Int modifier) against the kill effect, she dies. If the saving throw fails against the paralysis effect, the victim is rendered helpless and unable to act for 1d6 rounds plus 1 round per assassin class level of the character. If the victim's saving throw succeeds, the attack is just a normal sneak attack. Once the character has completed the 3 rounds of study, he must make the death attack within the next 3 rounds.

If a death attack is attempted and fails (the victim makes her save) or if the character does not launch the attack within 3 rounds of completing the study, 3 new rounds of study are required before he can attempt another death attack.

FIGHTING MASTERY IV

Prerequisites: Character Level 5, Fighting Mastery III.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

IMPROVED COMBAT STYLE: ARCHERY

Prerequisites: Character Level 5, Combat Style: Archery.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Manyshot feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

IMPROVED COMBAT STYLE: TWO-WEAPON

Prerequisites: Character Level 5, Combat Style: Two-Weapon.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Improved Two-Weapon Fighting feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

MARTIAL ARTS III: IMPROVED DISARM

Prerequisites: Character Level 5, any Martial Arts II special ability.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Improved Disarm as a bonus feat. This does not count as a base feat for the purposes of level determination.

MARTIAL ARTS III: IMPROVED TRIP

Prerequisites: Character Level 5, any Martial Arts II special ability.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Improved Trip as a bonus feat. This does not count as a base feat for the purposes of level determination.

POISON USE

Prerequisites: Character Level 5, evil alignment, Hide 5 ranks.

Ability Type: Natural.

Class Levels: None.

Description: The character is trained in the use of poison and can never risk accidentally poisoning himself when applying poison to a blade.

REMOVE CURSE I

Prerequisites: Character Level 5, Aura of Alignment (Law).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, as the spell, once per week.

REMOVE DISEASE I

Prerequisites: Character Level 5, Aura of Alignment (Good).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as the spell, once per week.

SLOW FALL II

Prerequisites: Character Level 5, Slow Fall I.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 30 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall I.

SPEED BONUS II

Prerequisites: Character Level 5, Speed Bonus I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +20 ft. This replaces the enhancement bonus granted by Speed Bonus I. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

SUGGESTION

Prerequisites: Character Level 5, Bardic Music, Inspire Competence, 9 or more ranks in Perform.

Ability Type: Spell-Like.

Class Levels: Bard.

Description: The character can make a suggestion (as the spell) to a creature that he has already fascinated. Using this ability does not break the character's concentration on the fascinate effect, nor does it allow a second saving throw against the fascinate effect.

Making a suggestion doesn't count against a character's daily limit on bardic music performances. A Will saving throw (DC 10 + ½ the character's bard class level + the character's Cha modifier) negates the effect. This ability affects only a single creature (but see mass suggestion, below). Suggestion is an enchantment (compulsion), mind-affecting, language dependent ability.

TERRAIN MASTERY I

Prerequisites: Character Level 5, Knowledge (geography) 8 ranks, Endurance feat.

Ability Type: Natural.

Class Levels: None.

Description: Choose one terrain type found below under Terrain Mastery Benefits. Terrain mastery gives the character a bonus on

checks involving a skill useful in that terrain, or some other appropriate benefit. The character also knows how to fight dangerous creatures typically found in that terrain, gaining a +1 insight bonus on attack rolls and damage rolls against creatures with that terrain mentioned in the Environment entry of their descriptions. The character only gains the bonus if the creature description specifically lists the terrain type.

Characters take their terrain mastery with them wherever they go. They retain their terrain mastery bonuses on skill checks, attack rolls, and damage rolls whether they're actually in the relevant terrain or not.

Terrain Mastery Benefits

Aquatic

You gain a +4 competence bonus on Swim checks, or a +10-foot bonus to your swim speed if you have one. You gain a +1 insight bonus on attack and damage rolls against aquatic creatures.

Desert

You resist effects that tire you. You are immune to fatigue, and anything that would cause you to become exhausted makes you fatigued instead. You gain a +1 insight bonus on attack and damage rolls against desert creatures.

Forest

You have a +4 competence bonus on Hide checks. You gain a +1 insight bonus on attack and damage rolls against forest creatures.

Hills

You gain a +4 competence bonus on Listen checks. You gain a +1 insight bonus on attack and damage rolls against hills creatures.

Marsh

You have a +4 competence bonus on Move Silently checks. You gain a +1 insight bonus on attack and damage rolls against marsh creatures.

Mountains

You gain a +4 competence bonus on Climb checks, or a +10-foot bonus to your climb speed if you have one. You gain a +1 insight bonus on attack and damage rolls against mountain creatures.

Plains

You have a +4 competence bonus on Spot checks. You gain a +1 insight bonus on attack and damage rolls against plains creatures.

Underground

You have 60-foot darkvision, or 120-foot darkvision if you already had darkvision from another source. You gain a +1 insight bonus on attack and damage rolls against underground creatures.

TRAP SENSE II

Prerequisites: Character Level 5, Trap Sense I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +2 bonus on Reflex saves made to avoid traps and a +2 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense I.

WILD SHAPE II

Prerequisites: Character Level 5, Wild Shape I.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape twice per day.

7TH-LEVEL SPECIAL ABILITIES

All 7th-Level Special Abilities have "Character Level 6" as a prerequisite.

DAMAGE REDUCTION I

Prerequisites: Character Level 6.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains Damage Reduction. Subtract 1 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

POISON RESISTANCE I

Prerequisites: Character Level 6, Poison Use.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +1 natural saving throw bonus to all poisons.

SNEAK ATTACK IV

Prerequisites: Character Level 6, Sneak Attack III.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 4d6 extra damage (instead of 3d6).

TERRAIN MASTERY II

Prerequisites: Character Level 6, Terrain Mastery I.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Terrain Mastery I. You gain the benefits of Terrain Mastery I for that terrain type as well.

WHOLENESS OF BODY

Prerequisites: Character Level 6, Purity of Body.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character can heal her own wounds. She can heal a number of hit points of damage equal to twice her current monk class level each day, and she can spread this healing out among several uses.

WILD SHAPE III

Prerequisites: Character Level 6, Wild Shape II.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape three times per day.

8TH-LEVEL SPECIAL ABILITIES

All 8th-Level Special Abilities have "Character Level 7" as a prerequisite.

CANNY DEFENSE

Prerequisites: Character Level 7, Base Attack Bonus +6, Perform 3 ranks, Tumble 5 ranks, Dodge feat, Mobility feat, and Weapon Finesse feat.

Ability Type: Extraordinary.

Class Levels: Duelist.

Description: When not wearing armor or using a shield, the character adds 1 point of Intelligence bonus (if any) per duelist class level to her Dexterity bonus to modify Armor Class while wielding a melee weapon. If the character is caught flat-footed or otherwise denied her Dexterity bonus, she also loses this bonus.

DEFENDER AC BONUS I

Prerequisites: Character Level 7, dwarf, lawful alignment, base attack bonus +7, Dodge feat, Endurance feat, Toughness feat.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives a +1 dodge bonus to Armor Class. Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

DEFENSIVE STANCE I

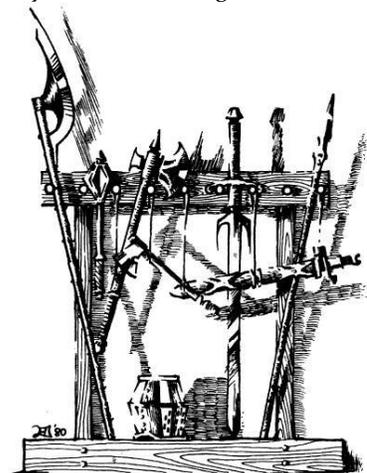

Prerequisites: Character Level 7, dwarf, lawful alignment, base attack

bonus +7, Dodge feat, Endurance feat, Toughness feat.

Ability Type: Natural.

Class Levels: None.

Description: When he adopts a defensive stance, the character gains phenomenal strength and durability, but he cannot move from the spot he is defending. He gains +2 to Strength, +4 to Constitution, a +2 resistance bonus on all saves, and a +4 dodge bonus to AC. The increase in Constitution increases the character's hit points by 2 points per level, but these hit points go away at the end of the defensive stance when the Constitution score drops back 4 points. These extra hit points are not lost first the way temporary hit points are. While in a defensive stance, the character cannot use skills or abilities that would require him to shift his position. A defensive stance lasts for a number of rounds equal to 3 + the character's (newly improved) Constitution modifier. The character may end his defensive stance voluntarily prior to this limit. At the end of the defensive stance, the character is winded and takes a -2 penalty to Strength for the duration of that encounter. The character can only use his defensive stance once per day as determined. Using the defensive stance takes no time itself, but the character can only do so during his action.

ENHANCE ARROW I

Prerequisites: Character Level 7, elf or half-elf, +6 base attack bonus, Point Blank Shot, Precise Shot, Weapon Focus (longbow or shortbow), ability to cast 1st-level arcane spells.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly becomes magical, gaining a +1 enhancement bonus. Unlike magic weapons created by normal means, the character need not spend experience points or gold pieces to accomplish this task. However, the character's magic arrows only function for her.

FIGHTING MASTERY V

Prerequisites: Character Level 7, Fighting Mastery IV.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

HIDE IN PLAIN SHADOW

Prerequisites: Character Level 7, Move Silently 8 ranks, Hide 10 ranks, Combat Reflexes feat, Dodge feat, Mobility feat.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can use the Hide skill even while being

observed. As long as she is within 10 feet of some sort of shadow, the character can hide herself from view in the open without anything to actually hide behind. She cannot, however, hide in her own shadow.

IMPROVED ALLY

Prerequisites: Character Level 7, Spell Focus (conjuration), ability to cast *lesser planar ally*.

Ability Type: Natural.

Class Levels: None.

Description: When the character casts a *planar ally* spell (including the lesser and greater versions), he makes a Diplomacy check to convince the creature to aid him for a reduced payment. If the character's Diplomacy check adjusts the creature's attitude to helpful the creature will work for 50% of the standard fee, as long as the task is one that is not against its nature.

The character's improved ally class feature only works when the planar ally shares at least one aspect of alignment with the thaumaturgist.

The character can have only one such ally at a time, but he may bargain for tasks from other planar allies normally.

INSPIRE COURAGE II

Prerequisites: Character Level 7, Inspire Courage I.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's Inspire Courage increase by 1 and is now +2. See Inspire Courage I for details.

LOREMASTER SECRET I

Prerequisites: Character Level 7, Knowledge (any two) 10 ranks each, any three metamagic or item creation feats, Skill Focus (Knowledge [any]), ability to cast seven different divination spells, one of which must be 3rd level or higher.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses one secret from the table below. Her loremaster class level plus Intelligence modifier determines the secrets from which she can choose. She can't choose the same secret twice.

TABLE 10: LOREMASTER SECRETS

Level + Int Modifier	Secret	Effect
1	Instant mastery	4 ranks of a skill in which the character has no ranks
2	Secret health	+3 hit points
3	Secrets of inner strength	+2 bonus on Will saves
4	The lore of true stamina	+2 bonus on Fortitude saves
5	Secret knowledge of avoidance	+2 bonus on Reflex saves
6	Weapon trick	+1 bonus on attack rolls
7	Dodge trick	+1 dodge bonus to AC
8	Applicable knowledge	Any feat
9	Newfound arcana	1 bonus 1st-level spell
10	More newfound arcana	1 bonus 2nd-level spell

RAGE III

Prerequisites: Character Level 7, non-lawful alignment, Rage II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage three times per day. See Rage I for details.

SLOW FALL III

Prerequisites: Character Level 7, Slow Fall II.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 40 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall II.

SWIFT TRACKER

Prerequisites: Character Level 7, Track special ability or Track feat.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can move at his normal speed while following tracks without taking the normal -5 penalty. He takes only a -10 penalty (instead of the normal -20) when moving at up to twice normal speed while tracking.

TERRAIN MASTERY III

Prerequisites: Character Level 7, Terrain Mastery II.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Terrain Mastery I. You gain the benefits of Terrain Mastery I for that terrain type as well.

UNARMED STRIKE III

Prerequisites: Character Level 7, Unarmed Strike II.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 1d8 damage with unarmed strikes, a medium character 1d10 damage, and a large character 2d8 damage.

WILD SHAPE: LARGE

Prerequisites: Character Level 7, Wild Shape III.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Large animal when using Wild Shape.

9TH-LEVEL SPECIAL ABILITIES

AUGMENT SUMMONING

Prerequisites: Character Level 8, Improved Ally.

Ability Type: Natural.

Class Levels: None.

Description: The character gains the Augment Summoning feat. This feat does not count as a base feat for the purposes of level determination.

BESTOW CURSE II

Prerequisites: Character Level 8, Aura of Alignment (Chaos), Bestow Curse I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, twice per week (instead of once per week).

CAUSE DISEASE II

Prerequisites: Character Level 8, Aura of Alignment (Evil), Cause Disease I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), twice per week (instead of once per week).

DARKVISION

Prerequisites: Character Level 8, Hide in Plain Shadow.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can see in the dark as though she were permanently under the effect of a *darkvision* spell.

FLURRY OF BLOWS III

Prerequisites: Character Level 8, Flurry of Blows II.

Ability Type: Natural.

Class Levels: None.

Description: The character's Flurry of Blows attack penalty disappears (i.e., becomes +0 instead of -1).

IMBUE ARROW

Prerequisites: Character Level 8, Enhance Arrow I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character gains the ability to place an area spell upon an arrow. When the arrow is fired, the spell's area is centered on where the arrow lands, even if the spell could normally be centered only on the caster. This ability allows the character to use the bow's range rather than the spell's range. It takes a standard action to cast the spell and fire the arrow. The arrow must be fired in the round the spell is cast, or the spell is wasted.

IMPROVED EVASION

Prerequisites: Character Level 8, Evasion.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's evasion ability improves. She still takes no damage on a successful Reflex saving throw against attacks, but henceforth she takes only half damage on a failed save. A helpless character does not gain the benefit of improved evasion.

IMPROVED REACTION I

Prerequisites: Character Level 8, Canny Defense.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +2 bonus on initiative checks. This bonus stacks with the benefit provided by the Improved Initiative feat.

INSPIRE GREATNESS

Prerequisites: Character Level 8, Suggestion, 12 or more ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use music or poetics to inspire greatness in himself or a single willing ally within 30 feet, granting him or her extra fighting capability. For every three bard class levels the bard attains beyond 9th, he can target one additional ally with a single use of this ability (two at 12th level, three at 15th, four at 18th). To inspire greatness, the character must sing and an ally must hear him sing. The effect lasts for as long as the ally hears the character sing and for 5 rounds thereafter. A

creature inspired with greatness gains 2 bonus Hit Dice (d10s), the commensurate number of temporary hit points (apply the target's Constitution modifier, if any, to these bonus Hit Dice), a +2 competence bonus on attack rolls, and a +1 competence bonus on Fortitude saves. The bonus Hit Dice count as regular Hit Dice for determining the effect of spells that are Hit Dice dependant. Inspire greatness is a mind-affecting ability.

POISON RESISTANCE II

Prerequisites: Character Level 8, Poison Use, Poison Resistance I.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +2 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance I.

RANGED LEGERDEMAIN I

Prerequisites: Character Level 8, non-lawful alignment, Decipher Script 7 ranks, Disable Device 7 ranks, Escape Artist 7 ranks, Knowledge (arcana) 4 ranks, ability to cast *mage hand*, ability to cast one arcane spell of 3rd level or higher.

Ability Type: Natural.

Class Levels: None.

Description: The character can perform one of the following skills at a range of 30 feet: Disable Device, Open Lock, or Sleight of Hand. Working at a distance increases the normal skill check DC by 5, and the character cannot take 10 on this check. Any object to be manipulated must weigh 5 pounds or less.

He can make only one ranged legerdemain skill check each day,

and only if he has at least 1 rank in the skill being used.

REMOVE CURSE II

Prerequisites: Character Level 8, Aura of Alignment (Law), Remove Curse I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, twice per week (instead of once per week).

REMOVE DISEASE II

Prerequisites: Character Level 8, Aura of Alignment (Good), Remove Disease I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as the spell, twice per week (instead of only once per week).

SNEAK ATTACK V

Prerequisites: Character Level 8, Sneak Attack IV.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 5d6 extra damage (instead of 4d6).

SPEED BONUS III

Prerequisites: Character Level 8, Speed Bonus II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her

speed of +30 ft. This replaces the enhancement bonus granted by Speed Bonus II. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TERRAIN MASTERY IV

Prerequisites: Character Level 8, Terrain Mastery III.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Terrain Mastery I. You gain the benefits of Terrain Mastery I for that terrain type as well.

TRAP SENSE III

Prerequisites: Character Level 8, Trap Sense II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +3 bonus on Reflex saves made to avoid traps and a +3 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense II.

VENOM IMMUNITY

Prerequisites: Character Level 8, Wild Shape: Large.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains immunity to all poisons.

10TH-LEVEL SPECIAL ABILITIES

DAMAGE REDUCTION II

Prerequisites: Character Level 9, Damage Reduction I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 1 point, for a new total of 2. Subtract 2 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

DEFENSIVE STANCE II

Prerequisites: Character Level 9, Defensive Stance I.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance twice per day (instead of only once per day).

ENHANCE ARROW II

Prerequisites: Character Level 9, Enhance Arrow I.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +2 enhancement bonus (instead of +1).

EXTEND SUMMONING

Prerequisites: Character Level 9, Improved Ally, Augment Summoning.

Ability Type: Natural.

Class Levels: None.

Description: All spells from the summoning subschool that the character casts have their durations doubled, as if the Extend Spell feat had been applied to them. The levels of the summoning spells don't change, however. This ability stacks with the effect of the Extend Spell feat, which does change the spell's level.

ENHANCED MOBILITY

Prerequisites: Character Level 9, Improved Reaction.

Ability Type: Extraordinary.

Class Levels: None.

Description: When wearing no armor and not using a shield, the character gains an additional +4 bonus to AC against attacks of opportunity caused when she moves out of a threatened square.

FAVORED ENEMY III

Prerequisites: Character Level 9, Favored Enemy II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

FIGHTING MASTERY VI

Prerequisites: Character Level 9, Fighting Mastery V.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

INTUITIVE DEFENSE III

Prerequisites: Character Level 9, Intuitive Defense II.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +2 bonus to AC. This bonus replaces the bonus to AC granted by Intuitive Defense II.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

KI STRIKE: LAWFUL

Prerequisites: Character Level 9, lawful alignment, Ki Strike: Magic.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's unarmed attacks are empowered with ki. Her unarmed attacks are treated as magic weapons and

lawful weapons for the purpose of dealing damage to creatures with damage reduction.

LOREMASTER SECRET II

Prerequisites: Character Level 9, Loremaster Secret I.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses another secret from **Table 10: Loremaster Secrets**.

ROGUE SPECIAL ABILITY I

Prerequisites: Character Level 9.

Ability Type: Varies (See Below).

Class Levels: None.

Description: The character gains a special ability of her choice from among the following options.

Crippling Strike (Ex)

A character with this ability can sneak attack opponents with such precision that her blows weaken and hamper them. An opponent damaged by one of her sneak attacks also takes 2 points of Strength damage. Ability points lost to damage return on their own at the rate of 1 point per day for each damaged ability.

Defensive Roll (Ex)

The character can roll with a potentially lethal blow to take less damage from it than she otherwise would. Once per day, when she would be reduced to 0 or fewer hit points by damage in combat (from a weapon or other blow, not a spell or special ability), the character can attempt to roll with the damage. To use this ability, the character must attempt a Reflex saving throw (DC = damage dealt). If the save succeeds, she takes only half damage from the blow; if it fails, she

takes full damage. She must be aware of the attack and able to react to it in order to execute her defensive roll—if she is denied her Dexterity bonus to AC, she can't use this ability. Since this effect would not normally allow a character to make a Reflex save for half damage, the character's evasion ability does not apply to the defensive roll.

Improved Evasion (Ex)

This ability works like evasion, except that while the character still takes no damage on a successful Reflex saving throw against attacks henceforth she takes only half damage on a failed save. A helpless character does not gain the benefit of improved evasion.

Opportunist (Ex)

Once per round, the character can make an attack of opportunity against an opponent who has just been struck for damage in melee by another character. This attack counts as the character's attack of opportunity for that round. Even a character with the Combat Reflexes feat can't use the opportunist ability more than once per round.

Skill Mastery

The character becomes so certain in the use of certain skills that she can use them reliably even under adverse conditions.

Upon gaining this ability, she selects a number of skills equal to 3 + her Intelligence modifier. When making a skill check with one of these skills, she may take 10 even if stress and distractions would normally prevent her from doing so. A character may gain this special ability multiple times, selecting additional skills for it to apply to each time.

Slippery Mind (Ex)

This ability represents the character's ability to wriggle free from magical effects that would otherwise control or compel her. If a character with slippery mind is affected by an enchantment spell or effect and fails her saving throw, she can attempt it again 1 round later at the same DC. She gets only this one extra chance to succeed on her saving throw.

Feat

A character may gain a bonus feat in place of a special ability. This feat does not count as a base feat for the purposes of level determination.

SHADOW ILLUSION

Prerequisites: Character Level 9, Hide in Plain Shadow, Darkvision.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can create visual illusions. This ability's effect is identical to that of the arcane spell *silent image* and may be employed once per day.

SLOW FALL IV

Prerequisites: Character Level 9, Slow Fall III.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 50 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall III.

SMITE CHAOS III

Prerequisites: Character Level 9, Smite Chaos II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos three times per day (instead of twice per day).

SMITE EVIL III

Prerequisites: Character Level 9, Smite Evil II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil three times per day (instead of twice per day).

SMITE GOOD III

Prerequisites: Character Level 9, Smite Good II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good three times per day (instead of twice per day).

SMITE LAW III

Prerequisites: Character Level 9, Smite Law II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law three times per day (instead of twice per day).

SUMMON SHADOW

Prerequisites: Character Level 9, Hide in Plain Shadow, Darkvision.

Ability Type: Supernatural.

Class Levels: Shadowdancer.

Description: The character can summon a shadow, an undead

shade. Unlike a normal shadow, this shadow's alignment matches that of the character, and the creature cannot create spawn. The summoned shadow cannot be turned, rebuked, or commanded by any third party. This shadow serves as a companion to the character and can communicate intelligibly with the character. Every third shadowdancer class level gained by the character adds +2 HD (and the requisite base attack and base save bonus increases) to her shadow companion.

If a shadow companion is destroyed, or the character chooses to dismiss it, the character must attempt a DC 15 Fortitude save. If the saving throw fails, the character loses 200 experience points per shadowdancer class level. A successful saving throw reduces the loss by half, to 100 XP per shadowdancer class level. The character's XP total can never go below zero as the result of a shadow's dismissal or destruction. A destroyed or dismissed shadow companion cannot be replaced for 30 days.

TERRAIN MASTERY V

Prerequisites: Character Level 9, Terrain Mastery IV.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Terrain Mastery I. You gain the benefits of Terrain Mastery I for that terrain type as well.

WILD SHAPE IV

Prerequisites: Character Level 9, Wild Shape III.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape four times per day.

WIZARDRY III

Prerequisites: Character Level 9, Wizardry II.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus feat. She can choose a metamagic feat, an item creation feat, or Spell Mastery. The character must still meet all prerequisites for a bonus feat, including caster level minimums.

11TH-LEVEL SPECIAL ABILITIES

BONUS LANGUAGE I

Prerequisites: Character Level 10, Loremaster Secret II.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a new language.

COMBAT STYLE MASTERY: ARCHERY

Prerequisites: Character Level 10, Improved Combat Style: Archery.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Improved Precise Shot feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

COMBAT STYLE MASTERY: TWO-WEAPON

Prerequisites: Character Level 10, Improved Combat Style: Two-Weapon.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Greater Two-Weapon Fighting feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

CONTINGENT CONJURATION

Prerequisites: Character Level 10, Extend Summoning.

Ability Type: Natural.

Class Levels: None.

Description: The character can prepare a summoning or calling spell ahead of time to be triggered by some other event. This functions as described for the contingency spell, including having the character cast the summoning or calling spell beforehand. The spell is cast instantly when the trigger event occurs.

The conditions needed to bring the spell into effect must be clear, although they can be general. If complicated or convoluted condition as are prescribed, the contingent conjuration may fail when triggered. The conjuration spell occurs based solely on the stated conditions, regardless of whether the thaumaturgist wants it to, although most conjurations can be dismissed normally. The character can have only one contingent conjuration active at a time.

DEFENDER AC BONUS II

Prerequisites: Character Level 10, Defender AC Bonus I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives an additional +1 dodge bonus to Armor Class. This bonus stacks with the dodge bonus granted by Defender AC Bonus I (for a new total of +2). Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

DIAMOND BODY

Prerequisites: Character Level 10, Wholeness of Body.

Ability Type: Supernatural.

Class Levels: None.

Description: The character gains immunity to poisons of all kinds.

FIENDISH SERVANT

Prerequisites: Character Level 10, evil alignment.

Ability Type: Spell-Like.

Class Levels: Blackguard.

Description: The character gains a fiendish servant. See the blackguard prestige class special ability in the System Reference Document for more details.

GRACE

Prerequisites: Character Level 10, Enhanced Mobility.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains an additional +2 competence bonus on all Reflex saving throws. This ability functions for the character only when she is wearing no armor and not using a shield.

GREATER FLURRY

Prerequisites: Character Level 10, Flurry of Blows III.

Ability Type: Natural.

Class Levels: None.

Description: In addition to the standard single extra attack the character gets from flurry of blows, she gets a second extra attack at her full base attack bonus.

GREATER RAGE

Prerequisites: Character Level 10, non-lawful alignment, Rage III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's bonuses to Strength and Constitution during his rage each increase to +6, and his morale bonus on Will saves increases to +3. The penalty to AC remains at -2.

IMPROMPTU SNEAK ATTACK I

Prerequisites: Character Level 10, non-lawful alignment, Decipher Script 7 ranks, Disable Device 7 ranks, Escape Artist 7 ranks, Knowledge (arcana) 4 ranks, ability to cast *mage hand*, ability to cast one arcane spell of 3rd level or higher..

Ability Type: Natural.

Class Levels: None.

Description: The character can declare one melee or ranged attack he makes to be a sneak attack (the target can be no more than 30 feet distant if the impromptu sneak attack is a ranged attack). The target of an impromptu sneak attack loses any Dexterity bonus to AC, but only against that attack. The power can be used against any target, but creatures that are not subject to critical hits take no extra damage (though they still lose any Dexterity bonus to AC against the attack). The character can use this ability once per day.

PLANAR TERRAIN MASTERY I

Prerequisites: Character Level 10, Terrain Mastery V.

Ability Type: Natural.

Class Levels: None.

Description: Choose one terrain type found below under Planar Terrain Mastery Benefits. Planar terrain mastery gives the character a bonus on checks involving a skill useful in that planar terrain, or some other appropriate benefit. The

character also knows how to fight dangerous creatures typically found in that planar terrain, gaining a +1 insight bonus on attack rolls and damage rolls against creatures with that terrain mentioned in the Environment entry of their descriptions. The character only gains the bonus if the creature description specifically lists the terrain type.

Characters take their planar terrain mastery with them wherever they go. They retain their planar terrain mastery bonuses on skill checks, attack rolls, and damage rolls whether they're actually in the relevant terrain or not.

Planar Terrain Mastery Benefits

Fiery (Planar)

This kind of planar terrain mastery provides you with resistance to fire 20. You gain a +1 insight bonus on attack and damage rolls against outsiders and elementals with the fire subtype.

Weightless (Planar)

You gain a +30-foot bonus to your fly speed on planes with no gravity or subjective gravity. You gain a +1 insight on attack and damage rolls against creatures native to the Astral Plane, the Elemental Plane of Air, and the Ethereal Plane.

Cold (Planar)

This kind of planar terrain mastery provides you with resistance to cold 20. You gain a +1 insight bonus on attack and damage rolls against outsiders and elementals with the cold subtype.

Shifting (Planar)

You instinctively anticipate shifts in the reality of the plane that bring you closer to your destination, giving you the spell-like ability to use dimension door (as the spell cast at your character level) once every 1d4 rounds. You gain a +1

insight bonus on attack and damage rolls against outsiders and elementals native to a shifting plane.

Aligned (Planar)

You have the instinctive ability to mimic the dominant alignment of the plane. You incur none of the penalties for having an alignment at odds with that of the plane, and spells and abilities that harm those of the opposite alignment don't affect you. You have the dominant alignment of the plane with regard to magic, but your behavior and any alignment-related Class Features you have are unaffected.

Cavernous (Planar)

You gain tremorsense with a 30-foot range.

Other (Planar)

If other planes are in use additional Planar Terrains can be created by the DM.

POISON RESISTANCE III

Prerequisites: Character Level 10, Poison Use, Poison Resistance II.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +3 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance II.

SEEKER ARROW

Prerequisites: Character Level 10, Enhance Arrow II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can launch an arrow once per day at a target known to her within range,

and the arrow travels to the target, even around corners. Only an unavoidable obstacle or the limit of the arrow's range prevents the arrow's flight. This ability negates cover and concealment modifiers, but otherwise the attack is rolled normally. Using this ability is a standard action (and shooting the arrow is part of the action).

SHADOW JUMP I

Prerequisites: Character Level 10, Shadow Illusion, Summon Shadow.

Ability Type: Supernatural.

Class Levels: None.

Description: The character gains the ability to travel between shadows as if by means of a *dimension door* spell. The limitation is that the magical transport must begin and end in an area with at least some shadow. The character can jump up to a total of 20 feet each day in this way; this may be a single jump of 20 feet or two jumps of 10 feet each.

SNEAK ATTACK VI

Prerequisites: Character Level 10, Sneak Attack V.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 6d6 extra damage (instead of 5d6).

WILD SHAPE: TINY

Prerequisites: Character Level 10, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Tiny animal when using Wild Shape.

12TH-LEVEL SPECIAL ABILITIES

ABUNDANT STEP

Prerequisites: Character Level 11, Diamond Body.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character can slip magically between spaces, as if using the spell *dimension door*, once per day. Her caster level for this effect is one-half her monk class level (rounded down).

BESTOW CURSE III

Prerequisites: Character Level 11, Aura of Alignment (Chaos), Bestow Curse II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, three times per week (instead of twice per week).

CAUSE DISEASE III

Prerequisites: Character Level 11, Aura of Alignment (Evil), Cause Disease II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), three times per week (instead of twice per week).

DEFENSIVE STANCE III

Prerequisites: Character Level 11, Defensive Stance II.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance three times per day (instead of twice per day).

ENHANCE ARROW III

Prerequisites: Character Level 11, Enhance Arrow II.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +3 enhancement bonus (instead of +2).

FIGHTING MASTERY VII

Prerequisites: Character Level 11, Fighting Mastery VI.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document.

The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

LOREMASTER SECRET III

Prerequisites: Character Level 11, Loremaster Secret II.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses another secret from **Table 10: Loremaster Secrets**.

PLANAR COHORT

Prerequisites: Character Level 11, Contingent Conjunction.

Ability Type: Natural.

Class Levels: None.

Description: The character can use any of the planar ally spells to call a creature to act as his cohort. The called creature serves loyally and well as long as the character continues to advance a cause important to the creature.

To call a planar cohort, the character must cast the relevant spell, paying the XP costs normally. It takes an offering of 1,000 gp × the HD of the creature to convince it to serve as a planar cohort, and the improved ally class feature can't be used to reduce or eliminate this cost. The planar cohort can't have more Hit Dice than the character has, and must have an ECL no higher than the thaumaturgist's character level -2.

The character can have only one planar cohort at a time, but he can continue to make agreements with other called creatures normally. A planar cohort replaces the character's existing cohort, if he has one by virtue of the Leadership feat.

PLANAR TERRAIN MASTERY II

Prerequisites: Character Level 11, Planar Terrain Mastery I.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Planar Terrain Mastery I. You gain the benefits of Planar Terrain Mastery I for that terrain type as well.

PRECISE STRIKE I

Prerequisites: Character Level 11, Grace.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains the ability to strike precisely with a light or one-handed piercing weapon, gaining an extra 1d6 damage added to her normal damage roll.

When making a precise strike, the character cannot attack with a weapon in her other hand or use a shield. The character's precise strike only works against living creatures with discernible anatomies. Any creature that is immune to critical hits is not vulnerable to a precise strike, and any item or ability that protects a creature from critical hits also protects a creature from a precise strike.

RAGE IV

Prerequisites: Character Level 11, non-lawful alignment, Rage III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage four times per day. See Rage I for details.

REMOVE CURSE III

Prerequisites: Character Level 11, Aura of Alignment (Law), Remove Curse II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, three times per week (instead of two times per week).

REMOVE DISEASE III

Prerequisites: Character Level 11, Aura of Alignment (Good), Remove Disease II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as the spell, three times per week (instead of twice per week).

SLOW FALL V

Prerequisites: Character Level 11, Slow Fall IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 60 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall IV.

SONG OF FREEDOM

Prerequisites: Character Level 11, Inspire Greatness, 15 or more ranks in Perform.

Ability Type: Spell-Like.

Class Levels: Bard.

Description: The character can use music or poetics to create an effect equivalent to the *break enchantment* spell (caster level equals the character's bard class level). Using this ability requires 1 minute of uninterrupted concentration and music, and it functions on a single target within 30 feet. The character can't use song of freedom on himself.

SPEED BONUS IV

Prerequisites: Character Level 11, Speed Bonus III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +40 ft. This replaces the enhancement bonus granted by Speed Bonus III. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TRAP SENSE IV

Prerequisites: Character Level 11, Trap Sense III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +4 bonus on Reflex saves made to avoid traps and a +4 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense III.

UNARMED STRIKE IV

Prerequisites: Character Level 11, Unarmed Strike III.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in

damage. A small character now deals 1d10 damage with unarmed strikes, a medium character 2d6 damage, and a large character 3d6 damage.

WILD SHAPE: PLANT

Prerequisites: Character Level 11, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character is able to use wild shape to change into a plant creature with the same size restrictions as for animal forms. (The character can't use this ability to take the form of a plant that isn't a creature.)

13TH-LEVEL SPECIAL ABILITIES

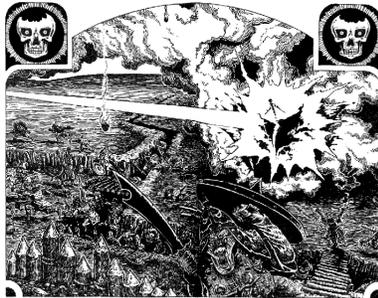

A THOUSAND FACES

Prerequisites: Character Level 12, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to change her appearance at will, as if using the *disguise self* spell, but only while in her normal form. This affects the character's body but not her possessions. It is not an illusory effect, but a minor physical alteration of the character's appearance, within the limits described for the spell.

ACROBATIC CHARGE

Prerequisites: Character Level 12, Precise Strike.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains the ability to charge in situations where others cannot. She may charge over difficult terrain that normally slows movement. Depending on the circumstance, she may still need to make appropriate checks to successfully move over the terrain.

DAMAGE REDUCTION III

Prerequisites: Character Level 12, Damage Reduction II or Defensive Stance III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains damage reduction 3/-. This damage reduction replaces the damage reduction gained from Damage Reduction I and Damage Reduction II. Subtract 3 from the damage the

character takes each time he is dealt damage from a weapon or a natural attack.

CAMOUFLAGE

Prerequisites: Character Level 12.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can use the Hide skill in any sort of natural terrain, even if the terrain doesn't grant cover or concealment.

DIAMOND SOUL

Prerequisites: Character Level 12, Abundant Step.

Ability Type: Extraordinary.

Class Levels: Monk.

Description: The character gains spell resistance equal to her current monk class level + 10. In order to affect the character with a spell, a spellcaster must get a result on a caster level check (1d20 + caster level) that equals or exceeds the character's spell resistance.

GREATER LORE

Prerequisites: Character Level 12, Loremaster Secret III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains the ability to understand magic items, as with the *identify* spell.

PHASE ARROW

Prerequisites: Character Level 12, Enhance Arrow III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can launch an arrow once per day at a target known to her within range, and the arrow travels to the target in a straight path, passing through any nonmagical barrier or wall in its way. (Any magical barrier stops the arrow.) This ability negates cover, concealment, and even armor modifiers, but otherwise the attack is rolled normally.

Using this ability is a standard action (and shooting the arrow is part of the action).

PLANAR TERRAIN MASTERY III

Prerequisites: Character Level 12, Planar Terrain Mastery II.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Planar Terrain Mastery I. You gain the benefits of Planar Terrain Mastery I for that terrain type as well.

POISON RESISTANCE IV

Prerequisites: Character Level 12, Poison Use, Poison Resistance III.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +4 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance III.

RANGED LEGERDEMAIN II

Prerequisites: Character Level 12, non-lawful alignment, Ranged Legerdemain I.

Ability Type: Natural.

Class Levels: None.

Description: The character can now make two ranged legerdemain skill checks each day. See details under Ranged Legerdemain I.

ROGUE SPECIAL ABILITY II

Prerequisites: Character Level 12, Rogue Special Ability I.

Ability Type: Varies (See Below).

Class Levels: None.

Description: The character gains another special ability of her choice from among those listed under Rogue Special Ability I.

SHADOW JUMP II

Prerequisites: Character Level 12, Shadow Jump I.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can now shadow jump up to a total of 40 feet each day in this way; this may be a single jump of 40 feet, two jumps of 20 feet each, four jumps of 10 feet each, etc.

SNEAK ATTACK VII

Prerequisites: Character Level 12, Sneak Attack VI.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 7d6 extra damage (instead of 6d6).

14TH-LEVEL SPECIAL ABILITIES

DEFENDER AC BONUS III

Prerequisites: Character Level 13, Defender AC Bonus II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives an additional +1 dodge bonus to Armor Class. This bonus stacks with the dodge bonuses granted by previous Defender AC Bonus special abilities (for a new total of +3). Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

DEFENSIVE STANCE IV

Prerequisites: Character Level 13, Defensive Stance III, Damage Reduction III.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance four times per day (instead of three times per day).

ELABORATE PARRY

Prerequisites: Character Level 13, Acrobatic Charge.

Ability Type: Extraordinary.

Class Levels: Duelist.

Description: If the character chooses to fight defensively or use total defense in melee combat, she gains an additional +1 dodge bonus to AC for each class level of duelist she has.

ENHANCE ARROW IV

Prerequisites: Character Level 13, Enhance Arrow III.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +4 enhancement bonus (instead of +3).

FIGHTING MASTERY VIII

Prerequisites: Character Level 13, Fighting Mastery VII.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

HIEROPHANT SPECIAL ABILITY I

Prerequisites: Character Level 13, Knowledge (religion) 15 ranks, any metamagic feat, ability to cast 7th-level divine spells.

Ability Type: Varies.

Class Levels: None.

Description: The character gains a special ability of his choice from among the following.

Blast Infidel (Su)

The character can use negative energy spells to their maximum effect on creatures with an alignment opposed to the character. Any spell with a description that

involves inflicting or channeling negative energy cast on a creature of the opposed alignment works as if under the effect of a Maximize Spell feat (without using a higher-level spell slot). Undead affected by this ability heal the maximized amount of damage.

Divine Reach (Su)

A character with this ability can use touch spells on targets up to 30 feet away. If the spell requires a melee touch attack, the character must make a ranged touch attack instead. Divine reach can be selected a second time as a special ability, in which case the range increases to 60 feet.

Faith Healing (Su)

The character can use healing spells to their maximum effect on creatures of the same alignment as the character (including the character himself). Any spell with the healing descriptor cast on such creatures works as if under the effects of a Maximize Spell feat (without using a higher-level spell slot).

Gift of the Divine (Su)

Available only to characters with cleric class or spellcaster levels, this ability allows the character to transfer one or more uses of his turn undead ability to a willing creature. (Characters who rebuke undead transfer uses of rebuke undead instead.) The transfer lasts anywhere from 24 hours to one week (chosen at the time of transfer), and while the transfer is in effect, the number of turning attempts per day allowed to the character is reduced by the number transferred. The recipient turns undead as a cleric of the character's cleric class level but uses her own Charisma modifier.

Mastery of Energy (Su)

Available only to characters with cleric class or spellcaster levels, this

ability allows the character to channel positive or negative energy much more effectively, increasing his ability to affect undead. Add a +4 bonus to the character's turning checks and turning damage rolls. This ability only affects undead, even if the character can turn other creatures, such as with a granted power of a domain.

Metamagic Feat

The character can choose a metamagic feat in place of one of the special abilities described here if desired.

Power of Nature (Su)

Available only to characters with druid class or spellcasting levels, this ability allows the character to temporarily transfer one or more of his druid special abilities (those appearing in the druid basic class description in the System Reference Document) to a willing creature. The transfer lasts anywhere from 24 hours to one week (chosen at the time of transfer), and while the transfer is in effect, the character cannot use the transferred power. He can transfer any of his druid powers except spellcasting and the ability to have an animal companion.

The wild shape ability can be partially or completely transferred. The character chooses how many uses of wild shape per day to give to transfer and retains the rest of the uses for himself. If the character can assume the form of Tiny or Huge animals, the recipient can as well.

As with the imbue with spell ability spell, the character remains responsible to his deity for any use to which the recipient puts the transferred abilities.

Spell Power

This special ability increases the character's effective caster level by 1 for purposes of determining level-dependent spell variables and for

caster level checks. This ability can be selected more than once, and changes to effective caster level are cumulative.

Spell-Like Ability

A character who selects this special ability can use one of his divine spell slots (or an appropriate number of spell points) to permanently prepare one of his divine spells as a spell-like ability that can be used twice per day. The character does not use any components when casting the spell, although a spell that costs XP to cast still does so, and a spell with a costly material component instead costs him 10 times that amount in XP.

The spell normally uses a spell slot of the spell's level (or higher, if the character chooses to permanently attach a metamagic feat to the spell chosen). The character can use an available higher-level spell slot to use the spell-like ability more than twice per day. Allocating a slot three levels higher allows him to cast the spell four times per day, and a slot six levels higher lets him cast it six times per day. If selected more than one time as a special ability, this ability can apply to the same spell (increasing the number of times per day it can be used) or to a different spell.

HIGH ARCANA I

Prerequisites: Character Level 13, Knowledge (arcana) 15 ranks, Spellcraft 15 ranks, Skill Focus (Spellcraft), Spell Focus in two schools of magic, ability to cast 7th-

level arcane spells, knowledge of 5th-level or higher spells from at least five schools.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains the opportunity to select a special ability from among those described below by permanently eliminating one existing spell slot (she cannot eliminate a spell slot of higher level than the highest-level spell she can cast). Each special ability has a minimum required spell slot level, as specified in its description.

The character may choose to eliminate a spell slot of a higher level than that required to gain a type of high arcana.

Arcane Fire (Su)

The character gains the ability to change arcane spell energy into arcane fire, manifesting it as a bolt of raw magical energy. The bolt is a ranged touch attack with long range (400 feet + 40 feet/class level of archmage) that deals 1d6 points of damage per class level of the archmage plus 1d6 points of damage per level of the spell used to create the effect. This ability costs one 9th-level spell slot.

Arcane Reach (Su)

The character can use spells with a range of touch on a target up to 30 feet away. The character must make a ranged touch attack. Arcane reach can be selected a second time as a special ability, in which case the range increases to 60 feet. This ability costs one 7th-level spell slot.

Mastery of Counterspelling

When the character counterspells a spell, it is turned back upon the caster as if it were fully affected by a spell turning spell. If the spell cannot be affected by spell turning, then it is merely counterspelled.

This ability costs one 7th-level spell slot.

Mastery of Elements

The character can alter an arcane spell when cast so that it utilizes a different element from the one it normally uses. This ability can only alter a spell with the acid, cold, fire, electricity, or sonic descriptor. The spell's casting time is unaffected. The caster decides whether to alter the spell's energy type and chooses the new energy type when he begins casting. This ability costs one 8th-level spell slot.

Mastery of Shaping

The character can alter area and effect spells that use one of the following shapes: burst, cone, cylinder, emanation, or spread. The alteration consists of creating spaces within the spell's area or effect that are not subject to the spell. The minimum dimension for these spaces is a 5-foot cube. Furthermore, any shapeable spells have a minimum dimension of 5 feet instead of 10 feet. This ability costs one 6th-level spell slot.

Spell Power

This ability increases the character's effective caster level by +1 (for purposes of determining level-dependent spell variables such as damage dice or range, and caster level checks only). This ability costs one 5th-level spell slot.

Spell-Like Ability

A character who selects this type of high arcana can use one of her arcane spell slots (other than a slot expended to learn this or any other type of high arcana) to permanently prepare one of her arcane spells as a spell-like ability that can be used twice per day. The character does not use any components when casting the spell, although a spell that costs XP to cast still does so and a spell with a costly material component instead costs her 10

times that amount in XP. This ability costs one 5th-level spell slot.

The spell-like ability normally uses a spell slot of the spell's level, although the character can choose to make a spell modified by a metamagic feat into a spell-like ability at the appropriate spell level.

The character may use an available higher-level spell slot in order to use the spell-like ability more often. Using a slot three levels higher than the chosen spell allows her to use the spell-like ability four times per day, and a slot six levels higher lets her use it six times per day.

If spell-like ability is selected more than one time as a high arcana choice, this ability can apply to the same spell chosen the first time (increasing the number of times per day it can be used) or to a different spell.

INDOMITABLE WILL

Prerequisites: Character Level 13, non-lawful alignment, Greater Rage.

Ability Type: Extraordinary.

Class Levels: None.

Description: While in a rage, the character gains a +4 bonus on Will saves to resist enchantment spells. This bonus stacks with all other modifiers, including the morale bonus on Will saves he also receives during his rage.

INSPIRE COURAGE III

Prerequisites: Character Level 13, Song of Freedom.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's Inspire Courage increases by 1 and is now +3. See Inspire Courage I for details.

LOREMASTER SECRET IV

Prerequisites: Character Level 13, Loremaster Secret III.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses another secret from **Table 10: Loremaster Secrets**.

PLANAR TERRAIN MASTERY IV

Prerequisites: Character Level 13, Planar Terrain Mastery III.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Planar Terrain Mastery I. You gain the benefits of Planar Terrain Mastery I for that terrain type as well.

SLOW FALL VI

Prerequisites: Character Level 13, Slow Fall V.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 70 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall V.

WILD SHAPE V

Prerequisites: Character Level 13, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape five times per day.

15TH-LEVEL SPECIAL ABILITIES

BESTOW CURSE IV

Prerequisites: Character Level 14, Aura of Alignment (Chaos), Bestow Curse III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, four times per week (instead of three times per week).

BONUS LANGUAGE II

Prerequisites: Character Level 14, Loremaster Secret IV.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a new language.

CAUSE DISEASE IV

Prerequisites: Character Level 14, Aura of Alignment (Evil), Cause Disease III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), four times per week (instead of three times per week).

FAVORED ENEMY IV

Prerequisites: Character Level 14, Favored Enemy III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

HAIL OF ARROWS

Prerequisites: Character Level 14, Enhance Arrow IV.

Ability Type: Spell-Like.

Class Levels: Arcane Archer.

Description: In lieu of her regular attacks, once per day the character can fire an arrow at each and every target within range, to a maximum

of one target for every arcane archer class level. Each attack uses the character's primary attack bonus, and each enemy may only be targeted by a single arrow.

HIEROPHANT SPECIAL ABILITY II

Prerequisites: Character Level 14, Hierophant Special Ability I.

Ability Type: Varies.

Class Levels: None.

Description: The character gains another special ability of his choice from among those listed under Hierophant Special Ability I.

HIGH ARCANA II

Prerequisites: Character Level 14, High Arcana I.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains another special ability listed under High Arcana I.

IMPROMPTU SNEAK ATTACK II

Prerequisites: Character Level 14, non-lawful alignment, Impromptu Sneak Attack I.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use impromptu sneak attack twice per day.

IMPROVED REACTION II

Prerequisites: Character Level 14, Improved Reaction I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's bonus from Improved Reaction I increases to +4. This replaces the bonus gained from Improved Reaction I. This bonus stacks with the benefit provided by the Improved Initiative feat.

INSPIRE HEROICS

Prerequisites: Character Level 14, Inspire Courage III, 18 or more ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use music or poetics to inspire tremendous heroism in himself or a single willing ally within 30 feet. For every three bard class levels the character attains beyond 15th, he can inspire heroics in one additional creature. To inspire heroics, the character must sing and an ally must hear the character sing for a full round. A creature so inspired gains a +4 morale bonus on saving throws and a +4 dodge bonus to AC. The effect lasts for as long as the ally hears the character sing and for up to 5 rounds thereafter. Inspire heroics is a mind-affecting ability.

INTUITIVE DEFENSE IV

Prerequisites: Character Level 14, Intuitive Defense III.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +3 bonus to AC. This bonus replaces the bonus to AC granted by Intuitive Defense III.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or

when she carries a medium or heavy load.

MOBILE DEFENSE

Prerequisites: Character Level 14, Defensive Stance IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can adjust his position while maintaining a defensive stance. While in a defensive stance, he can take one 5-foot step each round without losing the benefit of the stance.

PLANAR TERRAIN MASTERY V

Prerequisites: Character Level 14, Planar Terrain Mastery IV.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Planar Terrain Mastery I. You gain the benefits of Planar Terrain Mastery I for that terrain type as well.

POISON RESISTANCE V

Prerequisites: Character Level 14, Poison Use, Poison Resistance IV.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +5 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance IV.

QUIVERING PALM

Prerequisites: Character Level 14, Ki Strike: Lawful, Diamond Soul.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character can set up vibrations within the body of another creature that can thereafter be fatal if the character so desires. She can use this quivering palm attack once a week, and she must announce her intent before making her attack roll. Constructs, oozes, plants, undead, incorporeal creatures, and creatures immune to critical hits cannot be affected. Otherwise, if the character strikes successfully and the target takes damage from the blow, the quivering palm attack succeeds. Thereafter the character can try to slay the victim at any later time, as long as the attempt is made within a number of days equal to her monk class level. To make such an attempt, the character merely wills the target to die (a free action), and unless the target makes a Fortitude saving throw (DC 10 + ½ the character's monk class level + the character's Wis modifier), it dies. If the saving throw is successful, the target is no longer in danger from that particular quivering palm attack, but it may still be affected by another one at a later time.

REMOVE CURSE IV

Prerequisites: Character Level 14, Aura of Alignment (Law), Remove Curse III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, four times per week (instead of three times per week).

REMOVE DISEASE IV

Prerequisites: Character Level 14, Aura of Alignment (Good), Remove Disease III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as the spell, four times per week (instead of three times per week).

SHADOW JUMP III

Prerequisites: Character Level 14, Shadow Jump II.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can now shadow jump up to a total of 80 feet each day in this way; this may be a single jump of 80 feet, two jumps of 40 feet each, four jumps of 20 feet each, etc.

SMITE CHAOS IV

Prerequisites: Character Level 14, Smite Chaos III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos four times per day (instead of three times per day).

SMITE EVIL IV

Prerequisites: Character Level 14, Smite Evil III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil four times per day (instead of three times per day).

SMITE GOOD IV

Prerequisites: Character Level 14, Smite Good III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good four times per day (instead of three times per day).

SMITE LAW IV

Prerequisites: Character Level 14, Smite Law III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law four times per day (instead of three times per day).

SMITE EVIL IV

Prerequisites: Character Level 14, Smite Evil III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil four times per day (instead of three times per day).

SNEAK ATTACK VIII

Prerequisites: Character Level 14, Sneak Attack VII.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 8d6 extra damage (instead of 7d6).

SPEED BONUS V

Prerequisites: Character Level 14, Speed Bonus IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +50 ft. This replaces the enhancement bonus granted by Speed Bonus IV. If the character is

in armor or carrying a medium or heavy load, she loses this extra speed.

TIMELESS BODY: DRUIDIC

Prerequisites: Character Level 14, Wild Shape V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character no longer takes ability score penalties for aging and cannot be magically aged. Any penalties she may have already incurred, however, remain in place.

Bonuses still accrue, and the character still dies of old age when her time is up.

TRAP SENSE V

Prerequisites: Character Level 14, Trap Sense IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +5 bonus on Reflex saves made to avoid traps and a +5 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense IV.

WILD SHAPE: HUGE

Prerequisites: Character Level 14, Wild Shape V.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Huge animal when using Wild Shape.

WIZARDRY IV

Prerequisites: Character Level 14, Wizardry III.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus feat. She can choose a metamagic feat, an item creation feat, or Spell Mastery. The character must still meet all prerequisites for a bonus feat, including caster level minimums.

16TH-LEVEL SPECIAL ABILITIES

DAMAGE REDUCTION IV

Prerequisites: Character Level 15, Damage Reduction III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 1 point, for a new total of 4. Subtract 4 from the damage the character takes

each time he is dealt damage from a weapon or a natural attack.

DEFENSIVE STANCE V

Prerequisites: Character Level 15, Mobile Defense.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance five times per day (instead of four times per day).

DEFLECT ARROWS: DUELIST

Prerequisites: Character Level 15, Elaborate Parry.

Ability Type: Natural.

Class Levels: None.

Description: The character gains the benefit of the Deflect Arrows feat when using a light or one-handed piercing weapon.

ENHANCE ARROW V

Prerequisites: Character Level 15, Enhance Arrow IV.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +5 enhancement bonus (instead of +4).

FIGHTING MASTERY IX

Prerequisites: Character Level 15, Fighting Mastery VIII.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the

feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

HIEROPHANT SPECIAL ABILITY III

Prerequisites: Character Level 15, Hierophant Special Ability II.

Ability Type: Varies.

Class Levels: None.

Description: The character gains another special ability of his choice from among those listed under Hierophant Special Ability I.

HIGH ARCANA III

Prerequisites: Character Level 15, High Arcana II.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains another special ability listed under High Arcana I.

LOREMASTER SECRET V

Prerequisites: Character Level 15, Loremaster Secret IV.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses another secret from **Table 10: Loremaster Secrets**.

KI STRIKE: ADAMANTITE

Prerequisites: Character Level 15, Ki Strike: Lawful.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's unarmed attacks are empowered with ki. Her unarmed attacks are treated as magic weapons and lawful weapons for the purpose of dealing damage to creatures with damage reduction. Also, her unarmed attacks are treated as adamantite weapons for the purpose of dealing damage to creatures with damage reduction and bypassing hardness.

RAGE V

Prerequisites: Character Level 15, non-lawful alignment, Rage IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage five times per day. See Rage I for details.

ROGUE SPECIAL ABILITY III

Prerequisites: Character Level 15, Rogue Special Ability II.

Ability Type: Varies (See Below).

Class Levels: None.

Description: The character gains yet another special ability of her choice from among those listed under Rogue Special Ability I.

SLOW FALL VII

Prerequisites: Character Level 15, Slow Fall VI.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 80 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall VI.

UNARMED STRIKE V

Prerequisites: Character Level 15, Unarmed Strike IV.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 2d6 damage with unarmed strikes, a medium character 2d8 damage, and a large character 3d8 damage.

WILD SHAPE: ELEMENTAL I

Prerequisites: Character Level 15, Wild Shape V.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character able to use wild shape to change into a Small, Medium, or Large elemental (air, earth, fire, or water) once per day. These elemental forms are in addition to her normal wild shape usage. In addition to the normal effects of wild shape, the character gains all the elemental's extraordinary, supernatural, and spell-like abilities. She also gains the elemental's feats for as long as she maintains the wild shape, but she retains her own creature type.

17TH-LEVEL SPECIAL ABILITIES

ARROW OF DEATH

Prerequisites: Character Level 16,

Enhance Arrow V.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can create an arrow of death that forces the target, if damaged by the arrow's attack, to make a DC 20 Fortitude save or be slain immediately. It takes one day to make an arrow of death, and the arrow only functions for the character who created it. The arrow of death lasts no longer than one year, and the character can only have one such arrow in existence at a time.

DAMAGE REDUCTION VI

Prerequisites: Character Level 16, Defensive Stance V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 3 points, for a new total of 6. Subtract 6 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

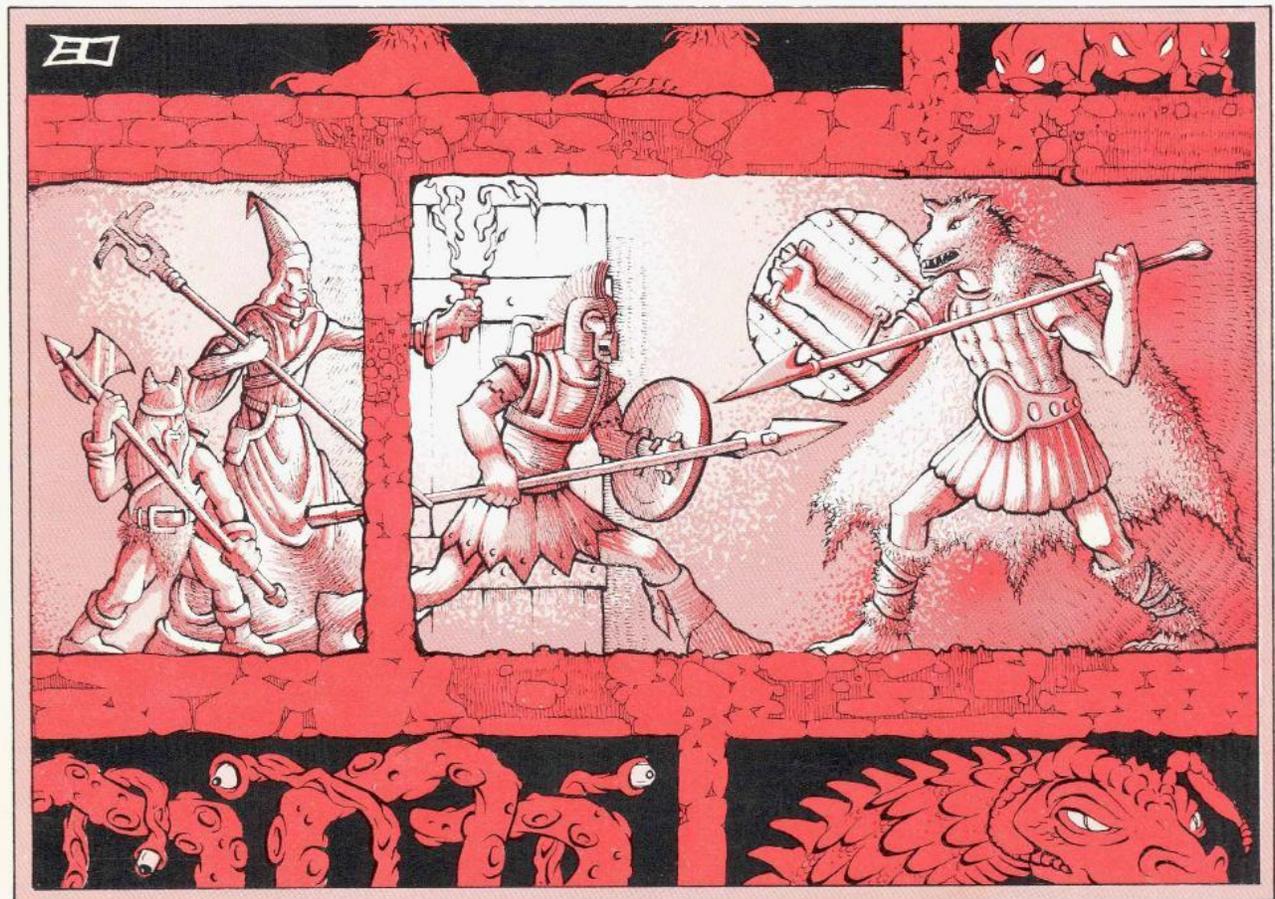

DEFENDER AC BONUS IV

Prerequisites: Character Level 16, Defender AC Bonus III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives an additional +1 dodge bonus to Armor Class. This bonus stacks with the dodge bonuses granted by previous Defender AC Bonus special abilities (for a new total of +4). Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

PRECISE STRIKE II

Prerequisites: Character Level 16, Precise Strike I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage bonus from a precise strike increases to +2d6. This bonus replaces the bonus granted by Precise Strike I.

HIDE IN PLAIN SIGHT

Prerequisites: Character Level 16, Camouflage.

Ability Type: Extraordinary.

Class Levels: None.

Description: While in any sort of natural terrain, the character can use the Hide skill even while being observed.

HIEROPHANT SPECIAL ABILITY IV

Prerequisites: Character Level 16, Hierophant Special Ability III.

Ability Type: Varies.

Class Levels: None.

Description: The character gains another special ability of his choice from among those listed under Hierophant Special Ability I.

HIGH ARCANA IV

Prerequisites: Character Level 16, High Arcana III.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains another special ability listed under High Arcana I.

RANGED LEGERDEMAIN III

Prerequisites: Character Level 16, non-lawful alignment, Ranged Legerdemain II.

Ability Type: Natural.

Class Levels: None.

Description: The character can now make three ranged legerdemain skill checks each day. See details under Ranged Legerdemain I.

SHADOW JUMP IV

Prerequisites: Character Level 16, Shadow Jump III.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can now shadow jump up to a total of 160 feet each day in this way; this may be a single jump of 160 feet, two jumps of 80 feet each, four jumps of 40 feet each, eight jumps of 20 feet each, etc.

SNEAK ATTACK IX

Prerequisites: Character Level 16, Sneak Attack VIII.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 9d6 extra damage (instead of 8d6).

TIMELESS BODY; ASCETIC

Prerequisites: Character Level 16, Diamond Soul.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character no longer takes penalties to her ability

scores for aging and cannot be magically aged. Any such penalties that she has already taken, however, remain in place. Bonuses still accrue, and the character still dies of old age when her time is up.

TIRELESS RAGE

Prerequisites: Character Level 16, non-lawful alignment, Indomitable Will.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character no longer becomes fatigued at the end of his rage.

TONGUE OF THE SUN AND THE MOON

Prerequisites: Character Level 16, Diamond Soul.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can speak with any living creature.

TRUE LORE

Prerequisites: Character Level 16, Loremaster Secret V.

Ability Type: Extraordinary.

Class Levels: None.

Description: Once per day the character can use her knowledge to gain the effect of a *legend lore* spell or an *analyze dweomer* spell.

18TH-LEVEL SPECIAL ABILITIES

BESTOW CURSE V

Prerequisites: Character Level 17, Aura of Alignment (Chaos), Bestow Curse IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, five times per week (instead of four times per week).

CAUSE DISEASE V

Prerequisites: Character Level 17, Aura of Alignment (Evil), Cause Disease IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), five times per week (instead of four times per week).

FIGHTING MASTERY X

Prerequisites: Character Level 17, Fighting Mastery IX.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

HIEROPHANT SPECIAL ABILITY V

Prerequisites: Character Level 17, Hierophant Special Ability IV.

Ability Type: Varies.

Class Levels: None.

Description: The character gains another special ability of his choice from among those listed under Hierophant Special Ability I.

HIGH ARCANA V

Prerequisites: Character Level 17, High Arcana IV.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains another special ability listed under High Arcana I.

MASS SUGGESTION

Prerequisites: Character Level 17, Inspire Heroics, 18 or more ranks in Perform.

Ability Type: Spell-Like.

Class Levels: None.

Description: This special ability functions like Suggestion, above, except that the character can make the suggestion simultaneously to any number of creatures that he has already fascinated. Mass suggestion is an enchantment (compulsion), mind-affecting, language-dependent ability.

REMOVE CURSE V

Prerequisites: Character Level 17, Aura of Alignment (Law), Remove Curse IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, five times per week (instead of four times per week).

REMOVE DISEASE V

Prerequisites: Character Level 17, Aura of Alignment (Good), Remove Disease IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as

the spell, five times per week (instead of four times per week).

SLOW FALL VIII

Prerequisites: Character Level 17, Slow Fall VII.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 90 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall VII.

SPEED BONUS VI

Prerequisites: Character Level 17, Speed Bonus V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +60 ft. This replaces the enhancement bonus granted by Speed Bonus V. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TRAP SENSE VI

Prerequisites: Character Level 17, Trap Sense V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +6 bonus on Reflex saves made to avoid traps and a +6 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense V.

WILD SHAPE VI

Prerequisites: Character Level 17, Wild Shape V.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape six times per day.

WILD SHAPE: ELEMENTAL II

Prerequisites: Character Level 17, Wild Shape: Elemental I.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use Wild Shape: Elemental twice per day.

19TH-LEVEL SPECIAL ABILITIES

DAMAGE REDUCTION V

Prerequisites: Character Level 18, Damage Reduction IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 1 point, for a new total of 5. Subtract 5 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

EMPTY BODY

Prerequisites: Character Level 18, Timeless Body; Ascetic.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character gains the ability to assume an ethereal state for 1 round per monk class level per day, as though using the spell *etherealness*. She may go ethereal on a number of different occasions during any single day, as long as the total number of rounds spent in an ethereal state does not exceed her monk class level.

ROGUE SPECIAL ABILITY IV

Prerequisites: Character Level 18, Rogue Special Ability III.

Ability Type: Varies (See Below).

Class Levels: None.

Description: The character gains still another special ability of her choice from among those listed under Rogue Special Ability I.

SNEAK ATTACK X

Prerequisites: Character Level 18, Sneak Attack IX.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 10d6 extra damage (instead of 9d6).

20TH-LEVEL SPECIAL ABILITIES

FAVORED ENEMY V

Prerequisites: Character Level 19, Favored Enemy IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

FIGHTING MASTERY XI

Prerequisites: Character Level 19, Fighting Mastery X.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

INSPIRE COURAGE IV

Prerequisites: Character Level 19, Mass Suggestion.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's Inspire Courage increases by 1 and is now +4. See Inspire Courage I for details.

INTUITIVE DEFENSE V

Prerequisites: Character Level 19, Intuitive Defense IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +4 bonus to AC. This bonus replaces the bonus to AC granted by Intuitive Defense IV.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

MIGHTY RAGE

Prerequisites: Character Level 19, non-lawful alignment, Tireless Rage.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's bonuses to Strength and Constitution during his rage each increase to +8, and his morale bonus on Will saves increases to +4. The penalty to AC remains at -2.

PERFECT SELF

Prerequisites: Character Level 19, Empty Body.

Ability Type: Natural.

Class Levels: None.

Description: The character becomes a magical creature. She is forevermore treated as an outsider rather than as a humanoid (or whatever the character's creature type was) for the purpose of spells and magical effects. Additionally, the character gains damage reduction 10/magic, which allows her to ignore the first 10 points of damage from any attack made by a nonmagical weapon or by any natural attack made by a creature that doesn't have similar damage reduction. Unlike other outsiders, the character can still be brought back from the dead as if she were a member of her previous creature type.

RAGE VI

Prerequisites: Character Level 19, non-lawful alignment, Rage V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage six times per day. See Rage I for details.

SMITE CHAOS V

Prerequisites: Character Level 19, Smite Chaos IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos five times per day (instead of four times per day).

SMITE EVIL V

Prerequisites: Character Level 19, Smite Evil IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil five times per day (instead of four times per day).

SMITE GOOD V

Prerequisites: Character Level 19, Smite Good IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good five times per day (instead of four times per day).

SMITE LAW V

Prerequisites: Character Level 19, Smite Law IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law five times per day (instead of four times per day).

SLOW FALL IX

Prerequisites: Character Level 19, Slow Fall VIII.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent and fall any distance without harm.

UNARMED STRIKE VI

Prerequisites: Character Level 19, Unarmed Strike V.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in

damage. A small character now deals 2d8 damage with unarmed strikes, a medium character 2d10 damage, and a large character 4d8 damage.

WILD SHAPE: ELEMENTAL III

Prerequisites: Character Level 19, Wild Shape: Elemental II.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use Wild Shape: Elemental three times per day.

WILD SHAPE: ELEMENTAL (HUGE)

Prerequisites: Character Level 19, Wild Shape: Elemental I.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Huge elemental when using Wild Shape: Elemental.

WIZARDRY V

Prerequisites: Character Level 19, Wizardry IV.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus feat. She can choose a metamagic feat, an item creation feat, or Spell Mastery. The character must still meet all prerequisites for a bonus feat, including caster level minimums.

ADDING NEW SPECIAL ABILITIES

Adding new special abilities is quite simple. First determine the minimum character level a character can get the special ability under the standard rules. This will become the level of the special ability. Then, determine what prerequisites are required. Usually, prerequisites are based on how related special abilities are gained as a character progresses. Lower-level special abilities having the same name or effect as higher-level special abilities should be made prerequisites of the higher-level abilities. Special abilities that seem to be more powerful than other special abilities in your campaign should have more prerequisites.

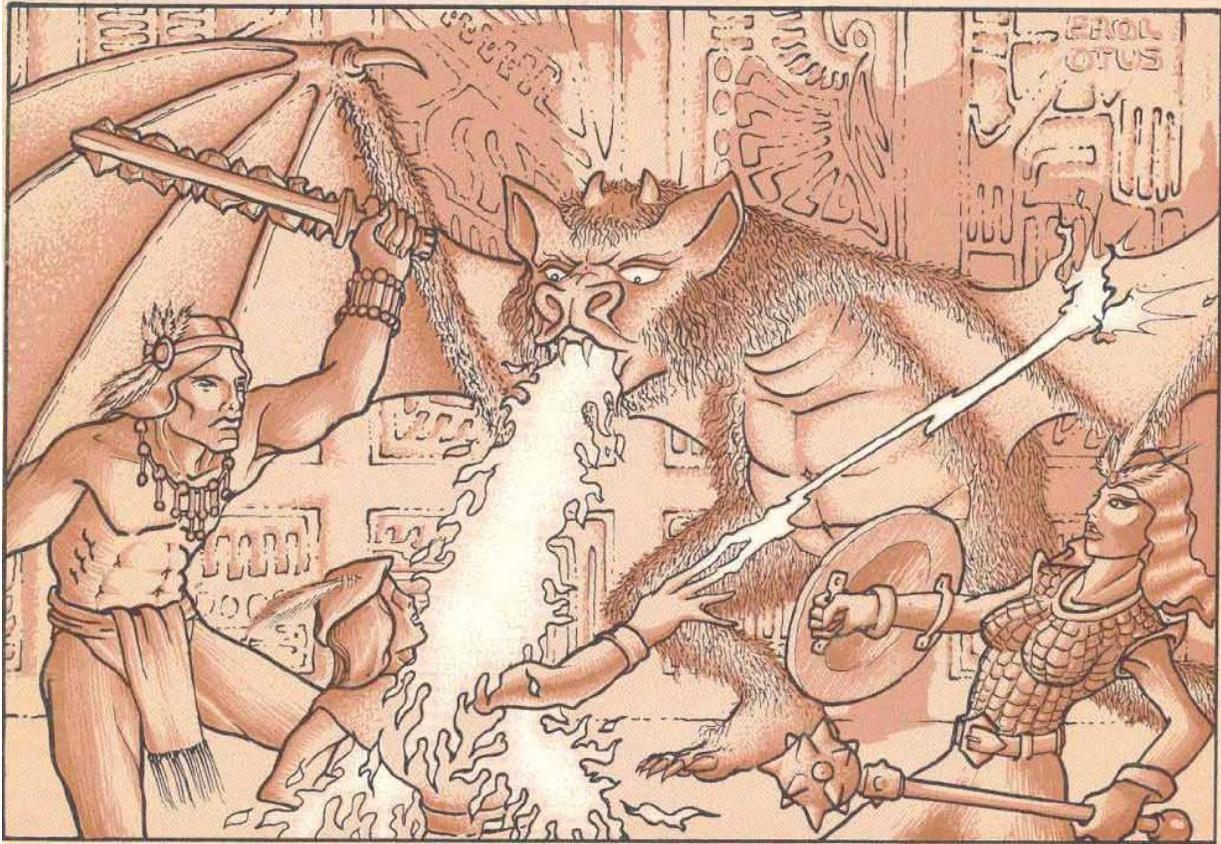

Ensure that any requirements for entry into a prestige class are made prerequisites. Determining the level of special abilities that appear in prestige class descriptions can be

tricky. Just find the minimum character level that a character could enter the prestige class and use that as a basis for determination.

After that, determine whether the special ability is an extraordinary, spell-like, or supernatural ability. If it is not one of these, make it "natural." If class levels are used to determine the effectiveness of the special ability, include the appropriate classes in the special ability description.

Determining the appropriate cost for other types of special abilities and spellcasting, such as draconic auras for the dragon shaman class or the spellcasting ability of the beguiler class (both from Player's Handbook II) is easy, as well. Simply add up the XP costs for all traits that you do have costs for (such as base attack bonus, base save bonuses, etc.) and then subtract this total from 20,000 XP.

This is the amount of experience points a character would have to invest to get 20 levels of that particular special ability or spellcasting. For example, at 20th level, the dragon shaman has a +15 base attack bonus (4,500 XP), a total of +30 in saves (3,000 XP), 20d10 hit points (5,000 XP for maximum), 40 skill ranks (1,000 XP), 29 special abilities (2,900 XP), seven base feats (700 XP) and five ability score increases (750 XP). This totals 17,850 XP. The difference is 2,150 XP. By the time the dragon shaman reaches 20th level, he knows seven dragon auras. Therefore, each aura should cost about 300 XP (2,150 XP / 7). The first three dragon auras are 1st level abilities. The fourth aura is a 3rd level ability (since the dragon shaman gains it at 3rd level). The fifth, sixth, and seventh auras are 5th, 7th, and 9th level abilities, respectively.

CHANGES TO CORE RULES

THE BASICS, RACES, AND DESCRIPTION

There are a few changes to ability scores in this ruleset.

Negative Constitution modifiers do not affect the number of hit points a character gains at each level. Positive Constitution modifiers continue to grant additional hit points at each character level.

Negative Intelligence modifiers do not affect the number of skill points a character gains at each level. Positive Intelligence modifiers continue to grant additional skill points at each character level.

To make the odd ability scores worth purchasing, the save bonuses for odd numbered ability scores are equal to one higher than those found in the SRD. For example, a Dexterity of 11 gives a +1 to Reflex saves instead of +0, and a Constitution of 17 grants a +4 bonus to Fortitude saves instead of +3. Furthermore, save bonuses are determined by the higher of two different ability scores. The higher of the Strength and Constitution bonuses adds to the Fortitude save, the higher of the Dexterity and Intelligence bonuses adds to Reflex, and the higher of Wisdom and Charisma adds to the Will saving throw. These rule changes will tend to make saving throw bonuses higher, since odd numbered ability scores now grant an additional +1 bonus and the character gets the higher of two different ability score bonuses.

CLASSES

There are no classes in this edition. All character traits (such as base attack bonus, saves, special abilities, spells, and the like) are bought directly with experience points.

Experience points are spent to improve character traits (much like XP can be spent in the creation of magical items).

SKILLS

There are no changes to the skills section.

FEATS

Change the Martial Weapon Proficiency feat to read:

MARTIAL WEAPON PROFICIENCY [GENERAL]

Prerequisite: Simple Weapon Proficiency.

Benefit: You make attack rolls with martial weapons normally.

Normal: When using a weapon with which you are not proficient, you take a -4 penalty on attack rolls.

MAGIC ITEMS

Instead of using an XP component for spells and XP for the creation of magic items, one campaign option is to replace all XP costs with *external power* (also known as 'XP'). Only the most powerful spells require external power. Magic items always require external power for their creation. External power can come in many forms. The body parts of certain creatures, magical substances, alchemical processes, eldritch power sources, and other materials or energies can be used as external power.

The basic unit for external power is the *thaum*, a unit of magical power equal to 1 XP. One thaum provides enough magical power for a potion or scroll holding a 0th level spell. In

contrast, casting a *wish* spell requires 5,000 thaums. Thus, one thaum is exactly equivalent to one XP for the purposes of casting spells and creating magic items.

DM's should determine appropriate sources of external power for his or her campaign. Some possible sources are listed below, with campaign guidelines.

CREATURES

Aberrations, dragons, elementals, fey, magical beasts, outsiders, undead, and other highly magical creatures are all suitable sources of external power. A suitable dead creature can provide up to 100 thaums per Hit Die. However, the creature need not be killed to harvest the external power. A living creature can provide up to 10 thaums per Hit Die per month without harm to the creature. For example, an astral deva may reward a faithful cleric by giving her one of his wing feathers (worth 120 thaums). Or perhaps a wizard has worked out a deal with a great wyrm red dragon who provides 400 thaums worth of material every month. Making such deals should always be extremely difficult (requiring a commensurate sacrifice from the recipient of the external power) and creatures will never willingly give enough external power to harm themselves, no matter what the agreement. Ultimately, it is up to the DM to determine how many thaums are available from each type of creature and what form this external power takes. The forms should make sense for the creature in question. Vampire fangs and vampire blood are more likely sources of external power than vampire toes, for instance.

The DM may require a Knowledge check at a DC equal to 10 plus the

creature's Hit Dice to determine if the character knows how to properly extract a creature's external power. The specific Knowledge skill is based on the creature type: Knowledge (arcana) for dragons and magical beasts, Knowledge (dungeoneering) for aberrations, Knowledge (nature) for fey, Knowledge (religion) for undead, and Knowledge (the planes) for elementals and outsiders. A character can take 10 on this roll, but cannot take 20.

MAGICAL SUBSTANCES

If external power in animal form comes from creatures, magical substances normally take a plant or mineral form. Once again, the DM should determine the exact form and amount of external power for any magical substances included in the campaign. Since one thaum is equal to one XP, magical substances should be as difficult to harvest or gather as the amount of external power would suggest. For example, if the DM has determined that a certain magical metal known as "xenium" exists in his campaign and one pound of it contains 100 thaums, then gaining ten pounds of xenium (1,000 thaums) should be just as dangerous or difficult as an encounter where the PC's would gain 1,000 XP. For a low level party, this could be a very difficult proposition, for a higher level party, a much easier one.

Knowing how to harvest, mine, or otherwise collect a magical substance is based on its rarity. Common substances should be the least powerful, and vice versa. The Knowledge check has a DC of 15 for common magical substances, 20 for uncommon magical substances, and 30 for rare magical substances. A good rule of thumb is that a character can find 50 thaums per site for a common magical, 100 thaums per site for uncommon magical substances, and 500 thaums per site for rare magical substances. It takes 1d4+1 days to

locate a site containing a magical substance, minus one day for every 5 points by which the Knowledge check exceeds the DC (minimum of one day). For example, if a character is searching for a common magical substance and the Knowledge skill check results in a 26, then it will take that character 1d4-1 days to find the substance (normally 1d4+1 days with -2 days for exceeding the DC of 15 by 11).

The specific Knowledge skill depends on the form of the magical substance. Magical minerals would require Knowledge (dungeoneering) and magical plants would require Knowledge (nature), for example.

ALCHEMICAL PROCESSES

If the DM allows, external power may be drawn from the environment and infused into a vessel through some sort of process. The nature of the process itself is unimportant from a rules standpoint, but should be described for roleplaying purposes. The most efficient process would allow a character to generate a maximum of 200 thaums per day at a cost of 500 gp. The basic ratio is 1 thaum of external power costs 2 gp 5 sp to create. Less efficient processes should certainly be available in the campaign, but more efficient processes should not. Regardless of the amount of external power infused, the process takes one whole day. The end product of a process is some material component infused with external power. For example, a small gemstone might be infused with 200 thaums of external power. The cost of the vessel holding the external power has nothing to do with the cost of the infusion. It will cost 500 gp to infuse 200 thaums into a diamond and the same amount to infuse 200 thaums into a copper coin.

POWER SOURCES

Power sources are defined by how much external power they give over what time interval. One power source may generate 100 thaums per month while another, extremely powerful source, may create 1,000 thaums per day. The exact nature of the power source will, of course, be determined by the DM. Magical springs, mana generators, sorcerous windmills, magical creature farms, and photosynthetic powerstones could all be possible sources of external power.

LIFE FORCE

The DM can also incorporate the old system into this new one by giving spellcasters the ability to tap their own life force as a source of external power. In this case, for every XP sacrificed, one thaum is made available immediately for use in a spell or magic item.

ATTUNED POWER

To add further color (and further complexity) to the campaign, the DM may rule that certain sources of external power are only suitable for certain uses. Perhaps external power gained from undead can only be used for magic items containing necromantic effects, or the external power gathered from a magical spring is only good for water magic. A demon's carcass could provide external power for creating evil magic items, or for creating good magic items designed to harm demons. The nature of the source will certainly give a clue as to what applications its external power is best suited for.

THAUMS AS CURRENCY

External power can be used as a form of currency among creatures that have a use for it. The basic value of one thaum is 5 gp (double the cost it takes to make it in an

alchemical process). This is the value for one thaum in portable form. There may also be an additional cost for the vessel that holds this external power.

Magic item prices are calculated according to the rules for magic items. Magic item creators typically charge 5 gp for every extra thaum they have to use to create the magic item. So, using an exchange rate of one thaum equals five gold pieces coincides with the magic item creation rules.

DIVISIBILITY AND EXTERNAL POWER

In general, spellcasters have the necessary knowledge and ability to use the amount of external power that they require for a certain endeavor without having to worry about divisibility. For example, if the cleric in the previous example wishes to use only 2 thaums of power from the astral deva's feather, she can use it, leaving her with a feather containing 18 thaums. She does not have to use the whole feather at one time.

Remember that when making magic items all external power must be spent at the beginning of the construction process (just like XP must be spent at the beginning of the construction process under the normal magic item creation rules). In other words, the magic item creator must have all the external power he needs before beginning construction on any magic item. This external power can come from many different sources and be in a variety of forms, however.

MAXIMUM EXTERNAL POWER USAGE

A character may only use a maximum number of thaums of external power equal to 1,000 times character level on a single spell or for a single effect when constructing a magic item. For

example, a 10th level magic item creator may only use up to 10,000 thaums on a single effect for a magic item. If he desired to make a magic item requiring 15,000 thaums for a single effect, he would have to wait until 15th level. However, if he wanted to create a magic item having three effects, each requiring 5,000 thaums, he could do so because each effect requires less than the maximum amount of external power he can use for one effect. This limit should probably never come into play.

METAGAME ANALYSIS

This variant negates an irritating feature of the standard D&D game: using up precious XP for magic item creation. However, the characters must still use an equivalent to XP in the form of external power, which requires monetary expenditure, dangerous quests, or risky combat to acquire. Seeking out external power for magic item construction is an easy story hook, which makes the DM's job easier.

If the DM allows external power to be gathered from creatures, expect after-combat dissections to become commonplace. Also, be aware that extra XP are essentially being awarded for encounters with any creatures having external power that can be harvested (not to mention the extra treasure gained if the PCs decide to sell external power to NPC magic item creators). Limiting creature-based external power to a few rare or dangerous creatures is an easy way to prevent the PCs from becoming a troupe of hunters.

In a campaign that uses this variant, PCs will more likely to create magic items since there is no need to sacrifice hard-earned experience. PCs will not be able to make more powerful magic items under this system than they would under the normal rules due to the restriction on the maximum external power usage per effect rule above.

EQUIPMENT & SPECIAL MATERIALS

Apply the Arcane Spell Failure Chance only if the arcane spellcaster is not proficient with the armor or shield.

MAGIC OVERVIEW

Druids are spontaneous divine casters under this ruleset (see Variant Rules, below).

SPELL LISTS & DOMAINS

There are a few changes to spell lists. Paladins and rangers no longer have their own spell lists and spell progressions. Players wishing to emulate the spellcasting abilities of paladins and rangers must purchase spellcasting levels in cleric and druid spellcasting (respectively). Because of this, a few changes to spell lists must occur.

All paladin spells are now part of the cleric spell list. When a spell is duplicated (i.e., the spell appears in both the cleric and paladin spell lists), the spell keeps its cleric level. If the spell is not part of the original cleric spell list, it becomes a cleric spell at the same level it had as a paladin spell.

All ranger spells are now part of the druid spell list. When a spell is

duplicated (i.e., the spell appears in both the druid and ranger spell lists), the spell keeps its druid level. If the spell is not part of the original druid spell list, it becomes a druid spell at the same level it had as a ranger spell.

After these two changes, five spell lists remain: bard, cleric, druid, sorcerer, and wizard. Cleric domain lists remain unchanged.

SPELLS

The changes to paladin and ranger spells are detailed in Spell Lists & Domains (above).

If the DM wishes to incorporate the limited, free-form spellcasting system described under these rules (Theurgy), then add the following spells to every spell list found in the SRD up to the maximum spell level found on that list (e.g., 6th level for bards and 9th level for all other spellcasters).

LEGERDEMAIN, LESSER

UNIVERSAL

Level: Spellcaster 1

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

Spell Points: 1

A *lesser legerdemain* lets you duplicate any cantrip available to

spellcasters of your class. A *lesser legerdemain* can do the following.

- Duplicate any spell on your spell list of 0th level.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 1st-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *lesser legerdemain* duplicates a spell that has an XP cost, you must pay that cost. When a *lesser legerdemain* duplicates a spell with a material component, you must provide that component. If a *lesser legerdemain* duplicates a spell with a focus, you must provide that focus.

LEGERDEMAIN

UNIVERSAL

Level: Spellcaster 2

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

Spell Points: 3

A *legerdemain* lets you duplicate any cantrip or basic class spell. A *legerdemain* can do the following.

- Duplicate any spell on your spell list with a casting cost of one spell point or any 0th level spell on your spell list.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 2nd-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *legerdemain* duplicates a spell that has an XP cost, you must pay that cost. When a *legerdemain* duplicates a spell with a material component, you must provide that component. If a *legerdemain* duplicates a spell with a focus, you must provide that focus.

LEGERDEMAIN, GREATER

UNIVERSAL

Level: Spellcaster 3

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

Spell Points: 5

A *greater legerdemain* lets you duplicate an extremely small number of basic spells and cantrips. A *greater legerdemain* can duplicate any spell on your spell list with a casting cost of two spell points or less.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 3rd-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *greater legerdemain* duplicates a spell that has an XP cost, you must pay that cost. When a *greater legerdemain* duplicates a spell with a material component, you must provide that component. If a *greater legerdemain* duplicates a spell with a focus, you must provide that focus.

THAUMATURGY, LESSER

UNIVERSAL

Level: Spellcaster 4

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

Spell Points: 7

A *lesser thaumaturgy* lets you duplicate an extremely small number of spells. A *lesser*

thaumaturgy can duplicate any spell on your spell list with a casting cost of three spell points or less.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 4th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *lesser thaumaturgy* duplicates a spell that has an XP cost, you must pay that cost. When a *lesser thaumaturgy* duplicates a spell with a material component, you must provide that component. If a *lesser thaumaturgy* duplicates a spell with a focus, you must provide that focus.

THAUMATURGY

UNIVERSAL

Level: Spellcaster 5

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

Spell Points: 9

A *thaumaturgy* lets you duplicate a small number of spells. A *thaumaturgy* can duplicate any spell on your spell list with a casting cost of four spell points or less.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 5th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *thaumaturgy* duplicates a spell that has an XP cost, you must pay that cost. When a *thaumaturgy* duplicates a spell with a material component, you must provide that component. If a *thaumaturgy* duplicates a spell with a focus, you must provide that focus.

THAUMATURGY, GREATER

UNIVERSAL

Level: Spellcaster 6

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

Spell Points: 11

A *greater thaumaturgy* lets you duplicate a number of spells. A *greater thaumaturgy* can duplicate any spell on your spell list with a casting cost of five spell points or less.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 6th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When *greater thaumaturgy* duplicates a spell that has an XP cost, you must pay that cost. When a *greater thaumaturgy* duplicates a spell with a material component, you must provide that component. If a *greater thaumaturgy* duplicates a spell with a focus, you must provide that focus.

THEURGY, LESSER

UNIVERSAL

Level: Spellcaster 7

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

Spell Points: 13

A *lesser theurgy* lets you duplicate a great number of spells. A *lesser theurgy* can duplicate any spell on

your spell list with a casting cost of six spell points or less.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 7th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *lesser theurgy* duplicates a spell that has an XP cost, you must pay that cost. When a *lesser theurgy* duplicates a spell with a material component, you must provide that component. If a *lesser theurgy* duplicates a spell with a focus, you must provide that focus.

THEURGY

UNIVERSAL

Level: Spellcaster 8

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

Spell Points: 15

A *theurgy* lets you duplicate an extremely large number of spells. A *theurgy* can duplicate any spell on your spell list with a casting cost of seven spell points or less.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 8th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *theurgy* duplicates a spell that has an XP cost, you must pay that cost. When a *theurgy* duplicates a spell with a material component, you must provide that component. If a *theurgy* duplicates a spell with a focus, you must provide that focus.

THEURGY, GREATER

UNIVERSAL

Level: Spellcaster 9

Components: V, S, (See text)

Casting Time: 1 standard action
(See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

Spell Points: 17; see text

A *greater theurgy* lets you duplicate nearly any spell. A *greater theurgy* can duplicate any spell on your spell list with a casting cost of eight spell points or less.

For every two additional spell points added to the casting cost of this spell, the spellcaster adds one spell point to the total number of spell points available for the duplicated spell. Remember that you cannot spend more spell points on a spell than your caster level.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 9th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *greater theurgy* duplicates a spell that has an XP cost, you must pay that cost. When a *greater theurgy* duplicates a spell with a material component, you must provide that component. If a *greater theurgy* duplicates a spell with a focus, you must provide that focus.

PSIONIC RULES

All psychic warrior powers are now part of the psion power list. When a power is duplicated (i.e., the power appears in both the psion

and psychic warrior power lists), the power keeps its psion level. If the power is not part of the original psion power list, it becomes a psion power at the same level it had as a psychic warrior power.

Feats involving power points are applied to spell points as well.

EXPERIENCE AWARDS

SIMPLIFIED XP AWARDS

All experience awards are derived from **Table 11: XP Awards**. This table shows the amount of experience points to award each character, individually, based on the difference between the challenge rating of the encounter (CR) and the character's character level (CL). Three different advancement rates are offered: normal, reduced, and slow. The normal advancement rate assumes that a character will gain a "level's worth" of experience points after about thirteen evenly-matched encounters. The reduced rate increases that number to 20 evenly-matched encounters. The slow advancement rate requires 40 evenly-matched encounters. The DM should choose the column that grants an appropriate advancement rate for his campaign. The normal advancement rate should be the default since this corresponds to the advancement rate found in standard D&D.

In standard D&D, experience point awards increase as the character's level increase. This is because an increasing number of experience points are required to reach successive levels (1,000 XP times the current character level). Under this system, however, a "level's worth" of experience is always 1,000 XP. As a result of this restructuring, all trait advancement costs found in the D&D5E ruleset do not need to be

multiplied by character level. Thus, all skill ranks cost 25 XP per rank, regardless of whether the character is 1st level or 15th level. Base attack bonus always costs 300 XP per +1. Every trait has a fixed cost that does not depend on the character's level.

TABLE 11: XP AWARDS

CR-CL	Normal XP	Reduced XP	Slow XP
-7	6	4	2
-6	9	6	3
-5	12	9	4
-4	18	12	6
-3	25	18	9
-2	38	25	12
-1	50	38	18
0	75	50	25
+1	100	75	38
+2	150	100	50
+3	200	150	75
+4	300	200	100
+5	400	300	150
+6	600	400	200
+7	800	600	300

To use **Table 11**, simply subtract the character's level from the challenge rating of the encounter to get a number from -7 to +7. Numbers less than -7 result in no experience award and numbers greater than +7 should be treated as +7 (but the characters shouldn't be able to successfully resolve those encounters anyway). Once you have the difference between the CR and the CL, find the row corresponding to this difference. The experience award for that character is found in the column corresponding to the advancement rate of the campaign (normal, reduced, or slow). For example, a 4th level character, two 3rd level characters, and a 2nd level character successfully complete a CR 3 encounter. The DM is using the normal advancement rate. The 4th level character receives 50 XP (the -1 row), the two 3rd level characters receive 75 XP each (the 0 row), and the 2nd level character receives 100 XP (the +1 row). When using **Table 11**, you never have to divide the XP award by the number of surviving

characters. The table shows the individual XP awards for characters. Characters who do not survive an encounter do not gain an experience award.

The normal advancement rate allows a character to gain 75 XP per evenly-matched encounter that was successfully overcome. After 13 such encounters, the character has earned 975 XP, just 25 XP short of a "level's worth" of experience. Once XP has been earned, it can be used immediately, subject to the dictates of the DM. The DM may only allow XP to be spent at the end of the gaming session or at the beginning of a session (giving the player time to think about how he wants to spend his XP). The DM could allow XP to be spent as soon as it is earned, but need not do this. After successfully overcoming an evenly-matched encounter, a character has enough experience points to gain three hit points, three skill ranks. It takes four evenly-matched encounters to gain a +1 base attack bonus. After seven evenly-matched encounters, a wizard can gain another level of spellcasting ability. If this advancement rate seems too fast, it's only because in the normal system, level abilities are granted all at once, after thirteen or fourteen encounters have been completed. The DM always has the option to use the reduced or slow advancement rates, if desired.

Stepping through an example may prove helpful. Let's say that a 1st level character begins his career. The character is a knight, concentrating on warfare and its related disciplines. During character creation, the player purchases a +1 base attack bonus (300 XP); light, medium, and heavy armor proficiencies (300 XP); shield proficiency (100 XP); he gives him a +2 base Fortitude save bonus (200 XP); eleven hit points (275 XP); one class level in fighter (25 XP); four skill ranks in Ride (100 XP); four skill ranks in Knowledge (nobility and royalty) (100 XP); four skill ranks in Perform (oratory) (100 XP);

simple and martial weapon proficiencies (200 XP); Mounted Combat feat (100 XP); Ride-By Attack feat (100 XP); and the Spirited Charge feat (100 XP) for a total of 2,000 XP.

Our knight begins his adventuring career in a war against gnolls who are ravaging his baron's countryside. Gnolls are CR 1 creatures, so for every gnoll the knight defeats, he will receive 75 XP (as long as the knight remains a 1st level character). After a short gaming session, the knight defeats four gnolls. The DM awards the player 300 XP and tells the player that he'll give him time to think about how he wants to spend his XP. He asks him to e-mail his plan on spending the XP, so that the DM can approve it before the next game session. The player goes home and thinks it over. If he immediately gains a trait that makes his knight a 2nd level character, he will only receive 50 XP per defeated gnoll during the next game session. The player decides to spend his XP on traits that will not raise his character's level. His knight already has a +1 base attack bonus, 12 hit points, a +2 Fortitude base save bonus, and a class level in fighter. Obviously, he cannot raise these traits if he wants his knight to remain at 1st level. Looking over the list of feats and 1st level special abilities, he notices that he could gain Favored Enemy (gnolls) without becoming a 2nd level character (since this is a 1st level special ability). This would help him defeat more gnolls and thus gain more experience. He could also take Weapon Focus (longsword) to grant his knight a +1 bonus to attack rolls. Since this is not an increase to the base attack bonus, taking this feat would not increase his character level. Finally, he decides that Toughness would be a good feat to have, since it gives his knight +3 hit points (not base hit points). So, our player has found a way to spend his 300 XP on three feats (costing 100 XP each) which will grant him a +1 attack bonus

with his favorite weapon, +2 damage against enemies that he knows he will encounter, and +3 hit points so that he is better able to survive the encounters. The best part is that he's still a 1st level character. He sends his plan to his DM, who replies that he's a min-maxing fool, but approves it anyway. But the DM can always cause the knight to lose his longsword and have to fight orcs next week.

Changing the experience point system in this way greatly simplifies character creation and advancement. By making every "level's worth" of experience equal 1,000 XP, the XP Award chart is now much simpler. Increasing the character level of your character lowers the amount of experience you receive for same type of encounters. For example, if you are a 4th level character, you would receive 50 XP for an ogre (CR 3) when using the normal advancement rate. Once you reach 5th character level, overcoming an ogre now grants you 38 XP. Experience awards are reduced. The 4th level character uses the "-1" row to find experience (since 3 minus 4 is -1). He uses the "-2" row once his level increases (3 minus 5 equals -2). Regardless of the character's level, skill ranks cost 25 XP each, feats cost 100 XP, hit points cost 25 XP each, and so on, according to the trait cost tables found in this ruleset.

This new system makes it easier to create higher-level characters since the XP costs for traits never change. In normal D&D, 120,000 XP could be used to create a character that is the equivalent of a 16th level character. Now, you need 16,000 XP to create the same character (1,000 XP per level) and the trait costs never change. If you want to give that character a +16 base attack bonus, it will cost 4800 XP (16 times 300 XP). If the normal D&D experience system were used, it would cost 300 XP for the first +1, 300 XP for the second, 600 XP for

the third, 900 XP for the fourth, and so on, which is a much more difficult math problem.

Since the experience award is based on the difference between the challenge rating of the encounter and the character level, fractional CR's must be handled a bit differently when using this system. It doesn't make sense to subtract a character's level from the challenge rating of a fractional CR encounter. Depending on your rounding convention, you would always end up on the row equal to either the negative of the character's level, or the row below it. For this system, all fractional CR's (such as 1/2 and 1/4) are converted to integers.

A simple table summarizes the conversion of old, fractional CR's to the new, integer CR's.

TABLE 12: CONVERTING CR

Old CR	New CR
1/2	0
1/3	-1
1/4 and 1/5	-2
1/6 and 1/7	-3
1/8 and 1/9	-4
1/10 and less	-5

This new system of treating every level as having 1,000 XP requires a few changes when it comes to spending or losing experience points. First, if a character must ever spend experience points (such as when casting a spell or making a magic item), divide the amount that must be spent by the character level (round up). Second, if any effect causes a character to lose a level, that character should lose 1,000 XP. This loss should be applied as evenly as possible across the character's traits in order to lower his character level by one. These changes are necessary to ensure that the experience point amounts are still equal to the same percentage of experience points required for advancement. For example, if a 20th level wizard casts a *wish* spell, normally costing 5,000

XP, then he need only to spend 250 XP (5,000 XP divided by 20). Under standard D&D3.5E, 5,000 XP represents 25% of the character's advancement toward 21st level. When levels only cost 1,000 XP, then 250 XP represents 25% of the character's advancement towards 21st level (or any level for that matter). It's the percentage that's important, not the amount.

Losing a number of experience points per class level (such as when a sorcerer or wizard loses their familiar) requires a special calculation. Consider the case of losing a familiar, which causes a character to lose 200 XP per sorcerer or wizard class level. This means that the character will lose a total of 20% of the amount of experience points it takes to reach his next level (assuming all of his character levels are class levels in sorcerer or wizard). The amount of experience lost is equal to the base amount lost (without considering the multiplication of class levels) times the number of class levels divided by the number of character levels. For example, a 20th level wizard's familiar is killed. Under the standard rules, he would lose 4,000 XP (200 XP times his 20 levels in wizard). Under this system, he loses 200 XP (200 XP times 20 class levels divided by 20 character levels). If he were a 10th fighter/10th level wizard, he would lose 100 XP (200 XP times 10 wizard levels divided by 20 character levels), which is 10% of a "level's worth" of experience points, the same percentage he would lose in standard D&D.

Luckily, the most complex calculations are required for the most infrequently encountered situations in the game (casting a spell with an XP component, losing a level, having a familiar die).

Using this new XP award greatly simplifies encounter creation, NPC creation, awarding XP, and raising traits. If the normal D&D3.5E system were used, all trait costs

would have to be multiplied by the character's level. This would make it difficult to advance traits and make high level characters. However, this new system complicates spellcasting with XP components and magical item creation. If the external power system is used for spellcasting and magical item creation, then the problem is solved.

“BLUE-BOOKING” ADVANCEMENT

In addition to the rules for experience awards found in this rulebook, experience can also be awarded on the basis of non-adventuring pursuits. Suitable for NPCs and campaigns where adventures may be separated by years of inactivity, these experience awards are based on the characters engaging in the normal, day-to-day activities to advance themselves along their chosen career path. A simple rule is to assume that the character earns 500 XP per year if they are actively working on advancing themselves. **Table 13: Career Experience Points** shows the total amount of experience points characters of different races can earn, assuming 500 XP each year for every year from adulthood to venerable age categories. The expected character level that each race can attain at the onset of the venerable age category is shown as well.

The figure of 500 XP per year can be adjusted based on the quality of instruction and materials available to the character. Poor conditions might result in the character receiving only 250 XP per year (or none at all), while formal tutoring with a mentor dedicated only to the character's instruction could yield up to 1,000 XP per year (but should be gained at exorbitant cost).

These “time-based” experience awards can be used to figure out how many experience points a non-adventuring NPC should have or

such awards could be used to create starting characters who are older than the norm. If characters take a great deal of time off between adventures, these experience awards could be used to simulate the slow, steady advancement that comes over time. Adventuring should always result in experience awards much greater than those shown here.

**TABLE 13: CAREER
EXPERIENCE POINTS**

Race	XP	Character Level
Human	27,500	7 th
Dwarf	105,000	15 th
Elf	120,000	16 th
Gnome	80,000	13 th
Half-elf	52,500	10 th
Half-orc	23,000	7 th
Halfling	40,000	9 th

Because this advancement system represents the slow, methodical advancement that comes with time, the costs to raise traits must be changed somewhat to prevent sedentary and unmotivated NPCs from surpassing heroic adventurers. It is assumed that great levels of skill and power are more difficult to attain when a character “plays it safe” so all trait costs must be multiplied by the character level required to have a trait at that level. Using **Table 2: Character Level Determination** find the character level required to have a certain trait. Multiply the cost to raise that trait from the previous level by the character level shown. For example, if an NPC has a base attack bonus of +5, it will cost that NPC 1,800 XP to raise it to +6. This represents an investment of over three-and-a-half years of practicing combat. Each trait must be stepped through, one at a time, so the NPC above would have had to pay a total of 4,500 XP to raise his base attack bonus from +0 to +5 (300 XP for the +1, 600 XP to raise it to +2, 900 XP to further raise it to +3, and so on). This represents about nine years of effort, but it assumes that the NPC

never really got into a fight that whole time. These increasing trait costs are taken into account when calculating the levels shown in **Table 13**.

INSTANCE-BASED ADVANCEMENT

This option almost completely eliminates experience points altogether. Under this system, a character advances traits that he uses during an adventure. Thus, if you resort to fighting most of the time, you will become a very good fighter. If you use magic more often than not, you will become a great wizard. What you do determines how you advance.

After each encounter, the DM will determine what traits each character used during that particular encounter. For each trait that was successfully used to resolve the encounter, the player is eligible to make a check to see if that particular instance of trait-use gave his character a useful insight. If the check is successful, the character gains a “step” in that trait. Advancing a trait to the next higher level costs a certain number of steps (one to 40). Each step is the equivalent of 25 XP. The player may make up to three checks after each encounter, but no more. **Table 14: Instance-Based Advancement Costs** shows the number of steps that are needed to advance a certain trait (listed in the first column) by a certain level (listed in the last column). The player must specify the trait the character is working towards when making the check if more than one specific trait could be chosen (such as when buying a feat or advancing an ability score).

For each trait, there is a requirement that must be met before the player can attempt to gain a step with that instance of trait-use. If the character successfully completed (remained alive after) an encounter deemed

significant by the DM and the character met the criterion listed for that trait on **Table 15: Instance-Based Advancement Criteria and Checks**, then he is eligible to make a check after that particular instance. If eligible, he can only make one check, regardless of how many times he may have met the criterion. For example, if the character had to make three Will saves during the encounter, he can only make a check to gain one step for his Will save. If, during the next encounter, he must make a Will save again, that counts as another instance. The “generic criterion” is met when a character successfully completes a significant encounter (regardless of how he completed the encounter). If the check on a particular instance is successful, the character gains a step in that trait. So, for a character to raise his base attack bonus by +1, he must earn 12 steps in that trait. The criterion for each of these steps is “deal weapon or unarmed damage three times” during an encounter that was completed successfully. Dealing damage three times makes the character eligible for one check. If the check on each instance is successful, the character earns one step towards the next higher level in base attack bonus (i.e., a +1). After 12 successful checks, the character will gain a +1 to base attack bonus.

Checks are conducted by rolling a d20 against the DC given in the Advancement Check column of **Table 15**. For our example above, the player must roll a d20 and score a result equal to or higher than his character’s current base attack bonus when making a check. As you can see, it becomes progressively harder to earn a success on an instance of trait-use (and turn it into an advancement

“step”) since the advancement check DC will rise as the character’s levels rise. Rolling a natural 20 (i.e., a “20” shows on the face of the die) always results in a successful check regardless of the DC. Also, for every previously failed check against a certain trait, the player adds +4 to the next advancement check on that trait until a step is earned (then the bonus is eliminated).

If Instance-Based Advancement is used, the tables below replace those found in the Character Advancement section. The XP costs for traits are listed for reference and comparison.

The “generic criterion” has another important use in this system besides being used for certain traits. Any trait that is deemed a starting trait by the DM can be bought with steps earned from the generic criterion. For example, if your character has absolutely no ability to cast wizard spells, how would you ever gain that ability? Under this system, the only way to get better at wizard spellcasting is to cast wizard spells. If you can’t cast wizard spells, you can’t advance your wizard spellcasting trait, but obviously people learn how to do new things. By using steps earned by the generic criterion, a character can become a wizard. These generic criterion steps can also be used to get special abilities without prerequisites (because normally you have to earn steps by using prerequisites before you can gain a special ability). The advancement check for these steps is equal to current character level.

Starting characters receive 80 steps to purchase initial traits, which may not exceed the maximums found on **Table 1: Starting Character Traits**.

Because some game mechanics use XP expenditure (such as magical item creation and spellcasting), the player may convert any instance of eligibility into XP. One instance converts to 25 times the character level of the character in XP. The player need not roll an advancement check, the instance is enough. This creates a pool of XP that can be used for any game mechanic requiring XP expenditure.

Character level is still determined by **Table 2: Character Level Determination** when using this system. The character’s highest level trait is used, just like in the normal XP advancement system. It is always up to the player to decide if he wants to make an advancement check to earn steps. If earning a step would advance a trait causing a character level increase, the player does not have to roll if he doesn’t want his character to level to increase (for some reason).

This advancement system is a radical departure from the normal XP-and-level advancement system found in most D&D games. Normally, XP are earned and the player makes advancement decisions based on the career progression he wants for his character. Under this system, career progression is based solely on the actions of the character. Regardless of the player’s initial conception of the character, the character will advance along a career path determined by the opportunities available.

TABLE 14: INSTANCE-BASED ADVANCEMENT COSTS

Basic Traits	Step Cost	XP Cost	Per
Base Attack Bonus (BAB)	12	300	+1
Base Save Bonuses	4	100	+1
Base Hit Points	1	25	Hit Point
Skills	1	25	Skill Rank
Feats	4	100	Feat
Special Abilities	4	100	Special Ability
Class Levels	1	25	Class Level
Ability Scores	6	150	+1 to Score
Spellcasting Traits			
Bard Spellcasting	6	150	Whole Level
Cleric Spellcasting	12	300	Whole Level
Druid Spellcasting	8	200	Whole Level
Psion Manifesting	20	500	Whole Level
Sorcerer Spellcasting	20	500	Whole Level
Wizard Spellcasting	20	500	Whole Level
Optional Basic Traits			
Base Attack Bonus (Melee)	6	150	+1
Base Attack Bonus (Ranged)	6	150	+1
Base Attack Bonus (Weapon Group)	3	75	+1
Base Attack Bonus (Specific Weapon)	1	25	+1
Weapon Group Feats	1	25	Feat
Class Level Package	40	1000	Level
Level Adjustment	40	1000	Level
Optional Spellcasting Traits			
Bard Spellcasting	3	75	Half-Level
Cleric Spellcasting	6	150	Half-Level
Druid Spellcasting	4	100	Half-Level
Psion Manifesting	10	250	Half-Level
Sorcerer Spellcasting	10	250	Half-Level
Wizard Spellcasting	10	250	Half-Level
Bard Spellcasting	1 or 2*	25/50	Quarter-Level
Cleric Spellcasting	3	75	Quarter-Level
Druid Spellcasting	2	50	Quarter-Level
Psion Manifesting	5	125	Quarter-Level
Sorcerer Spellcasting	5	125	Quarter-Level
Wizard Spellcasting	5	125	Quarter-Level
Component Spellcasting Traits			
Spellcaster Level	4	100	Caster Level
Spell Points	4	100	Whole Level
Spell Points	2	50	Half-Level
Spell Points	1	25	Quarter-Level
Spell List	2	50	School-Level
Spell List	3	75	Bard Spell Level
Spell List	5	125	Cleric Spell Level
Spell List	4	100	Druid Spell Level
Power List	8	200	Psion Power Level
Spell List	8	200	Sorcerer Spell Level
Spell List	8	200	Wizard Spell Level
Spell List	1	25	Five Spells
Spell List	15	375	Every Spell for Level
Spell Knowledge	2	50	Spell

* The cost is 1 for every ¼ and ¾ level and 2 for every ½ and whole level.

TABLE 15: INSTANCE-BASED ADVANCEMENT CRITERIA AND CHECKS

Criterion (per Encounter)		Advancement Check (DC)
Base Attack Bonus	Deal weapon or unarmed damage three times	Current Base Attack Bonus
Base Save Bonuses	Roll a save (successful or not)	Current Base Save Bonus times two
Base Hit Points	Be reduced to below 75% maximum hit points	Current Base Hit Points divided by 10
Skills	Significant and successful use of the skill	Current number of skill ranks
Feats	Generic criterion	Current number of base feats
Special Abilities	Use of a special ability prerequisite	Level of special ability minus one
Class Levels	Generic criterion	Current class levels
Ability Scores	Generic criterion	Current ability score
Bard Spellcasting	Use of bard spellcasting	Current bard caster level
Cleric Spellcasting	Use of cleric spellcasting	Current cleric caster level
Druid Spellcasting	Use of druid spellcasting	Current druid caster level
Psion Manifesting	Use of psion manifesting	Current psion manifester level
Sorcerer Spellcasting	Use of sorcerer spellcasting	Current sorcerer caster level
Wizard Spellcasting	Use of wizard spellcasting	Current wizard caster level
BAB (Melee)	Deal melee weapon/unarmed damage 3 times	Current BAB (Melee)
BAB (Ranged)	Deal ranged weapon damage three times	Current BAB (Ranged)
BAB (Weapon Group)	Deal damage with a group weapon three times	Current BAB for that weapon group
BAB (Specific Weapon)	Deal damage with that weapon three times	Current BAB for that specific weapon
Weapon Group Feats	Generic criterion	Current character level
Class Level Package	Generic criterion	Current character level
Level Adjustment	Generic criterion	Current character level
Bard Spellcasting	Use of bard spellcasting	Current bard caster level
Cleric Spellcasting	Use of cleric spellcasting	Current cleric caster level
Druid Spellcasting	Use of druid spellcasting	Current druid caster level
Psion Manifesting	Use of psion manifesting	Current psion manifester level
Sorcerer Spellcasting	Use of sorcerer spellcasting	Current sorcerer caster level
Wizard Spellcasting	Use of wizard spellcasting	Current wizard caster level
Bard Spellcasting	Use of bard spellcasting	Current bard caster level
Cleric Spellcasting	Use of cleric spellcasting	Current cleric caster level
Druid Spellcasting	Use of druid spellcasting	Current druid caster level
Psion Manifesting	Use of psion manifesting	Current psion manifester level
Sorcerer Spellcasting	Use of sorcerer spellcasting	Current sorcerer caster level
Wizard Spellcasting	Use of wizard spellcasting	Current wizard caster level
Spellcaster Level	Use spellcasting	Current spellcaster level
Spell Points	Use 25% maximum spell points	Current maximum spell points / 10
Spell Points	Use 25% maximum spell points	Current maximum spell points / 10
Spell Points	Use 25% maximum spell points	Current maximum spell points / 10
Spell List	Generic criterion or use spellcasting	Level of spell list times two
Spell List	Generic criterion or use spellcasting	Level of spell list times two
Spell List	Generic criterion or use spellcasting	Level of spell list times two
Spell List	Generic criterion or use spellcasting	Level of spell list times two
Power List	Generic criterion or use spellcasting	Level of spell list times two
Spell List	Generic criterion or use spellcasting	Level of spell list times two
Spell List	Generic criterion or use spellcasting	Level of spell list times two
Spell List	Generic criterion or use spellcasting	Level of highest level spell times two
Spell List	Generic criterion or use spellcasting	Level of spell list times two
Spell Knowledge	Generic criterion or use spellcasting	Level of spell times two

An extensive walkthrough example is most certainly necessary at this point. Let's say that a group of four characters; Jozan, Tordek, Lidda, and Mialee; are on an adventure. Their first encounter is pretty tough and the DM decides that it was a significant encounter. During the encounter, Tordek fought and killed four foes (hitting at least three times before dropping each enemy). He also lost half of his normal amount of base hit points. Jozan cast two healing spells, hit one foe five times, and turned undead once. Jozan lost one-third of his fully-healed base hit points. Lidda made a successful Move Silently skill check that was critical to the success of the encounter, fought two enemies (hitting at least three times on each one), and used her sneak attack special ability once. Mialee cast six wizard spells, made a successful Concentration skill check, and lost one-quarter of her base hit points.

Tordek is eligible to roll an advancement check one time for base attack bonus (he made way more than three successful hits) and one time for base hit points (since he was reduced to below 75% of his base hit point maximum). Even though he killed four enemies, he's only allowed one check for base attack bonus per encounter. Characters are allowed a maximum of three checks per encounter, but Tordek did not meet any of the other criteria except for the generic criterion. Tordek's player decides to make the generic criterion for the Strength ability score his third check. The player looks on **Table 15** and finds that he must roll against a DC equal to Tordek's base attack bonus in order to receive a step. Tordek's base attack bonus is

five, the player rolls an 11, easily making this check. The player notes somewhere that Tordek has one step towards increasing his base attack bonus by +1. Next, he will roll a check to earn a step for Tordek's base hit points. Tordek has 50 base hit points when fully-healed, so this check is also at DC 5. The player rolls a 13, resulting in a success. The player sees that only one step is required to raise Tordek's base hit points by one. Tordek's new base hit point total is now 51. Tordek's Strength is 17, so the player is not confident about earning a step for this trait. The DC for the roll is 17. The player rolls an 8. Tordek does not earn a step towards advancing his Strength.

Jozan's player now resolves his advancement checks. Jozan is eligible to roll for a base attack bonus step. Even though he only dropped one opponent, he had five successful hits. Jozan's current base attack bonus is +3 so the advancement check DC is 3. The player rolls an 18, so Jozan gets a step. Jozan cast two healing spells during the encounter. Since he used cleric spellcasting during a significant encounter, he is eligible for a check to advance his cleric spellcasting. He already has 11 steps in cleric spellcasting, so if Jozan earns another step, he will become a 6th level cleric spellcaster. The DC for this roll is 5. Jozan's player rolls a 9, thus earning a step. Jozan now has 6th cleric spellcasting ability. Even though Jozan is eligible to earn a step for base hit points, the player decides to attempt a Wisdom ability score step. Jozan's Wisdom is 16. The player rolls a 19 on the check and Jozan earns a step towards Wisdom. After five more successful steps, Jozan's Wisdom

will increase by one (since increasing an ability score by one requires six steps).

Lidda's player decides to roll advancement checks for base attack bonus, the Sneak Attack III special ability (since she doesn't have it yet), and a Dexterity ability score step. She decides not to roll for the use of Move Silently, since Lidda has eight ranks already. Skills only require one step for advancement (to the next rank) and Lidda's player wants her character to remain at 5th character level (because she feels her hit point are still too low). If she succeeded at the Move Silently advancement check, Lidda would then have nine ranks and would become a 6th level character. Players are never obligated to make advancement rolls if advancement is not desired, for whatever reason.

Mialee's player is eligible to make three advancement rolls in wizard spellcasting, the Concentration skill, base hit points, or any one other trait using the generic criterion. Even though Mialee's player really wants to increase Mialee's base attack bonus, he cannot make an advancement roll for this trait, since Mialee did not resort to physical combat during this encounter.

Since each step represents a 2.5% advancement towards the next "level" and three steps can be earned per encounter, it will still take a party approximately 13 or 14 challenging encounters to advance one level equivalent under the Instance-Based Advancement system, just like in normal D&D.

BASIC CHARACTER CLASS BUILDS

Inquisitive players and DM's may be interested in seeing how the basic character classes offered in the Player's Handbook turn out when constructed using the character advancement system contained in this ruleset. The number of experience points required to purchase the base attack bonus, base save bonuses, skill points, class special abilities, spellcasting, and ability score increases appropriate to each character class at each class level are assumed in the calculation. The experience point cost representing the maximum number of hit points that could be rolled on each hit die (per class level) is

included in these builds. Furthermore, the experience point costs to raise traits have been multiplied by the character level as appropriate to show the equivalent experience points that would have to be earned in normal D&D to attain each level in the indicated classes.

All experience point totals for each class fall within the normal XP ranges given in the SRD with a few exceptions. Experience point totals that are one level higher than standard are shown in bold black, while experience point totals indicated one level lower than

standard are in italics. For example, building an 18th level barbarian requires 172,450 XP when using this ruleset. This XP total is greater than 171,000, the minimum for a 19th level character under the normal rules. As you can see, fighters most often require less XP than other classes to reach the same character level. The XP amount in the first row shows how much additional XP is needed to build a 1st level character of that class, over the 2,000 XP granted during character creation. Positive numbers indicate that more XP is needed, while negative numbers show that less XP is required.

TABLE 16: EXPERIENCE POINT COSTS FOR BASIC CHARACTER CLASS BUILDS

		C	L	A	S	S	E	S				
Level	Standard	Bbn	Brd	Clr	Drd	Ftr	Mnk	Pal	Rgr	Rog	Sor	Wiz
1	0	(+125)	(+400)	(-100)	(+100)	(-25)	(-75)	(+75)	(+425)	(-125)	(-600)	(-500)
2	1,000	1,550	1,600	1,800	1,900	1,350	1,950	1,500	1,600	1,450	1,600	1,600
3	3,000	4,625	4,450	4,650	4,900	3,825	4,425	4,500	4,150	4,675	3,950	3,950
4	6,000	8,025	7,950	8,550	9,000	6,825	9,025	7,000	7,650	7,875	7,650	7,650
5	10,000	12,600	10,800	11,750	12,550	10,400	12,300	11,450	11,850	10,900	11,150	11,650
6	15,000	19,650	18,000	18,950	20,050	16,850	19,950	18,650	19,050	17,650	18,750	19,250
7	21,000	25,125	22,950	24,600	26,050	20,925	24,725	23,600	24,700	22,775	22,800	23,300
8	28,000	32,225	31,050	32,700	34,550	27,225	33,425	30,100	32,800	29,475	30,700	31,200
9	36,000	43,400	39,000	40,500	42,900	36,600	40,300	41,500	43,300	38,600	40,100	40,600
10	45,000	52,350	48,200	50,700	53,600	44,550	52,250	50,700	53,500	47,050	50,100	51,600
11	55,000	61,125	56,150	59,750	63,200	51,125	61,025	58,650	62,550	55,275	56,750	58,250
12	66,000	76,725	70,850	74,450	78,500	64,325	77,825	73,350	76,050	69,075	72,450	73,950
13	78,000	89,100	78,500	83,250	88,050	74,100	85,200	84,750	88,750	78,400	82,350	83,850
14	91,000	101,750	92,900	97,650	103,150	85,350	99,250	96,350	101,750	88,950	96,550	98,050
15	105,000	118,325	108,350	113,100	120,850	98,925	114,325	114,800	117,200	106,275	110,300	113,300
16	120,000	134,425	123,250	129,600	138,150	111,825	133,625	128,100	132,100	119,975	126,600	129,600
17	136,000	150,700	133,300	141,200	149,000	124,700	145,000	143,100	148,800	130,500	139,700	142,700
18	153,000	172,450	155,500	163,400	173,900	144,650	166,750	165,300	169,200	151,350	163,500	166,500
19	171,000	187,825	169,450	179,250	188,800	156,225	180,225	179,250	183,150	167,675	175,350	178,350
20	190,000	208,025	190,150	199,950	212,500	172,425	204,425	197,950	203,850	182,875	195,850	200,850

VARIANT RULES

RACES

Characters can always spend 1,000 XP outright to reduce a level adjustment. They need not buy off level adjustments at set character levels. This changes the system found in Reducing Level Adjustments. Characters with bloodlines must spend 1,000 XP before reaching the character levels shown in Bloodlines.

CLASSES

Druids are spontaneous divine casters under this ruleset. Clerics remain preparation-based spellcasters.

The new class features and class variants included in this section can be bought with experience points just as core special abilities are bought.

It is interesting to note that gestalt characters can be built with this ruleset and that such characters must pay for all of the extra abilities they receive.

BUILDING CHARACTERS

Taking a Character Flaw during character creation grants that character an extra 100 XP to spend on traits.

ADVENTURING

If Defense Bonus is used, it should cost 300 XP per +1. If the Vitality and Wound Points system is used, vitality points cost the same as hit points (25 XP).

MAGIC

The spell points system is adopted from this section to facilitate more incremental development of magical power for characters. Additional rules regarding the application of the spell points system is detailed below.

Use the vitalizing variant of the spell point system with the following changes to the Recovering Spell Points paragraph. A character's spell point total is not tied to his level of fatigue. Thus, spells that remove fatigue and exhaustion (such as heal and restoration) do not alter the recipient's spell point total. Characters do not lose spell points if they are subjected to some other effect that would make them fatigued or exhausted either.

Spell points are recovered only by rest. The first two-thirds of a character's spell points are recovered over the first two hours of rest. The last third of a character's spell points are recovered after an additional six hours of rest. Put another way, spell point recovery proceeds at a rate of one-third the character's maximum spell point pool per hour as long as the character's current spell point total is two-thirds maximum or less. Spell point recovery proceeds at a rate of one-third the character's maximum spell point pool for every six hours ($1/18^{\text{th}}$ maximum spell point pool per hour) if the character's current spell point total is greater than two-thirds maximum.

For example, let's say a character with a maximum pool of 36 spell points uses all those spell points in combat. By the end of combat, he will be exhausted, since his spell points dropped to below one-quarter of his maximum. The party

decides to rest for three hours before continuing on. In the first hour, the character recovers 12 spell points (one-third his maximum). He also happens to recover from his exhausted condition and moves up to a fatigued condition because he rested for one hour. During the second hour, he recovers another 12 spell points (the "second" third of his maximum pool of 36 spell points). He keeps his fatigued condition because one hour of rest does not remove this condition. For the last hour, his spell point recovery rate becomes 2 spell points per hour (since spellcasters recover their last third, in his case 12 spell points, over the course of six additional hours). Since the character is only resting for one additional hour, he recovers two spell points. So, after three hours of rest, he has recovered 26 spell points and is fatigued. The remaining 10 spell points remain uncovered as the party members ready themselves to continue on their way. The fatigued condition can only be removed by an additional six hours of rest (since he did rest for two hours after his condition was changed from exhausted to fatigued).

Had the spellcaster finished combat with 18 spell points, he would have been fatigued. The first half-hour of rest would have allowed him to recover six spell points (since he was below two-thirds his normal maximum). The remaining two-and-a-half hours of rest would have allowed him to recover five spell points (since the rate of recovery changed to two spell points per hour). His new total upon resuming exploration would be 29 spell points in this example.

All spellcasters gain bonus spell points based on their Constitution scores rather than the ability score that normally grants bonus spells.

Characters can exceed their normal pool of spell points as described by the second variant found in *Optional Vitalizing Variants*.

Metamagic feats can be applied to spells at an additional spell point cost. This corresponds to the first option listed in the *Spell Points Variant* rules.

If the campaign uses the *Component Spellcasting Traits* found above (thus, completely eliminating any differences between

spellcasters), then eliminate the *Multiclass Spellcasters* section. Each character has one pool of spell points which can be used for any of the spells they know.

The *System Reference Document* section on *Spell Points* is reprinted in this ruleset for convenience. Note that the **Spell Points per Day** and **Bonus Spell Points** tables from the SRD have been expanded and are included in this document as **Table 17: Expanded Spellcaster Level Chart**, **Table 18: Expanded**

Bonus Spell Points (Spellcasters), and **Table 19: Expanded Bonus Spell Points (Bard)**. Additions and changes to the SRD text are noted by brackets containing italicized text.

CAMPAIGNS

No variant rules in this section are included as necessary parts of this ruleset.

SPELL POINTS

The spell point system presented here allows casters to more freely pick and choose which spells they cast each day.

Every spellcaster has a reserve of spell points based on class and level (see Table: Spell Points Per Day). [See **Table 17: Expanded Spellcaster Level Chart** in this document] Characters also gain bonus spell points from a high ability score (just as a normal spellcaster would gain bonus spells from a high ability score; see Bonus Spell Points and Bonus Spells, below). These spell points provide the magical power behind the caster's spells: He spends a number of spell points appropriate to the spell's level to cast the spell (see Casting Spells, below). Once spent, spell points are expended until the caster has sufficient time to rest and prepare new spells (see Preparing Spells, below).

PREPARING SPELLS

With this variant, spellcasters still prepare spells as normal (assuming they normally prepare spells). In effect, casters who prepare spells are setting their list of "spells known" for the day. They need not prepare multiple copies of the same spell, since they can cast any combination of their prepared spells each day (up to the limit of their spell points).

For example, Gusto the 4th-level wizard has an Intelligence score of 16. When using the spell point system, he would prepare four 0-level spells, four 1st-level spells (three plus his bonus spell for high Int), and three 2nd-level spells (two plus his bonus spell for high Int). These spells make up his entire list of spells that he can cast during the day, though he can cast any combination of them, as long as he has sufficient spell points.

BONUS SPELL POINTS AND BONUS SPELLS

Any spellcaster who would normally receive bonus spells for a high ability score receives bonus spell points instead. In effect, the character can simply cast more of his spells each day.

To determine the number of bonus spell points gained from a high ability score, first find the row for the character's ability score on Table: Bonus Spell Points. [See **Table 18: Expanded Bonus Spell Points (Spellcasters)** and **Table 19: Expanded Bonus Spell Points (Bard)** in this document] Use whichever ability score would normally award bonus spells for the character's class (Wisdom for clerics and druids, Intelligence for wizards, and so forth).

Next, find the column for the highest level of spell the character is capable of casting based on his class level (even if he doesn't have a high enough ability score to cast spells of that level). [On **Table 18** and **Table 19** you find the column for the character's caster level] At the point where the row and column intersect, you find the bonus spell points the character gains. This value can change each time his ability score undergoes a permanent change (such from an ability score increase due to character level or one from a wish spell) and each time his level changes.

For example, Gusto the 4th-level wizard has an Intelligence score of 16 and is capable of casting 2nd-level spells. The number on Table: Bonus Spell Points at the intersection of the 16-17 row and the 2nd column is 4, so Gusto has 4 extra spell points to spend each day (in addition to the 11 points he gets for being a 4th-level wizard). If

Gusto's Intelligence were increased to 20 because of a fox's cunning spell or a headband of intellect +4, he wouldn't gain any additional bonus spell points, since those effects produce temporary changes, not permanent changes. However, when he reaches 5th level, his bonus spell points would increase from 4 to 9 (since he is now capable of casting 3rd-level spells and thus uses that column), and his overall total would increase from 15 to 25.

A character who would normally receive bonus spells from a class feature (such as from wizard specialization or access to a domain) can instead prepare extra spells of the appropriate levels, domains, and/or schools. The character doesn't get any extra spell points (and thus can't cast any more spells than normal), but the added flexibility of being able to use the bonus spell more than once per day makes up for that.

For instance, a specialist wizard can prepare one extra spell from the chosen school of each spell level that he can cast. A cleric can prepare one domain spell (chosen from among his domain spells available) of each spell level that he can cast.

For example, if Gusto were a transmuter, he could prepare one additional spell per level, but that spell would have to be from the transmutation school. Once it is prepared, he can use that spell just like any of his other spells, casting it as often as he has spell points.

Another example: At 1st level, Kemper the cleric gains a bonus 1st-level spell, which must be selected from one of his two domains. Once it is prepared, he can use that domain spell just like any of his other spells, casting it as often as he has spell points.

For class features that grant bonus spells of a nonfixed spell level (such as the dragon disciple's bonus spells), the character instead gains a number of bonus spell points equal to twice the highest spell level he can cast, minus 1 (minimum 1 point) each time he gains a bonus spell. This is a fixed value—it doesn't increase later as the character gains levels—though later rewards may be larger as appropriate to the character's spellcasting ability.

For example, a 4th-level fighter/4th-level sorcerer who gains a level of dragon disciple gets a bonus spell. Since the character is capable of casting 2nd-level spells, he receives 3 bonus spell points ($2 \times 2 = 4, 4 - 1 = 3$).

SPONTANEOUS SPELLCASTING

Characters who cast all their spells spontaneously—such as bards and sorcerers—don't have to prepare spells. They can cast any spell they know by spending the requisite number of spell points.

Characters with the ability to cast a limited number of spells spontaneously (such as druids, who can spontaneously cast a summon nature's ally spell in place of another spell of the same level) are always treated as having those spells prepared, without spending any spell slots to do so. Thus, they can cast such spells any time they have sufficient spell points.

Under this system, the Healing domain becomes a relatively poor choice for good-aligned clerics, since they gain less of a benefit for that domain. See Spontaneous Divine Casters for ways to solve that dilemma.

REGAINING SPELL POINTS

Spellcasters regain lost spell points whenever they could normally regain spells. Doing this requires

the same amount of rest and preparation or concentration time as normal for the class. Without this period of rest and mental preparation, the caster's mind isn't ready to regain its power. Spell points are not divorced from the body; they are part of it. Using spell points is mentally tiring, and without the requisite period of rest, they do not regenerate. Any spell points spent within the last 8 hours count against a character's daily limit and aren't regained. [*The Spell Point Variant: Vitalizing is used by this ruleset. This changes they way spell points are recovered.*]

CASTING SPELLS

Each spell costs a certain number of spell points to cast. The higher the level of the spell, the more points it costs. Table: Spell Point Costs describes each spell's cost. [*A spell's cost is equal to twice its level minus one. A 0th level spell costs 0.5 spell points*]

Spellcasters use their full normal caster level for determining the effects of their spells in this system, with one significant exception. Spells that deal a number of dice of damage based on caster level (such as magic missile, searing light, or lightning bolt) deal damage as if cast by a character of the minimum level of the class capable of casting the spell. Spells whose damage is partially based on caster level, but that don't deal a number of dice of damage based on caster level (such as produce flame or an inflict spell) use the spellcaster's normal caster level to determine damage. Use the character's normal caster level for all other effects, including range and duration.

For example, a fireball deals a number of dice of damage based on the caster's level, so when cast by a wizard using this system, it deals 5d6 points of damage (as if cast by a 5th-level wizard, which is the minimum level of wizard capable of casting fireball). A sorcerer who

casts the same spell deals 6d6 points of damage, since the minimum level of sorcerer capable of casting fireball is 6th.

A character can pay additional spell points to increase the dice of damage dealt by a spell. Every 1 extra spell point spent at the time of casting increases the spell's effective caster level by 1 for purposes of dealing damage. A character can't increase a damage-dealing spell's caster level above his own caster level, or above the normal maximum allowed by the spell.

For example, even at 7th level, Gusto's lightning bolts deal only 5d6 points of damage (just like a 5th-level wizard) unless he spends extra spell points. If he spends 1 extra spell point (making the lightning bolt cost 6 points rather than 5), the spell deals 6d6 points of damage. A second extra spell point would increase the damage to 7d6 points, but he can't spend more points than this, since his caster level is only 7th. Were he 10th level or higher, he could spend a maximum of 5 extra spell points on this spell, raising the damage up to 10d6, the maximum allowed for a lightning bolt spell.

Similarly, his magic missile spell only shoots one missile unless he spends extra spell points. An extra 2 spell points increases the caster level from 1st to 3rd, granting his one additional missile. He can spend a maximum of 6 additional spell points in this manner, increasing his effective caster level to 7th for damage purposes and granting his a total of four missiles. If he were 9th level or higher, he could spend a maximum of 8 extra spell points, granting his five missiles (just like a 9th-level caster).

METAMAGIC AND SPELL POINTS

In the spell point system, a GM has two options for how to adjudicate metamagic effects. In either case,

casters need not specially prepare metamagic versions of their spells—they can simply choose to apply the metamagic effect at the time of casting. Doing this does not increase the spell's casting time.

The first option is to apply an additional spell point cost to any spell cast with a metamagic feat. This option allows a character maximum flexibility in his choice of spellcasting. Effectively, the character must pay for the spell as if it were a higher-level spell, based on the adjustment from the metamagic feat. If the metamagic effect(s) would increase the spell's effective level above what he is capable of casting, he can't cast the spell in that way. [*This option is used by this ruleset.*]

For example, at 7th level Gusto is capable of casting 4th-level spells. He could empower a 2nd-level spell, or still a 3rd-level spell, or empower and still a 1st-level spell. He couldn't empower a 3rd-level spell or still a 4th-level spell (since doing either of those things would raise either spell's effective spell level to 5th).

The spell's caster level for purposes of damage-dealing effects (see above) doesn't change, even if the metamagic effect increases the minimum caster level of that spell. For instance, a quickened fireball still deals damage as if cast by a 5th-level caster unless the caster chooses to pay additional spell points to increase the caster level.

For example, if Gusto empowered his magic missile, it would cost his 5 spell points (as if it were a 3rd-level spell) but would shoot only one missile and deal $(1d4+1 \times 1.5)$ points of damage.

If he spent an additional 6 spell points (for a total of 11), the caster level of the magic missile would increase to 7th, and the spell would shoot four missiles dealing a total of $(4d4+4 \times 1.5)$ points of damage.

The second option is simpler but less flexible. In this option, each selection of a metamagic feat allows a character to apply the feat's effects three times per day at no additional spell point cost. The normal limit for maximum spell level applies (a 7th-level wizard can't empower any spell higher than 2nd level, for instance). [*This option is not used by this ruleset.*]

You could even combine these options, allowing a spellcaster with a metamagic feat to use the feat three times per day for free, but any additional uses in the same day would cost extra spell points. Only choose this combination approach if you're comfortable with characters throwing around a lot of metamagic spells.

MULTICLASS SPELLCASTERS

A character with nonstacking spellcasting ability from multiple classes (such as a cleric/wizard) has a separate pool of spell points for each spellcasting class. Such characters may only spend spell points on spells granted by that class. Bonus spell points from a high ability score apply to each pool separately, even if the same ability score is tied to more than one spellcasting class. In the rare situations when a character has prepared or knows the same spell in two different slots (such as a druid/ranger preparing delay poison as both a 2nd-level druid spell and a 1st-level ranger spell), the character can cast the spell using either pool of spell points, but the spell is treated as being cast by a caster of the level of the class from which the spell points are drawn.

For example, a 5th-level cleric/2nd-level bard has 15 spell points (plus bonus spell points for high Wisdom) for his cleric spells and 0 spell points (plus bonus spell points for high Charisma) for his bard spells. When he casts cure moderate wounds, the points for

that spell must be drawn from his pool of cleric spell points. If he knows cure light wounds as a bard spell and has also prepared it as a cleric spell, he may cast it either as a cleric or as a bard. As a cleric spell, the spell is cast at 5th level and heals $1d8+5$ points of damage; as a bard spell, it is cast at 2nd level and heals $1d8+2$ points of damage. [*If the Component Spellcasting Traits are used, there is only one source of magic, so there are no multiclass spellcasters.*]

MISCELLANEOUS ISSUES

When a character would lose a spell slot (such as from gaining a negative level), he instead loses the number of spell points required to cast his highest-level spell.

Spells that allow a character to recall or recast a spell don't function in this system. (It doesn't make any sense to have a spell that gives you more spell points, since you're either paying more than you get, getting nothing, or getting more than you paid.) Items that function similarly can work, but differently—they restore a number of spell points required to cast a spell of that level. A pearl of power for 3rd-level spells, for instance, would restore 5 spell points to a character's pool of available points when activated.

SPELL POINT VARIANT: VITALIZING

In the vitalizing system, spellcasters can potentially cast a great number of spells in a day, but every spell cast is a potential burden on the caster's health and vitality. Reaching for and directing magical energy is a dangerous and taxing exercise, at least as difficult as heavy labor or prolonged exertion.

This variant of the spell point system does not change the way a character prepares spells, casts spells, regains spell points, or any of

the other rules from that system. However, the spellcaster's pool of spell points represents a physical, not just mental, limit on his spellcasting power.

When a spellcaster's spell point pool falls to half of his maximum or less, he becomes fatigued.

When his spell points drop to one-quarter of his maximum or less, he becomes exhausted.

For example, at 1st level Kemper the cleric has 3 spell points (2 from his level, +1 bonus point for high Wisdom). He enters a fight by casting bless on his allies, spending 1 of his 3 spell points. Doing this has no ill effect on Kemper, since he still has more than half of his maximum spell points remaining. If, during the fight, he then casts divine favor, spending another spell point, he now becomes fatigued, since he has only one-third of his spell points remaining. After the fight, he spontaneously casts cure light wounds on Quint, spending his last spell point. Not only has he exhausted his spells for the day, but he has exhausted his body as well.

RECOVERING SPELL POINTS

In the vitalizing system, spellcasters must rest to recover their spell points and restore their physical well-being. A character's spell point total is tied directly to his level of fatigue. If an exhausted character rests for 1 hour, he becomes fatigued—and his spell point total rises to one-third of his normal maximum (round fractions down). A second hour of rest increases the spellcaster's spell point total to two-thirds of his maximum. It takes

another 6 hours of rest to replenish the last one-third of his spell points and shake the physical effects of the spellcasting. Spells that remove fatigue and exhaustion (such as heal and restoration) leave the recipient with a spell point total equal to two-thirds of his normal maximum.

As in the standard rules, a spellcaster must rest for a full 8 hours before preparing a fresh allotment of spells for the day. Even if an exhausted spellcaster regains his lost energy and spell points, he can't change the spells he has prepared without 8 hours of rest.

If a spellcaster is subjected to some other effect that would make him fatigued or exhausted, he loses spell points accordingly. If he becomes fatigued, his spell point total drops to one-half his normal maximum (round down), and if he becomes exhausted, his spell point total drops to one-quarter his normal maximum.

[In this ruleset, a character's spell point total is not tied to his level of fatigue. Thus, spells that remove fatigue and exhaustion (such as heal and restoration) do not alter the recipient's spell point total. Characters do not lose spell points if they are subjected to some other effect that would make them fatigued or exhausted either.]

Spell points are recovered only by rest. The first two-thirds of a character's spell points are recovered over the first two hours of rest. The last third of a character's spell points are recovered after an additional six hours of rest. Put another way, spell point recovery proceeds at a rate of one-third the character's maximum spell point pool per hour as long as

the character's current spell point total is two-thirds maximum or less. Spell point recovery proceeds at a rate of one-third the character's maximum spell point pool for every six hours (1/18th maximum spell point pool per hour) if the character's current spell point total is greater than two-thirds maximum.]

OPTIONAL VITALIZING VARIANTS

As a further variant of this system, all spellcasters gain bonus spell points based on their Constitution scores rather than the ability score that normally grants bonus spells. This variant reflects the idea that spellcasting power is tied to the caster's physical health. It also essentially requires spellcasters to have two high ability scores, though most spellcasters are happy to have a high Constitution score anyway. *[This option is used by this ruleset.]*

A second optional variant would allow a spellcaster to exceed his normal pool of spell points, but at great personal risk. Doing so successfully requires a Concentration check (DC 20 + spell level). Each time a character casts a spell for which he does not have sufficient spell points and subsequently fails the Concentration check, he takes both lethal and nonlethal damage equal to the level of the spell cast. A desperate (or unwary) spellcaster can literally cast himself into unconsciousness in this manner. *[This option is used by this ruleset.]*

APPENDIX I: A RADICAL DEPARTURE

This section will detail how a Dungeon Master might organize a campaign using these rules and the options presented herein. It is assumed that our DM is bold and daring and will create a campaign which is a radical departure from the way D&D is played normally.

It may be useful to first list a number of ways these rules and options could be employed. Let's start with the "Basic System" that is presented in this ruleset. The Basic D&D5E system allows traits from the Basic Traits and the Spellcasting Traits sections only. The Character Level Determination table is used with all of the level-determining traits (including base feats). The experience award system follows the normal D&D3.5E rules. The Basic System is the "tightest" of the systems and more closely adheres to 3.5E than any other version.

If the Spell Points Variant is used from *Unearthed Arcana*, then the Optional Partial-Level Spellcasting Traits section replaces the Spellcasting Traits section from the Basic System. Theurgy spells can be added if desired. Class spellcasting distinctions remain.

If the Spell Points Variant is used, the Optional Component Spellcasting Traits section can also be used to replace the Spellcasting Traits section from the Basic System. In this case, the theurgy spells should be used. Class spellcasting distinctions are eliminated.

If changes to the rules governing the base attack bonus are desired, there are a number of options. One is to use the changes found in Optional Base Traits. Another is to use the Optional Weapon Skills section. In these cases, the Base Attack Bonus trait from Basic Traits in the Basic System are eliminated. The Martial Training feat should be adopted.

Using Optional Bonus Feats removes base feats from the Character Level Determination table.

Another option is to eliminate the Class Level traits by expanding the Profession skill.

Optional Level Determination makes a character's level dependent on the amount of experience points spent on traits, rather than dependent on the actual traits themselves.

The Blue-Booking Advancement system can be used alongside the normal advancement system. The Instance-Based Advancement system replaces the normal advancement system.

Looking over all of these variants, our DM decides to employ the following options. He decides to use the Optional Component Spellcasting Traits, Optional Weapon Skills, Optional Bonus Feats, and the expansion of the Profession skill to cover class levels. He also wants to reduce the number of categories that traits fall under.

First, he notices that the cost to raise the base attack bonus by +1 is equal to 300 XP per CL. This is the equivalent of twelve weapon skills. He decides to create a Use Weapon skill that functions much like Knowledge and Perform. This skill will have twelve sub-skills which will cover all types of weapons. He will also include the Martial Training feat.

He rewrites the description of the Profession skill to include how class levels are obtained from this skill. Class level will be equal to the number of skill ranks minus three (minimum of one class level).

Looking over the Optional Component Spellcasting Traits section, he realizes that he wants to

simplify this greatly. He wants to determine how spell lists are bought and not leave it up to the players. The first thing that he notices is the buying all of the spells of a particular level from a particular school costs the same amount as buying two ranks in a skill. Since access to a new level of spells normally comes every two levels for a spellcaster, he decides to come up with two Magic skills that will give characters access to spells (i.e., allow characters to systematically add spells to their own personal spell list). He creates these skills using Knowledge as a model, including ten sub-skills, each one based on a school of magic. He includes "universal" as a school and groups all conjuration (healing) spells together calling it the "restoration" school.

Two existing feats inspire him to change the way the spells are learned and spell points are acquired. Since gaining a "level's worth" of spell points costs 100 XP per CL, just like a feat, he introduces the Magical Talent feat, which is based on the Psionic Talent feat from the System Reference Document. He realizes then that he must use the Optional Bonus Feats section from this ruleset to eliminate base feats as a level-determining trait. He also notices that learning spells costs 50 XP per CL and the epic feat Spell Knowledge allows a character to learn two new spells. Since all feats cost 100 XP per CL, the Spell Knowledge feat is easily adapted for non-epic use. Thus, gaining spell points and learning new spells are now governed by feats in his rule system and can be eliminated as separate traits. Lastly, after a few calculations, he realizes that he can derive caster levels from his new Magical Theory skill. Now he has completely redesigned the magic system of the entire game and reduced it to one skill and two feats.

Since the cost to increase a base saving throw by +1 is the same as the cost to buy a feat, he introduces three new feats that can be used to increase saving throws. He also notices that buying four hit points costs the same as buying one feat, so he rewrites the Toughness feat to allow four hit points to be gained instead of three. Special abilities also cost the same as feats, so he redefines all special abilities, making them “feats” now. He also devises a feat to govern ability score increases. In this way, he has eliminated four traits, but these traits can be advanced by purchasing feats now.

Now, players in his campaign need only concern themselves with two traits: skills and feats. The base attack bonus, class levels, caster levels, spell lists, and skills fall under the Skills category. Class special abilities, hit points, spell points, base saving throw bonuses, spell knowledge, ability score increases, and feats all fall under the Feats category. He realizes that some players may abuse the freedom that this system offers, so he decides to use the Character Level Determination a little differently. Instead of allowing the players to freely advance traits and determine their characters’ levels, he will set the maximum character level of the campaign at the beginning of the campaign and then advance that maximum level as the campaign progresses. During character generation, he makes 1st level the maximum character level. This means that players may not advance their characters’ traits beyond the limits shown for 1st level characters. After play begins, he sets the maximum at the 2nd character level. He decides that after every dozen encounters, he will raise the maximum character level by one. At that time, all characters will receive bonus hit points and skill points (due to Con and Int).

New tables, skills, and feats are listed below.

TABLE 21: CHARACTER LEVEL LIMITS

Character Level	Skill Rank Maximum
¼	1
½	2
¾	3
1	4
2	5
3	6
4	7
5	8
6	9
7	10
8	11
9	12
10	13
11	14
12	15
13	16
14	17
15	18
16	19
17	20
18	21
19	22
20	23

TABLE 22: BASIC TRAITS

Trait	XP Cost	Per
Skills	25	Skill Rank
Feats	100	Feat

These tables replace all other tables found in this ruleset. **Table 21: Character Level Limits** shows the maximum skill ranks that characters can have based on the maximum character level the DM has set for the campaign. Characters can purchase any number of feats unless the feat description says otherwise. **Table 22: Basic Traits** replaces all trait cost tables.

NEW SKILLS

These new skills eliminate the need for separate base attack bonus, spellcaster level, spell list, and class level traits.

ARCANE MAGIC (SPECIAL; TRAINED ONLY)

Like the Craft, Knowledge, and Profession skills, Arcane Magic actually encompasses a number of related skills. Each Arcane Magic skill represents the character's knowledge and mastery of one of the schools of arcane magic. These schools with their key abilities and associated spells are:

- **Abjuration** (Charisma; all arcane spells of the abjuration school)
- **Conjuration** (Intelligence; all arcane spells of the conjuration school except those of the healing subschool)
- **Divination** (Wisdom; all arcane spells of the divination school)
- **Enchantment** (Charisma; all arcane spells of the enchantment school)
- **Evocation** (Constitution; all arcane spells of the evocation school)
- **Illusion** (Dexterity; all arcane spells of the illusion school)
- **Necromancy** (Constitution; all arcane spells of the necromancy school)
- **Restoration** (Wisdom; all arcane spells of the healing subschool of conjuration)
- **Transmutation** (Dexterity; all arcane spells of the transmutation school)
- **Universal** (Intelligence; not technically a school, but this skill covers all arcane universal spells, including theurgy spells)

Check: Normally associated with caster level checks only. The key ability does not figure into caster level checks. The key ability does

affect the saving throw DC for spells of that school.

Action: Not Applicable.

Try Again: Not Applicable.

The Arcane Magic skill doesn't work like other skills. Arcane Magic grants the character the following advantages:

Arcane Spellcaster Level: the character's level for the purposes of arcane spellcasting is equal to the number of skill ranks the character has in Arcane Magic minus three (but see note below). Each Arcane Magic (school) skill counts separately. Thus, a character can potentially have ten different arcane spellcaster levels, since there are ten different Arcane Magic (school) skills. Spellcaster level governs the highest level of arcane spell the character can use, the maximum number of spell points the character can use for one spell, and is used for all situations where an arcane caster level is required. The character's arcane caster level in each school is based on the number of skill ranks in Arcane Magic the character has in that particular school. For game effects requiring an arcane class caster level (or some other "generic" caster level), use the highest caster level from among the character's ten different Arcane Magic (school) skills. For example, the character's highest caster level is used when meeting the prerequisites for Item Creation feats. For caster level checks, use the appropriate Arcane Magic skill to determine caster level.

Note that a character having two or three ranks in this skill can use up to ½ a spell point per spell and is considered a ½ level spellcaster. Thus, having two ranks in an Arcane Magic skill allows the character to use 0th level arcane spells.

Spell Lists: Each Arcane Magic skill allows the character to access arcane spells of the appropriate

school. These spells become part of the character's personal spell list, representing the breadth of the character's magical knowledge and training. All of these spells do not become known automatically by the character, but they can be learned through normal means. All spells of the appropriate school up to a level equal to the number of Arcane Magic skill ranks divided by two, minus one, become part of the character's spell list. See the chart below.

Ranks	Spell Level	Ranks	Spell Level
2	0 th	12	5 th
4	1 st	14	6 th
6	2 nd	16	7 th
8	3 rd	18	8 th
10	4 th	20	9 th

For example, a character with 10 ranks in Arcane Magic (evocation) would include all arcane evocation spells up to 4th level on his personal spell list.

In order to cast spells, the character must take either the Spell Preparation feat which allows the spellcaster to prepare spells for casting or the Spell Knowledge feat in order to cast spells spontaneously (without preparation). Access to spell lists is simply a prerequisite to learning or preparing spells. To prepare and cast an arcane spell, the character must have an Intelligence score equal to 10 + the arcane spell level. To learn and cast an arcane spell, the character must have a Charisma score equal to 10 + the arcane spell level.

DIVINE MAGIC (SPECIAL; TRAINED ONLY)

Like the Craft, Knowledge, and Profession skills, Divine Magic actually encompasses a number of related skills. Each Divine Magic skill represents the character's knowledge and mastery of one of the schools of divine magic. These schools with their key abilities and associated spells are:

- **Abjuration** (Charisma; all divine spells of the abjuration school)
- **Conjuration** (Intelligence; all divine spells of the conjuration school except those of the healing subschool)
- **Divination** (Wisdom; all divine spells of the divination school)
- **Enchantment** (Charisma; all divine spells of the enchantment school)
- **Evocation** (Constitution; all divine spells of the evocation school)
- **Illusion** (Dexterity; all divine spells of the illusion school)
- **Necromancy** (Constitution; all divine spells of the necromancy school)
- **Restoration** (Wisdom; all divine spells of the healing subschool of conjuration)
- **Transmutation** (Dexterity; all divine spells of the transmutation school)
- **Universal** (Intelligence; not technically a school, but this skill covers all divine universal spells, including theurgy spells)

Check: Normally associated with caster level checks only. The key ability does not figure into caster level checks. The key ability does affect the saving throw DC for spells of that school.

Action: Not Applicable.

Try Again: Not Applicable.

The Divine Magic skill doesn't work like other skills. Divine Magic grants the character the following advantages:

Divine Spellcaster Level: the character's level for the purposes of divine spellcasting is equal to the number of skill ranks the character has in Divine Magic minus three (but see note below). Each Divine Magic (school) skill counts separately. Thus, a character can potentially have ten different divine spellcaster levels, since there are ten

different Divine Magic (school) skills. Spellcaster level governs the highest level of divine spell the character can use, the maximum number of spell points the character can use for one spell, and is used for all situations where an divine caster level is required. The character's divine caster level in each school is based on the number of skill ranks in Divine Magic the character has in that particular school. For game effects requiring a divine class caster level (or some other "generic" caster level), use the highest caster level from among the character's ten different Divine Magic (school) skills. For example, the character's highest caster level is used when meeting the prerequisites for Item Creation feats. For caster level checks, use the appropriate Divine Magic skill to determine caster level.

Note that a character having two or three ranks in this skill can use up to ½ a spell point per spell and is considered a ½ level spellcaster. Thus, having two ranks in a Divine Magic skill allows the character to use 0th level divine spells.

Spell Lists: Each Divine Magic skill allows the character to access divine spells of the appropriate school. These spells become part of the character's personal spell list, representing the breadth of the character's magical knowledge and training. All of these spells do not become known automatically by the character, but they can be learned through normal means. All spells of the appropriate school up to a level equal to the number of Divine Magic skill ranks divided by two, minus one, become part of the character's spell list. See the chart below.

Ranks	Spell Level	Ranks	Spell Level
2	0 th	12	5 th
4	1 st	14	6 th
6	2 nd	16	7 th
8	3 rd	18	8 th
10	4 th	20	9 th

For example, a character with 10 ranks in Divine Magic (restoration) would include all divine conjuration (healing) spells up to 4th level on his personal spell list.

In order to cast spells, the character must take either the Spell Preparation feat which allows the spellcaster to prepare spells for casting or the Spell Knowledge feat in order to cast spells spontaneously (without preparation). Access to spell lists is simply a prerequisite to learning or preparing spells. To prepare, learn, or cast a divine spell, the character must have a Wisdom score equal to 10 + the divine spell level.

PROFESSION (WIS; TRAINED ONLY)

Like Craft, Knowledge, and Perform, Profession is actually a number of separate skills. You could have several Profession skills, each with its own ranks, each purchased as a separate skill. While a Craft skill represents ability in creating or making an item, a Profession skill represents an aptitude in a vocation requiring a broader range of less specific knowledge.

Traditional character classes can also be chosen for the Profession skill. In this case, the character is considered to have a number of class levels in that class equal to his Profession skill ranks in that class minus three (with a minimum of one level). For example, if a character has six ranks in Profession (cleric), that character is considered to be a 3rd level cleric for the purposes of meeting feat prerequisites, special abilities, and the like. Note that this skill does not grant the character spellcasting ability, turn undead ability, or any other ability of a 3rd level cleric. If the character does possess the ability to turn undead, he will turn as if he were a 3rd level cleric. Upon gaining an additional rank in Profession (cleric), he will turn undead as a 4th level cleric.

Check: You can practice your trade and make a decent living, earning about half your Profession check result in gold pieces per week of dedicated work. You know how to use the tools of your trade, how to perform the profession's daily tasks, how to supervise helpers, and how to handle common problems.

Action: Not applicable. A single check generally represents a week of work.

Try Again: Varies. An attempt to use a Profession skill to earn an income cannot be retried. You are stuck with whatever weekly wage your check result brought you. Another check may be made after a week to determine a new income for the next period of time. An attempt to accomplish some specific task can usually be retried.

Untrained: Untrained laborers and assistants (that is, characters without any ranks in Profession) earn an average of 1 silver piece per day.

USE WEAPON (STR OR DEX)

Like the Craft, Knowledge, and Profession skills, Use Weapon actually encompasses a number of related skills. Each Use Weapon skill represents the character's practical ability to use weapons from one of a number of groups. These weapon groups are:

- **Axes** (handaxe, battleaxe, greataxe, dwarven waraxe [one-handed and two-handed use], orc double axe, dwarven urgrosh [uses lower of this or Use Weapon (spears) skill])
- **Bows** (shortbow, longbow, composite shortbow, composite longbow, elven double bow, greatbow, composite greatbow)
- **Crossbows** (heavy crossbow, light crossbow, ray [ranged touch attack], repeating heavy crossbow, repeating light

crossbow, great crossbow, hand crossbow)

- **Flails** (light flail, heavy flail, dire flail, nunchaku, gyrspike [uses lower of this or Use Weapon (heavy blades) skill], chain-and-dagger, scourge, spiked chain, three-section staff, whip, whipdagger)
- **Hammers** (light pick, heavy pick, light hammer, warhammer, sickle, scythe, kama, maul [one-handed and two-handed use], double hammer, gnome hooked hammer, dire pick, gnome battlepick)
- **Heavy Blades** (longsword, greatsword, falchion, scimitar, bastard sword [one-handed and two-handed use], double scimitar, two-bladed sword, gyrspike [uses lower of this or Use Weapon (flails) skill], khopesh, mercurial longsword, mercurial greatsword, butterfly sword)
- **Light Blades** (dagger, punching dagger, rapier, short sword, sai, kukri, siangham, sapara, triple dagger, war fan)
- **Maces** (club, light mace, heavy mace, morningstar, greatclub, quarterstaff, sap, warmace [one-handed and two-handed use], double mace, tonfa)
- **Polearms** (glaive, guisarme, halberd, ranseur, heavy poleaxe)
- **Spears** (javelin, lance, spear, longspear, shortspear, trident, dwarven urgrosh [uses lower of this or Use Weapon (axes) skill], duom, greatspear, harpoon, manti, spinning javelin)
- **Thrown Weapons** (dart, sling, throwing axe, bolas, net, chakram, gnome calculus, halfling skiprock, orc shotput, shuriken, throwing iron)
- **Unarmed** (unarmed strike, grapple, touch attacks, light shield, heavy shield, punching dagger, spiked gauntlet, bladed gauntlet, claw bracer, panther

claw, stump knife, tiger claws, ward cestus)

Check: Normally associated with attack rolls only. The Strength modifier is used with melee attacks, while the Dexterity modifier is used with ranged attacks. The DC is typically the AC of the target.

Action: None. Weapons are used in combat. There is no reason to make a skill check with this skill, other than using the skill in place of the base attack bonus.

Try Again: Not Applicable. You may continue fighting as long as you are alive.

The Use Weapon skill works a little differently than other skills. This skill is used in place of the base attack bonus. Characters completely unskilled in the use of a weapon (i.e., having no ranks in the skill pertaining to that particular weapon) have a -4 penalty on attack rolls when using that weapon. Each skill rank in a weapon gives the character a +1 to his attack bonus with that weapon. So, the first rank in a weapon skill causes you to have a -3 attack bonus with that weapon, the second rank gives you a -2 attack bonus, the third a -1 attack bonus, and upon purchasing the fourth rank in that weapon skill, the penalty is negated entirely. Fifth and successive skill ranks give you a bonus on attack rolls with that weapon.

Multiple attacks are gained normally. When the number of skill ranks (plus the attack penalty) reaches +6, one additional attack at a -5 penalty to the attack roll is gained. When this total reaches +11, an additional attack at a -10 penalty to the attack roll is gained. At +16, another attack at a -15 penalty on the attack roll is gained for a total of four attacks.

Any new type of weapon added to the game must be put into one of the twelve categories above.

NEW FEATS

These new feats eliminate the base hit point, base save bonus, ability score, spell knowledge, ability score increase, and spell point traits.

ENHANCED ABILITY [GENERAL]

Prerequisite: None.

Benefit: Choose one ability (such as Strength or Intelligence). Increase that ability by one point.

Special: During character generation, you may take this feat any number of times. After play begins, you may take this feat a number of times equal to the campaign's maximum character level divided by four (round down). Its effects stack.

FORTITUDE [GENERAL]

Prerequisite: None.

Benefit: You gain +1 to your base Fortitude save.

Special: You can take this feat a number of times equal to two plus half of the campaign's maximum character level (round down). Its effects stack.

GENERAL TRAINING [GENERAL]

Prerequisites: None.

Benefit: You gain a number of skill ranks, hit points, or spells. You have four units with which to purchase either skill ranks, hit points, or spells. Each skill rank costs one unit. Each hit point costs one unit. Each spell costs two units. You need not purchase from each category. If you purchase a spell, you may learn a new spell of any level up to the maximum level you can cast. This spell must appear on your spell list.

Special: You can gain this feat multiple times. Base hit points cannot exceed twelve times your campaign's maximum character level. Ranks in a skill cannot exceed three plus the maximum character level of the campaign.

MAGICAL TALENT [GENERAL]

You gain additional spell points.

Prerequisite: Having at least one base spell point. Note that all characters begin play with one base spell point.

Benefit: When you take this feat for the first time, you gain two base spell points.

Special: You can take this feat a number of times equal to your campaign's maximum character level. Each time you take this feat after the first, the number of base spell points you gain increases by one. For example, to take this feat a second time, a character must at least 2nd character level and the character will receive an additional three base spell points. To take this feat a third time, the character must be at least 3rd character level and the character will receive an additional four base spell points. At 4th character level, the character can take this feat a fourth time and add five base spell points to his total.

MARTIAL TRAINING [GENERAL]

Prerequisites: Four ranks in each of four different Use Weapon skills.

Benefit: You have a -3 penalty on attack rolls when using a weapon in which you have no weapon skill ranks. This replaces the -4 penalty on attack rolls for using a weapon unskilled.

Normal: All characters receive a -4 penalty on attack rolls when using weapons in which they have no skill

ranks. Skill ranks in Use Weapon (group) are added to this penalty to determine a character's attack bonus with weapons in that group.

REFLEX [GENERAL]

Prerequisite: None.

Benefit: You gain +1 to your base Reflex save.

Special: You can take this feat a number of times equal to two plus half of the campaign's maximum character level (round down). Its effects stack.

SPELL KNOWLEDGE [GENERAL]

Prerequisite: Two ranks in Arcane Magic or Divine Magic.

Benefit: You learn two new spells of any level up to the maximum level you can cast. These spells must appear on your spell list. Once learned, these spells can be cast without preparation, following the normal rules for spellcasting. This feat does not grant any additional spell points.

Special: You can gain this feat multiple times.

SPELL PREPARATION (ARCANE) [GENERAL]

Prerequisite: Two ranks in Arcane Magic.

Benefit: You are able to prepare a number of arcane spells per day. Consult the table below, cross-referencing the number of times this feat has been taken with each spell level to see how many spells of that level can be prepared.

Special: You can take this feat a number of times equal to your campaign's maximum character level. It is left to the discretion of the DM as to how the character acquires and prepares spells.

**SPELL PREPARATION
(DIVINE) [GENERAL]**

Prerequisite: Two ranks in Divine Magic.

Benefit: You are able to prepare a number of divine spells per day. Consult the table below, cross-referencing the number of times this feat has been taken with each spell level to see how many spells of that level can be prepared.

Choose two domains. You may prepare one additional spell for every spell level that you can cast. This additional spell must be one or your domain spells.

Special: You can take this feat a number of times equal to your campaign's maximum character level. It is left to the discretion of the DM as to how the character acquires and prepares spells.

TOUGHNESS [GENERAL]

Prerequisite: None.

Benefit: You gain +4 base hit points.

Special: You can gain this feat multiple times. Its effects stack. Your base hit points cannot exceed twelve times your campaign's maximum character level. This version of the Toughness feat

replaces the old version of the Toughness feat.

WILL [GENERAL]

Prerequisite: None.

Benefit: You gain +1 to your base Will save.

Special: You can take this feat a number of times equal to two plus half of the campaign's maximum character level (round down). Its effects stack.

PUTTING IT ALL TOGETHER

So, how will our intrepid DM use this minimalist system? First, the DM sets the maximum character level for character generation. In most cases, the 1st character level should be chosen. To play characters that are just beginning their professional training, the DM may set the maximum character level at one of the fractional levels ($\frac{1}{4}$, $\frac{1}{2}$, or $\frac{3}{4}$). To create characters that are more experienced than those who normally begin adventuring, the DM can set the maximum character level to a level higher than 1st. Once the maximum character level has been set for character generation, the players determine their characters' ability scores through whatever method the DM decides is appropriate.

Race, alignment, vital statistics, and starting wealth are determined next. Each character receives one base hit point and one base spell point without XP cost. After this, each player is given 2,000 XP to spend on his character's traits if 1st level characters are being generated. For characters of fractional level, the amount of XP available to purchase traits is equal to the fractional level multiplied by 2,000 XP. For characters higher than 2nd level, 2,000 XP plus 1,000 XP for each additional level above 1st level is given. Regardless of the character's starting level, each skill rank costs 25 XP and each feat costs 100 XP during character generation.

During the character generation process, no skills can have more ranks than those shown in **Table 21: Character Level Limits**. The descriptions for the new feats also

detail the limitations on the number of times those feats can be chosen. Note that the Enhanced Ability feat may be taken any number of times during the character generation process, but can only be taken a limited number of times after play begins.

As an example, let's say that the DM wants players to generate 1st level characters. This means that the characters are limited to a maximum of four skill ranks in all of the skills they possess. They are also limited to twelve base hit points since the description of the Toughness feat says that characters are limited to a number of base hit points equal to twelve times their character level. Each character can have up to a +2 base save bonus for each of his saving throws. This is due to the fact that the saving throw feats (Fortitude, Reflexes,

and Will) can be taken a number of times equal to two plus half the character's level (round down). Characters can take only one Magical Talent feat as 1st level characters per the feat description. Characters can take as many General Training feats as they desire as long as they abide by the limitations on base hit points and skill ranks. Characters may take any number of Spell Knowledge and Enhanced Ability feats during character generation. Characters are not limited in the number of feats they may purchase unless the feat description says so. Since the DM has determined that all special abilities are now feats, characters can take those as well, but only those that are available to 1st level characters.

Once the characters have been created, the DM announces that play will begin. The maximum character level is raised to 2nd level at the start of the campaign. This allows the characters to purchase traits available to 2nd level characters as soon as they start earning XP. Once 1,000 XP have been earned by the characters, the DM will raise the maximum to 3rd character level. When another 1,000 XP have been earned, he will raise the limit to 4th level. When 1,000 XP more have been earned (for a career total of 3,000 XP), he will increase the limit to 5th and so on. It is important to note that the maximum character level of the campaign does not determine the character level of each individual character. Maximum character level determines the maximum number of skill ranks the DM is allowing characters to have (character level plus three). Each character has a character level equal to the highest skill rank he possesses (in any skill) minus three. Thus, even though the maximum character level allowable in the campaign may be 10th (with an upper limit of 13 skill ranks), a character could still be 6th level as long as he had no skill ranks higher than 9, for example.

A few character creation examples may be useful at this point. Let's start with the creation of a simple warrior. The player chooses to play a human and generates ability scores for his character. He ends up with Str 15, Dex 13, Con 14, Int 8, Wis 12, and Cha 11. He decides to make his character neutral good and he rolls for height, weight, and starting wealth. The DM sets the starting character level at 1st and gives the player 2,000 XP to spend on skill ranks and feats. The player wants to make a traditional fighter. He buys all three armor proficiency feats and both shield proficiency feats for 500 XP. He decides to buy four ranks each in four different Use Weapon skills (bows, heavy blades, light blades, and unarmed). This costs 400 XP. This makes his fighter eligible to buy the Martial Training feat, which he does, for 100 XP. He takes the Toughness feat two times giving his fighter nine base hit points (don't forget that the first base hit point is free). With his Constitution bonus, the character will have eleven hit points. These two feats cost 200 XP. He buys Fortitude twice for 200 XP. He purchases an additional eight skill ranks in various skills for 200 XP. He also puts four skill ranks into Profession (fighter) for 100 XP. He has spent a total of 1,600 XP so far. He spends his remaining 400 XP taking Enhanced Ability (Strength) three times, raising his Strength from 15 to 18. He also takes Enhanced Ability (Dexterity) one time, raising his Dexterity from 13 to 14. Since his character is human, he gains an additional feat and four skill ranks without cost.

Another player wants to create a spellcaster. He decides to play a chaotic good elf. He rolls for his ability scores and gets Str 10, Dex 14, Con 11, Int 15, Wis 13, and Cha 12. This player also receives 2,000 XP. He decides to spend 1,000 XP right away getting four ranks in all ten versions of Arcane Magic. He spends another 100 XP taking Magical Talent. This gives him two

more base spell points above the one free base spell point he receives at start for a total of three. His Constitution score does not give him any bonus spell points. He takes Spell Preparation once (to give himself some spellcasting flexibility and versatility) and Spell Knowledge once (giving him two spells that he doesn't have to prepare each day). This costs 200 XP. He buys eight ranks in various skills for 200 XP. He takes the Toughness feat once, giving him a new base hit point total of five for 100 XP. He buys the Will feat twice for 200 XP. So far, the player has spent 1,800 XP. To finish up, he buys four ranks in Use Weapon (heavy blades) and the Armor Proficiency (light) feat.

The next player wants to play a traditional thief. She rolls the ability scores for her character and comes up with Str 12, Dex 17, Con 13, Int 12, Wis 18, and Cha 16. With her 2,000 XP, she buys four ranks in each of the traditional thieving skills (Climb, Decipher Script, Disable Device, Hide, Listen, Move Silently, Open Lock, and Sleight of Hand). This costs 800 XP. She takes Armor Proficiency (light) along with four ranks in Use Weapon (heavy blades) and Use Weapon (light blades). These cost 300 XP. She takes Toughness twice for 200 XP. She buys Reflexes two times for 200 XP. So far, she has spent 1,500 XP. Further expanding her character's skill base, she buys four ranks each in Search, Spot, Bluff, Gather Information, and Sense Motive, spending her remaining 500 XP.

The last player, surprisingly, wants to play a character much like a traditional cleric. He gets Str 13, Dex 10, Con 12, Int 12, Wis 17, and Cha 15. He buys Armor Proficiency (light), Armor Proficiency (medium), and Shield Proficiency. These feats cost 300 XP. He takes four ranks in Use Weapon (maces) and Use Weapon (crossbows). This costs 200 XP. He buys eight ranks in various skills for 200 XP. He

takes Toughness twice for 200 XP. He buys the Will and Fortitude feats twice each for 400 XP. He now has 700 XP left. He decides to take four ranks in Divine Magical (restoration and abjuration) for 200 XP. He takes the Magical Talent feat once for 100 XP. He takes four ranks in Profession (cleric) for 100 XP and buys the Turn Undead feat for 100 XP. Finally, he takes Spell Knowledge two times for 200 XP.

As you can see, the four basic character classes can be approximated fairly well during the character generation process. The spellcaster above will not benefit immediately from his ranks in all ten versions of Arcane Magic, but it will make it easier for him to advance his knowledge in all ten areas after play begins. The cleric does not get proficiency with heavy armor at start, but that situation is easily remedied after he starts to earn XP.

And what of earning XP? How would the DM award experience points in this campaign? The normal system of awarding experience points can be used. Since a character's level is simply the highest number of skill ranks he has in any one skill minus three, this number is used for all calculations requiring character level. Thus, a character with eight skill ranks in Diplomacy would be a 5th level character (assuming that Diplomacy is the highest ranking skill he has). If this character single-handedly defeats a creature with a CR of 3, he will earn 38 XP as normal. Note that it doesn't matter if the character's highest number of skill ranks is in Diplomacy, Use Weapon (heavy blades) or Arcane Magic (evocation). The highest ranked skill is used to determine character level, no matter how

useful it may or may not be in combat.

Other factors are dependent on this character level also. A character cannot have more than twelve times his character level in base hit points. The Constitution bonus provides an additional amount of hit points equal to the positive modifier multiplied by the character's level. These extra hit points are not "base" hit points, and are not governed by the rule above. Negative Constitution modifiers do not affect a character's hit point total.

Base saving throws are limited to a maximum of two plus half of the character's level (per the feat descriptions). The higher of the character's Strength or Constitution modifier is applied to the Fortitude save. The higher of the character's Intelligence or Dexterity modifier is applied to the Reflexes save. The higher of the character's Wisdom or Charisma modifier is applied to the Will save. A character's total save bonus is not limited, only the "base" saving throw bonus.

Every time the character gains another character level, he also receives a number of free skill ranks equal to his Intelligence bonus (if any). Only a positive Intelligence modifier counts. Negative Intelligence modifiers have no effect on the number of skill ranks a character has. The character receives these free skill ranks immediately upon attaining the new level. Increases to the Intelligence bonus do not translate to additional free skill ranks. Characters receive free skill ranks according to their Intelligence bonus at the time of "leveling up." Intelligence increases do not retroactively grant free skill ranks.

Our DM also employs the "odd ability score rule" which states that the saving throw bonuses granted by ability scores are one higher for odd ability scores. Thus, a Constitution of 13 will grant a +2 bonus to the Fortitude save instead of a +1 and a Wisdom of 17 will grant a +4 bonus to Will saves instead of a +3. This makes purchasing odd-numbered ability scores worthwhile.

Because there are essentially twenty different versions of the Magic skill, specialists are simply characters that choose to specialize in certain schools and sources of power. Characters can specialize in one school by taking ranks only in the Arcane Magic or Divine Magic skill pertaining to that school. Still others may choose to ignore two or three schools and concentrate on the rest. Spellcasters can also be generalists, advancing all ten schools equally throughout their careers across both sources of power. The two Magic skills are expedients and are used simply to govern which spell lists are available to a certain character. There really is no difference between arcane and divine spellcasters now, since characters can freely advance one, some, or all of the twenty Magic skills. There may be in-game differences, however, that are used simply to color the setting. A variety of traditions may exist (and give color to an individual character) but the rules for magic work the same. It doesn't matter if the character learns his spells from books, lab journals, demonic familiars, direct implantation by gods, nature spirits or all of the above. Sources are simply part of the setting, but the same rules govern all magic-use within the context of the game system.

INTRODUCTION

Simply put, Custom Characters is a set of variant rules applied to the System Reference Document for use in a modified OGL fantasy campaign featuring a purchase advancement system.

The purchase advancement system eliminates the concept of character class almost entirely by allowing players to purchase exactly what bonuses, abilities, and traits they desire for their characters. Under the normal rule system, new character capabilities are granted wholesale at every rise in character level. Under this ruleset, characters are advanced incrementally and the concept of character level exists only to determine how many experience points to award for encounters. Furthermore, there is no character level to limit the abilities of the character. The character's abilities determine his character level. This is a reversal from the normal rules where character level determines the maximum potency of a character's abilities. Thus, this version of the game does away with not only character classes, but character levels as well.

Although the concept of using experience points as currency to buy character traits is nothing new in gaming circles, trait costs are handled a bit differently in this rulebook as compared to past efforts. Previous treatments base the experience point cost of a trait on the trait level itself. For example, the cost to raise your

character's base attack bonus from +0 to +1 may cost 100 XP while the cost to raise it from +19 to +20 may cost 2,000 XP. A simple thought experiment illustrates why this approach is not in keeping with advancement principles present in the System Reference Document. Imagine that your 1st level rogue has earned 1,000 XP. This means that he is eligible to select a new class level and thus become a 2nd level character. In our example, you choose one level of fighter. This makes your character a 2nd level character with one level in rogue and one level in fighter. How much did your fighter level cost? Your first fighter level cost 1,000 XP, naturally. Now imagine a second character, a 19th level rogue. Your character earns an additional 19,000 XP to bring his accumulated experience point total to 190,000 XP. You decide to take your first level in fighter, making your character a 20th level character overall, with 19 levels in rogue and one level in fighter. How much did your first fighter level cost in this case? Your first fighter level, with its +1 to base attack bonus, d10 hit die, bonus feat, armor proficiencies, and other traits cost you 19,000 XP. Clearly, then, trait costs should be based on your character's overall level, not on the level of the traits themselves.

It is my intention that this ruleset be different enough to constitute an entirely new form of d20 fantasy roleplaying, while retaining enough of the character of the original SRD

source material to permit the vast corpus of gaming resources for this game to continue to be useful to your gaming group. Indeed, the normal class system is subsumed by this system and many of the variants adopted are those found in supplements for the "orthodox" version of the game. All innovations that are new to this ruleset can be cheerfully used or disregarded by the GM who, as always, exercises total control over the campaign. The system presented here can be used in its entirety as the default system for character generation and advancement. I have taken great care to provide a balanced character advancement system which is firmly rooted in the game design principles evident in the System Reference Document. Although the math behind the purchase advancement system is not described in this document, rest assured that many hours were spent poring over numerous spreadsheets to prove that the numbers do indeed work out. The section in this document entitled "Basic Character Class Builds" is the product of extensive research and calculations.

If you've wanted to explore the concept of characters with "no class" then turn the page and get started on your first character. Just about any kind of character can be created now, using familiar d20-based fantasy game rules!

CHARACTER GENERATION

This section is meant to supplement the character creation section of your favorite game handbook. Follow the normal rules for creating a character, and implement the changes found in this chapter.

GENERATING ABILITY SCORES

Due to the relative ease at which ability scores can be raised during a character's career, there is little reason to worry about non-exceptional ability scores at start. Any method chosen by the GM is suitable, but those using some sort "point-buy" or "point-allocation" system are the best since it puts all starting characters on equal footing as far as ability score values are concerned. Therefore, it is suggested that the GM use some manner of point buy system to determine starting ability scores.

SELECTING A RACE

Any race allowed during initial character generation by the GM is suitable.

SELECTING AN ALIGNMENT

Any alignment allowed during initial character generation by the GM is suitable.

DETERMINING VITAL STATISTICS

All of a character's vital statistics are determined normally, as found in the System Reference Document.

SELECTING TRAITS

Since there are no classes in this ruleset, a new method of selecting class abilities and other game statistics is employed. A trait is defined as a game statistic that can be purchased with experience points. The base attack bonus, all saves, skill ranks, feats, special abilities, and spellcasting abilities are examples of traits. A starting character has 2,000 XP available to spend on traits before he begins his adventuring career. Consult **Table 1: Starting Character Traits** to find the list of traits that can be purchased and the cost to purchase those traits. All starting characters receive one hit point (at no cost) by virtue of being alive.

BASE ATTACK BONUS

A starting character can select a +0 base attack bonus at no cost or a +1 base attack bonus at the cost of 300 XP.

BASE SAVE BONUSSES

Each of the three saves (Fortitude, Reflexes, and Will) must be purchased individually. A save of +0 costs nothing, +1 costs 100 XP, and +2 costs 200 XP. Base save bonuses do not include bonuses due to high ability scores, magical items and the like.

BASE HIT POINTS

The maximum number of base hit points a starting character can have is 12. Base hit points do not include hit points due to the character's Constitution modifier (if any). Base hit points cost 25 XP per hit point. The character's positive Constitution modifier (if any) is applied after all base hit points are

purchased. All starting characters receive one hit point, without cost.

SKILL RANKS

Skill ranks are purchased at the cost of 25 XP per rank. Each skill can have a maximum of 4 skill ranks. There are no class or cross-class skills in this ruleset (since there are no classes). The character also receives skill ranks equal to four times his positive Intelligence modifier (if he has one) at no cost. Humans receive an additional 4 skill ranks for free at start.

FEATS

Any number of armor and weapon proficiency feats can be bought during character generation at the cost of 100 XP per feat. Only one base feat can be purchased at 100 XP. Any other feats gained due to character race or special abilities do not count towards the total number of bonus feats.

Under this system, a character purchasing the Martial Weapon Proficiency feat gains proficiency in all martial weapons (not just one, as stated in the feat description).

SPELLCASTING

Spellcasting or manifesting can be purchased for various costs as shown in **Table 5: Spellcasting Traits**. When a character purchases a level in spellcasting or manifesting, the character does not gain any special abilities, bonus feats, or other abilities associated with the character classes found in the System Reference Document. The character does gain one caster (or manifester) level, the ability to cast spells (manifest powers) at the new level, and an appropriate number of spells per day (power points) for the spellcasting

(manifesting) class. If the character is a spontaneous caster, he gains an appropriate number of spells known. If the character purchases cleric spellcasting, he should choose two domains and gains an aura appropriate to his alignment. The character can opt to be a specialist wizard if wizard spellcasting is purchased. Characters can purchase the ability to cast spells in more than one class at start, but caster level cannot be increased above 1st.

SPECIAL ABILITIES

A barbarian's rage, a cleric's turn undead ability, and a rogue's sneak attack are all examples of special abilities. Each class special costs 100 XP during character generation. A character can only purchase special abilities available to 1st-level characters but can purchase as

many as they can afford. The complete list of special abilities starts on page 12.

CLASS LEVELS

Some special abilities (such as the monk's *wholeness of body* class special) increase in potency as a character attains higher levels in a certain class. Since there are no classes in this ruleset, the ability to purchase "class levels" is used to determine the level at which these special abilities operate. Characters that have purchased spellcasting levels can count those levels as class levels in the appropriate spellcasting class (such as bard and druid) and do not need to purchase class levels. Starting characters can purchase one class level in as many classes they want (but one class level only in each).

ABILITY SCORES

Ability scores can also be purchased with experience points at start, over and above those gained through ability score generation up to racial maximums. The cost is 150 XP per point. The ability scores that your character starts the game with are known as their "Starting Values."

STARTING EQUIPMENT AND WEALTH

All characters start with 6d4 X 100 gold pieces worth of equipment and cash. Since there are no classes, all characters start with the same amount. Any equipment allowed by the GM can be purchased.

TABLE 1: STARTING CHARACTER TRAITS

Trait	Cost (XP)	Maximum Value
Base Attack Bonus	300 for +1	+1
Base Save Bonus	100 per +1	+2
Base Hit Points	25 per HP	12 HP
Skill Rank	25 per Rank	4 Ranks per Skill
Base Feat	100	One Base Feat
Armor and Weapon Proficiency Feats	100 per Feat	--
Bard Spellcasting	150	First Level
Cleric Spellcasting	300	First Level
Druid Spellcasting	200	First Level
Psion Manifesting	500	First Level
Sorcerer Spellcasting	500	First Level
Wizard Spellcasting	500	First Level
Special Ability	100 per Ability	First Level
Class Level	25 per Class	First Level
Ability Score	150 per +1	Racial Max

CHARACTER CREATION WORKSHEET

Original Ability Scores	Cost per Increase	Number of Increases	Total Cost	Purchase Limit	Starting Value
Strength	150 XP			Up to Racial Maximum	
Dexterity	150 XP			Up to Racial Maximum	
Constitution	150 XP			Up to Racial Maximum	
Intelligence	150 XP			Up to Racial Maximum	
Wisdom	150 XP			Up to Racial Maximum	
Charisma	150 XP			Up to Racial Maximum	

Combat Traits	Cost	Number	Total Cost	Purchase Limit
Base Attack Bonus	300 XP			+1
Base Fortitude Bonus	100 XP			+2
Base Reflex Bonus	100 XP			+2
Base Will Bonus	100 XP			+2
Base Hit Points (1 HP for free)	25 XP			11

Skills	Cost per Rank	Ranks	Total Cost	Purchase Limit
1.	25 XP			4 skill ranks
2.	25 XP			4 skill ranks
3.	25 XP			4 skill ranks
4.	25 XP			4 skill ranks
5.	25 XP			4 skill ranks
6.	25 XP			4 skill ranks
7.	25 XP			4 skill ranks
8.	25 XP			4 skill ranks
9.	25 XP			4 skill ranks
10.	25 XP			4 skill ranks

Feats	Cost	Take?	Total Cost	Prerequisite
Light Armor Proficiency	100 XP	Yes / No		None
Medium Armor Proficiency	100 XP	Yes / No		Light Armor
Heavy Armor Proficiency	100 XP	Yes / No		Medium Armor
Shield Proficiency	100 XP	Yes / No		None
Tower Shield Proficiency	100 XP	Yes / No		Shield
Simple Weapon Proficiency	100 XP	Yes / No		None
Martial Weapon Proficiency*	100 XP	Yes / No		Simple Weapon
Base Feat	100 XP	Yes / No		Varies

Special Abilities	Cost	Class?	Total Cost	Purchase Limit
1.	100 XP			First Level Abilities only
2.	100 XP			First Level Abilities only
3.	100 XP			First Level Abilities only
4.	100 XP			First Level Abilities only
5.	100 XP			First Level Abilities only
6.	100 XP			First Level Abilities only
7.	100 XP			First Level Abilities only

Spellcasting / Class Levels	Cost	Class	Total Cost	Purchase Limit
Spellcasting #1	XP			First Level
Spellcasting #2	XP			First Level
Spellcasting #3	XP			First Level
Class Level #1	25 XP			First Level
Class Level #2	25 XP			First Level
Class Level #3	25 XP			First Level

* The character receives proficiency in all Martial weapons.

2,000XP

CHARACTER ADVANCEMENT

Under this ruleset, characters are advanced through the expenditure of experience points. Character traits are purchased one at a time, allowing for more incremental advancement. Because there are no strictly defined character levels under this system, a new method must be employed to determine character level (for the purposes of encounter experience, spell effects, hit dice determination, and other game factors). Simply put, character level is determined by the

highest single trait a character has. **Table 2: Character Level Determination** shows all traits that can be used to determine character level. For example, a character having a +3 base attack bonus with his highest save at +3, highest skill rank at 9, 59 base hit points, with all ability scores at starting values, and no special abilities, class levels, or spellcasting above Level 3 would be a 6th level character (due to having a skill at rank 9). Likewise a character

having a +0 base attack bonus, all saves at +0, one skill at rank 9, 4 base hit points, all ability scores at starting values, and no special abilities, class levels, or spellcasting above Level 1 would be a 6th level character as well. Under this system, the player controls character level by advancement choices made during play. Unbalanced advancement can result in characters being underpowered for their particular character level.

TABLE 2: CHARACTER LEVEL DETERMINATION

Character Level	Base Attack Bonus	Base Save Bonus	Skill Rank	Base Hit Points	Ability Scores	Base Feats	Special Abilities, Class Levels, and Spellcasting
1	+1	+2	4	12	Starting Value	1st	Level 1
2	+2	+3	5	24			Level 2
3	+3		6	36		2nd	Level 3
4	+4	+4	7	48	Starting Value +1		Level 4
5	+5		8	60			Level 5
6	+6	+5	9	72		3rd	Level 6
7	+7		10	84			Level 7
8	+8	+6	11	96	Starting Value +2		Level 8
9	+9		12	108		4th	Level 9
10	+10	+7	13	120			Level 10
11	+11		14	132			Level 11
12	+12	+8	15	144	Starting Value +3	5th	Level 12
13	+13		16	156			Level 13
14	+14	+9	17	168			Level 14
15	+15		18	180		6th	Level 15
16	+16	+10	19	192	Starting Value +4		Level 16
17	+17		20	204			Level 17
18	+18	+11	21	216		7th	Level 18
19	+19		22	228			Level 19
20	+20	+12	23	240	Starting Value +5		Level 20

TABLE 3: BASIC TRAITS

Trait	XP Cost	Per
Base Attack Bonus	300 x CL	+1
Base Save Bonuses	100 x CL	+1
Base Hit Points	25 x CL	Hit Point
Skills	25 x CL	Skill Rank
Feats	100 x CL	Feat
Special Abilities	100 x CL	Special Ability
Class Levels	25 x CL	Class Level
Ability Scores	150 x CL	+1 to Score

BASIC TRAITS

As characters earn experience points, these points can be used to purchase new traits or raise the level at which previously purchased traits operate. Spending XP in this manner is exactly like spending XP to cast spells with XP components or spending XP to make magic items. Once XP have been spent on a trait, these XP are no longer available for the purposes of casting spells, making magical items, or for any other game situation requiring the conscious expenditure of XP. Experience points previously spent on the acquisition of traits can still be taken away as a result of calamity, such as when a sorcerer's familiar dies. In this case, the DM may allow the player to choose which traits are reduced in effectiveness due to XP loss.

Table 3: Basic Traits gives all of the basic traits that can be bought with experience points. Each XP cost is multiplied by the character's current character level (denoted by 'x CL'). Note that any character level increase that comes as a result of raising a trait is immediately applied to all subsequent costs. For example, a character at the beginning of his career (1st level) earns 300 XP over the course of several encounters. At the end of the play session, the player decides to spend those 300 XP to raise his character's base attack bonus from +1 to +2. Consulting **Table 2: Character Level Determination**, the player notes that his character is

now a 2nd level character. All XP costs on **Table 3: Basic Traits** will now be multiplied by 2 (until the character reaches 3rd character level). It is important to note that the character level (not the trait level) is used to calculate the XP cost. For example, a 6th level character wishes to raise his previously-neglected base attack bonus. Currently, he has a base attack bonus of +1. Raising it from +1 to +2 will cost 300 XP times 6 (his character level), or 1,800 XP. Raising it from +2 to +3 will also cost 1,800 XP since his character level is still 6th, even after raising his base attack bonus from +1 to +2.

Explanations of all basic traits are given in the following sections.

BASE ATTACK BONUS

This is the normal base attack bonus as used in the System Reference Document. Characters receive multiple attacks as appropriate. Each +1 added to the base attack bonus costs 300 XP times the character's level.

BASE SAVE BONUS

This is the normal base save bonus as used in the System Reference Document. Each of the three saving throws (Fortitude, Reflexes, and Will) has its own base save bonus and all three must be purchased separately. Each +1 added to a base save bonus costs 100 XP x CL.

BASE HIT POINTS

Base hit points represent the hit points that normally come from hit dice and do not include hit points from any other source (such as hit points derived from the character's Constitution modifier). One base hit point costs 25 XP x CL. The character's positive Constitution modifier (if any) multiplied by Character Level is added to the base hit point total. Characters having a negative Constitution modifier do not have their hit points reduced. Characters start with one free hit point.

SKILL RANKS

These are the normal skill ranks described in the SRD. Skill ranks are purchased at the cost of 25 XP x CL. There are no class or cross-class skills in this ruleset (since there are no classes).

When a character attains a new character level, the character receives bonus skill ranks equal to that character's positive Intelligence modifier (if any) at no cost. Skill ranks gained from this positive Intelligence modifier can never be used to purchase skill ranks above the character's Character Level plus three. In other words, these bonus skill ranks cannot be used to further raise the character's Character Level.

Characters having a negative Intelligence modifier do not receive a reduction in the number of skill

ranks. Characters having a negative Intelligence modifier do not have the number of skill ranks they may purchase reduced.

Human characters receive one free skill rank upon attaining each new Character Level. As with skill ranks gained from a positive Intelligence modifier, this skill rank cannot be used to raise a skill above Character Level plus three ranks.

FEATS

The term “base feats” is used to refer to feats that are not acquired as racial bonus feats (such as the feat gained by all human characters) or as special abilities (such as those gained by fighters and wizards). Base feats also do not include armor and weapon proficiency feats. The number of base feats acquired by a character is a level-determining trait (c.f., **Table 2: Character Level Determination**). All feats, regardless of classification, have a purchase price of 100 XP x CL. Racial bonus feats are free, however.

SPECIAL ABILITIES

All traits listed in the “Special” column of each character class description in the SRD are called special abilities in this ruleset. Special abilities are treated much like feats, having prerequisites and the same purchase price of 100 XP times the character’s level. See the Special Abilities section for more extensive details.

CLASS LEVELS

Characters can buy class levels in certain classes to meet the prerequisites of special abilities (or feats) and to determine the level at which some specials operate. When a class level is bought, the class must be specified, such as class level (fighter) or class level (monk). Each class level is bought in

sequence (the previous class level always being a prerequisite for the next class level). Characters that have purchased spellcasting levels can count those levels as class levels in the appropriate spellcasting class (such as bard and druid) and do not need to purchase class levels. Class levels in spellcasting classes can be bought separately, however (in case a character wants class levels but not necessarily spellcasting ability). Characters must also abide by the alignment restrictions of a class when gaining class levels. A character must be lawful to purchase monk class levels, have a neutral alignment component to purchase druid class levels, be lawful good to purchase paladin class levels, etc. Gaining class levels in a class with an alignment aura (such as cleric and paladin) grants an aura of corresponding strength to the character.

A quick illustration may be helpful. Let’s say that a player wishes for his character to gain the Weapon Specialization (longsword) feat. He is already proficient in the longsword and has already bought the Weapon Focus feat for longsword. However, the feat lists “fighter level 4th” as a prerequisite. The character would need to have four levels in class level (fighter) before being able to take Weapon Specialization (longsword).

Class levels cost 25 XP times the character’s level. Remember that XP costs are based on the Character Level and not the level at which the trait is bought. Thus, a 6th level character will pay 150 XP (6 x 25 XP) for each class level as long as he remains a 6th level character

Class levels can also be purchased for prestige classes, but only after all prerequisites are met for entry into the prestige class. Level determination for prestige classes works differently than for basic classes. Prestige class entry prerequisites almost always guarantee that characters must be of a certain character level (since no

character begins play with one level in a prestige class). Therefore, for the purposes of level determination, class levels in prestige classes are higher than class levels in the basic classes.

Table 4: Prestige Class Level Determination

Prestige Class	Level Modifier
Arcane Archer	+7
Arcane Trickster	+8
Archmage	+13
Assassin	+5
Blackguard	+6
Dragon Disciple	+5
Duelist	+7
Dwarven Defender	+7
Hierophant	+13
Horizon Walker	+5
Loremaster	+7
Shadowdancer	+7
Thaumaturgist	+7

Table 4: Prestige Class Level Determination shows the equivalent basic class level that a certain prestige class level is for the purposes of level determination (see **Table 2**). For example, the level modifier for the arcane archer prestige class is +7. This means that taking the 1st class level in arcane archer counts as taking the 8th class level in a basic class for the purpose of level determination. Taking the 2nd class level in arcane archer is the equivalent to taking the 9th class level in a basic class, and so on. This level modifier only affects the class level as it relates to level determination. The level modifier has no effect on the potency of special abilities. Having one class level in arcane archer counts as one class level for all of the special abilities that increase in potency as the character’s arcane archer class level increases.

Note that the eldritch knight and mystic theurge prestige classes are not included in this table. This is due to the fact that these prestige classes can already be simulated using the normal character

advancement rules in this ruleset (and these prestige classes offer no new special abilities).

The level modifier is determined by finding the minimum number of character levels a character would have to have before being eligible to take the first level in the prestige class. Thus, the level modifiers for prestige classes not found on **Table 4** can be found easily by the GM.

Keep in mind that class levels cost the same amount of XP as skill ranks. The GM may wish to simply refer to class levels as skill ranks in an appropriate Profession (type) skill. In this case, the class level is equal to the number of skill ranks possessed minus three (minimum of one). The Wisdom modifier does not affect this number (since skill ranks only are counted, not the total skill modifier). Because you must purchase five skill ranks to reach 2nd class level, this option makes purchasing class levels a bit more costly up front. Otherwise, this Profession skill functions as normal (i.e., granting income). So, a character with 10 ranks in Profession (fighter) is considered to have seven class levels in fighter. If his Wisdom bonus is +2, then the player may make a skill check each week, with a +12 modifier, to determine the character's income (half of the check result in gold pieces).

ABILITY SCORES

There are six ability scores and each must be advanced individually. Advancing an ability score above its starting value can make that ability score a level determining trait (c.f., **Table 2: Character Level Determination**). The price to advance an ability score by one point is 150 XP x CL.

SPELLCASTING TRAITS

The costs for purchasing spellcasting ability are shown in

Table 5: Spellcasting Traits. Buying a level of spellcasting is very much like prestige class special abilities that read "+1 level of existing spellcasting class." For each level of spellcasting bought, the character gains one caster level (and the class level inherent in this), the ability to cast spells up to the highest level granted by that class (such as 3rd level spells for 5th level wizards), and the new array of spells per day for that class/level combination.

If the character is a spontaneous caster, he gains an appropriate number of spells known. If the character purchases cleric spellcasting, he continues to gain access to domain spells and the aura appropriate to his alignment strengthens. The character can opt to be a specialist wizard if wizard spellcasting is purchased.

The character does not gain any bonus feats, special abilities, or any other benefit a character of that class would have gained (but of course, these can be bought separately).

TABLE 5: SPELLCASTING TRAITS

Spellcasting Trait	XP Cost	Per
Bard	150 x CL	Level
Cleric	300 x CL	Level
Druid	200 x CL	Level
Psion	500 x CL	Level
Sorcerer	500 x CL	Level
Wizard	500 x CL	Level

ADVANCING TRAITS

With these two tables, advancing along a path similar to any of the basic character classes is possible. More importantly, players are now able to conceive of characters not bound to the archetypal, traditional fantasy roles. Characters can become *polymaths*, remaining at a certain character level while purchasing a broad array of traits encompassing several different class

roles. Or they can become *paragons*, focusing on one particular trait while neglecting all others. If balance is desired, a character can advance as a *hero*, following a traditional class-based path.

OPTIONAL BASIC TRAITS

More well-defined characters can be created at the cost of added complexity. **Table 6: Optional Basic Traits** gives several optional basic traits that can be used break down the base attack bonus into less costly components as well as the costs for buying whole class levels outright as packaged-deals (or "bundles").

TABLE 6: OPTIONAL BASIC TRAITS

Trait	XP Cost	Per
Base Attack Bonus		
(Melee)	150 x CL	+1
(Ranged)	150 x CL	+1
(One Group)	75 x CL	+1
(One Weapon)	25 x CL	+1
Weapon Group	25 x CL	Feat
Whole Class Level	1000 x CL	Level
Level Adjustment	1000 x CL	Level

For the purposes of **Table 2: Character Level Determination**, use the character's highest base attack bonus when determining character level if these optional base attack bonus traits are used, whether it be with a single weapon or an entire class of weapons. Weapon group feats are found in the System Reference Document and can be bought at a reduced cost since each of these feats grants proficiency with a smaller group of weapons than normal feats. A class level package is a normal class level as found in the System Reference Document. Level adjustments can be bought off directly if this optional basic trait is used.

OPTIONAL PARTIAL-LEVEL SPELLCASTING TRAITS

If the Spell Points variant in the System Reference Document is used, spellcasting ability can be made more incremental. Half- and quarter-level purchases are offered at reduced XP costs in **Table 7**.

TABLE 7: OPTIONAL SPELLCASTING TRAITS

Trait	XP Cost	Per
Bard*	75 x CL	Half-Level
	25/50 x CL	Quarter-Level
Cleric	150 x CL	Half-Level
	75 x CL	Quarter-Level
Druid	100 x CL	Half-Level
	50 x CL	Quarter-Level
Psion	250 x CL	Half-Level
	125 x CL	Quarter-Level
Sorcerer	250 x CL	Half-Level
	125 x CL	Quarter-Level
Wizard	250 x CL	Half-Level
	125 x CL	Quarter-Level

*The quarter-level cost for bard spellcasting is 25 XP x CL when purchasing the $\frac{1}{4}$ and $\frac{3}{4}$ quarter-levels and 50 XP x CL when purchasing the $\frac{1}{2}$ and whole integer quarter-levels.

Table 14: Expanded Spellcaster Level Chart gives the spell points for each spellcaster/level combination along with the highest level of spell that a spellcaster of the given level can cast at all quarter-level increments. This is an expanded version of a similar table found in the System Reference Document. A spell point value of zero indicates that the spellcaster has only bonus spell points received from a high ability score. A dashed line indicates that nothing is received at that level. If this system is used, cantrips and orisons have a cost of $\frac{1}{2}$ of a spell point.

Expanded tables for bonus spell and power points are given in **Table 15**, **Table 16**, and **Table 17**.

OPTIONAL BONUS FEATS

Since the number of special abilities a character possesses is not a level-determining trait, the GM may rule that feats operate in this manner as well. Using this option, a character can purchase any number of feats and the whole concept of “base feats” is removed from the ruleset. Individual feats themselves may require a certain minimum character level if a minimum level is specified as a prerequisite, such as “fighter level 4th” for Weapon Specialization and “caster level 12th” for Craft Staff.

To implement this option, simply ignore the “Base Feats” column on **Table 2: Character Level Determination**. The number of feats a character purchases is not a level-determining trait.

OPTIONAL LEVEL DETERMINATION

The GM may not be comfortable with the level-determination system as written. If the GM wishes to use experience points as the only level-determinant, then the following rules should be employed. First, character level is determined by the number of experience points the character has used to purchase traits. Experience points spent on magical item construction, spellcasting, etc. do not count. Once a character has spent 1,000 XP on traits, increase the character level by one. It does not matter how the XP were spent, only the amount. Thus, after spending 1,000 XP, a 1st level character becomes a 2nd level character. Traits may be purchased up to a level shown on **Table 2: Character Level Determination**. For example, as long as a character is 2nd level, his base attack bonus may not be increased above +2, he may not have a base save above +3, hit points above 24, etc. Traits no

longer determine the character level, the character level determines the maximum value of the traits.

NEGATIVE-LEVEL CHARACTERS

Some gaming groups may wish to begin their characters as completely unskilled, normal members of their race. In this case, the 2,000 XP given to all starting characters is not available. Characters start with no experience. Ability scores are determined and each character receives one free hit point. **Table 8: Pre-Character Level Determination** shows the maximum base attack bonus, base save bonus, skill rank, base hit points, ability scores, and spellcasting levels as they pertain to these “pre-levels.” One base feat may be purchased, as long as it is a feat that must be purchased at 1st level according to the rules. Humans may take their free feat at any point up to and including 1st character level. Humans may take their free skill points upon attaining 1st character level. Weapon and armor proficiency feats may be purchased at any point. Only the 1st class level in a single class may be purchased at these levels. Only one class special available to 1st level characters may be purchased and only one level of spellcasting in one class can be bought during these pre-levels. If half- and quarter-levels are used for spellcasting (using the Expanded Spellcaster Level Charts), then only fractional levels can be purchased. However, if this system is used, then fractional spellcasting levels can be purchased for multiple spellcasting classes. For advancement, use the appropriate trait cost tables found in previous sections.

HIGH-LEVEL CHARACTERS

Other gaming groups may wish to create high-level characters at start. In this case, create 1st level characters as normal. After that, determine the highest level character that will be allowed at start. The GM can consult **Table 2** to determine the maximum character level, and thus maximum traits that will be allowed at the start of the campaign.

Once the maximum character level has been determined, allow each player to spend a number of experience points equal to the normal amount of experience points for a character of that level. For example, if the GM decides to limit the characters to 10th level, then each player will have an additional 45,000 XP to spend.

The GM should also consult the appropriate rulebooks to determine how much equipment and money to give to each character at start if high-level characters are generated.

It is important to create 1st level characters as the first step in the process of creating high-level characters. The starting values of ability scores must be determined since there is a character level limit to how high ability scores may be raised with experience points.

If this option is used, characters cannot exceed the maximum character level determined by the GM, but may be lower level than the maximum.

TABLE 8: PRE-CHARACTER LEVEL DETERMINATION

Character Level	Base Attack Bonus	Base Save Bonus	Skill Rank	Base Hit Points	Ability Scores	Base Feats	Spellcasting
-2	+0	+0	1	3	Racial Max	(1st)	Level ¼
-1	+0	+1	2	6	Racial Max		Level ½
0	+0	+2	3	9	Racial Max		Level ¾

CHARACTER CREATION AND ADVANCEMENT EXAMPLE

An example of character creation and subsequent character advancement will be useful in illustrating these rules in action.

Russell wants to create a character that specializes in hunting down and slaying undead creatures. After determining ability scores, character race, alignment, and vital statistics, he is ready to purchase traits with the starting 2,000 XP. He wants the character to be good at combat, so he buys the +1 base attack bonus for 300 XP. He feels that having a good Fortitude save at start continues to represent the martial nature of his character, so he allocates 200 XP to get a +2 base save bonus in Fortitude. His character receives one free hit point at start and Russell buys eight more for him (200 XP). He also purchases eight skill ranks for the same price (200 XP). He takes the one base feat he is allowed to buy during character generation (100 XP). So far, Russell has spent 1,000 XP. He envisions a lightly-armored,

but well-armed character so he takes armor proficiency (light), simple weapon proficiency, and martial weapon proficiency (300 XP). He now has 700 XP left to spend on special abilities, class levels, and spellcasting. He decides to buy the turn undead cleric class special along with one class level in cleric (125 XP total for both). Taking a class level in cleric automatically gives him an alignment aura (Russell chooses the aura of good). He also takes the detect evil and smite evil (1/day) special abilities (200 XP total for both). To use smite evil effectively, he needs to take a class level in paladin (25 XP) which also causes a strengthening of his aura of good. He purchases the 1st favored enemy (undead) class special from the ranger class (100 XP). This leaves 250 XP left to spend. He decides to go ahead and give the character two more hit points (up to 11, just one short of the starting maximum) and eight more skill ranks. Our

undead-slayer is now ready to begin adventuring.

After a few successful adventures, Russell's stingy GM, Erick, awards the undead-slayer 600 XP. Russell determines that his character should have the ability to track, so he purchases the ranger class special of the same name (100 XP). He notes that this does not change the undead-slayer's character level since track is available to 1st level characters. With 500 XP left to spend, Russell decides to raise his character's base attack bonus from +1 to +2. This costs 300 XP and makes his character a 2nd level character (according to **Table 2**). With 200 XP left to spend, Russell buys another class level in cleric which costs 50 XP. He also buys another class level of paladin for the same price (50 XP). Buying hit points is always a good idea, so he spends the remaining 100 XP to get two additional hit points. Note that as soon as his character became 2nd level, all XP costs were doubled.

SPECIAL ABILITIES

Special abilities are grouped by level. The level of a special ability is a level determining trait (see **Table 2: Character Level Determination**). Each special ability is listed along with prerequisites, ability type, class levels, and a description. Characters must have all prerequisites before purchasing a special ability. Ability type refers to its classification as either an extraordinary, spell-like, or supernatural ability. Special abilities not falling into one of these three categories is classified as a natural ability. The class level entry lists what class levels can be used to increase the potency of the special ability (if any). Finally, description gives the details of the special ability in game terms.

1ST-LEVEL SPECIAL ABILITIES

All 1st-Level Special Abilities are available to starting characters during character generation as long as the character meets the prerequisites.

ANIMAL COMPANION

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: Druid and Ranger (Half).

Description: The character gains an animal companion selected from the following list: badger, camel, dire rat, dog, riding dog, eagle, hawk, horse (light or heavy), owl, pony, snake (Small or Medium viper), or wolf. If the campaign takes place wholly or partly in an aquatic environment, the following creatures are also available: porpoise, Medium shark, and squid.

This animal is a loyal companion that accompanies the character on her adventures as appropriate for its kind.

An animal companion is completely typical for its kind except as noted below. As the character advances in druid class levels, the animal's power increases as shown on the table. If the character releases her companion from service, she may gain a new one by performing a ceremony requiring 24 uninterrupted hours of prayer. This ceremony can also replace an animal companion that has perished.

A character with a druid class level of 4th level or higher may select from alternative lists of animals. Should she select an animal companion from one of these alternative lists, the creature gains abilities as if the character's druid class level were lower than it actually is. Subtract the value indicated in the appropriate list header from the character's druid class level and compare the result with the druid class level entry on the table to determine the animal companion's powers. (If this adjustment would reduce the druid's effective class level to 0 or lower, she can't have that animal as a companion.)

Each ranger class level counts as half of a druid class level when determining the animal companion's abilities. Consult *The Druid's Animal Companion* section of the System Reference Document for more information about animal companions.

AURA OF ALIGNMENT

Prerequisites: Chaotic, evil, good, or lawful alignment.

Ability Type: Extraordinary.

Class Levels: Cleric and Paladin.

Description: Choose a non-neutral component of the character's alignment, either chaotic, evil, good, or lawful. The character gains a particularly powerful aura corresponding to that alignment component (see the *detect evil* spell for details). The power of the aura corresponds to the character's class levels in cleric and paladin.

BARDIC KNOWLEDGE

Prerequisites: None.

Ability Type: Natural.

Class Levels: Bard and Loremaster.

Description: The character may make a special bardic knowledge check with a bonus equal to his bard and loremaster class levels + his Intelligence modifier to see whether he knows some relevant information about local notable people, legendary items, or noteworthy places. (If the character has 5 or more ranks in Knowledge (history), he gains a +2 bonus on this check.)

A successful bardic knowledge check will not reveal the powers of a magic item but may give a hint as to its general function. A character may not take 10 or take 20 on this check; this sort of knowledge is essentially random.

Types of knowledge with corresponding DC are shown below.

DC 10: Common, known by at least a substantial minority of the local population.

DC 20: Uncommon but available, known by only a few people, legends.

DC 25: Obscure, known by few, hard to come by.

DC 30: Extremely obscure, known by very few, possibly forgotten by most who once knew it, possibly known only by those who don't understand the significance of the knowledge.

BARDIC MUSIC

Prerequisites: None.

Ability Type: Natural.

Class Levels: Bard.

Description: Once per day per bard class level, the character can use his song or poetics to produce magical effects on those around him (usually including himself, if desired). While these abilities fall under the category of bardic music and the descriptions discuss singing or playing instruments, they can all be activated by reciting poetry, chanting, singing lyrical songs, singing melodies, whistling, playing an instrument, or playing an instrument in combination with some spoken performance. Each ability requires both a minimum bard class level and a minimum number of ranks in the Perform skill as prerequisites.

Starting a bardic music effect is a standard action. Some bardic music abilities require concentration, which means the character must take a standard action each round to maintain the ability. Even while using bardic music that doesn't require concentration, the character cannot cast spells, activate magic items by spell completion (such as scrolls), spell trigger (such as wands), or command word. Just as for casting a spell with a verbal component, a deaf character has a 20% chance to fail when attempting to use bardic music. If he fails, the

attempt still counts against his daily limit.

COUNTERSONG

Prerequisites: Bardic Music special ability, 3 or more skill ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use his music or poetics to counter magical effects that depend on sound (but not spells that simply have verbal components). Each round of the countersong, he makes a Perform check. Any creature within 30 feet of the character (including the character himself) that is affected by a sonic or language-dependent magical attack may use the character's Perform check result in place of its saving throw if, after the saving throw is rolled, the Perform check result proves to be higher. If a creature within range of the countersong is already under the effect of a noninstantaneous sonic or language-dependent magical attack, it gains another saving throw against the effect each round it hears the countersong, but it must use the bard's Perform check result for the save. Countersong has no effect against effects that don't allow saves. The character may keep up the countersong for 10 rounds.

DETECT ALIGNMENT

Prerequisites: None.

Ability Type: Spell-Like.

Class Levels: None.

Description: Choose an alignment component, either chaos, evil, good, or law. At will, the character can use *detect chaos*, *detect evil*, *detect good*, or *detect law* as the spell. The exact spell corresponds to the alignment component chosen.

FASCINATE

Prerequisites: Bardic Music special ability, 3 or more skill ranks in Perform.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can use his music or poetics to cause one or more creatures to become fascinated with him. Each creature to be fascinated must be within 90 feet, able to see and hear the character, and able to pay attention to him. The character must also be able to see the creature. The distraction of a nearby combat or other dangers prevents the ability from working. For every three bard class levels the character attains beyond 1st, he can target one additional creature with a single use of this ability.

To use the ability, the character makes a Perform check. His check result is the DC for each affected creature's Will save against the effect. If a creature's saving throw succeeds, the character cannot attempt to fascinate that creature again for 24 hours. If its saving throw fails, the creature sits quietly and listens to the song, taking no other actions, for as long as the character continues to play and concentrate (up to a maximum of 1 round per bard class level). While fascinated, a target takes a -4 penalty on skill checks made as reactions, such as Listen and Spot checks. Any potential threat requires the character to make another Perform check and allows the creature a new saving throw against a DC equal to the new Perform check result.

Any obvious threat, such as someone drawing a weapon, casting a spell, or aiming a ranged weapon at the target, automatically breaks the effect. Fascinate is an enchantment (compulsion), mind-affecting ability.

FAST MOVEMENT

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's land speed is faster than the norm for his race by +10 feet. This benefit applies only when he is wearing no armor, light armor, or medium armor and not carrying a heavy load. Apply this bonus before modifying the character's speed because of any load carried or armor worn.

FAVORED ENEMY I

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character selects a type of creature from among those given on **Table: Ranger Favored Enemies** in the System Reference Document. The character gains a +2 bonus on Bluff, Listen, Sense Motive, Spot, and Survival checks when using these skills against creatures of this type. Likewise, he gets a +2 bonus on weapon damage rolls against such creatures.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

FIGHTING MASTERY I

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This

bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

FLURRY OF BLOWS I

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: When unarmored, the character may strike with a flurry of blows at the expense of accuracy. When doing so, she may make one extra attack in a round at her highest base attack bonus, but this attack takes a -2 penalty, as does each other attack made that round. This penalty applies for 1 round, so it also affects attacks of opportunity the character might make before her next action. The character must use a full attack action to strike with a flurry of blows.

When using flurry of blows, the character may attack only with unarmed strikes or with special weapons (kama, nunchaku, quarterstaff, sai, shuriken, and siangham). She may attack with unarmed strikes and special weapons interchangeably as desired. When using weapons as part of a flurry of blows, the character applies her Strength bonus (not Str bonus $\times 1\frac{1}{2}$ or $\times\frac{1}{2}$) to her damage rolls for all successful attacks, whether she wields a weapon in one or both hands. The character can't use any weapon other than a special weapon as part of a flurry of blows.

In the case of the quarterstaff, each end counts as a separate weapon for the purpose of using the flurry of blows ability. Even though the quarterstaff requires two hands to

use, the character may still intersperse unarmed strikes with quarterstaff strikes, assuming that she has enough attacks in her flurry of blows routine to do so.

INSPIRE COURAGE I

Prerequisites: Bardic Music special ability, 3 or more skill ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use song or poetics to inspire courage in his allies (including himself), bolstering them against fear and improving their combat abilities. To be affected, an ally must be able to hear the character sing. The effect lasts for as long as the ally hears the character sing and for 5 rounds thereafter. An affected ally receives a +1 morale bonus on saving throws against charm and fear effects and a +1 morale bonus on attack and weapon damage rolls.

INTUITIVE DEFENSE I

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character adds her Wisdom bonus (if any) to her AC.

This bonus to AC applies even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

MARTIAL ARTS I: IMPROVED GRAPPLE

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Improved Grapple as a bonus feat. This does not count as a base feat for the purposes of level determination.

MARTIAL ARTS I: STUNNING FIST

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Stunning Fist as a bonus feat. This does not count as a base feat for the purposes of level determination.

NATURE SENSE

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +2 bonus on Knowledge (nature) and Survival checks.

RAGE I

Prerequisites: Non-lawful alignment.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can fly into a rage one time per day. In a rage, the character temporarily gains a +4 bonus to Strength, a +4 bonus to Constitution, and a +2 morale bonus on Will saves, but he takes a -2 penalty to Armor Class.

The increase in Constitution increases the character's hit points by 2 points per level, but these hit points go away at the end of the rage when his Constitution score drops back to normal. (These extra hit points are not lost first the way temporary hit points are.) While raging, a character cannot use any Charisma-, Dexterity-, or Intelligence-based skills (except for Balance, Escape Artist, Intimidate, and Ride), the Concentration skill, or any abilities that require patience or concentration, nor can he cast spells or activate magic items that require a command word, a spell trigger (such as a wand), or spell completion (such as a scroll) to function. He can use any feat he has except Combat Expertise, item creation feats, and metamagic feats. A fit of rage lasts for a number of rounds equal to 3 + the character's (newly improved) Constitution modifier. A character may prematurely end his rage. At the end of the rage, the character loses the rage modifiers and restrictions and becomes fatigued (-2 penalty to Strength, -2 penalty to Dexterity, can't charge or run) for the duration of the current encounter. Entering a rage takes no time itself, but a character can do it only during his action, not in response to someone else's action.

REBUKE UNDEAD

Prerequisites: Non-good alignment, cannot have Turn Undead special ability.

Ability Type: Supernatural.

Class Levels: Cleric.

Description: The character has the power to affect undead creatures by channeling the power of his faith through his unholy symbol (see Turn or Rebuke Undead in the System Reference Document).

The character may attempt to rebuke undead a number of times

per day equal to 3 + his Charisma modifier. A character with 5 or more ranks in Knowledge (religion) gets a +2 bonus on rebuke checks against undead.

SMITE CHAOS I

Prerequisites: Aura of Alignment (Lawful).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite chaos with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not chaotic, the smite has no effect, but the ability is still used up for that day.

SMITE EVIL I

Prerequisites: Aura of Alignment (Good).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite evil with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not evil, the smite has no effect, but the ability is still used up for that day.

SMITE GOOD I

Prerequisites: Aura of Alignment (evil).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite good with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not good, the smite has no effect, but the ability is still used up for that day.

SMITE LAW I

Prerequisites: Aura of Alignment (Chaotic).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite law with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not lawful, the smite has no effect, but the ability is still used up for that day.

SNEAK ATTACK I

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character's attack deals 1d6 extra damage any time her target would be denied a Dexterity bonus to AC (whether the target actually has a Dexterity bonus or not), or when the rogue flanks her target. Should the character score a critical hit with a sneak attack, this extra damage is not multiplied.

Ranged attacks can count as sneak attacks only if the target is within 30 feet.

With a sap (blackjack) or an unarmed strike, the character can make a sneak attack that deals

nonlethal damage instead of lethal damage. She cannot use a weapon that deals lethal damage to deal nonlethal damage in a sneak attack, not even with the usual -4 penalty.

The character can sneak attack only living creatures with discernible anatomies—undead, constructs, oozes, plants, and incorporeal creatures lack vital areas to attack. Any creature that is immune to critical hits is not vulnerable to sneak attacks. The character must be able to see the target well enough to pick out a vital spot and must be able to reach such a spot. A character cannot sneak attack while striking a creature with concealment or striking the limbs of a creature whose vitals are beyond reach.

SUMMON FAMILIAR

Prerequisites: Ability to cast arcane spells.

Ability Type: Spell-Like.

Class Levels: Sorcerer and Wizard.

Description: The character can obtain a familiar. Doing so takes 24 hours and uses up magical materials that cost 100 gp. A familiar is a magical beast that resembles a small animal and is unusually tough and intelligent. The creature serves as a companion and servant.

The character chooses the kind of familiar he gets. As the character gains sorcerer and wizard class levels, his familiar also increases in power.

If the familiar dies or is dismissed by the character, the character must attempt a DC 15 Fortitude saving throw. Failure means he loses 200 experience points for every sorcerer and wizard class level; success reduces the loss to one-half that amount. However, a character's experience point total can never go below zero as the result of a familiar's demise or dismissal. A

slain or dismissed familiar cannot be replaced for a year and day. A slain familiar can be raised from the dead just as a character can be, and it does not lose a level or a Constitution point when this happy event occurs.

TRACK

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Track as a bonus feat. This does not count as a base feat for the purposes of level determination.

TRAPFINDING

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character can use the Search skill to locate traps when the task has a Difficulty Class higher than 20.

Finding a nonmagical trap has a DC of at least 20, or higher if it is well hidden. Finding a magic trap has a DC of 25 + the level of the spell used to create it.

The character can use the Disable Device skill to disarm magic traps. A magic trap generally has a DC of 25 + the level of the spell used to create it.

A character who beats a trap's DC by 10 or more with a Disable Device check can study a trap, figure out how it works, and bypass it (with her party) without disarming it.

TURN UNDEAD

Prerequisites: Non-evil alignment, cannot have Rebuke Undead special ability.

Ability Type: Supernatural.

Class Levels: Cleric and Paladin.

Description: The character has the power to affect undead creatures by channeling the power of his faith through his holy symbol (see Turn or Rebuke Undead in the System Reference Document).

The character may attempt to turn undead a number of times per day equal to 3 + his Charisma modifier. A character with 5 or more ranks in Knowledge (religion) gets a +2 bonus on turning checks against undead.

UNARMED STRIKE I

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Improved Unarmed Strike as a bonus feat. This does not count as a base feat for the purposes of level determination. The character's attacks may be with either fist interchangeably or even from elbows, knees, and feet. This means that the character may even make unarmed strikes with her hands full. There is no such thing as an off-hand attack for the character when striking unarmed. The character may thus apply her full Strength bonus on damage rolls for all her unarmed strikes.

Usually the character's unarmed strikes deal lethal damage, but she can choose to deal nonlethal damage instead with no penalty on her attack roll. She has the same choice to deal lethal or nonlethal damage while grappling.

The character's unarmed strike is treated both as a manufactured weapon and a natural weapon for the purpose of spells and effects that enhance or improve either manufactured weapons or natural weapons.

A character also deals more damage with her unarmed strikes than a normal person would. A small character deals 1d4 damage, a medium character deals 1d6 damage, and a large character deals 1d8.

WILD EMPATHY

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: Druid and Ranger.

Description: The character can improve the attitude of an animal. This ability functions just like a Diplomacy check made to improve the attitude of a person. The character rolls 1d20 and adds her druid and ranger class levels along with her Charisma modifier to determine the wild empathy check result.

The typical domestic animal has a starting attitude of indifferent, while wild animals are usually unfriendly.

To use wild empathy, the character and the animal must be able to study each other, which means that they must be within 30 feet of one another under normal conditions. Generally, influencing an animal in this way takes 1 minute but, as with influencing people, it might take more or less time.

The character can also use this ability to influence a magical beast with an Intelligence score of 1 or 2, but she takes a -4 penalty on the check.

WIZARDRY I

Prerequisites: Ability to cast arcane spells.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Scribe Scroll as a bonus feat. This does not count as a base feat for the purposes of level determination.

2ND-LEVEL SPECIAL ABILITIES

All 2nd-Level Special Abilities have "Character Level 1" as a prerequisite.

COMBAT STYLE: ARCHERY

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Rapid Shot feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

COMBAT STYLE: TWO-WEAPON

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Two-Weapon Fighting feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

DEADLY TOUCH

Prerequisites: Character Level 1, Cha 12, Aura of Alignment (Evil).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character can cause wounds with a successful touch attack. Each day she can deal a total number of hit points of damage equal to her paladin class level x her Charisma bonus. An opponent subjected to this attack can make a Will save (DC 10 + 1/2 paladin class level + character's Cha modifier) to halve the damage dealt.

Alternatively, the character can use any or all of this power to cure damage to undead creatures, just as an inflict wounds spell does. This power otherwise functions identically to the lay on hands ability.

DIVINE GRACE

Prerequisites: Character Level 1, Aura of Alignment (Any).

Ability Type: Supernatural.

Class Levels: None.

Description: The character gains a bonus equal to her Charisma bonus (if any) on all saving throws.

EVASION

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can avoid even magical and unusual attacks with great agility. If the character makes a successful Reflex saving throw against an attack that normally deals half damage on a successful save, she instead takes no damage. Evasion can be used only if

the character is wearing light armor or no armor. A helpless character does not gain the benefit of evasion.

FIGHTING MASTERY II

Prerequisites: Character Level 1, Fighting Mastery I.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

LAY ON HANDS

Prerequisites: Character Level 1, Cha 12, Aura of Alignment (Good).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character can heal wounds (her own or those of others) by touch. Each day she can heal a total number of hit points of damage equal to her paladin class level x her Charisma bonus. The character may choose to divide her healing among multiple recipients, and she doesn't have to use it all at once. Using lay on hands is a standard action.

Alternatively, the character can use any or all of this healing power to deal damage to undead creatures. Using lay on hands in this way requires a successful melee touch attack and doesn't provoke an attack of opportunity. The character decides how many of her daily allotment of points to use as damage after successfully touching an undead creature.

MARTIAL ARTS II: COMBAT REFLEXES

Prerequisites: Character Level 1, any Martial Arts I special ability.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Combat Reflexes as a bonus feat. This does not count as a base feat for the purposes of level determination.

MARTIAL ARTS II: DEFLECT ARROWS

Prerequisites: Character Level 1, any Martial Arts I special ability.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Deflect Arrows as a bonus feat. This does not count as a base feat for the purposes of level determination.

UNCANNY DODGE

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can react to danger before his senses would normally allow him to do so. The character retains his Dexterity bonus to AC (if any) even if he is caught flat-footed or struck by an invisible attacker. However, he still loses his Dexterity bonus to AC if immobilized.

WOODLAND STRIDE

Prerequisites: Character Level 1.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may move through any sort of undergrowth (such as natural thorns, briars, overgrown areas, and similar terrain) at her normal speed and without taking damage or suffering any other impairment. However, thorns, briars, and overgrown areas that have been magically manipulated to impede motion still affect her.

3RD-LEVEL SPECIAL ABILITIES

All 3rd-Level Special Abilities have "Character Level 2" as a prerequisite.

AURA OF COURAGE

Prerequisites: Character Level 2, lawful good alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character is immune to fear (magical or otherwise). Each ally within 10 feet of her gains a +4 morale bonus on saving throws against fear effects.

This ability functions while the character is conscious, but not if she is unconscious or dead.

AURA OF DEBILITATION

Prerequisites: Character Level 2, chaotic evil alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character radiates a malign aura that causes enemies within 10 feet of her to take a -1 penalty to Armor Class.

This ability functions while the character is conscious, but not if she is unconscious or dead.

AURA OF DESPAIR

Prerequisites: Character Level 2, lawful evil alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character radiates a malign aura that causes enemies within 10 feet of him to take a -2 penalty on all saving throws.

This ability functions while the character is conscious, but not if she is unconscious or dead.

AURA OF RESOLVE

Prerequisites: Character Level 2, chaotic good, alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character is immune to compulsion effects. Each ally within 10 feet of him gains a +4 morale bonus on saving throws against compulsion effects.

This ability functions while the character is conscious, but not if she is unconscious or dead.

DIVINE HEALTH

Prerequisites: Character Level 2, Aura of Alignment (Any).

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains immunity to all diseases, including supernatural and magical diseases.

ENDURANCE

Prerequisites: Character Level 2.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Endurance as a bonus feat. This feat does not count as a base feat for the purposes of level determination.

INSPIRE COMPETENCE

Prerequisites: Character Level 2, Bardic Music, Countersong, Fascinate, Inspire Courage I, 6 or more ranks in Perform.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can use his music or poetics to help an ally succeed at a task. The ally must be within 30 feet and able to see and hear the character. The character must also be able to see the ally.

The ally gets a +2 competence bonus on skill checks with a particular skill as long as he or she continues to hear the character's music. Certain uses of this ability are infeasible. The effect lasts as long as the character concentrates, up to a maximum of 2 minutes. The character can't inspire competence in himself. Inspire competence is a mind-affecting ability.

SPEED BONUS I

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains an enhancement bonus to her speed of +10 ft. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

SNEAK ATTACK II

Prerequisites: Character Level 2, Sneak Attack I.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 2d6 extra damage (instead of 1d6).

STILL MIND

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +2 bonus on saving throws against spells and effects from the school of enchantment.

TRACKLESS STEP

Prerequisites: Character Level 2, Woodland Stride.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character leaves no trail in natural surroundings and cannot be tracked. She may choose to leave a trail if so desired.

TRAP SENSE I

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +1 bonus on Reflex saves made to avoid traps and a +1 dodge bonus to AC against attacks made by traps.

4TH-LEVEL SPECIAL ABILITIES

All 4th-Level Special Abilities have "Character Level 3" as a prerequisite.

FIGHTING MASTERY III

Prerequisites: Character Level 3, Fighting Mastery II.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

KI STRIKE: MAGIC

Prerequisites: Character Level 3.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's unarmed attacks are empowered with ki. Her unarmed attacks are treated as magic weapons for the purpose of dealing damage to creatures with damage reduction.

RAGE II

Prerequisites: Character Level 3, non-lawful alignment, Rage I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage two times per day. See Rage I for details.

RESIST NATURE'S LURE

Prerequisites: Character Level 3, Nature Sense.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +4 bonus on saving throws against the spell-like abilities of fey.

SLOW FALL I

Prerequisites: Character Level 3.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 20 feet shorter than it actually is.

UNARMED STRIKE II

Prerequisites: Character Level 3, Unarmed Strike I.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 1d6 damage with unarmed strikes, a medium character 1d8 damage, and a large character 2d6 damage.

5TH-LEVEL SPECIAL ABILITIES

All 5th-Level Special Abilities have "Character Level 4" as a prerequisite.

FAVORED ENEMY II

Prerequisites: Character Level 4, Favored Enemy I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System

Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

FLURRY OF BLOWS II

Prerequisites: Character Level 4, Flurry of Blows I.

Ability Type: Natural.

Class Levels: None.

Description: The character's Flurry of Blows attack penalty lessens from -2 to -1.

IMPROVED UNCANNY DODGE

Prerequisites: Character Level 4, Uncanny Dodge.

Ability Type: Extraordinary.

Class Levels: Barbarian and Rogue.

Description: The character can no longer be flanked. This defense denies a rogue the ability to sneak attack the character by flanking him, unless the attacker has at least four more rogue class levels than the target has barbarian and rogue class levels.

INTUITIVE DEFENSE II

Prerequisites: Character Level 4, Intuitive Defense I.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +1 bonus to AC.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

PURITY OF BODY

Prerequisites: Character Level 4, Still Mind.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains immunity to all diseases except for supernatural and magical diseases.

SMITE CHAOS II

Prerequisites: Character Level 4, Smite Chaos I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos two times per day (instead of only once per day).

SMITE EVIL II

Prerequisites: Character Level 4, Smite Evil I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil two times per day (instead of only once per day).

SMITE GOOD II

Prerequisites: Character Level 4, Smite Good I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good two times per day (instead of only once per day).

SMITE LAW II

Prerequisites: Character Level 4, Smite Law I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law two times per day (instead of only once per day).

SNEAK ATTACK III

Prerequisites: Character Level 4, Sneak Attack II.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 3d6 extra damage (instead of 2d6).

SPECIAL MOUNT

Prerequisites: Character Level 4, Aura of Alignment (Any).

Ability Type: Spell-Like.

Class Levels: Paladin.

Description: The character gains the service of an unusually intelligent, strong, and loyal steed to serve her in her crusade against evil (or goodness, law, or chaos). This mount is usually a heavy warhorse (for a Medium character) or a warpony (for a Small character).

Once per day, as a full-round action, the character may magically call her mount from the otherworldly realms in which it resides. This ability is the

equivalent of a spell of a level equal to one-third the character's paladin class level. The mount immediately appears adjacent to the character and remains for 2 hours per paladin class level; it may be dismissed at any time as a free action. The mount is the same creature each time it is summoned, though the character may release a particular mount from service.

Each time the mount is called, it appears in full health, regardless of any damage it may have taken previously. The mount also appears wearing or carrying any gear it had when it was last dismissed. Calling a mount is a conjuration (calling) effect.

Should the character's mount die, it immediately disappears, leaving behind any equipment it was carrying. The character may not summon another mount for thirty days or until she gains a paladin class level, whichever comes first, even if the mount is somehow returned from the dead. During this thirty-day period, the character takes a -1 penalty on attack and weapon damage rolls.

WILD SHAPE I

Prerequisites: Character Level 4.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to turn herself into any Small or Medium animal and back again once per day. Her options for new forms include all creatures with the animal type. This ability functions like the alternate form special ability, except as noted here. The effect lasts for 1 hour per druid class level, or until she changes back. Changing form (to animal or back) is a standard action and doesn't provoke an attack of opportunity. Each time you use wild shape, you regain lost hit points as if you had rested for a night.

Any gear worn or carried by the character melds into the new form and becomes nonfunctional. When the character reverts to her true form, any objects previously melded into the new form reappear in the same location on her body that they previously occupied and are once again functional. Any new items worn in the assumed form fall off and land at the character's feet.

The form chosen must be that of an animal the character is familiar with.

The character loses her ability to speak while in animal form because she is limited to the sounds that a normal, untrained animal can make, but she can communicate normally with other animals of the same general grouping as her new form. (The normal sound a wild parrot makes is a squawk, so changing to this form does not permit speech.)

The new form's Hit Dice can't exceed the character's druid class level.

WIZARDRY II

Prerequisites: Character Level 4, Wizardry I.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus feat. She can choose a metamagic feat, an item creation feat, or Spell Mastery. The character must still meet all prerequisites for a bonus feat, including caster level minimums. This feat does not count as a base feat for the purposes of level determination.

6TH-LEVEL SPECIAL ABILITIES

All 6th-Level Special Abilities have "Character Level 5" as a prerequisite.

BESTOW CURSE I

Prerequisites: Character Level 5, Aura of Alignment (Chaos).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, as the spell, once per week.

CAUSE DISEASE I

Prerequisites: Character Level 5, Aura of Alignment (Evil).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), once per week.

DEATH ATTACK

Prerequisites: Character Level 5, evil alignment, Disguise 4 ranks, Hide 8 ranks, Move Silently 8 ranks, the character must kill someone for no other reason than to become an assassin.

Ability Type: Natural.

Class Levels: Assassin.

Description: If the character studies his victim for 3 rounds and then makes a sneak attack with a melee weapon that successfully deals damage, the sneak attack has the additional effect of possibly either paralyzing or killing the target (character's choice). While studying the victim, the character can undertake other actions so long as his attention stays focused on the target and the target does not detect the character or recognize the character as an enemy. If the victim of such an attack fails a Fortitude save (DC 10 + the character's assassin class level + the character's Int modifier) against the kill effect, she dies. If the saving

throw fails against the paralysis effect, the victim is rendered helpless and unable to act for 1d6 rounds plus 1 round per assassin class level of the character. If the victim's saving throw succeeds, the attack is just a normal sneak attack. Once the character has completed the 3 rounds of study, he must make the death attack within the next 3 rounds.

If a death attack is attempted and fails (the victim makes her save) or if the character does not launch the attack within 3 rounds of completing the study, 3 new rounds of study are required before he can attempt another death attack.

FIGHTING MASTERY IV

Prerequisites: Character Level 5, Fighting Mastery III.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

IMPROVED COMBAT STYLE: ARCHERY

Prerequisites: Character Level 5, Combat Style: Archery.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Manyshot feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the

character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

IMPROVED COMBAT STYLE: TWO-WEAPON

Prerequisites: Character Level 5, Combat Style: Two-Weapon.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Improved Two-Weapon Fighting feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

MARTIAL ARTS III: IMPROVED DISARM

Prerequisites: Character Level 5, any Martial Arts II special ability.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Improved Disarm as a bonus feat. This does not count as a base feat for the purposes of level determination.

MARTIAL ARTS III: IMPROVED TRIP

Prerequisites: Character Level 5, any Martial Arts II special ability.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Improved Trip as a bonus feat. This

does not count as a base feat for the purposes of level determination.

POISON USE

Prerequisites: Character Level 5, evil alignment, Hide 5 ranks.

Ability Type: Natural.

Class Levels: None.

Description: The character is trained in the use of poison and can never risk accidentally poisoning himself when applying poison to a blade.

REMOVE CURSE I

Prerequisites: Character Level 5, Aura of Alignment (Law).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, as the spell, once per week.

REMOVE DISEASE I

Prerequisites: Character Level 5, Aura of Alignment (Good).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as the spell, once per week.

SLOW FALL II

Prerequisites: Character Level 5, Slow Fall I.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the

fall were 30 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall I.

SPEED BONUS II

Prerequisites: Character Level 5, Speed Bonus I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +20 ft. This replaces the enhancement bonus granted by Speed Bonus I. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

SUGGESTION

Prerequisites: Character Level 5, Bardic Music, Inspire Competence, 9 or more ranks in Perform.

Ability Type: Spell-Like.

Class Levels: Bard.

Description: The character can make a suggestion (as the spell) to a creature that he has already fascinated. Using this ability does not break the character's concentration on the fascinate effect, nor does it allow a second saving throw against the fascinate effect.

Making a suggestion doesn't count against a character's daily limit on bardic music performances. A Will saving throw (DC 10 + $\frac{1}{2}$ the character's bard class level + the character's Cha modifier) negates the effect. This ability affects only a single creature (but see mass suggestion, below). Suggestion is an enchantment (compulsion), mind-affecting, language dependent ability.

TERRAIN MASTERY I

Prerequisites: Character Level 5, Knowledge (geography) 8 ranks, Endurance feat.

Ability Type: Natural.

Class Levels: None.

Description: Choose one terrain type found below under Terrain Mastery Benefits. Terrain mastery gives the character a bonus on checks involving a skill useful in that terrain, or some other appropriate benefit. The character also knows how to fight dangerous creatures typically found in that terrain, gaining a +1 insight bonus on attack rolls and damage rolls against creatures with that terrain mentioned in the Environment entry of their descriptions. The character only gains the bonus if the creature description specifically lists the terrain type.

Characters take their terrain mastery with them wherever they go. They retain their terrain mastery bonuses on skill checks, attack rolls, and damage rolls whether they're actually in the relevant terrain or not.

Terrain Mastery Benefits

Aquatic

You gain a +4 competence bonus on Swim checks, or a +10-foot bonus to your swim speed if you have one. You gain a +1 insight bonus on attack and damage rolls against aquatic creatures.

Desert

You resist effects that tire you. You are immune to fatigue, and anything that would cause you to become exhausted makes you fatigued instead. You gain a +1 insight bonus on attack and damage rolls against desert creatures.

Forest

You have a +4 competence bonus on Hide checks. You gain a +1 insight bonus on attack and damage rolls against forest creatures.

Hills

You gain a +4 competence bonus on Listen checks. You gain a +1 insight bonus on attack and damage rolls against hills creatures.

Marsh

You have a +4 competence bonus on Move Silently checks. You gain a +1 insight bonus on attack and damage rolls against marsh creatures.

Mountains

You gain a +4 competence bonus on Climb checks, or a +10-foot bonus to your climb speed if you have one. You gain a +1 insight bonus on attack and damage rolls against mountain creatures.

Plains

You have a +4 competence bonus on Spot checks. You gain a +1 insight bonus on attack and damage rolls against plains creatures.

Underground

You have 60-foot darkvision, or 120-foot darkvision if you already had darkvision from another source. You gain a +1 insight bonus on attack and damage rolls against underground creatures.

TRAP SENSE II

Prerequisites: Character Level 5, Trap Sense I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +2 bonus on Reflex saves made to avoid traps and a +2 dodge

bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense I.

WILD SHAPE II

Prerequisites: Character Level 5, Wild Shape I.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape twice per day.

7TH-LEVEL SPECIAL ABILITIES

All 7th-Level Special Abilities have “Character Level 6” as a prerequisite.

DAMAGE REDUCTION I

Prerequisites: Character Level 6.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains Damage Reduction. Subtract 1 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

POISON RESISTANCE I

Prerequisites: Character Level 6, Poison Use.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +1 natural saving throw bonus to all poisons.

SNEAK ATTACK IV

Prerequisites: Character Level 6, Sneak Attack III.

Ability Type: Natural.

Class Levels: None.

Description: The character’s sneak attack now deals 4d6 extra damage (instead of 3d6).

TERRAIN MASTERY II

Prerequisites: Character Level 6, Terrain Mastery I.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Terrain Mastery I. You gain the benefits of Terrain Mastery I for that terrain type as well.

WHOLENESS OF BODY

Prerequisites: Character Level 6, Purity of Body.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character can heal her own wounds. She can heal a number of hit points of damage equal to twice her current monk class level each day, and she can spread this healing out among several uses.

WILD SHAPE III

Prerequisites: Character Level 6, Wild Shape II.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape three times per day.

8TH-LEVEL SPECIAL ABILITIES

All 8th-Level Special Abilities have “Character Level 7” as a prerequisite.

CANNY DEFENSE

Prerequisites: Character Level 7, Base Attack Bonus +6, Perform 3 ranks, Tumble 5 ranks, Dodge feat, Mobility feat, and Weapon Finesse feat.

Ability Type: Extraordinary.

Class Levels: Duelist.

Description: When not wearing armor or using a shield, the character adds 1 point of Intelligence bonus (if any) per duelist class level to her Dexterity bonus to modify Armor Class while wielding a melee weapon. If the character is caught flat-footed or otherwise denied her Dexterity bonus, she also loses this bonus.

DEFENDER AC BONUS I

Prerequisites: Character Level 7, dwarf, lawful alignment, base attack bonus +7, Dodge feat, Endurance feat, Toughness feat.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives a +1 dodge bonus to Armor Class. Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

DEFENSIVE STANCE I

Prerequisites: Character Level 7, dwarf, lawful alignment, base attack bonus +7, Dodge feat, Endurance feat, Toughness feat.

Ability Type: Natural.

Class Levels: None.

Description: When he adopts a defensive stance, the character gains phenomenal strength and durability, but he cannot move from the spot he is defending. He gains +2 to Strength, +4 to Constitution, a +2 resistance bonus on all saves, and a +4 dodge bonus to AC. The increase in Constitution increases the character's hit points by 2 points per level, but these hit points go away at the end of the defensive stance when the Constitution score drops back 4 points. These extra hit points are not lost first the way temporary hit points are. While in a defensive stance, the character cannot use skills or abilities that would require him to shift his position. A defensive stance lasts for a number of rounds equal to 3 + the character's (newly improved) Constitution modifier. The character may end his defensive stance voluntarily prior to this limit. At the end of the defensive stance, the character is winded and takes a -2 penalty to Strength for the duration of that encounter. The character can only use his defensive stance once per day as determined. Using the defensive stance takes no time itself, but the character can only do so during his action.

ENHANCE ARROW I

Prerequisites: Character Level 7, elf or half-elf, +6 base attack bonus, Point Blank Shot, Precise Shot, Weapon Focus (longbow or shortbow), ability to cast 1st-level arcane spells.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly becomes magical, gaining a +1 enhancement bonus. Unlike magic weapons created by normal means, the character need not spend experience points or gold pieces to accomplish this task. However, the

character's magic arrows only function for her.

FIGHTING MASTERY V

Prerequisites: Character Level 7, Fighting Mastery IV.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

HIDE IN PLAIN SHADOW

Prerequisites: Character Level 7, Move Silently 8 ranks, Hide 10 ranks, Combat Reflexes feat, Dodge feat, Mobility feat.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can use the Hide skill even while being observed. As long as she is within 10 feet of some sort of shadow, the character can hide herself from view in the open without anything to actually hide behind. She cannot, however, hide in her own shadow.

IMPROVED ALLY

Prerequisites: Character Level 7, Spell Focus (conjuration), ability to cast *lesser planar ally*.

Ability Type: Natural.

Class Levels: None.

Description: When the character casts a *planar ally* spell (including the lesser and greater versions), he

makes a Diplomacy check to convince the creature to aid him for a reduced payment. If the character's Diplomacy check adjusts the creature's attitude to helpful the creature will work for 50% of the standard fee, as long as the task is one that is not against its nature.

The character's improved ally class feature only works when the planar ally shares at least one aspect of alignment with the thaumaturgist.

The character can have only one such ally at a time, but he may bargain for tasks from other planar allies normally.

INSPIRE COURAGE II

Prerequisites: Character Level 7, Inspire Courage I.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's Inspire Courage increase by 1 and is now +2. See Inspire Courage I for details.

LOREMASTER SECRET I

Prerequisites: Character Level 7, Knowledge (any two) 10 ranks each, any three metamagic or item creation feats, Skill Focus (Knowledge [any]), ability to cast seven different divination spells, one of which must be 3rd level or higher.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses one secret from the table below. Her loremaster class level plus Intelligence modifier determines the secrets from which she can choose. She can't choose the same secret twice.

TABLE 9: LOREMASTER SECRETS

Level+Int Modifier	Secret	Effect
1	Instant mastery	4 ranks of a skill in which the character has no ranks
2	Secret health	+3 hit points
3	Secrets of inner strength	+2 bonus on Will saves
4	The lore of true stamina	+2 bonus on Fortitude saves
5	Secret knowledge of avoidance	+2 bonus on Reflex saves
6	Weapon trick	+1 bonus on attack rolls
7	Dodge trick	+1 dodge bonus to AC
8	Applicable knowledge	Any feat
9	Newfound arcana	1 bonus 1st-level spell
10	More newfound arcana	1 bonus 2nd-level spell

RAGE III

Prerequisites: Character Level 7, non-lawful alignment, Rage II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage three times per day. See Rage I for details.

SLOW FALL III

Prerequisites: Character Level 7, Slow Fall II.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 40 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall II.

SWIFT TRACKER

Prerequisites: Character Level 7, Track special ability or Track feat.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can move at his normal speed while following tracks without taking the normal -5 penalty. He takes only a -10 penalty (instead of the normal -20) when moving at up to twice normal speed while tracking.

TERRAIN MASTERY III

Prerequisites: Character Level 7, Terrain Mastery II.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Terrain Mastery I. You gain the benefits of Terrain Mastery I for that terrain type as well.

UNARMED STRIKE III

Prerequisites: Character Level 7, Unarmed Strike II.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 1d8 damage with unarmed strikes, a medium character 1d10 damage, and a large character 2d8 damage.

WILD SHAPE: LARGE

Prerequisites: Character Level 7, Wild Shape III.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Large animal when using Wild Shape.

9TH-LEVEL SPECIAL ABILITIES

All 9th-Level Special Abilities have "Character Level 8" as a prerequisite.

AUGMENT SUMMONING

Prerequisites: Character Level 8, Improved Ally.

Ability Type: Natural.

Class Levels: None.

Description: The character gains the Augment Summoning feat. This feat does not count as a base feat for the purposes of level determination.

BESTOW CURSE II

Prerequisites: Character Level 8, Aura of Alignment (Chaos), Bestow Curse I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, twice per week (instead of once per week).

CAUSE DISEASE II

Prerequisites: Character Level 8, Aura of Alignment (Evil), Cause Disease I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), twice per week (instead of once per week).

DARKVISION

Prerequisites: Character Level 8, Hide in Plain Shadow.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can see in the dark as though she were permanently under the effect of a *darkvision* spell.

FLURRY OF BLOWS III

Prerequisites: Character Level 8, Flurry of Blows II.

Ability Type: Natural.

Class Levels: None.

Description: The character's Flurry of Blows attack penalty disappears (i.e., becomes +0 instead of -1).

IMBUE ARROW

Prerequisites: Character Level 8, Enhance Arrow I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character gains the ability to place an area spell upon an arrow. When the arrow is fired, the spell's area is centered on where the arrow lands, even if the spell could normally be centered only on the caster. This ability allows the character to use the bow's range rather than the spell's range. It takes a standard action to cast the spell and fire the arrow.

The arrow must be fired in the round the spell is cast, or the spell is wasted.

IMPROVED EVASION

Prerequisites: Character Level 8, Evasion.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's evasion ability improves. She still takes no damage on a successful Reflex saving throw against attacks, but henceforth she takes only half damage on a failed save. A helpless character does not gain the benefit of improved evasion.

IMPROVED REACTION I

Prerequisites: Character Level 8, Canny Defense.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +2 bonus on initiative checks. This bonus stacks with the benefit provided by the Improved Initiative feat.

INSPIRE GREATNESS

Prerequisites: Character Level 8, Suggestion, 12 or more ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use music or poetics to inspire greatness in himself or a single willing ally within 30 feet, granting him or her extra fighting capability. For every three bard class levels the bard attains beyond 9th, he can target one additional ally with a single use of this ability (two at 12th level, three at 15th, four at 18th). To

inspire greatness, the character must sing and an ally must hear him sing. The effect lasts for as long as the ally hears the character sing and for 5 rounds thereafter. A creature inspired with greatness gains 2 bonus Hit Dice (d10s), the commensurate number of temporary hit points (apply the target's Constitution modifier, if any, to these bonus Hit Dice), a +2 competence bonus on attack rolls, and a +1 competence bonus on Fortitude saves. The bonus Hit Dice count as regular Hit Dice for determining the effect of spells that are Hit Dice dependant. Inspire greatness is a mind-affecting ability.

POISON RESISTANCE II

Prerequisites: Character Level 8, Poison Use, Poison Resistance I.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +2 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance I.

RANGED LEGERDEMAIN I

Prerequisites: Character Level 8, non-lawful alignment, Decipher Script 7 ranks, Disable Device 7 ranks, Escape Artist 7 ranks, Knowledge (arcana) 4 ranks, ability to cast *mage hand*, ability to cast one arcane spell of 3rd level or higher.

Ability Type: Natural.

Class Levels: None.

Description: The character can perform one of the following skills at a range of 30 feet: Disable Device, Open Lock, or Sleight of Hand. Working at a distance increases the normal skill check DC by 5, and the character cannot take 10 on this check. Any object to be

manipulated must weigh 5 pounds or less.

He can make only one ranged legerdemain skill check each day, and only if he has at least 1 rank in the skill being used.

REMOVE CURSE II

Prerequisites: Character Level 8, Aura of Alignment (Law), Remove Curse I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, twice per week (instead of once per week).

REMOVE DISEASE II

Prerequisites: Character Level 8, Aura of Alignment (Good), Remove Disease I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as the spell, twice per week (instead of only once per week).

SNEAK ATTACK V

Prerequisites: Character Level 8, Sneak Attack IV.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 5d6 extra damage (instead of 4d6).

SPEED BONUS III

Prerequisites: Character Level 8, Speed Bonus II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +30 ft. This replaces the enhancement bonus granted by Speed Bonus II. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TERRAIN MASTERY IV

Prerequisites: Character Level 8, Terrain Mastery III.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Terrain Mastery I. You gain the benefits of Terrain Mastery I for that terrain type as well.

TRAP SENSE III

Prerequisites: Character Level 8, Trap Sense II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +3 bonus on Reflex saves made to avoid traps and a +3 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense II.

VENOM IMMUNITY

Prerequisites: Character Level 8, Wild Shape: Large.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains immunity to all poisons.

10TH-LEVEL SPECIAL ABILITIES

All 10th-Level Special Abilities have "Character Level 9" as a prerequisite.

DAMAGE REDUCTION II

Prerequisites: Character Level 9, Damage Reduction I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 1 point, for a new total of 2. Subtract 2 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

DEFENSIVE STANCE II

Prerequisites: Character Level 9, Defensive Stance I.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance twice per day (instead of only once per day).

ENHANCE ARROW II

Prerequisites: Character Level 9, Enhance Arrow I.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +2 enhancement bonus (instead of +1).

EXTEND SUMMONING

Prerequisites: Character Level 9, Improved Ally, Augment Summoning.

Ability Type: Natural.

Class Levels: None.

Description: All spells from the summoning subschool that the character casts have their durations doubled, as if the Extend Spell feat had been applied to them. The levels of the summoning spells don't change, however. This ability stacks with the effect of the Extend Spell feat, which does change the spell's level.

ENHANCED MOBILITY

Prerequisites: Character Level 9, Improved Reaction.

Ability Type: Extraordinary.

Class Levels: None.

Description: When wearing no armor and not using a shield, the character gains an additional +4 bonus to AC against attacks of opportunity caused when she moves out of a threatened square.

FAVORED ENEMY III

Prerequisites: Character Level 9, Favored Enemy II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do

not stack; he simply uses whichever bonus is higher.

FIGHTING MASTERY VI

Prerequisites: Character Level 9, Fighting Mastery V.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

INTUITIVE DEFENSE III

Prerequisites: Character Level 9, Intuitive Defense II.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +2 bonus to AC. This bonus replaces the bonus to AC granted by Intuitive Defense II.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

KI STRIKE: LAWFUL

Prerequisites: Character Level 9, lawful alignment, Ki Strike: Magic.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's unarmed attacks are empowered with ki. Her unarmed attacks are treated as magic weapons and lawful weapons for the purpose of dealing damage to creatures with damage reduction.

LOREMASTER SECRET II

Prerequisites: Character Level 9, Loremaster Secret I.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses another secret from **Table 9: Loremaster Secrets**.

ROGUE SPECIAL ABILITY I

Prerequisites: Character Level 9.

Ability Type: Varies (See Below).

Class Levels: None.

Description: The character gains a special ability of her choice from among the following options.

Crippling Strike (Ex)

A character with this ability can sneak attack opponents with such precision that her blows weaken and hamper them. An opponent damaged by one of her sneak attacks also takes 2 points of Strength damage. Ability points lost to damage return on their own at the rate of 1 point per day for each damaged ability.

Defensive Roll (Ex)

The character can roll with a potentially lethal blow to take less damage from it than she otherwise would. Once per day, when she would be reduced to 0 or fewer hit points by damage in combat (from a weapon or other blow, not a spell or special ability), the character can attempt to roll with the damage. To use this ability, the character must

attempt a Reflex saving throw (DC = damage dealt). If the save succeeds, she takes only half damage from the blow; if it fails, she takes full damage. She must be aware of the attack and able to react to it in order to execute her defensive roll—if she is denied her Dexterity bonus to AC, she can't use this ability. Since this effect would not normally allow a character to make a Reflex save for half damage, the character's evasion ability does not apply to the defensive roll.

Improved Evasion (Ex)

This ability works like evasion, except that while the character still takes no damage on a successful Reflex saving throw against attacks henceforth she takes only half damage on a failed save. A helpless character does not gain the benefit of improved evasion.

Opportunist (Ex)

Once per round, the character can make an attack of opportunity against an opponent who has just been struck for damage in melee by another character. This attack counts as the character's attack of opportunity for that round. Even a character with the Combat Reflexes feat can't use the opportunist ability more than once per round.

Skill Mastery

The character becomes so certain in the use of certain skills that she can use them reliably even under adverse conditions.

Upon gaining this ability, she selects a number of skills equal to 3 + her Intelligence modifier. When making a skill check with one of these skills, she may take 10 even if stress and distractions would normally prevent her from doing so. A character may gain this special ability multiple times, selecting additional skills for it to apply to each time.

Slippery Mind (Ex)

This ability represents the character's ability to wriggle free from magical effects that would otherwise control or compel her. If a character with slippery mind is affected by an enchantment spell or effect and fails her saving throw, she can attempt it again 1 round later at the same DC. She gets only this one extra chance to succeed on her saving throw.

Feat

A character may gain a bonus feat in place of a special ability. This feat does not count as a base feat for the purposes of level determination.

SHADOW ILLUSION

Prerequisites: Character Level 9, Hide in Plain Shadow, Darkvision.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can create visual illusions. This ability's effect is identical to that of the arcane spell *silent image* and may be employed once per day.

SLOW FALL IV

Prerequisites: Character Level 9, Slow Fall III.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 50 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall III.

SMITE CHAOS III

Prerequisites: Character Level 9, Smite Chaos II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos three times per day (instead of twice per day).

SMITE EVIL III

Prerequisites: Character Level 9, Smite Evil II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil three times per day (instead of twice per day).

SMITE GOOD III

Prerequisites: Character Level 9, Smite Good II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good three times per day (instead of twice per day).

SMITE LAW III

Prerequisites: Character Level 9, Smite Law II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law three times per day (instead of twice per day).

SUMMON SHADOW

Prerequisites: Character Level 9, Hide in Plain Shadow, Darkvision.

Ability Type: Supernatural.

Class Levels: Shadowdancer.

Description: The character can summon a shadow, an undead shade. Unlike a normal shadow, this shadow's alignment matches that of the character, and the creature cannot create spawn. The summoned shadow cannot be turned, rebuked, or commanded by any third party. This shadow serves as a companion to the character and can communicate intelligibly with the character. Every third shadowdancer class level gained by the character adds +2 HD (and the requisite base attack and base save bonus increases) to her shadow companion.

If a shadow companion is destroyed, or the character chooses to dismiss it, the character must attempt a DC 15 Fortitude save. If the saving throw fails, the character loses 200 experience points per shadowdancer class level. A successful saving throw reduces the loss by half, to 100 XP per shadowdancer class level. The character's XP total can never go below zero as the result of a shadow's dismissal or destruction. A destroyed or dismissed shadow companion cannot be replaced for 30 days.

TERRAIN MASTERY V

Prerequisites: Character Level 9, Terrain Mastery IV.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Terrain Mastery I. You gain the benefits of Terrain Mastery I for that terrain type as well.

WILD SHAPE IV

Prerequisites: Character Level 9, Wild Shape III.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape four times per day.

WIZARDRY III

Prerequisites: Character Level 9, Wizardry II.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus feat. She can choose a metamagic feat, an item creation feat, or Spell Mastery. The character must still meet all prerequisites for a bonus feat, including caster level minimums.

11TH-LEVEL SPECIAL ABILITIES

All 11th-Level Special Abilities have "Character Level 10" as a prerequisite.

BONUS LANGUAGE I

Prerequisites: Character Level 10, Loremaster Secret II.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a new language.

COMBAT STYLE MASTERY: ARCHERY

Prerequisites: Character Level 10, Improved Combat Style: Archery.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Improved

Precise Shot feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

COMBAT STYLE MASTERY: TWO-WEAPON

Prerequisites: Character Level 10, Improved Combat Style: Two-Weapon.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Greater Two-Weapon Fighting feat, even if he does not have the normal prerequisites for that feat. This feat does not count as a base feat for the purposes of level determination. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

CONTINGENT CONJURATION

Prerequisites: Character Level 10, Extend Summoning.

Ability Type: Natural.

Class Levels: None.

Description: The character can prepare a summoning or calling spell ahead of time to be triggered by some other event. This functions as described for the contingency spell, including having the character cast the summoning or calling spell beforehand. The spell is cast instantly when the trigger event occurs.

The conditions needed to bring the spell into effect must be clear,

although they can be general. If complicated or convoluted condition as are prescribed, the contingent conjuration may fail when triggered. The conjuration spell occurs based solely on the stated conditions, regardless of whether the thaumaturgist wants it to, although most conjurations can be dismissed normally. The character can have only one contingent conjuration active at a time.

DEFENDER AC BONUS II

Prerequisites: Character Level 10, Defender AC Bonus I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives an additional +1 dodge bonus to Armor Class. This bonus stacks with the dodge bonus granted by Defender AC Bonus I (for a new total of +2). Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

DIAMOND BODY

Prerequisites: Character Level 10, Wholeness of Body.

Ability Type: Supernatural.

Class Levels: None.

Description: The character gains immunity to poisons of all kinds.

FIENDISH SERVANT

Prerequisites: Character Level 10, evil alignment.

Ability Type: Spell-Like.

Class Levels: Blackguard.

Description: The character gains a fiendish servant. See the blackguard prestige class special ability in the

System Reference Document for more details.

GRACE

Prerequisites: Character Level 10, Enhanced Mobility.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains an additional +2 competence bonus on all Reflex saving throws. This ability functions for the character only when she is wearing no armor and not using a shield.

GREATER FLURRY

Prerequisites: Character Level 10, Flurry of Blows III.

Ability Type: Natural.

Class Levels: None.

Description: In addition to the standard single extra attack the character gets from flurry of blows, she gets a second extra attack at her full base attack bonus.

GREATER RAGE

Prerequisites: Character Level 10, non-lawful alignment, Rage III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's bonuses to Strength and Constitution during his rage each increase to +6, and his morale bonus on Will saves increases to +3. The penalty to AC remains at -2.

IMPROMPTU SNEAK ATTACK I

Prerequisites: Character Level 10, non-lawful alignment, Decipher Script 7 ranks, Disable Device 7 ranks, Escape Artist 7 ranks,

Knowledge (arcana) 4 ranks, ability to cast *mage hand*, ability to cast one arcane spell of 3rd level or higher..

Ability Type: Natural.

Class Levels: None.

Description: The character can declare one melee or ranged attack he makes to be a sneak attack (the target can be no more than 30 feet distant if the impromptu sneak attack is a ranged attack). The target of an impromptu sneak attack loses any Dexterity bonus to AC, but only against that attack. The power can be used against any target, but creatures that are not subject to critical hits take no extra damage (though they still lose any Dexterity bonus to AC against the attack). The character can use this ability once per day.

PLANAR TERRAIN MASTERY I

Prerequisites: Character Level 10, Terrain Mastery V.

Ability Type: Natural.

Class Levels: None.

Description: Choose one terrain type found below under Planar Terrain Mastery Benefits. Planar terrain mastery gives the character a bonus on checks involving a skill useful in that planar terrain, or some other appropriate benefit. The character also knows how to fight dangerous creatures typically found in that planar terrain, gaining a +1 insight bonus on attack rolls and damage rolls against creatures with that terrain mentioned in the Environment entry of their descriptions. The character only gains the bonus if the creature description specifically lists the terrain type.

Characters take their planar terrain mastery with them wherever they go. They retain their planar terrain

mastery bonuses on skill checks, attack rolls, and damage rolls whether they're actually in the relevant terrain or not.

Planar Terrain Mastery Benefits

Fiery (Planar)

This kind of planar terrain mastery provides you with resistance to fire 20. You gain a +1 insight bonus on attack and damage rolls against outsiders and elementals with the fire subtype.

Weightless (Planar)

You gain a +30-foot bonus to your fly speed on planes with no gravity or subjective gravity. You gain a +1 insight on attack and damage rolls against creatures native to the Astral Plane, the Elemental Plane of Air, and the Ethereal Plane.

Cold (Planar)

This kind of planar terrain mastery provides you with resistance to cold 20. You gain a +1 insight bonus on attack and damage rolls against outsiders and elementals with the cold subtype.

Shifting (Planar)

You instinctively anticipate shifts in the reality of the plane that bring you closer to your destination, giving you the spell-like ability to use dimension door (as the spell cast at your character level) once every 1d4 rounds. You gain a +1 insight bonus on attack and damage rolls against outsiders and elementals native to a shifting plane.

Aligned (Planar)

You have the instinctive ability to mimic the dominant alignment of the plane. You incur none of the penalties for having an alignment at odds with that of the plane, and spells and abilities that harm those of the opposite alignment don't affect you. You have the dominant

alignment of the plane with regard to magic, but your behavior and any alignment-related Class Features you have are unaffected.

Cavernous (Planar)

You gain tremorsense with a 30-foot range.

Other (Planar)

If other planes are in use additional Planar Terrains can be created by the DM.

POISON RESISTANCE III

Prerequisites: Character Level 10, Poison Use, Poison Resistance II.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +3 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance II.

SEEKER ARROW

Prerequisites: Character Level 10, Enhance Arrow II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can launch an arrow once per day at a target known to her within range, and the arrow travels to the target, even around corners. Only an unavoidable obstacle or the limit of the arrow's range prevents the arrow's flight. This ability negates cover and concealment modifiers, but otherwise the attack is rolled normally. Using this ability is a standard action (and shooting the arrow is part of the action).

SHADOW JUMP I

Prerequisites: Character Level 10, Shadow Illusion, Summon Shadow.

Ability Type: Supernatural.

Class Levels: None.

Description: The character gains the ability to travel between shadows as if by means of a *dimension door* spell. The limitation is that the magical transport must begin and end in an area with at least some shadow. The character can jump up to a total of 20 feet each day in this way; this may be a single jump of 20 feet or two jumps of 10 feet each.

SNEAK ATTACK VI

Prerequisites: Character Level 10, Sneak Attack V.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 6d6 extra damage (instead of 5d6).

WILD SHAPE: TINY

Prerequisites: Character Level 10, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Tiny animal when using Wild Shape.

12TH-LEVEL SPECIAL ABILITIES

All 12th-Level Special Abilities have "Character Level 11" as a prerequisite.

ABUNDANT STEP

Prerequisites: Character Level 11, Diamond Body.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character can slip magically between spaces, as if using the spell dimension door, once per day. Her caster level for this effect is one-half her monk class level (rounded down).

BESTOW CURSE III

Prerequisites: Character Level 11, Aura of Alignment (Chaos), Bestow Curse II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, three times per week (instead of twice per week).

CAUSE DISEASE III

Prerequisites: Character Level 11, Aura of Alignment (Evil), Cause Disease II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), three times per week (instead of twice per week).

DEFENSIVE STANCE III

Prerequisites: Character Level 11, Defensive Stance II.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance three

times per day (instead of twice per day).

ENHANCE ARROW III

Prerequisites: Character Level 11, Enhance Arrow II.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +3 enhancement bonus (instead of +2).

FIGHTING MASTERY VII

Prerequisites: Character Level 11, Fighting Mastery VI.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

LOREMASTER SECRET III

Prerequisites: Character Level 11, Loremaster Secret II.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses another secret from **Table 9: Loremaster Secrets**.

PLANAR COHORT

Prerequisites: Character Level 11, Contingent Conjunction.

Ability Type: Natural.

Class Levels: None.

Description: The character can use any of the planar ally spells to call a creature to act as his cohort. The called creature serves loyally and well as long as the character continues to advance a cause important to the creature.

To call a planar cohort, the character must cast the relevant spell, paying the XP costs normally. It takes an offering of 1,000 gp × the HD of the creature to convince it to serve as a planar cohort, and the improved ally class feature can't be used to reduce or eliminate this cost. The planar cohort can't have more Hit Dice than the character has, and must have an ECL no higher than the thaumaturgist's character level -2.

The character can have only one planar cohort at a time, but he can continue to make agreements with other called creatures normally. A planar cohort replaces the character's existing cohort, if he has one by virtue of the Leadership feat.

PLANAR TERRAIN MASTERY II

Prerequisites: Character Level 11, Planar Terrain Mastery I.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Planar Terrain Mastery I. You gain the benefits of Planar Terrain Mastery I for that terrain type as well.

PRECISE STRIKE I

Prerequisites: Character Level 11, Grace.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains the ability to strike precisely with a light or one-handed piercing weapon, gaining an extra 1d6 damage added to her normal damage roll.

When making a precise strike, the character cannot attack with a weapon in her other hand or use a shield. The character's precise strike only works against living creatures with discernible anatomies. Any creature that is immune to critical hits is not vulnerable to a precise strike, and any item or ability that protects a creature from critical hits also protects a creature from a precise strike.

RAGE IV

Prerequisites: Character Level 11, non-lawful alignment, Rage III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage four times per day. See Rage I for details.

REMOVE CURSE III

Prerequisites: Character Level 11, Aura of Alignment (Law), Remove Curse II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, three times per week (instead of two times per week).

REMOVE DISEASE III

Prerequisites: Character Level 11, Aura of Alignment (Good), Remove Disease II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as the spell, three times per week (instead of twice per week).

SLOW FALL V

Prerequisites: Character Level 11, Slow Fall IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 60 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall IV.

SONG OF FREEDOM

Prerequisites: Character Level 11, Inspire Greatness, 15 or more ranks in Perform.

Ability Type: Spell-Like.

Class Levels: Bard.

Description: The character can use music or poetics to create an effect equivalent to the *break enchantment* spell (caster level equals the character's bard class level). Using this ability requires 1 minute of uninterrupted concentration and music, and it functions on a single target within 30 feet. The character can't use song of freedom on himself.

SPEED BONUS IV

Prerequisites: Character Level 11, Speed Bonus III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +40 ft. This replaces the

enhancement bonus granted by Speed Bonus III. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TRAP SENSE IV

Prerequisites: Character Level 11, Trap Sense III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +4 bonus on Reflex saves made to avoid traps and a +4 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense III.

UNARMED STRIKE IV

Prerequisites: Character Level 11, Unarmed Strike III.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 1d10 damage with unarmed strikes, a medium character 2d6 damage, and a large character 3d6 damage.

WILD SHAPE: PLANT

Prerequisites: Character Level 11, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character is able to use wild shape to change into a plant creature with the same size restrictions as for animal forms. (The character can't use this ability to take the form of a plant that isn't a creature.)

13TH-LEVEL SPECIAL ABILITIES

All 13th-Level Special Abilities have “Character Level 12” as a prerequisite.

A THOUSAND FACES

Prerequisites: Character Level 12, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to change her appearance at will, as if using the *disguise self* spell, but only while in her normal form. This affects the character’s body but not her possessions. It is not an illusory effect, but a minor physical alteration of the character’s appearance, within the limits described for the spell.

ACROBATIC CHARGE

Prerequisites: Character Level 12, Precise Strike.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains the ability to charge in situations where others cannot. She may charge over difficult terrain that normally slows movement. Depending on the circumstance, she may still need to make appropriate checks to successfully move over the terrain.

DAMAGE REDUCTION III

Prerequisites: Character Level 12, Damage Reduction II or Defensive Stance III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains damage reduction 3/-. This damage reduction replaces the damage reduction gained from Damage Reduction I and Damage Reduction II. Subtract 3 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

CAMOUFLAGE

Prerequisites: Character Level 12.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can use the Hide skill in any sort of natural terrain, even if the terrain doesn’t grant cover or concealment.

DIAMOND SOUL

Prerequisites: Character Level 12, Abundant Step.

Ability Type: Extraordinary.

Class Levels: Monk.

Description: The character gains spell resistance equal to her current monk class level + 10. In order to affect the character with a spell, a spellcaster must get a result on a caster level check (1d20 + caster level) that equals or exceeds the character’s spell resistance.

GREATER LORE

Prerequisites: Character Level 12, Loremaster Secret III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains the ability to understand magic items, as with the *identify* spell.

PHASE ARROW

Prerequisites: Character Level 12, Enhance Arrow III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can launch an arrow once per day at a target known to her within range, and the arrow travels to the target in a straight path, passing through any nonmagical barrier or wall in its way. (Any magical barrier stops the arrow.) This ability negates cover, concealment, and even armor modifiers, but otherwise the attack is rolled normally.

Using this ability is a standard action (and shooting the arrow is part of the action).

PLANAR TERRAIN MASTERY III

Prerequisites: Character Level 12, Planar Terrain Mastery II.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Planar Terrain Mastery I. You gain the benefits of Planar Terrain Mastery I for that terrain type as well.

POISON RESISTANCE IV

Prerequisites: Character Level 12, Poison Use, Poison Resistance III.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +4 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance III.

RANGED LEGERDEMAIN II

Prerequisites: Character Level 12, non-lawful alignment, Ranged Legerdemain I.

Ability Type: Natural.

Class Levels: None.

Description: The character can now make two ranged legerdemain skill checks each day. See details under Ranged Legerdemain I.

ROGUE SPECIAL ABILITY II

Prerequisites: Character Level 12, Rogue Special Ability I.

Ability Type: Varies (See Below).

Class Levels: None.

Description: The character gains another special ability of her choice from among those listed under Rogue Special Ability I.

SHADOW JUMP II

Prerequisites: Character Level 12, Shadow Jump I.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can now shadow jump up to a total of 40 feet each day in this way; this may be a single jump of 40 feet, two jumps of 20 feet each, four jumps of 10 feet each, etc.

SNEAK ATTACK VII

Prerequisites: Character Level 12, Sneak Attack VI.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 7d6 extra damage (instead of 6d6).

14TH-LEVEL SPECIAL ABILITIES

All 14th-Level Special Abilities have "Character Level 13" as a prerequisite.

DEFENDER AC BONUS III

Prerequisites: Character Level 13, Defender AC Bonus II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives an additional +1 dodge bonus to Armor Class. This bonus stacks with the dodge bonuses granted by previous Defender AC Bonus special abilities (for a new total of +3). Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

DEFENSIVE STANCE IV

Prerequisites: Character Level 13, Defensive Stance III, Damage Reduction III.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance four times per day (instead of three times per day).

ELABORATE PARRY

Prerequisites: Character Level 13, Acrobatic Charge.

Ability Type: Extraordinary.

Class Levels: Duelist.

Description: If the character chooses to fight defensively or use total defense in melee combat, she gains an additional +1 dodge bonus to AC for each class level of duelist she has.

ENHANCE ARROW IV

Prerequisites: Character Level 13, Enhance Arrow III.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +4 enhancement bonus (instead of +3).

FIGHTING MASTERY VIII

Prerequisites: Character Level 13, Fighting Mastery VII.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

HIEROPHANT SPECIAL ABILITY I

Prerequisites: Character Level 13, Knowledge (religion) 15 ranks, any metamagic feat, ability to cast 7th-level divine spells.

Ability Type: Varies.

Class Levels: None.

Description: The character gains a special ability of his choice from among the following.

Blast Infidel (Su)

The character can use negative energy spells to their maximum effect on creatures with an alignment opposed to the character. Any spell with a description that

involves inflicting or channeling negative energy cast on a creature of the opposed alignment works as if under the effect of a Maximize Spell feat (without using a higher-level spell slot). Undead affected by this ability heal the maximized amount of damage.

Divine Reach (Su)

A character with this ability can use touch spells on targets up to 30 feet away. If the spell requires a melee touch attack, the character must make a ranged touch attack instead. Divine reach can be selected a second time as a special ability, in which case the range increases to 60 feet.

Faith Healing (Su)

The character can use healing spells to their maximum effect on creatures of the same alignment as the character (including the character himself). Any spell with the healing descriptor cast on such creatures works as if under the effects of a Maximize Spell feat (without using a higher-level spell slot).

Gift of the Divine (Su)

Available only to characters with cleric class or spellcaster levels, this ability allows the character to transfer one or more uses of his turn undead ability to a willing creature. (Characters who rebuke undead transfer uses of rebuke undead instead.) The transfer lasts anywhere from 24 hours to one week (chosen at the time of transfer), and while the transfer is in effect, the number of turning attempts per day allowed to the character is reduced by the number transferred. The recipient turns undead as a cleric of the character's cleric class level but uses her own Charisma modifier.

Mastery of Energy (Su)

Available only to characters with cleric class or spellcaster levels, this

ability allows the character to channel positive or negative energy much more effectively, increasing his ability to affect undead. Add a +4 bonus to the character's turning checks and turning damage rolls. This ability only affects undead, even if the character can turn other creatures, such as with a granted power of a domain.

Metamagic Feat

The character can choose a metamagic feat in place of one of the special abilities described here if desired.

Power of Nature (Su)

Available only to characters with druid class or spellcasting levels, this ability allows the character to temporarily transfer one or more of his druid special abilities (those appearing in the druid basic class description in the System Reference Document) to a willing creature. The transfer lasts anywhere from 24 hours to one week (chosen at the time of transfer), and while the transfer is in effect, the character cannot use the transferred power. He can transfer any of his druid powers except spellcasting and the ability to have an animal companion.

The wild shape ability can be partially or completely transferred. The character chooses how many uses of wild shape per day to give to transfer and retains the rest of the uses for himself. If the character can assume the form of Tiny or Huge animals, the recipient can as well.

As with the imbue with spell ability spell, the character remains responsible to his deity for any use to which the recipient puts the transferred abilities.

Spell Power

This special ability increases the character's effective caster level by 1 for purposes of determining level-dependent spell variables and for

caster level checks. This ability can be selected more than once, and changes to effective caster level are cumulative.

Spell-Like Ability

A character who selects this special ability can use one of his divine spell slots (or an appropriate number of spell points) to permanently prepare one of his divine spells as a spell-like ability that can be used twice per day. The character does not use any components when casting the spell, although a spell that costs XP to cast still does so, and a spell with a costly material component instead costs him 10 times that amount in XP.

The spell normally uses a spell slot of the spell's level (or higher, if the character chooses to permanently attach a metamagic feat to the spell chosen). The character can use an available higher-level spell slot to use the spell-like ability more than twice per day. Allocating a slot three levels higher allows him to cast the spell four times per day, and a slot six levels higher lets him cast it six times per day. If selected more than one time as a special ability, this ability can apply to the same spell (increasing the number of times per day it can be used) or to a different spell.

HIGH ARCANA I

Prerequisites: Character Level 13, Knowledge (arcana) 15 ranks, Spellcraft 15 ranks, Skill Focus (Spellcraft), Spell Focus in two schools of magic, ability to cast 7th-level arcane spells, knowledge of 5th-level or higher spells from at least five schools.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains the opportunity to select a special ability from among those described

below by permanently eliminating one existing spell slot (she cannot eliminate a spell slot of higher level than the highest-level spell she can cast). Each special ability has a minimum required spell slot level, as specified in its description.

The character may choose to eliminate a spell slot of a higher level than that required to gain a type of high arcana.

Arcane Fire (Su)

The character gains the ability to change arcane spell energy into arcane fire, manifesting it as a bolt of raw magical energy. The bolt is a ranged touch attack with long range (400 feet + 40 feet/class level of archmage) that deals 1d6 points of damage per class level of the archmage plus 1d6 points of damage per level of the spell used to create the effect. This ability costs one 9th-level spell slot.

Arcane Reach (Su)

The character can use spells with a range of touch on a target up to 30 feet away. The character must make a ranged touch attack. Arcane reach can be selected a second time as a special ability, in which case the range increases to 60 feet. This ability costs one 7th-level spell slot.

Mastery of Counterspelling

When the character counterspells a spell, it is turned back upon the caster as if it were fully affected by a spell turning spell. If the spell cannot be affected by spell turning, then it is merely counterspelled. This ability costs one 7th-level spell slot.

Mastery of Elements

The character can alter an arcane spell when cast so that it utilizes a different element from the one it normally uses. This ability can only alter a spell with the acid, cold, fire, electricity, or sonic descriptor. The spell's casting time is unaffected.

The caster decides whether to alter the spell's energy type and chooses the new energy type when he begins casting. This ability costs one 8th-level spell slot.

Mastery of Shaping

The character can alter area and effect spells that use one of the following shapes: burst, cone, cylinder, emanation, or spread. The alteration consists of creating spaces within the spell's area or effect that are not subject to the spell. The minimum dimension for these spaces is a 5-foot cube. Furthermore, any shapeable spells have a minimum dimension of 5 feet instead of 10 feet. This ability costs one 6th-level spell slot.

Spell Power

This ability increases the character's effective caster level by +1 (for purposes of determining level-dependent spell variables such as damage dice or range, and caster level checks only). This ability costs one 5th-level spell slot.

Spell-Like Ability

A character who selects this type of high arcana can use one of her arcane spell slots (other than a slot expended to learn this or any other type of high arcana) to permanently prepare one of her arcane spells as a spell-like ability that can be used twice per day. The character does not use any components when casting the spell, although a spell that costs XP to cast still does so and a spell with a costly material component instead costs her 10 times that amount in XP. This ability costs one 5th-level spell slot.

The spell-like ability normally uses a spell slot of the spell's level, although the character can choose to make a spell modified by a metamagic feat into a spell-like ability at the appropriate spell level.

The character may use an available higher-level spell slot in order to

use the spell-like ability more often. Using a slot three levels higher than the chosen spell allows her to use the spell-like ability four times per day, and a slot six levels higher lets her use it six times per day.

If spell-like ability is selected more than one time as a high arcana choice, this ability can apply to the same spell chosen the first time (increasing the number of times per day it can be used) or to a different spell.

INDOMITABLE WILL

Prerequisites: Character Level 13, non-lawful alignment, Greater Rage.

Ability Type: Extraordinary.

Class Levels: None.

Description: While in a rage, the character gains a +4 bonus on Will saves to resist enchantment spells. This bonus stacks with all other modifiers, including the morale bonus on Will saves he also receives during his rage.

INSPIRE COURAGE III

Prerequisites: Character Level 13, Song of Freedom.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's Inspire Courage increases by 1 and is now +3. See Inspire Courage I for details.

LOREMASTER SECRET IV

Prerequisites: Character Level 13, Loremaster Secret III.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses another secret from **Table 9: Loremaster Secrets**.

PLANAR TERRAIN MASTERY IV

Prerequisites: Character Level 13, Planar Terrain Mastery III.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Planar Terrain Mastery I. You gain the benefits of Planar Terrain Mastery I for that terrain type as well.

SLOW FALL VI

Prerequisites: Character Level 13, Slow Fall V.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 70 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall V.

WILD SHAPE V

Prerequisites: Character Level 13, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape five times per day.

15TH-LEVEL SPECIAL ABILITIES

All 15th-Level Special Abilities have "Character Level 14" as a prerequisite.

BESTOW CURSE IV

Prerequisites: Character Level 14, Aura of Alignment (Chaos), Bestow Curse III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, four times per week (instead of three times per week).

BONUS LANGUAGE II

Prerequisites: Character Level 14, Loremaster Secret IV.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a new language.

CAUSE DISEASE IV

Prerequisites: Character Level 14, Aura of Alignment (Evil), Cause Disease III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), four times per week (instead of three times per week).

FAVORED ENEMY IV

Prerequisites: Character Level 14, Favored Enemy III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

HAIL OF ARROWS

Prerequisites: Character Level 14, Enhance Arrow IV.

Ability Type: Spell-Like.

Class Levels: Arcane Archer.

Description: In lieu of her regular attacks, once per day the character can fire an arrow at each and every target within range, to a maximum of one target for every arcane archer class level. Each attack uses the character's primary attack bonus, and each enemy may only be targeted by a single arrow.

HIEROPHANT SPECIAL ABILITY II

Prerequisites: Character Level 14, Hierophant Special Ability I.

Ability Type: Varies.

Class Levels: None.

Description: The character gains another special ability of his choice from among those listed under Hierophant Special Ability I.

HIGH ARCANA II

Prerequisites: Character Level 14, High Arcana I.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains another special ability listed under High Arcana I.

IMPROMPTU SNEAK ATTACK II

Prerequisites: Character Level 14, non-lawful alignment, Impromptu Sneak Attack I.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use impromptu sneak attack twice per day.

IMPROVED REACTION II

Prerequisites: Character Level 14, Improved Reaction I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's bonus from Improved Reaction I increases to +4. This replaces the bonus gained from Improved Reaction I. This bonus stacks with the benefit provided by the Improved Initiative feat.

INSPIRE HEROICS

Prerequisites: Character Level 14, Inspire Courage III, 18 or more ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use music or poetics to inspire

tremendous heroism in himself or a single willing ally within 30 feet. For every three bard class levels the character attains beyond 15th, he can inspire heroics in one additional creature. To inspire heroics, the character must sing and an ally must hear the character sing for a full round. A creature so inspired gains a +4 morale bonus on saving throws and a +4 dodge bonus to AC. The effect lasts for as long as the ally hears the character sing and for up to 5 rounds thereafter. Inspire heroics is a mind-affecting ability.

INTUITIVE DEFENSE IV

Prerequisites: Character Level 14, Intuitive Defense III.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +3 bonus to AC. This bonus replaces the bonus to AC granted by Intuitive Defense III.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

MOBILE DEFENSE

Prerequisites: Character Level 14, Defensive Stance IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can adjust his position while maintaining a defensive stance. While in a defensive stance, he can take one 5-foot step each round without losing the benefit of the stance.

PLANAR TERRAIN MASTERY V

Prerequisites: Character Level 14, Planar Terrain Mastery IV.

Ability Type: Natural.

Class Levels: None.

Description: Choose another terrain type found under Planar Terrain Mastery I. You gain the benefits of Planar Terrain Mastery I for that terrain type as well.

POISON RESISTANCE V

Prerequisites: Character Level 14, Poison Use, Poison Resistance IV.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +5 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance IV.

QUIVERING PALM

Prerequisites: Character Level 14, Ki Strike: Lawful, Diamond Soul.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character can set up vibrations within the body of another creature that can thereafter be fatal if the character so desires. She can use this quivering palm attack once a week, and she must announce her intent before making her attack roll. Constructs, oozes, plants, undead, incorporeal creatures, and creatures immune to critical hits cannot be affected. Otherwise, if the character strikes successfully and the target takes damage from the blow, the quivering palm attack succeeds. Thereafter the character can try to slay the victim at any later time, as long as the attempt is made within

a number of days equal to her monk class level. To make such an attempt, the character merely wills the target to die (a free action), and unless the target makes a Fortitude saving throw (DC 10 + ½ the character's monk class level + the character's Wis modifier), it dies. If the saving throw is successful, the target is no longer in danger from that particular quivering palm attack, but it may still be affected by another one at a later time.

REMOVE CURSE IV

Prerequisites: Character Level 14, Aura of Alignment (Law), Remove Curse III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, four times per week (instead of three times per week).

REMOVE DISEASE IV

Prerequisites: Character Level 14, Aura of Alignment (Good), Remove Disease III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as the spell, four times per week (instead of three times per week).

SHADOW JUMP III

Prerequisites: Character Level 14, Shadow Jump II.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can now shadow jump up to a total of 80 feet each day in this way; this may be a single jump of 80 feet, two

jumps of 40 feet each, four jumps of 20 feet each, etc.

SMITE CHAOS IV

Prerequisites: Character Level 14, Smite Chaos III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos four times per day (instead of three times per day).

SMITE EVIL IV

Prerequisites: Character Level 14, Smite Evil III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil four times per day (instead of three times per day).

SMITE GOOD IV

Prerequisites: Character Level 14, Smite Good III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good four times per day (instead of three times per day).

SMITE LAW IV

Prerequisites: Character Level 14, Smite Law III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law four times per day (instead of three times per day).

SMITE EVIL IV

Prerequisites: Character Level 14, Smite Evil III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil four times per day (instead of three times per day).

SNEAK ATTACK VIII

Prerequisites: Character Level 14, Sneak Attack VII.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 8d6 extra damage (instead of 7d6).

SPEED BONUS V

Prerequisites: Character Level 14, Speed Bonus IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +50 ft. This replaces the enhancement bonus granted by Speed Bonus IV. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TIMELESS BODY: DRUIDIC

Prerequisites: Character Level 14, Wild Shape V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character no longer takes ability score penalties for aging and cannot be magically aged. Any penalties she may have

already incurred, however, remain in place.

Bonuses still accrue, and the character still dies of old age when her time is up.

TRAP SENSE V

Prerequisites: Character Level 14, Trap Sense IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +5 bonus on Reflex saves made to avoid traps and a +5 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense IV.

WILD SHAPE: HUGE

Prerequisites: Character Level 14, Wild Shape V.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Huge animal when using Wild Shape.

WIZARDRY IV

Prerequisites: Character Level 14, Wizardry III.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus feat. She can choose a metamagic feat, an item creation feat, or Spell Mastery. The character must still meet all prerequisites for a bonus feat, including caster level minimums.

16TH-LEVEL SPECIAL ABILITIES

All 16th-Level Special Abilities have “Character Level 15” as a prerequisite.

DAMAGE REDUCTION IV

Prerequisites: Character Level 15, Damage Reduction III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character’s damage reduction rises by 1 point, for a new total of 4. Subtract 4 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

DEFENSIVE STANCE V

Prerequisites: Character Level 15, Mobile Defense.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance five times per day (instead of four times per day).

DEFLECT ARROWS: DUELIST

Prerequisites: Character Level 15, Elaborate Parry.

Ability Type: Natural.

Class Levels: None.

Description: The character gains the benefit of the Deflect Arrows feat when using a light or one-handed piercing weapon.

ENHANCE ARROW V

Prerequisites: Character Level 15, Enhance Arrow IV.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +5 enhancement bonus (instead of +4).

FIGHTING MASTERY IX

Prerequisites: Character Level 15, Fighting Mastery VIII.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

HIEROPHANT SPECIAL ABILITY III

Prerequisites: Character Level 15, Hierophant Special Ability II.

Ability Type: Varies.

Class Levels: None.

Description: The character gains another special ability of his choice from among those listed under Hierophant Special Ability I.

HIGH ARCANA III

Prerequisites: Character Level 15, High Arcana II.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains another special ability listed under High Arcana I.

LOREMASTER SECRET V

Prerequisites: Character Level 15, Loremaster Secret IV.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses another secret from **Table 9: Loremaster Secrets**.

KI STRIKE: ADAMANTITE

Prerequisites: Character Level 15, Ki Strike: Lawful.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's unarmed attacks are empowered with ki. Her unarmed attacks are treated as magic weapons and lawful weapons for the purpose of dealing damage to creatures with damage reduction. Also, her unarmed attacks are treated as adamantite weapons for the purpose of dealing damage to creatures with damage reduction and bypassing hardness.

RAGE V

Prerequisites: Character Level 15, non-lawful alignment, Rage IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage five times per day. See Rage I for details.

ROGUE SPECIAL ABILITY III

Prerequisites: Character Level 15, Rogue Special Ability II.

Ability Type: Varies (See Below).

Class Levels: None.

Description: The character gains yet another special ability of her choice from among those listed under Rogue Special Ability I.

SLOW FALL VII

Prerequisites: Character Level 15, Slow Fall VI.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 80 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall VI.

UNARMED STRIKE V

Prerequisites: Character Level 15, Unarmed Strike IV.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 2d6 damage with unarmed strikes, a medium character 2d8 damage, and a large character 3d8 damage.

WILD SHAPE: ELEMENTAL I

Prerequisites: Character Level 15, Wild Shape V.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character able to use wild shape to change into a Small, Medium, or Large elemental (air, earth, fire, or water) once per day. These elemental forms are in addition to her normal wild shape usage. In addition to the normal effects of wild shape, the character

gains all the elemental's extraordinary, supernatural, and spell-like abilities. She also gains the elemental's feats for as long as she maintains the wild shape, but she retains her own creature type.

17TH-LEVEL SPECIAL ABILITIES

All 17th-Level Special Abilities have "Character Level 16" as a prerequisite.

ARROW OF DEATH

Prerequisites: Character Level 16, Enhance Arrow V.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can create an arrow of death that forces the target, if damaged by the arrow's attack, to make a DC 20 Fortitude save or be slain immediately. It takes one day to make an arrow of death, and the arrow only functions for the character that created it. The arrow of death lasts no longer than one year, and the character can only have one such arrow in existence at a time.

DAMAGE REDUCTION: DEFENDER

Prerequisites: Character Level 16, Defensive Stance V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 3 points, for a new total of 6. Subtract 6 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

DEFENDER AC BONUS IV

Prerequisites: Character Level 16, Defender AC Bonus III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives an additional +1 dodge bonus to Armor Class. This bonus stacks with the dodge bonuses granted by previous Defender AC Bonus special abilities (for a new total of +4). Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

PRECISE STRIKE II

Prerequisites: Character Level 16, Precise Strike I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage bonus from a precise strike increases to +2d6. This bonus replaces the bonus granted by Precise Strike I.

HIDE IN PLAIN SIGHT

Prerequisites: Character Level 16, Camouflage.

Ability Type: Extraordinary.

Class Levels: None.

Description: While in any sort of natural terrain, the character can use the Hide skill even while being observed.

HIEROPHANT SPECIAL ABILITY IV

Prerequisites: Character Level 16, Hierophant Special Ability III.

Ability Type: Varies.

Class Levels: None.

Description: The character gains another special ability of his choice from among those listed under Hierophant Special Ability I.

HIGH ARCANA IV

Prerequisites: Character Level 16, High Arcana III.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains another special ability listed under High Arcana I.

RANGED LEGERDEMAIN III

Prerequisites: Character Level 16, non-lawful alignment, Ranged Legerdemain II.

Ability Type: Natural.

Class Levels: None.

Description: The character can now make three ranged legerdemain skill checks each day. See details under Ranged Legerdemain I.

SHADOW JUMP IV

Prerequisites: Character Level 16, Shadow Jump III.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can now shadow jump up to a total of 160 feet each day in this way; this may be a single jump of 160 feet, two jumps of 80 feet each, four jumps of 40 feet each, eight jumps of 20 feet each, etc.

SNEAK ATTACK IX

Prerequisites: Character Level 16, Sneak Attack VIII.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 9d6 extra damage (instead of 8d6).

TIMELESS BODY: ASCETIC

Prerequisites: Character Level 16, Diamond Soul.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character no longer takes penalties to her ability scores for aging and cannot be magically aged. Any such penalties that she has already taken, however, remain in place. Bonuses still accrue, and the character still dies of old age when her time is up.

TIRELESS RAGE

Prerequisites: Character Level 16, non-lawful alignment, Indomitable Will.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character no longer becomes fatigued at the end of his rage.

TONGUE OF THE SUN AND THE MOON

Prerequisites: Character Level 16, Diamond Soul.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can speak with any living creature.

TRUE LORE

Prerequisites: Character Level 16, Loremaster Secret V.

Ability Type: Extraordinary.

Class Levels: None.

Description: Once per day the character can use her knowledge to gain the effect of a *legend lore* spell or an *analyze dweomer* spell.

18TH-LEVEL SPECIAL ABILITIES

All 18th-Level Special Abilities have “Character Level 17” as a prerequisite.

BESTOW CURSE V

Prerequisites: Character Level 17, Aura of Alignment (Chaos), Bestow Curse IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a bestow curse effect, five times per week (instead of four times per week).

CAUSE DISEASE V

Prerequisites: Character Level 17, Aura of Alignment (Evil), Cause Disease IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the contagion spell), five times per week (instead of four times per week).

FIGHTING MASTERY X

Prerequisites: Character Level 17, Fighting Mastery IX.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This

bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

HIEROPHANT SPECIAL ABILITY V

Prerequisites: Character Level 17, Hierophant Special Ability IV.

Ability Type: Varies.

Class Levels: None.

Description: The character gains another special ability of his choice from among those listed under Hierophant Special Ability I.

HIGH ARCANA V

Prerequisites: Character Level 17, High Arcana IV.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains another special ability listed under High Arcana I.

MASS SUGGESTION

Prerequisites: Character Level 17, Inspire Heroics, 18 or more ranks in Perform.

Ability Type: Spell-Like.

Class Levels: None.

Description: This special ability functions like Suggestion, above, except that the character can make the suggestion simultaneously to any number of creatures that he has already fascinated. Mass suggestion is an enchantment (compulsion), mind-affecting, language-dependent ability.

REMOVE CURSE V

Prerequisites: Character Level 17, Aura of Alignment (Law), Remove Curse IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove curse effect, five times per week (instead of four times per week).

REMOVE DISEASE V

Prerequisites: Character Level 17, Aura of Alignment (Good), Remove Disease IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a remove disease effect, as the spell, five times per week (instead of four times per week).

SLOW FALL VIII

Prerequisites: Character Level 17, Slow Fall VII.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm’s reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 90 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall VII.

SPEED BONUS VI

Prerequisites: Character Level 17, Speed Bonus V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +60 ft. This replaces the enhancement bonus granted by Speed Bonus V. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TRAP SENSE VI

Prerequisites: Character Level 17, Trap Sense V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +6 bonus on Reflex saves made to avoid traps and a +6 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense V.

WILD SHAPE VI

Prerequisites: Character Level 17, Wild Shape V.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape six times per day.

WILD SHAPE: ELEMENTAL II

Prerequisites: Character Level 17, Wild Shape: Elemental I.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use Wild Shape: Elemental twice per day.

19TH-LEVEL SPECIAL ABILITIES

All 19th-Level Special Abilities have “Character Level 18” as a prerequisite.

DAMAGE REDUCTION V

Prerequisites: Character Level 18, Damage Reduction IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character’s damage reduction rises by 1 point, for a new total of 5. Subtract 5 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

EMPTY BODY

Prerequisites: Character Level 18, Timeless Body: Ascetic.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character gains the ability to assume an ethereal state for 1 round per monk class level per day, as though using the spell *etherealness*. She may go ethereal on a number of different occasions during any single day, as long as the total number of rounds spent in an ethereal state does not exceed her monk class level.

ROGUE SPECIAL ABILITY IV

Prerequisites: Character Level 18, Rogue Special Ability III.

Ability Type: Varies (See Below).

Class Levels: None.

Description: The character gains still another special ability of her choice from among those listed under Rogue Special Ability I.

SNEAK ATTACK X

Prerequisites: Character Level 18, Sneak Attack IX.

Ability Type: Natural.

Class Levels: None.

Description: The character’s sneak attack now deals 10d6 extra damage (instead of 9d6).

20TH-LEVEL SPECIAL ABILITIES

All 20th-Level Special Abilities have “Character Level 19” as a prerequisite.

FAVORED ENEMY V

Prerequisites: Character Level 19, Favored Enemy IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character’s bonuses do not stack; he simply uses whichever bonus is higher.

FIGHTING MASTERY XI

Prerequisites: Character Level 19, Fighting Mastery X.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus combat-oriented feat. This bonus feat must be drawn from the feats noted as fighter bonus feats in the System Reference Document. The character must still meet all prerequisites for a bonus feat, including ability score and base attack bonus minimums. This feat does not count as a base feat for the purposes of level determination.

INSPIRE COURAGE IV

Prerequisites: Character Level 19, Mass Suggestion.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's Inspire Courage increases by 1 and is now +4. See Inspire Courage I for details.

INTUITIVE DEFENSE V

Prerequisites: Character Level 19, Intuitive Defense IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +4 bonus to AC. This bonus replaces the bonus to AC granted by Intuitive Defense IV.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

MIGHTY RAGE

Prerequisites: Character Level 19, non-lawful alignment, Tireless Rage.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's bonuses to Strength and Constitution during his rage each increase to +8, and his morale bonus on Will saves increases to +4. The penalty to AC remains at -2.

PERFECT SELF

Prerequisites: Character Level 19, Empty Body.

Ability Type: Natural.

Class Levels: None.

Description: The character becomes a magical creature. She is forevermore treated as an outsider rather than as a humanoid (or whatever the character's creature type was) for the purpose of spells and magical effects. Additionally, the character gains damage reduction 10/magic, which allows her to ignore the first 10 points of damage from any attack made by a nonmagical weapon or by any natural attack made by a creature that doesn't have similar damage reduction. Unlike other outsiders, the character can still be brought back from the dead as if she were a member of her previous creature type.

RAGE VI

Prerequisites: Character Level 19, non-lawful alignment, Rage V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage six times per day. See Rage I for details.

SMITE CHAOS V

Prerequisites: Character Level 19, Smite Chaos IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos five times per day (instead of four times per day).

SMITE EVIL V

Prerequisites: Character Level 19, Smite Evil IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil five times per day (instead of four times per day).

SMITE GOOD V

Prerequisites: Character Level 19, Smite Good IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good five times per day (instead of four times per day).

SMITE LAW V

Prerequisites: Character Level 19, Smite Law IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law five times per day (instead of four times per day).

SLOW FALL IX

Prerequisites: Character Level 19, Slow Fall VIII.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent and fall any distance without harm.

UNARMED STRIKE VI

Prerequisites: Character Level 19, Unarmed Strike V.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 2d8 damage with unarmed strikes, a medium character 2d10 damage, and a large character 4d8 damage.

WILD SHAPE: ELEMENTAL III

Prerequisites: Character Level 19, Wild Shape: Elemental II.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use Wild Shape: Elemental three times per day.

WILD SHAPE: ELEMENTAL (HUGE)

Prerequisites: Character Level 19, Wild Shape: Elemental I.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Huge elemental when using Wild Shape: Elemental.

WIZARDRY V

Prerequisites: Character Level 19, Wizardry IV.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a bonus feat. She can choose a metamagic feat, an item creation feat, or Spell Mastery. The character must still meet all prerequisites for a bonus feat, including caster level minimums.

ADDING NEW SPECIAL ABILITIES

Adding new special abilities is quite simple. First determine the minimum character level a character can get the special ability under the standard rules. This will become the level of the special ability. Then, determine what prerequisites are required. Usually, prerequisites are based on how related special abilities are gained as a character progresses. Lower-level special abilities having the same name or effect as higher-level special abilities should be made prerequisites of the higher-level abilities. Special abilities that seem to be more powerful than other special abilities in your campaign should have more prerequisites.

Ensure that any requirements for entry into a prestige class are made prerequisites. Determining the level of special abilities that appear in prestige class descriptions can be tricky. Just find the minimum character level that a character could enter the prestige class and use that as a basis for determination.

After that, determine whether the special ability is an extraordinary, spell-like, or supernatural ability. If it is not one of these, make it "natural." If class levels are used to determine the effectiveness of the special ability, include the appropriate classes in the special ability description.

Determining the appropriate cost for other types of special abilities and spellcasting, such as draconic auras for the dragon shaman class or the spellcasting ability of the beguiler class (both from Player's Handbook II) is easy, as well. Simply add up the XP costs for all traits that you do have costs for (such as base attack bonus, base save bonuses, etc.) and then subtract this total from 20,000 XP. This is the amount of experience points a character would have to invest to get 20 levels of that particular special ability or spellcasting. For example, at 20th level, the dragon shaman has a +15 base attack bonus (4,500 XP), a total of +30 in saves (3,000 XP), 20d10 hit points (5,000 XP for maximum), 40 skill ranks (1,000 XP), 29 special abilities (2,900 XP), seven base feats (700 XP) and five ability score increases (750 XP). This totals 17,850 XP. The difference is 2,150 XP. By the time the dragon shaman reaches 20th level, he knows seven dragon auras. Therefore, each aura should cost about 300 XP x CL (2,150 XP / 7). The first three dragon auras are 1st level abilities. The fourth aura is a 3rd level ability (since the dragon shaman gains it at 3rd level). The fifth, sixth, and seventh auras are 5th, 7th, and 9th level abilities, respectively.

CHANGES TO CORE RULES

FEATS

Change the Martial Weapon Proficiency feat to read:

MARTIAL WEAPON PROFICIENCY [GENERAL]

Prerequisite: Simple Weapon Proficiency.

Benefit: You make attack rolls with martial weapons normally.

Normal: When using a weapon with which you are not proficient, you take a -4 penalty on attack rolls.

SPELL LISTS & DOMAINS

There are a few changes to spell lists. Paladins and rangers no longer have their own spell lists and spell progressions. Players wishing to emulate the spellcasting abilities of paladins and rangers must purchase spellcasting levels in cleric and druid spellcasting (respectively). Because of this, a few changes to spell lists must occur.

All paladin spells are now part of the cleric spell list. When a spell is duplicated (i.e., the spell appears in both the cleric and paladin spell lists), the spell keeps its cleric level. If the spell is not part of the original cleric spell list, it becomes a cleric spell at the same level it had as a paladin spell.

All ranger spells are now part of the druid spell list. When a spell is duplicated (i.e., the spell appears in both the druid and ranger spell lists), the spell keeps its druid level. If the spell is not part of the original druid spell list, it becomes a druid spell at the same level it had as a ranger spell.

After these two changes, five spell lists remain: bard, cleric, druid, sorcerer, and wizard. Cleric domain lists remain unchanged.

SPELLS

The changes to paladin and ranger spells are detailed in Spell Lists & Domains (above).

If the GM wishes to incorporate a limited, free-form spellcasting system, then add the following spells to every spell list found in the SRD up to the maximum spell level found on that list (e.g., 6th level for bards and 9th level for all other spellcasters). The spells themselves are designed to take advantage the Spell Points Variant. If the GM does not use this variant, then only five of the following spells need to be added to every spellcaster's spell list (*sorcery I*, *sorcery II*, *sorcery IV*, *sorcery VI*, and *sorcery VIII*).

SORCERY I

UNIVERSAL

Level: Spellcaster 1

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

A *sorcery I* lets you duplicate any cantrip available to spellcasters of your class. A *sorcery I* can do the following.

- Duplicate any spell on your spell list of 0th level.

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 1st-level spell). The casting time for this spell is one standard action or the

duplicated spell's casting time, whichever is longer. When a *sorcery I* duplicates a spell that has an XP cost, you must pay that cost. When a *sorcery I* duplicates a spell with a material component, you must provide that component. If a *sorcery I* duplicates a spell with a focus, you must provide that focus.

SORCERY II

UNIVERSAL

Level: Spellcaster 2

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

A *sorcery II* lets you duplicate any cantrip or basic class spell. A *sorcery II* can do the following.

- Duplicate any 0th or 1st level spell on your spell list (or a spell on your spell list with a casting cost of one spell point if using the Spell Points Variant).

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 2nd-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *sorcery II* duplicates a spell that has an XP cost, you must pay that cost. When a *sorcery II* duplicates a spell with a material component, you must provide that component. If a *sorcery II* duplicates a spell with a focus, you must provide that focus.

SORCERY III

UNIVERSAL

Level: Spellcaster 3

Components: V, S, (See text)

Casting Time: 1 standard action (See text)
Range: See text
Target, Effect, or Area: See text
Duration: See text
Saving Throw: None; see text
Spell Resistance: See text

A *sorcery III* lets you duplicate an extremely small number of basic spells and cantrips. A *sorcery III* can duplicate any spell of 1st level or lower on your spell list (or any spell on your spell list with a casting cost of two spell points or less if using the Spell Points Variant).

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 3rd-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *sorcery III* duplicates a spell that has an XP cost, you must pay that cost. When a *sorcery III* duplicates a spell with a material component, you must provide that component. If a *sorcery III* duplicates a spell with a focus, you must provide that focus.

SORCERY IV

UNIVERSAL

Level: Spellcaster 4
Components: V, S, (See text)
Casting Time: 1 standard action (See text)
Range: See text
Target, Effect, or Area: See text
Duration: See text
Saving Throw: None; see text
Spell Resistance: See text

A *sorcery IV* lets you duplicate an extremely small number of spells. A *sorcery IV* can duplicate any spell of 2nd level or lower on your spell list (or any spell on your spell list with a casting cost of three spell points or less if using the Spell Points Variant).

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a

4th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *sorcery IV* duplicates a spell that has an XP cost, you must pay that cost. When a *sorcery IV* duplicates a spell with a material component, you must provide that component. If a *sorcery IV* duplicates a spell with a focus, you must provide that focus.

SORCERY V

UNIVERSAL

Level: Spellcaster 5
Components: V, S, (See text)
Casting Time: 1 standard action (See text)
Range: See text
Target, Effect, or Area: See text
Duration: See text
Saving Throw: None; see text
Spell Resistance: See text

A *sorcery V* lets you duplicate a small number of spells. A *sorcery V* can duplicate any spell of 2nd level or lower on your spell list (or any spell on your spell list with a casting cost of four spell points or less if using the Spell Points Variant).

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 5th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *sorcery V* duplicates a spell that has an XP cost, you must pay that cost. When a *sorcery V* duplicates a spell with a material component, you must provide that component. If a *sorcery V* duplicates a spell with a focus, you must provide that focus.

SORCERY VI

UNIVERSAL

Level: Spellcaster 6
Components: V, S, (See text)
Casting Time: 1 standard action (See text)
Range: See text

Target, Effect, or Area: See text
Duration: See text
Saving Throw: None; see text
Spell Resistance: See text

A *sorcery VI* lets you duplicate a number of spells. A *sorcery VI* can duplicate any spell of 3rd level or lower on your spell list (or any spell on your spell list with a casting cost of five spell points or less if using the Spell Points Variant).

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 6th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When *sorcery VI* duplicates a spell that has an XP cost, you must pay that cost. When a *sorcery VI* duplicates a spell with a material component, you must provide that component. If a *sorcery VI* duplicates a spell with a focus, you must provide that focus.

SORCERY VII

UNIVERSAL

Level: Spellcaster 7
Components: V, S, (See text)
Casting Time: 1 standard action (See text)
Range: See text
Target, Effect, or Area: See text
Duration: See text
Saving Throw: None; see text
Spell Resistance: See text

A *sorcery VII* lets you duplicate a great number of spells. A *sorcery VII* can duplicate any spell of 3rd level or lower on your spell list (or any spell on your spell list with a casting cost of six spell points or less if using the Spell Points Variant).

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 7th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *sorcery VII* duplicates a spell that has an XP cost, you must pay that

cost. When a *sorcery VII* duplicates a spell with a material component, you must provide that component. If a *sorcery VII* duplicates a spell with a focus, you must provide that focus.

SORCERY VIII

UNIVERSAL

Level: Spellcaster 8

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

A *sorcery VIII* lets you duplicate an extremely large number of spells. A *sorcery VIII* can duplicate any spell of 4th level or lower on your spell list (or any spell on your spell list with a casting cost of seven spell points or less if using the Spell Points Variant).

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 8th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *sorcery VIII* duplicates a spell that has an XP cost, you must pay that cost. When a *sorcery VIII* duplicates a spell with a material component, you must provide that component. If a *sorcery VIII* duplicates a spell with a focus, you must provide that focus.

SORCERY IX

UNIVERSAL

Level: Spellcaster 9

Components: V, S, (See text)

Casting Time: 1 standard action (See text)

Range: See text

Target, Effect, or Area: See text

Duration: See text

Saving Throw: None; see text

Spell Resistance: See text

A *sorcery IX* lets you duplicate an extremely large number of spells. A *sorcery IX* can duplicate any spell of 4th level or lower on your spell list (or any spell on your spell list with a casting cost of eight spell points or less if using the Spell Points Variant).

A duplicated spell allows saving throws and spell resistance as normal (but the save DC is for a 9th-level spell). The casting time for this spell is one standard action or the duplicated spell's casting time, whichever is longer. When a *sorcery IX* duplicates a spell that has an XP cost, you must pay that cost. When a *sorcery IX* duplicates a spell with a material component, you must provide that component. If a *sorcery IX* duplicates a spell with a focus, you must provide that focus.

PSIONIC RULES

All psychic warrior powers are now part of the psion power list. When a power is duplicated (i.e., the power appears in both the psion and psychic warrior power lists), the power keeps its psion level. If the power is not part of the original psion power list, it becomes a psion power at the same level it had as a psychic warrior power.

BASIC CHARACTER CLASS BUILDS

Inquisitive players and Gamemasters may be interested in seeing how the basic character classes turn out when constructed using the character advancement system contained in this ruleset. The number of experience points required to purchase the base attack bonus, base save bonuses, skill points, class special abilities, spellcasting, and ability score increases appropriate to each character class at each class level are assumed in the calculation. The experience point cost representing the maximum number of hit points that could be rolled on each hit die (per class level) is included in these

builds. Furthermore, it is assumed that the most costly trait of that class is purchased when increasing the character level (and thus increasing the experience point cost multiplier). This results in the smartest, most economical build with a minimum of wasted experience points.

All experience point totals for each class fall within the normal experience point ranges for the appropriate character level with a few exceptions. Experience point totals that are one level higher than standard are shown in bold black, while experience point totals

indicated one level lower than standard are in italics. For example, building an 12th level monk requires 78,300 XP when using this ruleset. This XP total is greater than 78,000, the minimum for a 13th level character under the normal rules. As you can see, fighters most often require less XP than other classes to reach the same character level. The XP amount in the first row shows how much additional XP is needed to build a 1st level character of that class, over the 2,000 XP granted during character creation. Positive numbers indicate that more XP is needed, while negative numbers show that less XP is required.

TABLE 10: EXPERIENCE POINT COSTS FOR BASIC CHARACTER CLASS BUILDS

		C	L	A	S	S	E	S				
Level	Standard	Bbn	Brd	Clr	Drd	Ftr	Mnk	Pal	Rgr	Rog	Sor	Wiz
1	0	(-25)	(+275)	(-225)	(-25)	(-175)	(-225)	(-75)	(+275)	(-275)	(-725)	(-625)
2	1,000	1,500	1,600	1,800	1,900	1,300	1,900	1,500	1,600	1,400	1,600	1,600
3	3,000	4,500	4,450	4,650	4,900	3,700	4,300	4,500	4,150	4,550	3,950	3,950
4	6,000	8,400	8,550	9,150	9,600	7,200	9,400	8,000	8,250	8,250	8,250	8,250
5	10,000	12,000	10,800	11,600	12,400	9,900	11,800	13,200	12,700	10,400	11,000	11,500
6	15,000	18,900	18,000	18,800	19,900	16,200	19,300	19,500	19,300	17,000	18,600	19,100
7	21,000	24,200	22,950	24,450	25,900	20,100	23,900	25,500	25,650	21,950	22,650	23,150
8	28,000	32,300	32,250	33,750	35,600	27,400	33,600	32,000	34,150	29,650	31,750	32,250
9	36,000	41,800	39,000	40,200	42,600	35,200	39,800	43,400	44,200	37,200	39,800	40,300
10	45,000	50,500	48,200	50,400	53,300	42,900	51,500	51,100	53,400	45,400	49,800	51,300
11	55,000	59,000	56,150	59,450	62,900	49,200	60,000	60,700	63,550	53,350	56,450	57,950
12	66,000	76,100	72,650	75,950	80,000	63,900	78,300	75,400	77,650	68,650	73,950	75,450
13	78,000	86,100	78,500	82,800	87,600	71,400	83,400	86,800	89,700	75,700	81,900	83,400
14	91,000	98,400	92,900	97,200	102,700	82,300	97,100	96,300	101,300	85,900	96,100	97,600
15	105,000	114,600	108,350	112,650	120,400	95,500	111,800	117,000	118,250	102,850	109,850	112,850
16	120,000	132,700	125,650	131,550	140,100	110,400	131,500	130,300	133,950	118,550	128,550	131,550
17	136,000	145,900	133,300	140,600	148,400	120,300	139,900	145,300	149,800	126,100	139,100	142,100
18	153,000	167,200	155,500	162,800	173,300	139,800	161,200	164,800	168,400	146,500	162,900	165,900
19	171,000	182,100	169,450	178,650	188,200	150,900	174,200	181,600	184,250	162,350	174,750	177,750

LEVEL-BY-LEVEL BUILDS FOR BASIC CHARACTER CLASSES

Most players and Gamemasters would be interested to see how the basic character classes from the System Reference Document fare under this system, so a level-by-level build of each character class is presented below.

Each character class is built using the system detailed in this document. Class levels (at 25 XP per CL) are not purchased each level because an appropriate class level is subsumed into the total cost to gain the level. In other words, since we are building the basic character classes, we will already assume that the character gains the appropriate “class level” as described by these rules without needing to purchase it.

The format for each purchased level remains the same for continuity even if a particular trait for that level isn't purchased. For example, barbarians do not purchase spellcasting levels (ever!), but “Spellcasting +0 Level (0 XP)” appears for each level entry, regardless.

For Level 1, the Level Cost is shown. This is the amount that must be used during character generation to purchase all Level 1 traits for that class. Career XP is listed as zero, because the character has not begun adventuring yet. All subsequent Career XP totals ignore the starting XP that must be used during character generation as well.

For spellcasting, the character receives an additional spellcasting level relevant to class. In the case of paladins, they receive cleric spellcasting levels while rangers receive druid spellcasting levels.

The most expensive trait is purchased first when raising the level of the character. For example, the listing for a barbarian's 2nd level lists the cost of the +1 to base attack bonus as 300 XP. According to the rules, a +1 to base attack bonus costs 300 XP per character level. So shouldn't this actually cost 600 XP? No. In this case, the 1st level barbarian purchases a +1 to the base attack bonus for 300 XP. Immediately after this purchase, the character becomes 2nd level. Every purchase after that will use the 2nd character level as the multiplier for trait costs. As you will note, the +1 to the Fortitude save immediately after that purchase costs 200 XP (which is 100 XP per CL, or 100 XP times 2). For the barbarian, fighter, paladin, and ranger, base attack bonus is purchased first. For clerics, sorcerers, and wizards, spellcasting levels are purchased first. For all other characters, base attack bonus is purchased first (if received for that level) or a special ability (if a BAB add is not received for that level).

BARBARIAN

Level 1 - Base Attack Bonus: +1 (300 XP), Fortitude Save: +2 (200 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +11 (275 XP), Skill Points: +16 (400 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (100 XP), Spellcasting: +0 Level (0 XP), Class Specials: Fast Movement, Rage I (200 XP), Class Levels: +0 (0 XP), Armor and Weapon Feats: Simple, Martial Weapons; Light, Medium Armor; Shields (500 XP), Level Cost: 1975 XP, CAREER XP: 0 XP.

Level 2 - Base Attack Bonus: +1 (300 XP), Fortitude Save: +1 (200 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (600 XP), Skill Points: +4 (200 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Uncanny Dodge (200 XP), Class Levels: +0 (0 XP), Level Cost: 1500 XP, CAREER XP: 1500 XP.

Level 3 - Base Attack Bonus: +1 (600 XP), Fortitude Save: +0 (0 XP), Reflex Save: +1 (300 XP), Will Save: +1 (300 XP), Hit Points: +12 (900 XP), Skill Points: +4 (300 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (300 XP), Spellcasting: +0 Level (0 XP), Class Specials: Trap Sense I (300 XP), Class Levels: +0 (0 XP), Level Cost: 3000 XP, CAREER XP: 4500 XP.

Level 4 - Base Attack Bonus: +1 (900 XP), Fortitude Save: +1 (400 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (1200 XP), Skill Points: +4 (400 XP), Ability Score: +1 (600 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Rage II (400 XP), Class Levels: +0 (0 XP), Level Cost: 3900 XP, CAREER XP: 8400 XP.

Level 5 - Base Attack Bonus: +1 (1200 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (1500 XP), Skill Points: +4 (500 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Improved Uncanny Dodge (400 XP), Class Levels: +0 (0 XP), Level Cost: 3600 XP, CAREER XP: 12000 XP.

Level 6 - Base Attack Bonus: +1 (1500 XP), Fortitude Save: +1 (600 XP), Reflex Save: +1 (600 XP), Will Save: +1 (600 XP), Hit Points: +12 (1800 XP), Skill Points: +4 (600 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (600 XP), Spellcasting: +0 Level (0 XP), Class Specials: Trap Sense II (600 XP), Class Levels: +0 (0 XP), Level Cost: 6900 XP, CAREER XP: 18900 XP.

Level 7 - Base Attack Bonus: +1 (1800 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (2100 XP), Skill Points: +4 (700 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Damage Reduction I (700 XP), Class Levels: +0 (0 XP), Level Cost: 5300 XP, CAREER XP: 24200 XP.

Level 8 - Base Attack Bonus: +1 (2100 XP), Fortitude Save: +1 (800 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (2400 XP), Skill Points: +4 (800 XP), Ability Score: +1 (1200 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Rage III (800 XP), Class Levels: +0 (0 XP), Level Cost: 8100 XP, CAREER XP: 32300 XP.

Level 9 - Base Attack Bonus: +1 (2400 XP), Fortitude Save: +0 (0 XP), Reflex Save: +1 (900 XP), Will Save: +1 (900 XP), Hit Points: +12 (2700 XP), Skill Points: +4 (900 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (900 XP), Spellcasting: +0 Level (0 XP), Class Specials: Trap Sense III (800 XP), Class Levels: +0 (0 XP), Level Cost: 9500 XP, CAREER XP: 41800 XP.

Level 10 - Base Attack Bonus: +1 (2700 XP), Fortitude Save: +1 (1000 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (3000 XP), Skill Points: +4 (1000 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Damage Reduction II (1000 XP), Class Levels: +0 (0 XP), Level Cost: 8700 XP, CAREER XP: 50500 XP.

Level 11 - Base Attack Bonus: +1 (3000 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (3300 XP), Skill Points: +4 (1100 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Greater Rage (1100 XP), Class Levels: +0 (0 XP), Level Cost: 8500 XP, CAREER XP: 59000 XP.

Level 12 - Base Attack Bonus: +1 (3300 XP), Fortitude Save: +1 (1200 XP), Reflex Save: +1 (1200 XP), Will Save: +1 (1200 XP), Hit Points: +12 (3600 XP), Skill Points: +4 (1200 XP), Ability Score: +1 (1800 XP), Bonus Feat: +1 (1200 XP), Spellcasting: +0 Level (0 XP), Class Specials: Rage IV, Trap Sense IV (2400 XP), Class Levels: +0 (0 XP), Level Cost: 17100 XP, CAREER XP: 76100 XP.

Level 13 - Base Attack Bonus: +1 (3600 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (3900 XP), Skill Points: +4 (1300 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Damage Reduction III (1200 XP), Class Levels: +0 (0 XP), Level Cost: 10000 XP, CAREER XP: 86100 XP.

Level 14 - Base Attack Bonus: +1 (3900 XP), Fortitude Save: +1 (1400 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (4200 XP), Skill Points: +4 (1400 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Indomitable Will (1400 XP), Class Levels: +0 (0 XP), Level Cost: 12300 XP, CAREER XP: 98400 XP.

Level 15 - Base Attack Bonus: +1 (4200 XP), Fortitude Save: +0 (0 XP), Reflex Save: +1 (1500 XP), Will Save: +1 (1500 XP), Hit Points: +12 (4500 XP), Skill Points: +4 (1500 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (1500 XP), Spellcasting: +0 Level (0 XP), Class Specials: Trap Sense V (1500 XP), Class Levels: +0 (0 XP), Level Cost: 16200 XP, CAREER XP: 114600 XP.

Level 16 - Base Attack Bonus: +1 (4500 XP), Fortitude Save: +1 (1600 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (4800 XP), Skill Points: +4 (1600 XP), Ability Score: +1 (2400 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Damage Reduction IV, Rage V (3200 XP), Class Levels: +0 (0 XP), Level Cost: 18100 XP, CAREER XP: 132700 XP.

Level 17 - Base Attack Bonus: +1 (4800 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (5100 XP), Skill Points: +4 (1700 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Tireless Rage (1600 XP), Class Levels: +0 (0 XP), Level Cost: 13200 XP, CAREER XP: 145900 XP.

Level 18 - Base Attack Bonus: +1 (5100 XP), Fortitude Save: +1 (1800 XP), Reflex Save: +1 (1800 XP), Will Save: +1 (1800 XP), Hit Points: +12 (5400 XP), Skill Points: +4 (1800 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (1800 XP), Spellcasting: +0 Level (0 XP), Class Specials: Trap Sense VI (1800 XP), Class Levels: +0 (0 XP), Level Cost: 21300 XP, CAREER XP: 167200 XP.

Level 19 - Base Attack Bonus: +1 (5400 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (5700 XP), Skill Points: +4 (1900 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Damage Reduction V (1900 XP), Class Levels: +0 (0 XP), Level Cost: 14900 XP, CAREER XP: 182100 XP.

Level 20 - Base Attack Bonus: +1 (5700 XP), Fortitude Save: +1 (2000 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +12 (6000 XP), Skill Points: +4 (2000 XP), Ability Score: +1 (3000 XP), Bonus Feat: +0 (0 XP), Spellcasting: +0 Level (0 XP), Class Specials: Mighty Rage, Rage VI (4000 XP), Class Levels: +0 (0 XP), Level Cost: 22700 XP, CAREER XP: 204800 XP.

BARD

Level 1 - Base Attack Bonus: +0 (0 XP), Fortitude Save: +0 (0 XP), Reflex Save: +2 (200 XP), Will Save: +2 (200 XP), Hit Points: +5 (125 XP), Skill Points: +24 (600 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (100 XP), Spellcasting: +1 Level (150 XP), Class Specials: Bardic Music, Bardic Knowledge, Countersong, Fascinate, Inspire Courage I (500 XP), Armor and Weapon Feats: Simple, Bard Weapons; Light Armor; Shields (400 XP), Class Levels: +0 (0 XP), Level Cost: 2275 XP, CAREER XP: 0 XP.

Level 2 - Base Attack Bonus: +1 (300 XP), Fortitude Save: +0 (0 XP), Reflex Save: +1 (200 XP), Will Save: +1 (200 XP), Hit Points: +6 (300 XP), Skill Points: +6 (300 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (300 XP), Class Specials: +0 (0 XP), Class Levels: +0 (0 XP), Level Cost: 1600 XP, CAREER XP: 1600 XP.

Level 3 - Base Attack Bonus: +1 (600 XP), Fortitude Save: +1 (300 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +6 (450 XP), Skill Points: +6 (450 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (300 XP), Spellcasting: +1 Level (450 XP), Class Specials: Inspire Competence (300 XP), Class Levels: +0 (0 XP), Level Cost: 2850 XP, CAREER XP: 4450 XP.

Level 4 - Base Attack Bonus: +1 (900 XP), Fortitude Save: +0 (0 XP), Reflex Save: +1 (400 XP), Will Save: +1 (400 XP), Hit Points: +6 (600 XP), Skill Points: +6 (600 XP), Ability Score: +1 (600 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (600 XP), Class Specials: +0 (0 XP), Class Levels: +0 (0 XP), Level Cost: 4100 XP, CAREER XP: 8550 XP.

Level 5 - Base Attack Bonus: +0 (0 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +6 (750 XP), Skill Points: +6 (750 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (750 XP), Class Specials: +0 (0 XP), Class Levels: +0 (0 XP), Level Cost: 2250 XP, CAREER XP: 10800 XP.

Level 6 - Base Attack Bonus: +1 (1500 XP), Fortitude Save: +1 (600 XP), Reflex Save: +1 (600 XP), Will Save: +1 (600 XP), Hit Points: +6 (900 XP), Skill Points: +6 (900 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (600 XP), Spellcasting: +1 Level (900 XP), Class Specials: Suggestion (600 XP), Class Levels: +0 (0 XP), Level Cost: 7200 XP, CAREER XP: 18000 XP.

Level 7 - Base Attack Bonus: +1 (1800 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +6 (1050 XP), Skill Points: +6 (1050 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (1050 XP), Class Specials: +0 (0 XP), Class Levels: +0 (0 XP), Level Cost: 4950 XP, CAREER XP: 22950 XP.

Level 8 - Base Attack Bonus: +1 (2100 XP), Fortitude Save: +0 (0 XP), Reflex Save: +1 (800 XP), Will Save: +1 (800 XP), Hit Points: +6 (1200 XP), Skill Points: +6 (1200 XP), Ability Score: +1 (1200 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (1200 XP), Class Specials: Inspire Courage II (800 XP), Class Levels: +0 (0 XP), Level Cost: 9300 XP, CAREER XP: 32250 XP.

Level 9 - Base Attack Bonus: +0 (0 XP), Fortitude Save: +1 (900 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +6 (1350 XP), Skill Points: +6 (1350 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (900 XP), Spellcasting: +1 Level (1350 XP), Class Specials: Inspire Greatness (900 XP), Class Levels: +0 (0 XP), Level Cost: 6750 XP, CAREER XP: 39000 XP.

Level 10 - Base Attack Bonus: +1 (2700 XP), Fortitude Save: +0 (0 XP), Reflex Save: +1 (1000 XP), Will Save: +1 (1000 XP), Hit Points: +6 (1500 XP), Skill Points: +6 (1500 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (1500 XP), Class Specials: +0 (0 XP), Class Levels: +0 (0 XP), Level Cost: 9200 XP, CAREER XP: 48200 XP.

Level 11 - Base Attack Bonus: +1 (3000 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +6 (1650 XP), Skill Points: +6 (1650 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (1650 XP), Class Specials: +0 (0 XP), Class Levels: +0 (0 XP), Level Cost: 7950 XP, CAREER XP: 56150 XP.

Level 12 - Base Attack Bonus: +1 (3300 XP), Fortitude Save: +1 (1200 XP), Reflex Save: +1 (1200 XP), Will Save: +1 (1200 XP), Hit Points: +6 (1800 XP), Skill Points: +6 (1800 XP), Ability Score: +1 (1800 XP), Bonus Feat: +1 (1200 XP), Spellcasting: +1 Level (1800 XP), Class Specials: Song of Freedom (1200 XP), Class Levels: +0 (0 XP), Level Cost: 16500 XP, CAREER XP: 72650 XP.

Level 13 - Base Attack Bonus: +0 (0 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +6 (1950 XP), Skill Points: +6 (1950 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (1950 XP), Class Specials: +0 (0 XP), Class Levels: +0 (0 XP), Level Cost: 5850 XP, CAREER XP: 78500 XP.

Level 14 - Base Attack Bonus: +1 (3900 XP), Fortitude Save: +0 (0 XP), Reflex Save: +1 (1400 XP), Will Save: +1 (1400 XP), Hit Points: +6 (2100 XP), Skill Points: +6 (2100 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (2100 XP), Class Specials: Inspire Courage III (1400 XP), Class Levels: +0 (0 XP), Level Cost: 14400 XP, CAREER XP: 92900 XP.

Level 15 - Base Attack Bonus: +1 (4200 XP), Fortitude Save: +1 (1500 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +6 (2250 XP), Skill Points: +6 (2250 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (1500 XP), Spellcasting: +1 Level (2250 XP), Class Specials: Inspire Heroics (1500 XP), Class Levels: +0 (0 XP), Level Cost: 15450 XP, CAREER XP: 108350 XP.

Level 16 - Base Attack Bonus: +1 (4500 XP), Fortitude Save: +0 (0 XP), Reflex Save: +1 (1600 XP), Will Save: +1 (1600 XP), Hit Points: +6 (2400 XP), Skill Points: +6 (2400 XP), Ability Score: +1 (2400 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (2400 XP), Class Specials: +0 (0 XP), Class Levels: +0 (0 XP), Level Cost: 17300 XP, CAREER XP: 125650 XP.

Level 17 - Base Attack Bonus: +0 (0 XP), Fortitude Save: +0 (0 XP), Reflex Save: +0 (0 XP), Will Save: +0 (0 XP), Hit Points: +6 (2550 XP), Skill Points: +6 (2550 XP), Ability Score: +0 (0 XP), Bonus Feat: +0 (0 XP), Spellcasting: +1 Level (2550 XP), Class Specials: +0 (0 XP), Class Levels: +0 (0 XP), Level Cost: 7650 XP, CAREER XP: 133300 XP.

Level 18 - Base Attack Bonus: +1 (5100 XP), Fortitude Save: +1 (1800 XP), Reflex Save: +1 (1800 XP), Will Save: +1 (1800 XP), Hit Points: +6 (2700 XP), Skill Points: +6 (2700 XP), Ability Score: +0 (0 XP), Bonus Feat: +1 (1800 XP), Spellcasting: +1 Level (2700 XP), Class Specials: Mass Suggestion (1800 XP), Class Levels: +0 (0 XP), Level Cost: 22200 XP, CAREER XP: 155500 XP.

CONSTRUCTING CHARACTER CLASSES

Custom Characters can be used to create classes for your campaign, even if you don't want to use the free-form "classless" system. Building a class is quite easy. First, you start off with 21,000 XP. Then, you spend these experience points on the various traits members of the class gain as they progress. Ignore the "x CL" multiplier to trait costs. You start with 21,000 XP because 1st level characters start with 2,000 XP. Add another 1,000 XP for each level beyond first (19 more levels) and you get 21,000 XP. However, any number of experience points can be used, as long as all of the classes in your campaign get the same amount of XP on traits.

The generic classes listed in the System Reference Document are a little on the weak side. Custom Characters can be used to beef them up. Each class was built using approximately 21,100 XP and is at about the same power level as the standard classes found in the SRD.

These classes can form the basis of a more systematic treatment of character archetypes as well. There is a certain logic to the structure of these classes. The three basic generic classes (combatant, expert, and spellcaster) are used to create the other four classes. The gish is a combatant/spellcaster. The zerth is a spellcaster/expert. The specialist is a combatant and

expert. Finally, the polymath is an amalgamation of all three. Of the spellcasting classes (spellcaster, gish, zerth, and polymath), each has three variations based on the character's "prime requisite." Arcane magic-users are Intelligence-based and operate like wizards. Divine magic-users are Wisdom-based and operate like clerics and druids. Innate magic-users are Charisma-based and operate like bards and sorcerers. Thus, there are fifteen different generic classes, if each type of magic-user is considered a separate class. Furthermore, players are given the option to choose the class skills for their characters' classes and base save bonuses, adding more variation.

These classes can be used as a foundation while additional traits are purchased *a la carte*. Thus, players are not limited to advancing along these career paths alone. They can add a few feats, additional skill ranks, and add more hit points as needed as they follow the class progression. For example, no two arcane zerths will be the same. One may operate like a sage, while another may function as an assassin. With the right combination of feats and special abilities, the combatant class can be made to represent any sort of fighter. And all classes found in the System Reference Document can be approximated and developed exactly as the player desires!

COMBATANT

The combatant is the basic warrior of the trio of generic classes. He has the fighter's hit points, combat prowess, bonus feats, and weapon selection. This class represents all characters that make their way primarily through martial prowess and is suitable for such characters as mercenaries, knights, barbarians, soldiers, archers, horsemen, footmen, and all other types of combatants.

Alignment: Any.

Hit Die: d10.

Base Save Bonuses

One good save and two poor saves. Fortitude is the default good save.

Class Skills

Choose any six skills as class skills, plus Craft.

Skill Points at 1st Level: (2 + Int modifier) x 4.

Skill Points at Each Additional Level: 2 + Int modifier.

Table: The Combatant

19th	+19/+14/+9/+4	+11	+6	37th, 38th
20th	+20/+15/+10/+5	+12	+6	39th, 40th

CLASS FEATURES

All of the following are class features of the combatant.

Weapon and Armor Proficiency: A combatant is proficient with all simple and martial weapons. They are proficient with light, medium, and heavy armor as well as with shields and tower shields.

Class Specials: At 1st level, the combatant gains two bonus feats or class special abilities as found in this rulebook. At each level thereafter, the combatant gains two additional bonus feats or class special abilities. These feats or special abilities may be any that the combatant qualifies for.

EXPERT

The expert class represents a wide variety of non-magical and non-martial characters. Advisors, academics, craftsmen, performers, sailors, and many other types of characters can be constructed using this class. Experts are the true masters of skill use in the campaign world and surpass all other character classes in this area. This class is an adaptation of the expert generic character class.

Alignment: Any.

Hit Die: d6.

Base Save Bonuses

One good save and two poor saves. Reflex is the default good save.

Class Skills

19th	+14/+9/+4	+11	+6	37th, 38th
20th	+15/+10/+5	+12	+6	39th, 40th

CLASS FEATURES

All of the following are class features of the expert.

Weapon and Armor Proficiency: An expert is proficient with all simple and martial weapons. They are proficient with light armor, but they are not proficient with shields.

Class Specials: At 1st level, the expert gains two bonus feats or class special abilities as found in this rulebook. At each level thereafter, the expert gains two additional bonus feats or class special abilities. These feats or special abilities may be any that the expert qualifies for.

SPELLCASTER

This class represents any kind of pure spellcaster, whether divine, arcane, innate, or otherwise. Use this class for wizards, wise ones, hedge mages, witches, sorcerers, infernalists, clerics, miracle workers, kabalists, thaumaturgists, theurgists, necromancers, shaman, sorcerers, and any other type of magic-user.

Alignment: Any.

Hit Die: d4.

CLASS FEATURES

All of the following are class features of the spellcaster.

Weapon and Armor Proficiency: The spellcaster is proficient with all simple weapons, but not with armor or shields.

Class Specials: At 1st level, the spellcaster gains one bonus feat or class special ability as found in this rulebook. At each level evenly divisible by five thereafter (5th, 10th, 15th, and 20th), the spellcaster gains another bonus feat or class special ability. This feat or special ability may be any that the spellcaster qualifies for.

Spells: A spellcaster must choose at 1st level whether to be an arcane, divine, or innate spellcaster. This choice has no impact on the spells that he may learn, but affects what kinds of scrolls he can use and which ability score controls his spellcasting. An arcane spellcaster uses Intelligence as the ability score that determines the highest-level spell he can learn or cast, and the Difficulty Class of his spell's saving throws. A divine spellcaster uses Wisdom to determine the highest-level spell he can learn or cast, and the DC of his spell's saving throws. An innate spellcaster uses Charisma to determine the highest level spell he can learn or cast, and the DC of his spell's saving throws. Both arcane and innate spellcasters cast arcane spells. Divine spellcasters cast divine spells.

ARCANE SPELLCASTERS

An arcane spellcaster casts arcane spells which are drawn from the any arcane spell list, such as bard and sorcerer/wizard. An arcane spellcaster must choose and prepare his spells ahead of time (see below).

Base Save Bonuses

One good save and two poor saves. Will is the default good save.

Class Skills

Choose any four skills as class skills, plus Craft, Knowledge (all), and Profession.

Skill Points at 1st Level: (2 + Int modifier) x 4.

Skill Points at Each Additional Level: 2 + Int modifier.

Table: The Spellcaster

Level	Base Attack Bonus	Good Save	Poor Saves	Class Specials
1st	+0	+2	+0	1st
2nd	+1	+3	+0	
3rd	+1	+3	+1	
4th	+2	+4	+1	
5th	+2	+4	+1	2nd
6th	+3	+5	+2	
7th	+3	+5	+2	
8th	+4	+6	+2	
9th	+4	+6	+3	
10th	+5	+7	+3	3rd
11th	+5	+7	+3	
12th	+6/+1	+8	+4	
13th	+6/+1	+8	+4	
14th	+7/+2	+9	+4	
15th	+7/+2	+9	+5	4th
16th	+8/+3	+10	+5	
17th	+8/+3	+10	+5	
18th	+9/+4	+11	+6	
19th	+9/+4	+11	+6	
20th	+10/+5	+12	+6	5th

To learn, prepare, or cast a spell, the arcane spellcaster must have an Intelligence score equal to at least 10 plus the spell level. The Difficulty Class for a saving throw against a arcane spellcaster's spell is 10 + the spell level + the arcane spellcaster's Intelligence modifier.

His base daily spell allotment is given on Table: The Wizard. In addition, he receives bonus spells per day if Unlike a bard or sorcerer, an arcane spellcaster may know any number of spells. He must choose and prepare his spells ahead of time by getting a good night's sleep and spending 1 hour studying his spellbook. While studying, the wizard decides which spells to prepare.

At each new spellcaster level, an arcane spellcaster gains two new spells of any spell level or levels that he can cast (based on his new arcane spellcaster level) for his spellbook. At any time, an arcane spellcaster can also add spells found in other spellcasters' spellbooks to his own.

DIVINE SPELLCASTERS

A divine spellcaster casts divine spells, which are drawn from any divine spell list, such as cleric, druid, paladin, and ranger. However, his alignment may restrict him from casting certain spells opposed to his moral or ethical beliefs. A divine spellcaster can't cast spells of an alignment opposed to his own or his deity's (if he has one). Spells associated with particular alignments are indicated by the chaos, evil, good, and law descriptors in their spell descriptions. Furthermore, the divine spellcaster's patron deity or philosophy may prevent certain spells from being used (at the DM's discretion). A divine spellcaster must choose and prepare his spells in advance (see below).

To prepare or cast a spell, a divine spellcaster must have a Wisdom score equal to at least 10 + the spell level. The Difficulty Class for a saving throw against a divine spellcaster's spell is 10 + the spell level + the divine spellcaster's Wisdom modifier.

Like other spellcasters, a divine spellcaster can cast only a certain number of spells of each spell level per day. His base daily spell allotment is given on Table: The Cleric. In addition, he receives bonus spells per day if he has a high Wisdom score. Unlike the cleric, divine spellcasters do not gain one domain spell of each spell level he can cast. Divine spellcasters receive the base daily spell allotment only.

Divine spellcasters meditate or pray for their spells. Each divine spellcaster must choose a time at which he must spend 1 hour each day in quiet contemplation or supplication to regain his daily allotment of spells. Time spent resting has no effect on whether a divine spellcaster can prepare spells. A divine spellcaster may prepare and cast any spell found on a divine spell list, provided that he can cast spells of that level, but he must choose which spells to prepare during his daily meditation.

she has a high Intelligence score.

INNATE SPELLCASTERS

An innate spellcaster casts arcane spells which can be drawn from any spell list (such as bard, cleric, druid, paladin, ranger, and sorcerer/wizard). He can cast any spell he knows without preparing it ahead of time, the way a wizard or a cleric must (see below).

To learn or cast a spell, an innate spellcaster must have a Charisma score equal to at least 10 + the spell level. The Difficulty Class for a saving throw against an innate spellcaster's spell is 10 + the spell level + the innate spellcaster's Charisma modifier.

Like other spellcasters, an innate spellcaster can cast only a certain number of spells of each spell level per day. His base daily spell allotment is given on Table: The Sorcerer. In addition, he receives bonus spells per day if he has a high Charisma score.

An innate spellcaster's selection of spells is extremely limited. An innate spellcaster begins play knowing four 0-level spells and two 1st-level spells of your choice. At each new spellcaster level, he gains one or more new spells, as indicated on Table: Sorcerer Spells Known. (Unlike spells per day, the number of spells an innate spellcaster knows is not affected by his Charisma score; the numbers on Table: Sorcerer Spells Known are fixed.) These new spells can be spells chosen from any spell list, or they can be unusual spells that the innate spellcaster has gained some understanding of by study. The innate spellcaster can't use this method of spell acquisition to learn spells at a faster rate, however.

Upon reaching 4th level, and at every even-numbered spellcaster level after that (6th, 8th, and so on), an innate spellcaster can choose to learn a new spell in place of one he already knows. In effect, the innate spellcaster "loses" the old spell in exchange for the new one. The new spell's level must be the same as that of the spell being exchanged, and it must be at least two levels lower than the highest-level spell the innate spellcaster can cast. An innate spellcaster may swap only a single spell at any given level, and must choose whether or not to swap the spell at the same time that he gains new spells known for the level.

Unlike a wizard or a cleric, an innate spellcaster need not prepare his spells in advance. He can cast any spell he knows at any time, assuming he has not yet used up his spells per day for that spell level. He does not have to decide ahead of time which spells he'll cast.

SPECIALIST

The specialist class represents combatant characters who give up a small amount of fighting prowess in order to be more skilled. They can also be thought of as experts who are better at fighting. At any rate, the specialist is a good fighter and somewhat of an expert in a concentrated skill area. They are midway between the combatant and the expert.

Alignment: Any.

Hit Die: d8.

Base Save Bonuses

Two fair saves and one poor save. The default fair saves are Fortitude and Reflex.

Class Skills

19th	+19/+14/+9/+4		+8	+6	37th, 38th
20th	+20/+15/+10/+5		+9	+6	39th, 40th

CLASS FEATURES

All of the following are class features of the specialist.

Weapon and Armor Proficiency: A specialist is proficient with all simple and martial weapons. They are proficient with light and medium armor, but not with heavy armor or shields.

Class Specials: At 1st level, the specialist gains two bonus feats or class special abilities as found in this rulebook. At each level thereafter, the specialist gains two additional bonus feats or class special abilities. These feats or special abilities may be any that the specialist qualifies for.

GISH

The “gish” is the quintessential combatant/spellcaster, using both magic and force of arms to overcome obstacles. It is a compromise between the combatant and spellcaster classes. They do not reach the dizzying heights of magical power that spellcasters enjoy, nor do they become the unstoppable fighting machines as high-level combatants do, but they are able to effectively combine two professional areas most commonly thought to be mutually exclusive.

Gishes must choose to be arcane, divine, or innate spellcasters at start. Once chosen, the character cannot later change the type of magic he uses as a gish. He uses the spells per day chart appropriate to his choice (only one).

Alignment: Any.

Hit Die: d7 (d8 on odd levels, d6 on even levels).

CLASS FEATURES

All of the following are class features of the gish.

Weapon and Armor Proficiency: The gish is proficient with all simple and martial weapons. They are also proficient with light, medium, and heavy armor as well as shields (but not tower shields).

Class Specials: At 1st level, the gish gains one bonus feat or class special ability as found in this rulebook. At each level thereafter, the gish gains one additional bonus feat or class special ability. These feats or special abilities may be any that the gish qualifies for.

Spells: A gish must choose at 1st level whether to be an arcane, divine, or innate spellcaster. This choice has an

impact on the spells that he may learn, affects what kinds of scrolls he can use, and which ability score controls his spellcasting. An arcane gish uses Intelligence as the ability score that determines the highest-level spell he can learn or cast, and the Difficulty Class of his spell's saving throws. A divine gish uses Wisdom to determine the highest-level spell he can learn or cast, and the DC of his spell's saving throws. An innate gish uses Charisma to determine the highest level spell he can learn or cast, and the DC of his spell's saving throws. Both arcane and innate gishes cast arcane spells. Divine gishes cast divine spells. Gishes use the spells per day tables appropriate to their choice (found above). For more details on spellcasting, see the Spellcaster class description.

ZERTH

The “zerth” is a spellcasting skill-user, using both magic and superior skills to overcome obstacles. It is a compromise between the expert and spellcaster classes. They do not gain the magical power that spellcasters eventually attain, nor do they become the masters of skill-use as high-level experts do, but they are able to effectively combine two professional areas that complement each other quite nicely.

Zerths must choose to be arcane, divine, or innate spellcasters at start. Once chosen, the character cannot later change the type of magic he uses as a zerth. He uses the spells per day chart appropriate to his choice (only one).

Alignment: Any.

Hit Die: d5 (d6 on odd levels, d4 on even levels).

Base Save Bonuses

Two fair saves and one poor save. The default fair saves are Reflex and Will.

Class Skills

Choose any eight skills as class skills, plus Craft, Knowledge (all), and Profession.

Skill Points at 1st Level: (4 + Int modifier) x 4.

Skill Points at Each Additional Level: 4 + Int modifier.

CLASS FEATURES

All of the following are class features of the zerth.

Weapon and Armor Proficiency: The zerth is proficient with all simple and martial weapons. They are also proficient with light armor, but not medium or heavy armor. They are not proficient with shields.

Class Specials: At 1st level, the zerth gains two bonus feats or class special abilities as found in this rulebook. At each level thereafter, the zerth gains one additional bonus feat or class special ability. These feats or special abilities may be any that the zerth qualifies for.

Spells: A zerth must choose at 1st level whether to be an arcane, divine, or innate spellcaster. This choice has

an impact on the spells that he may learn, affects what kinds of scrolls he can use, and which ability score controls his spellcasting. An arcane zerth uses Intelligence as the ability score that determines the highest-level spell he can learn or cast, and the Difficulty Class of his spell's saving throws. A divine zerth uses Wisdom to determine the highest-level spell he can learn or cast, and the DC of his spell's saving throws. An innate zerth uses Charisma to determine the highest level spell he can learn or cast, and the DC of his spell's saving throws. Both arcane and innate zerths cast arcane spells. Divine zerths cast divine spells. Zerths use the spells per day tables appropriate to their choice (found above). For more details on spellcasting, see the Spellcaster class description.

POLYMATH

The polymath is a jack-of-all-trades, able to effectively fight while using both skills and magic to make their way in the world. It is a compromise between the three generic classes (combatant, expert, and spellcaster). Dabbling comes with a price, though. Polymaths can operate in a number of different professional areas, but they will never master any of them.

Polymaths must choose to be arcane, divine, or innate spellcasters at start. Once chosen, the character cannot later change the type of magic he uses as a polymath. He uses the spells per day chart appropriate to his choice (only one).

Alignment: Any.

Hit Die: d7 (d8 on odd levels, d6 on even levels).

Base Save Bonuses

All base save bonuses progress as indicated below.

Class Skills

Choose any eight skills as class skills, plus Craft, Knowledge (all), and Profession.

Skill Points at 1st Level: (5 + Int modifier) x 4.

Skill Points at Each Additional Level: 5 + Int modifier.

CLASS FEATURES

All of the following are class features of the polymath.

Weapon and Armor Proficiency: The polymath is proficient with all simple and martial weapons. They are also proficient with light armor and shields (but not tower shields). They are not proficient with medium or heavy armor.

Class Specials: At 1st level, the polymath gains one bonus feat or class special ability as found in this rulebook. At each level thereafter, the polymath gains one additional bonus feat or class special ability. These feats or special abilities may be any that the polymath qualifies for.

Spells: A polymath must choose at 1st level whether to be an arcane, divine, or innate spellcaster. This choice has an impact on the spells that he may learn, affects what kinds of scrolls he can use, and which ability score controls his spellcasting. An arcane polymath uses Intelligence as the ability score that determines the highest-level spell he can learn or cast, and the Difficulty Class of his spell's saving throws. A divine polymath uses Wisdom to determine the highest-level spell he can learn or cast, and the DC of his spell's saving throws. An innate polymath uses Charisma to determine the highest level spell he can learn or cast, and the DC of his spell's saving throws. Both arcane and innate polymaths cast arcane spells. Divine polymaths cast divine spells. Polymaths use the spells per day tables appropriate to their choice (found above). For more details on spellcasting, see the Spellcaster class description.

MULTICLASS GENERIC CHARACTERS

Multiclass characters could get quite complex with the generic classes that have been offered. A few guidelines might help to keep things simple.

Once a character has “set” the save bonuses for a class, he may not change them. He may take levels in another class, however, and “set” the save bonuses for that class. For example, if a character starts off as a combatant and makes Fortitude his good save, Fortitude will always be the good save whenever he takes a level in combatant. If he later takes a level in expert, he can designate Fortitude, Reflex, or Will as the good save (for his version of the expert class). It remains locked after selection.

Once the character has chosen the class skills for a particular class, those skills are the only class skills for his particular version of the class. If he later takes a level in a different class, he picks class skills for that class (which may or may not be among those he picked for other classes). For example, a character starts off as a spellcaster. He picks Concentration, Decipher Script, Diplomacy, and Spellcraft as his spellcaster class skills. He later takes a level in combatant and chooses Diplomacy, Intimidate, Ride, Search, Sense Motive, and Tumble. Diplomacy is the only skill that is common to both classes (plus Craft), so this will always be a class skill for him as long as he takes levels in spellcaster and combatant.

For the spellcasting classes, each of the three types of spellcasting must be accounted for separately, with not sharing of spells, spell slots, or spells known. Thus, a character could multiclass as an arcane spellcaster and a divine spellcaster, but must keep spells per day separate, must use Intelligence to determine bonus spells, spell DC, and other factors for the arcane spellcasting class, Wisdom for the divine class, must prepare divine spells using his divine spellcaster class, and must prepare arcane spells using his arcane spellcasting class. If he took levels as an innate spellcaster, he would use Charisma for those spells and would account for them separately as well.

For the “semi-spellcaster” classes, such as gish and zerth, it is a bit more complicated. If the character

multiclassed as a pure spellcaster of one type of magic (arcane, divine, or innate) and takes levels in gish or zerth using another type of magic, then keep track of spell use separately as above. If the semi-spellcaster and pure spellcaster classes are both of the same type (arcane, divine, or innate), then the spellcasting stacks. Simply add the caster levels of the compatible classes and consult the appropriate spellcasting tables in the SRD (with cleric, sorcerer, or wizard) to see the character’s spells per day, spells known, etc. For example, a character has ten levels as an arcane spellcaster and six levels as an arcane gish. His arcane spells per day would be the same as a 13th level arcane spellcaster (because he gets ten caster levels from the spellcaster class plus three additional spellcasting levels for being a 6th level gish). As a further example, a 20th level character is an 8th level divine polymath, a 4th level divine gish, and an 8th level divine spellcaster. He would cast divine spells as an 11th level divine spellcaster. This is because he gains eight spellcasting levels from the spellcaster class, two spellcasting levels from the gish class, and one spellcasting level from being an 8th level polymath.

Simply put, add the caster levels shown for each class as long as the character is the same type of caster in the classes. Do not simply stack the spells per day. If you do this, you will get characters that can cast a lot of lower level spells per day, but will never reach higher levels of magic-use. However, if you like this idea, then use it as an option.

So, for a few thought-experiments, let’s think of characters who take ten levels in two different spellcasting classes (using the same source of power). A 10th level arcane spellcaster/10th level arcane gish would cast spells as a 15th level wizard. A 10th level divine spellcaster/10th level divine polymath would cast spells as a 12th level cleric. A 10th level innate zerth/10th level innate polymath would cast spells as a 7th level sorcerer.

CLASS CONCEPTS FOR GENERIC CLASSES

The generic classes are just that, generic. The player must decide exactly what sort of combatant, expert, or spellcaster his character is. There is a big difference between a combatant who is a mounted knight and one that is an unarmed and unarmored barbarian brawler. The generic classes leave the base save bonuses and class special abilities as options for the player to choose. Some thought must be put into characters advancing along the spellcaster, gish, zerth, and polymath classes. Each of these classes have three variants: arcane, divine, and innate. The character concept will largely determine how each of these character types interact with the game world. Some suggestions are given below.

Combatants are completely martial characters with no spellcasting ability or great ability with skills. The standard type of combatant character will be the fighter as it exists in the System Reference Document. Thought should be given to the types of armor the character will wear as well as the types of weapons that will be used. After this has been determined, certain feats and class special abilities can be used to further specialize the character and help build the exact type of combatant the player wants. Footmen (light and heavy), duelists, archers, knights, wrestlers, brawlers, crossbowmen, spearmen, samurai, gladiators, and even grenadiers or musketeers can be created using the combatant generic class.

Experts are the premier skill-users in the game world. Players are allowed to choose twelve class skills and get Craft and Profession in addition to these. They are fair combatants, but if the player foresees his expert spending a lot of time in combat, he may want to take a level in combatant to get the weapon and armor feats. Experts can become highly specialized in a suite of skills by taking the two basic types of "skill feats." Skill Focus grants a +3 to one skill and there is usually another feat that grants a +2 bonus to two skills in the rulebooks. Making sure that the character has a high ability score in the key ability for his favored skills is essential. Just about any type of non-magical character imaginable can be created with the expert class. Diplomats, merchants, thieves, sailors, performers, professors, craftsmen, sages, linguists, courtiers, officials, nobles, and spies can all be created as experts. Essentially, if the character is not primarily a combatant or a spellcaster, he is probably an expert.

Specialists combine the realm of arms with that of skill. They fulfill the same roles as both combatants and experts, but tend to be more versatile. Specialists may

could function as any of the roles listed for experts and combatants and this type also includes assassins, explorers, scouts, military officers, rangers, and martial artists.

Spellcasters are quite easy to make. The normal classes provide three archetypes for each of the three different types of spellcasters. Arcane spellcasters are wizards. Divine spellcasters are mystics who are much like clerics, except they are non-combatants for the most part. Finally, innate spellcasters are sorcerers. In fact, it may be simpler to refer to arcane, divine, and innate spellcasters as wizards, mystics, and sorcerers, respectively, in game terms. Of course, within the campaign world, the common denizens might use different words to describe these types of characters (or may not distinguish between the three types at all!).

The gish class combines both the combatant and spellcaster classes. Since there are three different types of spellcasters, there are three different types of gishes. Although, there could be many different conceptions involving this sort of gestalt, three immediately come to mind. The divine gish would fulfill the role of the paladin (or templar, if you prefer an "alignment neutral" term). Combatants for the faith, paladins are proficient in both combat and divine magic-use. The arcane gish closely resembles, what has been called in at least one other game system, a paragon. The arcane gish represents a sort of "jock-scholar" type of character, able to function effectively in both the physical and mental realms. An innate gish needs neither books nor gods for his spellcasting, so he would probably also naturally gravitate towards unarmed fighting styles to be spiritually, mentally, and materially free, and thus be an "ascetic" character, that is, a monk.

The zerth is much like the gish, except these character types focus on skill-use as well as magic-use. They can function as combatants, not as well as pure experts, but better than spellcasters. Zerths are spellcasters who also interact more with the world than pure spellcasting types. Thus, a divine zerth is most likely a priest. He is able to call down the powers of his god, but can still operate effectively in the secular sphere through the proper specialization of skills. The arcane zerth is a sage, interested in spells and magic, but also in lore and knowledge, spending an equal amount of time between the two. The innate zerth typifies the bard character, using his natural talents, developed

skills, and inborn ability to work magic to make his way through the world.

The polymath is a jack-of-all-trades, combining aspects from all three of the pure generic classes. The default divine polymath could be seen as a ranger, combining might, skill, and divine spells into an effective array of powers. The arcane polymath is a rogue, a dabbler in different areas with a number of tricks up his sleeve. Finally, an innate polymath might be a warlock who uses his hereditary powers of questionable origin along with arms and wit to win the day.

ALTERNATE ADVANCEMENT SYSTEMS

Two new advancement systems are offered below.

SIMPLIFIED XP AWARDS

All experience awards are derived from **Table 11: XP Awards**. This table shows the amount of experience points to award each character, individually, based on the difference between the challenge rating of the encounter (CR) and the character's character level (CL). Three different advancement rates are offered: normal, reduced, and slow. The normal advancement rate assumes that a character will gain a "level's worth" of experience points after about thirteen evenly-matched encounters. The reduced rate increases that number to 20 evenly-matched encounters. The slow advancement rate requires 40 evenly-matched encounters. The GM should choose the column that grants an appropriate advancement rate for his campaign. The normal advancement rate should be the default since this corresponds to the typical advancement rate for SRD-based games.

In standard D20 games, experience point awards increase as the character's level increase. This is because an increasing number of experience points are required to reach successive levels (1,000 XP times the current character level). This is why all experience point awards are multiplied by the character's level (shown as "x CL" in the table).

To use **Table 11**, simply subtract the character's level from the challenge rating of the encounter to get a number from -7 to +7. Numbers less than -7 result in no experience award and numbers greater than +7 should be treated as +7 (but the characters shouldn't be able to successfully resolve those

encounters anyway). Once you have the difference between the CR and the CL, find the row corresponding to this difference. The experience award for that character is found in the column corresponding to the advancement rate of the campaign (normal, reduced, or slow). For example, a 4th level character, two 3rd level characters, and a 2nd level character successfully complete a CR 3 encounter. The GM is using the normal advancement rate. The 4th level character receives 200 XP (using the "-1" row, multiply 50 XP times the character level of 4), the two 3rd level characters receive 225 XP each (using the "0" row; 75 XP times 3), and the 2nd level character receives 200 XP (using the "+1" row). When using **Table 11**, you never have to divide the XP award by the number of surviving characters. The table shows the individual XP awards for characters. Characters who do not survive an encounter do not gain an experience award.

The normal advancement rate allows a character to gain 75 XP x CL per evenly-matched encounter that was successfully overcome. After 13 such encounters, the character has earned 975 XP x CL, just 25 XP x CL short of a "level's worth" of experience. Once XP has been earned, it can be used immediately, subject to the dictates of the GM. The GM may only allow XP to be spent at the end of the gaming session or at the beginning of a session (giving the player time to think about how he wants to spend his XP). The GM could allow XP to be spent as soon as it is earned, but need not do this. After successfully overcoming an evenly-matched encounter, a character has enough experience points to gain three hit points or three skill ranks. It takes four evenly-matched encounters to gain a +1 base attack bonus. After seven evenly-matched

encounters, a wizard can gain another level of spellcasting ability. If this advancement rate seems too fast, it's only because in the normal system, level abilities are granted all at once, after thirteen or fourteen encounters have been completed. The GM always has the option to use the reduced or slow advancement rates, if desired.

TABLE 11: XP AWARDS

CR- CL	Normal XP	Reduced XP	Slow XP
-7	6 x CL	4 x CL	2 x CL
-6	9 x CL	6 x CL	3 x CL
-5	12 x CL	9 x CL	4 x CL
-4	18 x CL	12 x CL	6 x CL
-3	25 x CL	18 x CL	9 x CL
-2	38 x CL	25 x CL	12 x CL
-1	50 x CL	38 x CL	18 x CL
0	75 x CL	50 x CL	25 x CL
+1	100 x CL	75 x CL	38 x CL
+2	150 x CL	100 x CL	50 x CL
+3	200 x CL	150 x CL	75 x CL
+4	300 x CL	200 x CL	100 x CL
+5	400 x CL	300 x CL	150 x CL
+6	600 x CL	400 x CL	200 x CL
+7	800 x CL	600 x CL	300 x CL

Stepping through an example may prove helpful. Let's say that a 1st level character begins his career. The character is a knight, concentrating on warfare and its related disciplines. During character creation, the player purchases a +1 base attack bonus (300 XP); light, medium, and heavy armor proficiencies (300 XP); shield proficiency (100 XP); he gives him a +2 base Fortitude save bonus (200 XP); eleven hit points (275 XP); one class level in fighter (25 XP); four skill ranks in Ride (100 XP); four skill ranks in Knowledge (nobility and royalty) (100 XP); four skill ranks in Perform (oratory) (100 XP); simple and martial weapon proficiencies (200 XP); Mounted Combat feat (100 XP); Ride-By Attack feat (100 XP); and the

Spirited Charge feat (100 XP) for a total of 2,000 XP.

Our knight begins his adventuring career in a war against gnolls who are ravaging his baron's countryside. Gnolls are CR 1 creatures, so for every gnoll the knight defeats, he will receive 75 XP (as long as the knight remains a 1st level character). After a short gaming session, the knight defeats four gnolls. The GM awards the player 300 XP and tells the player that he'll give him time to think about how he wants to spend his XP. He asks him to e-mail his plan on spending the XP, so that the GM can approve it before the next game session. The player goes home and thinks it over. If he immediately gains a trait that makes his knight a 2nd level character, he will only receive 100 XP per defeated gnoll during the next game session (which represents less "buying power" if he is a 2nd level character). The player decides to spend his XP on traits that will not raise his character's level. His knight already has a +1 base attack bonus, 12 hit points, a +2 Fortitude base save bonus, and a class level in fighter. Obviously, he cannot raise these traits if he wants his knight to remain at 1st level. Looking over the list of feats and 1st level special abilities, he notices that he could gain Favored Enemy (gnolls) without becoming a 2nd level character (since this is a 1st level special ability). This would help him defeat more gnolls and thus gain more experience. He could also take Weapon Focus (longsword) to grant his knight a +1 bonus to attack rolls. Since this is not an increase to the base attack bonus, taking this feat would not increase his character level. Finally, he decides that Toughness would be a good feat to have, since it gives his knight +3 hit points (not base hit points). So, our player has found a way to spend his 300 XP on three feats (costing 100 XP each) which will grant him a +1 attack bonus with his favorite weapon, +2

damage against enemies that he knows he will encounter, and +3 hit points so that he is better able to survive the encounters. The best part is that he's still a 1st level character. He sends his plan to his GM, who replies that he's a min-maxing fool, but approves it anyway. But the GM can always cause the knight to lose his longsword and have to fight orcs next week.

Since the experience award is based on the difference between the challenge rating of the encounter and the character level, fractional CR's must be handled a bit differently when using this system. It doesn't make sense to subtract a character's level from the challenge rating of a fractional CR encounter. Depending on your rounding convention, you would always end up on the row equal to either the negative of the character's level, or the row below it. For this system, all fractional CR's (such as 1/2 and 1/4) are converted to integers.

A simple table summarizes the conversion of old, fractional CR's to the new, integer CR's.

TABLE 12: CONVERTING CR

Old CR	New CR
1/2	0
1/3	-1
1/4 and 1/5	-2
1/6 and 1/7	-3
1/8 and 1/9	-4
1/10 and less	-5

"BLUE-BOOKING" ADVANCEMENT

In addition to the rules for experience awards found in this rulebook, experience can also be awarded on the basis of non-adventuring pursuits. Suitable for NPCs and campaigns where adventures may be separated by years of inactivity, these experience awards are based on the characters engaging in the normal, day-to-day

activities to advance themselves along their chosen career path. A simple rule is to assume that the character earns 500 XP per year if they are actively working on advancing themselves. **Table 13: Career Experience Points** shows the total amount of experience points characters of different races can earn, assuming 500 XP each year for every year from adulthood to venerable age categories. The expected character level that each race can attain at the onset of the venerable age category is shown as well.

The figure of 500 XP per year can be adjusted based on the quality of instruction and materials available to the character. Poor conditions might result in the character receiving only 250 XP per year (or none at all), while formal tutoring with a mentor dedicated only to the character's instruction could yield up to 1,000 XP per year (but should be gained at exorbitant cost).

These "time-based" experience awards can be used to figure out how many experience points a non-adventuring NPC should have or such awards could be used to create starting characters who are older than the norm. If characters take a great deal of time off between adventures, these experience awards could be used to simulate the slow, steady advancement that comes over time. Adventuring should always result in experience awards much greater than those shown here.

**TABLE 13: CAREER
EXPERIENCE POINTS**

Race	XP	Character Level
Human	27,500	7 th
Dwarf	105,000	15 th
Elf	120,000	16 th
Gnome	80,000	13 th
Half-elf	52,500	10 th
Half-orc	23,000	7 th
Halfling	40,000	9 th

* Treat the sorcerer level as one level less for the purposes of this chart (except at 1st level). For example, an 8th level sorcerer uses the “7” column to find bonus spell points. A 1st level sorcerer uses the “1” column; a 2nd level sorcerer also uses the “1” column.

THE ADVANCED ALIGNMENT SYSTEM

For players and DM's wanting more detail for the alignment system, this sourcebook should prove helpful. Each alignment is explored in much more detail expanding upon the light treatment of alignment found in the System Reference Document.

LAWFUL GOOD

While strict in their prosecution of law and order, characters of lawful good alignment follow these precepts to improve the common weal. Certain freedoms must, of course, be sacrificed in order to bring order; but truth is of highest value, and life and beauty of great importance. The benefits of this society are to be brought to all. Creatures of lawful good alignment view the cosmos with varying degrees of lawfulness or desire for good. They are convinced that order and law are absolutely necessary to assure good, and that good is best defined as whatever brings the most benefit to the greater number of decent, thinking creatures and the least woe to the rest. (1)

Characters of this alignment believe that an orderly, strong society with a well-organized government can work to make life better for the majority of the people. To ensure the quality of life, laws must be created and obeyed. When people respect the laws and try to help one another, society as a whole prospers. These characters strive for those things that will bring the greatest benefit to the most people and cause the least harm. (2)

These characters have a strong moral character. Truth, honor, and the welfare of others is all-important. They are convinced that order and laws are absolutely necessary to assure that goodness prevails. Lawful good beings will not want to lie or cheat anyone, good or evil. They will not stand for treachery and will not let obviously dishonorable people use their own honor against them, if they can help it. They will obey the laws and customs of the area that they are in, but will attempt to find legal loopholes to disobey a law which is clearly evil or unjust. (3)

Lawful good characters are group and order oriented, and will cooperate with authority in all cases to promote the common weal. Not all lawful good beings view the cosmos with an equal desire for lawfulness and goodness, so there is no such thing as a perfectly balanced "lawful good" attitude (nor a perfectly balanced attitude for any other alignment, for that matter). In general, however, a lawful good character

promotes the ideals and rights of the majority over those of the individual (and this includes himself as well as others) and upholds the rights of the weak and oppressed members of society, who should be allowed to reap society's benefits with equanimity. The lawful good being feels this is the best way that all members of society can enjoy the rights of existence together. Life is important to the lawful good being, but life is not exclusive of order, and vice versa. (4)

Lawful good can appear to be a difficult alignment to uphold, but it must be remembered that lawful good characters are not necessarily naive or unrealistic. At the heart of a lawful good alignment is the belief in a system of laws that promotes the welfare of all members of a society, ensures their safety, and guarantees justice. So long as the laws are just and applied fairly to all people, it doesn't matter to the lawful good character whether they originate from a democracy or a dictator. Though all lawful good systems adhere to the same general principles, specific laws may be different. One society may allow a wife to have two husbands, another may enforce strict monogamy. Gambling may be tolerated in one system, forbidden in another. A lawful good character respects the laws of other lawful good cultures and will not seek to impose his own values on their citizens. (6)

However, a lawful good character will not honor a law that runs contrary to his alignment. A government may believe that unregulated gambling provides a harmless diversion, but a lawful good character may determine that the policy has resulted in devastating poverty and despair. In this character's mind, the government is guilty of a lawless act by promoting an exploitative and destructive enterprise. In response, he may encourage citizens to refrain from gambling, or he may work to change the law. Particularly abhorrent practices, such as slavery and torture, may force the lawful good character to take direct action. It doesn't matter if these practices are culturally acceptable or sanctioned by well-meaning officials. The lawful good character's sense of justice compels him to intervene and alleviate as much suffering as he can. Note, though, that time constraints, inadequate resources, and other commitments may limit his involvement. While a lawful good character might wish for a cultural revolution in a society that tolerates cannibalism, he may have to content himself with rescuing a few victims before circumstances force him to leave the area. (6)

LAWFUL GOOD AND SOCIETY

A lawful good being...

Respects the authority figures in his family and obeys their mandates.

Values lifelong commitment to a romantic partner.

Obeys all personal contracts.

Respects the laws and authority figures of the community and nation.

Considers public service in a leadership role an honor.

Supports the legal procedures of the nation, without regard to their own discomfort.

Seeks secure employment, believing hard work will pay off in the end.

Will not want to disappoint his family.

Will support their family even if it means personal discomfort.

Will never betray a friend and enjoys having close friends.

Considers the needs of the community in personal life.

Will give his life in defense of his community.

Will take actions to aid others during times of crisis, even if unprofitable to do so.

Will give his life in defense of his community.

Will take actions to aid others during times of crisis, even if unprofitable to do so.

Believes everyone should be treated fairly and kindly.

Feels guilt when he commits a wrongdoing and will seek to right his wrong.

Uses wealth to help others who are less fortunate.

A community with a lawful good government usually has a codified set of laws, and most people willingly obey those laws. In a lawful good society, the people are generally honest, law-abiding, and helpful. They mean well (at least most of them do). They respect the law. As a rule, people don't walk around wearing armor and carrying weapons. Those who do are viewed with suspicion or as trouble-makers. Some societies tend to dislike adventurers, since they often bring trouble.

When will a lawful good character take a life? A lawful good being kills whenever necessary to promote the greater good, or to protect himself, his companions, or anyone whom he's vowed to defend. In times of war, he strikes down the enemies of his nation. He does not interfere with a legal execution, so long as the punishment fits the crime. Otherwise, a lawful good character avoids killing whenever possible. He does not kill a person who is merely suspected of a crime, nor does this character necessarily kill someone he perceives to be a threat unless he has tangible evidence or certain knowledge of evildoing. He never kills for treasure or personal gain. He never knowingly kills an innocent being. (6)

A lawful good character will keep his word if he gives it and will never lie. He will never attack an unarmed foe and will never harm an innocent. He will not use torture to extract information or for pleasure. He will never kill for pleasure, only in self-defense or in the defense of others. A lawful good character will never use poison. He will help those in need and he prefers to work with others. He responds well to higher authority, is trustful of organizations, and will always follow the law. He will never betray a family member, comrade, or friend (though he will attempt to bring an immoral or law-breaking friend to justice, in order to rehabilitate that person). Lawful good characters respect the concepts of self-discipline and honor. (5)

Here are some possible adjectives describing lawful good characters: friendly, courteous, sensitive to the feelings of others, scrupulous, honorable, trustworthy, reliable, helpful, loyal, and respectful of "life, love, and the pursuit of happiness."

Well known lawful good characters from film or literature include: Luke Skywalker (Star Wars), Mister Spock (Star Trek), Hermione Granger (Harry Potter), and Superman (DC Comics).

THE PHILOSOPHY OF LAWFUL GOOD

Lawful good is the philosophy that goodness is best achieved through law and order. It is a philosophy of altruistic collectivism. This philosophy holds that people should behave altruistically and put the needs of the group ahead of individual desires. Lawful good can also be associated with rule utilitarianism and ethical altruism.

Lawful good philosophers generally maintain that there is metaphysical order in the multiverse and thus may support doctrines of hard determinism, predeterminism, fatalism, predestination, and/or necessitarianism. They may believe in fate or destiny.

THE TEN LAWFUL GOOD COMMANDMENTS

A list of Ten Commandments for a lawful good religion may look like this:

1. You shall not lie.
2. You shall not harm the innocent.
3. You shall not murder.
4. You shall help the needy.
5. You shall honor legitimate authority that promotes goodness.
6. You shall follow the law.
7. You shall not betray others.
8. You shall bring criminals and evil-doers to justice.
9. You shall not steal.
10. You shall seek unlimited good for others and unlimited order in society.

TEN LAWFUL GOOD SINS

Likewise, a lawful good religion may list the following as sins. This list is given in the order of least severe infraction to most severe.

1. Failing to show respect to lawful good churches, governments, and/or beings.
2. Failing to speak out against corruption, sin, greed, pride, etc.
3. Being motivated by pride, avarice, gluttony, or some other sinful impulse.
4. Theft, robbery, or willful vandalism.
5. Causing harm to a pious or virtuous being.
6. Failing to assist or aid good beings when in need.
7. Blasphemous or heretical acts.
8. Allowing a crime or major act of evil to go unpunished.
9. The murder of an innocent.
10. Aiding the servants of Chaos and Evil.

THE LAWFUL GOOD ADVENTURER

The following two lists detail common actions undertaken during "adventuring" that are considered honorable and dishonorable for the lawful good alignment. An honorable action is one that is in keeping with the spirit of this alignment, while dishonorable actions tend to be those which bring shame to the character in the eyes of his or her alignment peers. Note that an action which is considered honorable by one alignment may be considered dishonorable by another alignment and vice versa.

The following actions are honorable for this alignment:

Allowing a disarmed enemy to pick up his weapon
Allowing the enemy to attack first
Allowing the enemy to remove their dead/wounded from the field
Defeating a superior opponent
Picking up the funeral expenses of someone you slew in combat
Refusing medical treatment for the good of the party
Reporting illegal and immoral actions to the authorities
Saving the life of another at great risk to own self
Taking an arrow or hit for someone else
Taking prisoners

The following actions are dishonorable for this alignment:

Accused of crime (innocent or not)
Attacking an unarmed or obviously inferior opponent
Being taken prisoner
Convicted of a crime
Defeated by an inferior opponent
Delivering death blow to a helpless opponent
Desecrating an enemy's corpse
Dirty fighting
Falsely claiming the 'bragging rights' that belong to another or outright lying
Fleeing a battle that's obviously going poorly
Fleeing a fight with a superior opponent
Fleeing a fight with an equal opponent
Gloating over a victory
Killing a host who has provided you food or shelter
Neglecting to properly bury a member of one's own race
Paying off an extortionist or shake-down
Perpetrate humiliating prank on enemy
Rash or improper social behavior
Refusing a fair contest/challenge
Surrendering
Taking a bribe
Taunting an enemy into fighting
Treason
Unjustly slaying a prisoner or unarmed opponent who has yielded
Walking away from a challenge

NEUTRAL GOOD AND SOCIETY

A neutral good being...

Values his family, but will not heed their requests necessarily.

Will provide for friends, and expects to be repaid in some manner.

Does not seek positions of authority over others.

Fits in with their society.

Supports their nation.

Supports the law when advantageous to do so.

Is not concerned with politics, most likely.

Will keep his word.

Will take risks if the benefits are great.

Will not want to disappoint his family.

Will support their family even if it means personal discomfort.

Will never betray a friend and enjoys having close friends.

Considers the needs of the community in personal life.

Will give his life in defense of his community.

Will take actions to aid others during times of crisis, even if unprofitable to do so.

Believes everyone should be treated fairly and kindly.

Feels guilt when he commits a wrongdoing and will seek to right his wrong.

Uses wealth to help others who are less fortunate.

A neutral good government rarely influences the residents of the community other than to help them when they are in need. Neutral good societies tend to adopt whatever government seems most expedient at the moment. A particular form of government lasts as long as the ruler or dynasty in power can maintain it. Transfers of power are usually marked by shifts in government, though these are often bloodless coups. There is a certain apathy about politics and government. Adventurers are treated the same as everyone else.

They tend to be moral objectivists, holding that values exist in the external world independently of and external to our comprehension of them; that they can be found and known; and that they must be used as principles for human judgments and conduct.

The ideal government for this alignment is an authoritarian state with codified laws supporting a social order in which altruism is rewarded and radical egoism is punished. Lawful good beings want the power of the state to be used for the benefit of all. Rehabilitative justice is used to reform criminals and evil-doers.

NEUTRAL GOOD

Creatures of neutral good alignment believe that there must be some regulation in combination with freedoms if the best is to be brought to the world--the most beneficial conditions for living things in general and intelligent creatures in particular. Creatures of this alignment see the cosmos as a place where law and chaos are merely tools to use in bringing life, happiness, and prosperity to all deserving creatures. Order is not good unless it brings this to all; neither are randomness and total freedom desirable if it does not bring such good. (1)

Neutral goods value both personal freedom and adherence to laws. They feel that too many laws may unnecessarily restrict the freedom of good beings. They also believe that too much freedom may not protect society as a whole and encourage counterproductive divisions and in-fighting. They promote governments which hold broad powers, but do not interfere in the day-to-day lives of their citizens. (2)

These characters value life and freedom above all else, and despise those who would deprive others of them. Neutral good characters sometimes find themselves forced to work beyond the law, yet for the law, and the greater good of the people. They are not vicious or vindictive, but are people driven to right injustice. Neutral good characters always attempt to work within the law whenever possible, however. (3)

To a neutral good being, life and the assurance of other creatures' rights take precedence over all else. This is not to say that this character will have an aversion to taking another's life when faced with a choice between an attacker's and his own, however. Neutral good

THE TEN NEUTRAL GOOD COMMANDMENTS

A list of Ten Commandments for a neutral good religion may look like this:

1. You shall lie only to evil-doers.
2. You shall not harm the innocent.
3. You shall not murder.
4. You shall help the needy.
5. You shall honor those who promote goodness.
6. You shall follow the law unless breaking the law results in more good.
7. You shall not betray others.
8. You shall bring evil-doers to justice.
9. You shall steal only to promote goodness.
10. You shall seek unlimited good for others.

TEN NEUTRAL GOOD SINS

Likewise, a neutral good religion may list the following as sins. This list is given in the order of least severe infraction to most severe.

1. Refusing to defy authority to perform a good act.
2. Failing to speak out against an evil act.
3. Following a law or keeping your word when you feel that breaking the law would result in more good.
4. Theft, robbery, or willful vandalism unless it harms an evil being or cause.
5. Willful causing of harm to a good being.
6. Failing to assist good beings when they are in need.
7. Turning down a chance to destroy or bring to justice an evil being.
8. Allowing major act of evil to go unavenged. Betraying a friend or ally for evil reason.
9. The murder of an innocent.
10. Aiding the servants of Evil. Committing a heinous or demented act.

THE NEUTRAL GOOD ADVENTURER

The following two lists detail common actions undertaken during "adventuring" that are considered honorable and dishonorable for the neutral good alignment. An honorable action is one that is in keeping with the spirit of this alignment, while dishonorable actions tend to be those which bring shame to the character in the eyes of his or her alignment peers. Note that an action which is considered honorable by one alignment may be considered dishonorable by another alignment and vice versa.

The following actions are honorable for this alignment:

Allowing a disarmed enemy to pick up his weapon
Allowing the enemy to attack first
Defeating a superior opponent
Perpetrate humiliating prank on enemy
Picking up the funeral expenses of someone you slew in combat
Refusing medical treatment for the good of the party
Saving the life of another at great risk to own self
Taking an arrow or hit for someone else
Taking prisoners

The following actions are dishonorable for this alignment:

Accused of crime (innocent or not)
Attacking an unarmed or obviously inferior opponent
Being taken prisoner
Convicted of a crime
Defeated by an inferior opponent
Delivering death blow to a helpless opponent
Desecrating an enemy's corpse
Dirty fighting
Falsely claiming the 'bragging rights' that belong to another or outright lying
Fleeing a battle that's obviously going poorly
Fleeing a fight with a superior opponent
Fleeing a fight with an equal opponent
Killing a host who has provided you food or shelter
Neglecting to properly bury a member of one's own race
Rash or improper social behavior
Refusing a fair contest/challenge
Surrendering
Taunting an enemy into fighting
Treason
Unjustly slaying a prisoner or unarmed opponent who has yielded
Walking away from a challenge

beings also believe that law and chaos are merely tools to use in bringing life, prosperity, and happiness to all deserving creatures. Neither numbers nor individual concerns have any bearing on decisions regarding the needs and rights of any given creature. In other words, in the view of a neutral good being, rarely will either the needs of the many or the personal desires of an individual outweigh the needs of any other creature. All life is given even-handed treatment. As with all alignments neutral with respect to law and chaos, self-reliance is a cornerstone of a neutral good being's personality. In a crunch, neutral good characters trust in themselves and in no other individual or group. This doesn't mean they can't make friends and develop trusting relationships with others, however. Neutral good beings aren't normally as independent as chaotic good beings, and they can cooperate in groups. But they won't always trust a group to be more effective than they could be themselves. (4)

A neutral good character will keep his word to those who are not evil and will lie only to evil-doers. He will never attack an unarmed foe and will never harm an innocent. He will not use torture to extract information or for pleasure. He will never kill for pleasure, only in self-defense or in the defense of others. A neutral good character will never use poison. He will help those in need and works well alone or in a group. He responds well to higher authority until that authority attempts to use the law to hamper his ability to do good. He is trustful of organizations as long as they serve his utilitarian purpose. He will follow the law unless more good can come from breaking the law. He will never betray a family member, comrade, or friend. Neutral good characters are indifferent to the concepts of self-discipline and honor, finding them useful only if they promote goodness. (5)

Here are some possible adjectives describing neutral good characters: self-reliant, helpful, courteous, kind, respectful, sensitive, friendly, loving, merciful, gracious, humane, altruistic, giving, respectful, and protective of life.

Well known neutral good characters from film or literature include: Captain James T. Kirk (Star Trek), Gandalf the Grey (Lord of the Rings), Harry Potter (Harry Potter), and Spiderman (Marvel Comics).

THE PHILOSOPHY OF NEUTRAL GOOD

Neutral good is the philosophy that goodness should be advanced by using whatever means provide the most benefit. It is a philosophy of altruistic consequentialism. This philosophy holds that people

should behave altruistically and balance the needs of the collective as a whole and the needs of the individuals making up the collective. Neutral good can also be associated with act utilitarianism and ethical altruism.

Neutral good philosophers generally maintain that there is metaphysical balance in the multiverse and thus may support doctrines of soft determinism, pragmatism, conventionalism, and/or instrumentalism. They may believe in free will or choice. They could also embrace skepticism or suspend judgment on philosophical issues. They tend to be moral relativists, holding that values differ from society to society, from person to person; that they are conditioned by the peculiarities of the society in which they arise; that they are not universally applicable at all times or in all places; and that they are correct or incorrect, desirable or undesirable only relative to whether or not they conform to a common norm or to common acceptance.

The ideal government for this alignment is any social order in which altruism is rewarded and radical egoism is punished. Neutral good beings want the power of the state to be used for the benefit of all without sacrificing individual freedom. Rehabilitative justice is used to reform criminals and evil-doers.

CHAOTIC GOOD

While creatures of this alignment view freedom and the randomness of actions as ultimate truths, they likewise place value on life and the welfare of each individual. Respect for individualism is also great. By promoting the philosophy of chaotic good, characters of this alignments seek to spread their values throughout the world. To the chaotic good individual, freedom and independence are as important to life and happiness. The ethos views this freedom as the only means by which each creature can achieve true satisfaction and happiness. Law, order, social forms, and anything else which tends to restrict or abridge individual freedom is wrong, and each individual is capable of achieving self-realization and prosperity through himself, herself, or itself. (1)

Chaotic good characters are strong individualists marked by a streak of kindness and benevolence. They believe in all the virtues of goodness and right, but they have little use for laws and regulations. They have no use for people who "try to push folk around and tell them what to do." Their actions are guided by their own moral compass which, although good, may not

always be in perfect agreement with the rest of society.
(2)

These characters are basically good, but tend to be selfish and maybe a bit greedy. They tend to hold personal freedom and welfare above anything else. The chaotic good dislikes confining laws, self-discipline, and they distrust authority. (3)

Chaotic goods believe that freedom is the only means by which each creature can achieve true satisfaction and happiness. Law, order, social forms, and anything else which tends to restrict individual freedom is wrong, and each individual is capable of achieving self-realization and prosperity through himself. These characters believe that life has no grand plan, but each creature's spirit is essentially noble and good. Each being must follow his own conscience. By performing good acts the individual can hope to alleviate the suffering and anguish of others, whether caused by random or structured acts. (7)

The chaotic good character has a "beatific" attitude toward existence. In this character's opinion, any laws, social structures, or other such hierarchies that restrict his freedom are abhorrent and to be done away with. The inviolable right of the individual to seek his own pleasures is one of the cornerstones of society; but, being good, the chaotic good being will not tread on others to get his own way, for he feels that every other creature has the right to the pursuit of pleasure as well. Friends of a chaotic good character will find him unreliable in the clutch only if he puts his own well-being ahead of that of his companions. Obviously, almost everyone has this tendency, but it is left up to this individual whether or not he values a friendship enough to risk self sacrifice. The chaotic good being would not, however, take action that could unnecessarily jeopardize the lives of other persons or creatures. Life is valuable, but without sufficient personal freedom it is demeaned. Life and freedom are the foundation of the universe. (4)

A chaotic good character will keep his word to those who are not evil and will lie only to evil-doers.

CHAOTIC GOOD AND SOCIETY

A chaotic good being...

Is not concerned with the desires of family members.

Values flexible relationships with romantic partners.

Considers himself above the law.

Finds most people to be narrow-minded and inflexible.

Believes those who seek to rule others are, by nature, corrupt.

Seeks to undermine the authority figures of his community or nation.

Finds the legal procedures of his nation corrupt.

Believes luck determines wealth.

Will break any contract when he feels like it.

Will not want to disappoint his family.

Will support their family even if it means personal discomfort.

Will never betray a friend and enjoys having close friends.

Considers the needs of the community in personal life.

Will give his life in defense of his community.

Will take actions to aid others during times of crisis, even if unprofitable to do so.

Believes everyone should be treated fairly and kindly.

Feels guilt when he commits a wrongdoing and will seek to right his wrong.

Uses wealth to help others who are less fortunate.

A chaotic good government influences the community by helping the needy and opposing restrictions on freedom. In a chaotic good society, The people mean well and try to do right, but are hampered by a natural dislike of big government. Although there may be a single ruler, most communities are allowed to manage themselves, so long as their taxes are paid and they obey a few broad edicts. Such areas tend to have weak law enforcement organizations. A local sheriff, baron, or council may hire adventurers to fill the gap. Communities often take the law into their own hands when it seems necessary. Lands on the fringes of vast empires far from the capital tend to have this type of alignment.

THE TEN CHAOTIC GOOD COMMANDMENTS

A list of Ten Commandments for a chaotic good religion may look like this:

1. You shall lie in the pursuit of goodness.
2. You shall not harm the innocent.
3. You shall not murder.
4. You shall help the needy.
5. You shall honor those who promote freedom and goodness.
6. You shall break the law in pursuit of goodness.
7. You shall not betray others.
8. You shall avenge the acts of evil-doers and enemies of freedom.
9. You shall not place duty above personal desire to do good.
10. You shall seek unlimited good for others and freedom in society.

TEN CHAOTIC GOOD SINS

Likewise, a chaotic good religion may list the following as sins. This list is given in the order of least severe infraction to most severe.

1. Failing to perform a random act of kindness when appropriate.
2. Failing to pursue a new form of pleasure.
3. Placing duty above personal desire.
4. Failing to assist allies or good beings in need.
5. Causing harm to an essentially good being.
6. Following a law when you feel that it unnecessarily restricts your freedom.
7. Turning down a chance to trick, cheat, or harm an evil being for personal gain.
8. Betraying an ally or friend for evil reason.
9. The murder of an innocent.
10. Aiding the servants of Order and Evil.

THE CHAOTIC GOOD ADVENTURER

The following two lists detail common actions undertaken during "adventuring" that are considered honorable and dishonorable for the chaotic good alignment. An honorable action is one that is in keeping with the spirit of this alignment, while dishonorable actions tend to be those which bring shame to the character in the eyes of his or her alignment peers. Note that an action which is considered honorable by one alignment may be considered dishonorable by another alignment and vice versa.

The following actions are honorable for this alignment:

Allowing a disarmed enemy to pick up his weapon
Gloating over a victory
Perpetrate humiliating prank on enemy
Picking up the funeral expenses of someone you slew in combat
Saving the life of another at great risk to own self
Taking an arrow or hit for someone else
Taking prisoners

The following actions are dishonorable for this alignment:

Accused of crime by good or neutral authorities (innocent or not)
Being taken prisoner
Convicted of a crime by good or neutral authorities
Delivering death blow to a helpless opponent
Desecrating an enemy's corpse
Falsely claiming the 'bragging rights' that belong to another or outright lying
Fleeing a battle that's obviously going poorly
Fleeing a fight with an equal opponent
Killing a host who has provided you food or shelter
Neglecting to properly bury a member of one's own race
Reporting the illegal actions of good beings to the authorities
Surrendering
Taunting an enemy into fighting
Treason
Unjustly slaying a prisoner or unarmed opponent who has yielded

He will never attack an unarmed foe and will never harm an innocent. He will not use torture to extract information or for pleasure, but he may "rough up" someone to get information. He will never kill for pleasure, only in self-defense or in the defense of others. A chaotic good character will never use poison. He will help those in need and he prefers to work alone, as he values his freedom. He does not respond well to higher authority, is distrustful of organizations, and will disregard the law in his fight against evil. He will never betray a family member, comrade, or friend. Chaotic good characters do not respect the concepts of self-discipline and honor, because they believe such concepts limit freedom to act. (5)

Here are some possible adjectives describing chaotic good characters: unpredictable, independent, free spirited, cheerful, optimistic, easy going, carefree, helpful, kind, merciful, respectful of personal liberties, and anarchic.

Well known chaotic good characters from film or literature include: Han Solo (Star Wars), Batman (DC Comics), Fred and George Weasley (Harry Potter), and Robin Hood.

THE PHILOSOPHY OF CHAOTIC GOOD

Chaotic good is the philosophy that goodness is best achieved through the freedom of individuals to act independently. It is a philosophy of altruistic individualism. This philosophy holds that people should behave altruistically and that society exists for the sake of its individual members. Chaotic good can also be associated with preference utilitarianism, ethical altruism, altruistic hedonism, and various forms of existentialism.

Chaotic good philosophers generally maintain that there is metaphysical chaos in the multiverse and thus may support doctrines of indeterminism, casualism, tychism, and/or accidentalism. They may believe that fortune or chance determine all outcomes. They tend to be moral subjectivists, holding that values are expressions of emotions, attitudes, reactions, feelings, thoughts, wishes, and desires, and have no independent objective or external reality or reference in the real world.

The ideal government for this alignment is a minimalist state supporting a social order in which altruism is rewarded and radical egoism is punished. Chaotic good beings believe that the best way to advance benefit for all is by allowing the most freedom possible. Rehabilitative justice is used to reform criminals and evil-doers.

LAWFUL NEUTRAL

Those of this alignment view regulation as all-important, taking a middle ground betwixt evil and good. This is because the ultimate harmony of the world--and the whole universe--is considered by lawful neutral creatures to have its sole hope rest upon law and order. Evil or good are immaterial beside the determined purpose of bringing all to predictability and regulation. It is the view of this alignment that law and order give purpose and meaning to everything. Without regimentation and strict definition, there would be no purpose in the cosmos. Therefore, whether a law is good or evil is of no import as long as it brings order and meaning. (1)

Lawful neutral beings believe in a strong, well-ordered government, whether that government is a tyranny or benevolent democracy. The benefits of organization and regimentation outweigh any moral questions raised by their actions. Lawful neutral beings will uphold the law regardless of whether it is considered just or not. If the majority of the population disagrees with the practices of the government, then they must use legal means of getting those laws changed. Rebellion is a crime regardless of the purpose behind revolt. In their day-to-day affairs, lawful neutrals will adhere to the laws of the area they are in, and will also maintain their own sense of honor. (2)

They are respectful to both their leaders and their peers. Subordinates will be treated as is due their station within society. Written contracts and verbal agreements will be honored by these characters. They will not break their word or a contract unless there is a legal way to do so. Lawful neutral beings are concerned with the letter of the law, but rarely the spirit. These characters also respect the idea of station in life. They will act as they should, given their station.

The lawful neutral being normally sees law and order as of prime importance, with the well-being of the group put ahead of the individual on almost every occasion. Such persons see good and evil as immaterial and unimportant in the structuring of the universe into perfect order and harmony, in which lies society's only hope for survival. Whether a law is good or evil is of no import as long as it brings order and meaning. Thus, personal gratification of needs and desires is well and fine, as long as this doesn't interfere with the ultimate ordering of the cosmos; all other considerations are secondary. Life, to the lawful neutral being, has no meaning without order, and is thus expendable when faced with the choice between it and harmony. (4)

LAWFUL NEUTRAL AND SOCIETY

A lawful neutral being...

Respects the authority figures in his family and obeys their mandates.

Values lifelong commitment to a romantic partner.

Obeys all personal contracts.

Respects the laws and authority figures of the community and nation.

Considers public service in a leadership role an honor.

Supports the legal procedures of the nation, without regard to their own discomfort.

Seeks secure employment, believing hard work will pay off in the end.

Will not aid family members in need if personal discomfort is required.

Will not betray a family member.

Has few close friends and would never betray those he has.

Is generally well liked by his community, but normally will not seek to improve the community.

Will support his nation when profitable to do so, but will not act against his nation if profitable.

Believes people deserve the treatment they are willing to endure.

Is not concerned with those less fortunate.

Will not harm others for profit.

A community with a lawful neutral government has a codified set of laws that are followed to the letter. Those in power usually insist that visitors (as well as residents) obey all local rules and regulations. In a lawful neutral society, The people are not only law-abiding, they are passionate creators of arcane bureaucracies. The tendency to organize and regulate everything easily gets out of control. In large empires there are ministries, councils, commissions, departments, offices, and cabinets for everything. If the region attracts a lot of adventurers, there are special ministries, with their own special taxes and licenses, to deal with the problem. The people are not tremendously concerned with the effectiveness of the government, so long as it functions.

A lawful neutral character will keep his word if he gives it and will never lie. He may attack an unarmed foe if he feels it necessary. He will never harm an innocent. He may use torture to extract information, but never for pleasure. He will never kill for pleasure, only in self-defense or in the defense of others. A lawful neutral character may use poison as long as poison use is not illegal. He will help those in need only to advance the social order. He prefers to work with others. He responds well to higher authority, is trustful of organizations, and will always follow the law. He will never betray a family member, comrade, or friend. Lawful neutral characters respect the concepts of self-discipline and honor. (5)

Here are some possible adjectives describing lawful neutral characters: reliable, responsible, truthful, orderly, loyal, respectful of authority, regular, structured, rigid, neat, methodical, and precise.

Well known lawful neutral characters from film or literature include: Judge Dredd (Comics), Sergeant Friday (Dragnet television show), Percy Weasley (Harry Potter), and Cornelius Fudge (Harry Potter).

THE PHILOSOPHY OF LAWFUL NEUTRAL

Lawful neutral is the philosophy that law and order are desirable ends in and of themselves. It is a philosophy of pure equitistic collectivism. This philosophy holds that the best way for all beings to pursue a rational self-interest is within the framework of a strong social order. By putting the needs of the state or social order ahead of individual desires, each being can advance the self-interest of the collective as a whole. Lawful neutral can also be associated with ethical equitism and natural law philosophies. As the philosophical "average" of altruism and egoism, equitism holds that harm to others should be minimized when advancing the self and that harm to the self should be minimized when advancing others.

Lawful neutral philosophers generally maintain that there is metaphysical order in the multiverse and thus may support doctrines of hard determinism, predeterminism, fatalism, predestination, and/or necessitarianism. They may believe in fate or destiny. They tend to be moral objectivists, holding that values exist in the external world independently of and external to our comprehension of them; that they can be found and known; and that they must be used as principles for human judgments and conduct.

THE TEN LAWFUL NEUTRAL COMMANDMENTS

A list of Ten Commandments for a lawful neutral religion may look like this:

1. You shall not lie.
2. You shall not kill the innocent.
3. You shall not murder.
4. You shall help the needy if such action advances law and order.
5. You shall honor legitimate authority.
6. You shall follow the law.
7. You shall not betray others.
8. You shall not aid criminals.
9. You shall honor all oaths.
10. You shall promote unlimited order in society.

TEN LAWFUL NEUTRAL SINS

Likewise, a lawful neutral religion may list the following as sins. This list is given in the order of least severe infraction to most severe.

1. Failing to alert the authorities of a crime.
2. Treating a peer with disrespect.
3. Placing personal desire above adherence to the law.
4. Breaking your word to your peer or ally.
5. Failing to assist allies in need.
6. Breaking a major law.
7. Failing to assist your superior when in need.
8. Treating a superior with disrespect.
9. Breaking your word to your superior.
10. Breaking a sacred oath or written contract. Aiding the forces of Chaos and Disorder.

THE LAWFUL NEUTRAL ADVENTURER

The following two lists detail common actions undertaken during "adventuring" that are considered honorable and dishonorable for the lawful neutral alignment. An honorable action is one that is in keeping with the spirit of this alignment, while dishonorable actions tend to be those which bring shame to the character in the eyes of his or her alignment peers. Note that an action which is considered honorable by one alignment may be considered dishonorable by another alignment and vice versa.

The following actions are honorable for this alignment:

Allowing a disarmed enemy to pick up his weapon
Allowing the enemy to attack first
Allowing the enemy to remove their dead/wounded from the field
Defeating a superior opponent
Refusing medical treatment for the good of the party
Reporting illegal actions to the authorities
Taking prisoners

The following actions are dishonorable for this alignment:

Accused of crime (innocent or not)
Being taken prisoner
Convicted of a crime
Defeated by an inferior opponent
Dirty fighting
Fleeing a battle that's obviously going poorly
Fleeing a fight with a superior opponent
Fleeing a fight with an equal opponent
Killing a host who has provided you food or shelter
Rash or improper social behavior
Refusing a fair contest/challenge
Saving the life of another at great risk to own self
Surrendering
Taking an arrow or hit for someone else
Treason
Walking away from a challenge

TRUE NEUTRAL AND SOCIETY

A true neutral being...

Values his family, but will not heed their requests necessarily.

Will provide for friends, and expects to be repaid in some manner.

Does not seek positions of authority over others.

Fits in with their society.

Supports their nation.

Supports the law when advantageous to do so.

Is not concerned with politics, most likely.

Will keep his word, generally.

Will take risks if the benefits are great.

Will not aid family members in need if personal discomfort is required.

Will not betray a family member, unless the circumstances are dire.

Has few close friends and would never betray those he has, unless circumstances are dire.

Is generally well liked by his community, but normally will not seek to improve the community.

Will support his nation when profitable to do so, but will not act against his nation if profitable.

Believes people deserve the treatment they are willing to endure.

Is not concerned with those less fortunate.

Will not harm others for profit.

A true neutral government rarely influences the community. Those in power prefer to pursue their private goals. True neutral societies tend to adopt whatever government seems most expedient at the moment. A particular form of government lasts as long as the ruler or dynasty in power can maintain it. The people cooperate when it suits them. Such true neutral territories often act as buffer states between lands of extreme alignment difference (for example, between a lawful good barony and a vile chaotic evil principality). They shift allegiance artfully to preserve their borders against the advances of both sides in a conflict.

The ideal government for this alignment is an authoritarian state with codified laws supporting a social order. Whether the social order supports altruistic actions or egoistic actions is of no concern to the followers of this alignment. Lawful neutral beings want the power of the state to be used to maintain the social order. Any form of justice that maintains the social order is desirable.

TRUE NEUTRAL

The "true" neutral looks upon all other alignments as facets of the system of many things. Thus, each aspect--evil and good, chaos and law--of things must be retained in balance to maintain the status quo; for things as they are cannot be improved upon except temporarily, and even then but superficially. Nature will prevail and keep things as they were meant to be, provided the "wheel" surrounding the hub of nature does not become unbalanced due to the work of unnatural forces--such as human and other intelligent creatures interfering with what is meant to be. Absolute, or true, neutral creatures view everything which exists as an integral, necessary part or function of the entire cosmos. Each thing exists as a part of the whole, one as a check or balance to the other, with life necessary for death, happiness for suffering, good for evil, order for chaos, and vice versa. Nothing must ever become predominant or out of balance. Within this naturalistic ethos, humankind serves a role also, just as all other creatures do. The may be more or less important, but the neutral does not concern himself or herself with these considerations except where it is positively determined that the balance is threatened. Absolute neutrality is the central or fulcrum position quite logically, as the neutral sees all other alignments as parts of a necessary whole. This alignment is the narrowest in scope. (1)

True neutral characters are concerned with their own well-being and that of the group or organization which aids them. They may behave in a good manner to those that they consider friends and allies, but will only act maliciously against those who have tried to injure them in some way. For the rest, they do not care. They do not wish ill on those they do not know, but they also do not care when they hear of evil befalling them. Better for others to suffer the evil than the true neutral and his allies. If an ally is in need, the true neutral will aid him, out of genuine love or because he may be able to count on that ally a little more in the future. If someone else is in need, they will weigh the options of the potential rewards and dangers associated with the act. If an enemy is in need, they will ignore him or take advantage of his misfortune.

True neutrals are offended by those who are opinionated or bigoted. A "hell-fire and brimstone" lawful good priest is just as offensive as a neutral evil racial supremacist in their eyes. They do not necessarily strive for philosophical balance. In fact, they may avoid philosophical considerations altogether. A true neutral may take up the cause of his nation, not because he necessarily feels obligated to do so, but because it just makes sense to support the group that protects your way of life. True neutrals tend to believe in lex talionis forms of justice.

However, a true neutral being with a highly philosophical outlook may hold that law, chaos, good, and evil are all necessary forces in the universe. But all are of equal import, and none should be allowed to take precedence over another, unless an imbalance should be perceived--in which case corrective steps must be taken until the balance is righted once again. Hence, the motives of a highly philosophical true neutral character are perhaps the most difficult for any other alignment to fathom, for such a true neutral being will usually act first to preserve the balance, second if he deems it his business, and third if it is in his own best interests. For these reasons, being nature's mediators, true neutral characters should be diplomatic and tactful, but they may also come across as being strange and enigmatic until one gets to know them and their "world view" better. This is because some true neutral beings look far beyond the immediate situation to the overall balance of the cosmos. Most true neutral characters will, throughout their lives, tend more or less toward one of the other alignments, dependent upon their perception of the state of the world and what force should be balanced. Such a "deviation" will be temporary, until the true neutral being recognizes and modifies his actions in accordance with the new balance. For example, once the strong evil forces in an area have been conquered, and the balance restored, the true neutral character will stop acting "good." In addition, this attitude of balance will ordinarily be reflected in a true neutral's choice of companions and should thus be demonstrated with reasonable consistency. As all things in the cosmos are equally important and necessary, life is as valuable as death to the true neutral being, because life is inevitably followed by death. In this character's view, one's time will come when it is supposed to come, and no sooner or later. (4)

True neutral is typically the most misunderstood of all alignments. One common misconception is thinking that true neutral characters seek a balance by deliberately following a certain alignment one day and an entirely different alignment the next. Such behavior

makes true neutral characters unpredictable, and the cumulative effect promotes chaos more than anything else. True neutral characters tend to remain nonjudgmental and uncommitted to any moral, legal, or philosophical system beyond the basic tenets of their own society. Despite this fact, true neutral beings do not resent being into struggles involving different viewpoints. True neutral individuals do not lack interest, ambition, or passion--they value their own well-being and that of friends and loved ones. They may struggle passionately on behalf of themselves or others, as well as feel compassion for those they barely know. In fact, since most humans are true neutral, it is the alignment of the majority of people encountered in day-to-day situations. (8)

A true neutral character will keep his word if in his best interest. He may attack an unarmed foe if he feels it necessary. He will not kill, but may harm an innocent. He may use torture to extract information, but never for pleasure. He will never kill for pleasure, only in self-defense or in the defense of others. A true neutral character may use poison as long as there is an overwhelming need. He will help those in need if it is in his best interest and works well alone or in a group. He responds well to higher authority until that authority attempts to use the law to hamper his ability to pursue his own self-interest. He will follow the law unless breaking it is in his best interest and he's reasonably sure that he will not be caught. He will never betray a family member, comrade, or friend unless the situation is dire. True neutral characters are indifferent to the concepts of self-discipline and honor, finding them useful only if they can be used to advance their own interests. (5)

Here are some possible adjectives describing true neutral characters: diplomatic, judgmental, enigmatic, aloof, distant, self-reliant, mediatory, even-handed, fair, indifferent, and impartial.

Well known true neutral characters from film or literature include: The Watchers (Marvel Comics), Horace Slughorn (Harry Potter), and Tom Bombadil (Lord of the Rings).

THE PHILOSOPHY OF NEUTRALITY

True neutral is the philosophy that harmony and freedom are both important in society and that altruism and egoism are both legitimate ends. It is a philosophy of pure equitistic consequentialism.

THE TRUE NEUTRAL TEN COMMANDMENTS

A list of Ten Commandments for a true neutral religion may look like this:

1. You shall avoid lies.
2. You shall not kill the innocent.
3. You shall not murder.
4. You shall help the needy if such action aids yourself.
5. You shall honor those who honor you.
6. You shall follow the law unless breaking the law can advance you without harming others.
7. You shall not betray others unless your life is in jeopardy.
8. You shall aid those who aid you and harm those who harm you.
9. You shall not promote an extreme viewpoint.
10. You shall advance yourself without harming others.

TEN TRUE NEUTRAL SINS

Likewise, a true neutral religion may list the following as sins. This list is given in the order of least severe infraction to most severe.

1. Trying to persuade others to take a stance on a moral or ethical issue.
2. Failing to assist a friend or ally.
3. Killing for any reason other than survival.
4. Breaking your word to a friend or ally, unless life is threatened.
5. Needless torture.
6. Making a sacrifice for someone unrelated to you.
7. Refusing to kill when important to your survival.
8. Betraying an ally or friend, unless life is in danger.
9. Showing mercy to a dire enemy.
10. Taking sides in a conflict that doesn't affect your survival.

THE TRUE NEUTRAL ADVENTURER

The following two lists detail common actions undertaken during "adventuring" that are considered honorable and dishonorable for the true neutral alignment. An honorable action is one that is in keeping with the spirit of this alignment, while dishonorable actions tend to be those which bring shame to the character in the eyes of his or her alignment peers. Note that an action which is considered honorable by one alignment may be considered dishonorable by another alignment and vice versa.

The following actions are honorable for this alignment:

Defeating a superior opponent

Dirty Fighting

Fleeing a fight with a superior opponent

Gloating over a victory

Perpetrate humiliating prank on enemy

The following actions are dishonorable for this alignment:

Allowing the enemy to attack first

Being taken prisoner

Convicted of a crime

Defeated by an inferior opponent

Killing a host who has provided you food or shelter

Surrendering

Treason

This philosophy holds that people should pursue a rational self-interest while balancing the needs of the state or social order with the freedom of individuals to pursue their own agenda. True neutral can also be associated with ethical equitism and skepticism. As the philosophical "average" of altruism and egoism, equitism holds that harm to others should be minimized when advancing the self and that harm to the self should be minimized when advancing others.

True neutral philosophers generally maintain that there is metaphysical balance in the multiverse and thus may support doctrines of soft determinism, pragmatism, conventionalism, and/or instrumentalism. They may believe in free will or choice. They could also embrace skepticism or suspend judgment on philosophical issues. They tend to be moral relativists, holding that values differ from society to society, from person to person; that they are conditioned by the peculiarities of the society in which they arise; that they are not universally applicable at all times or in all places; and that they are correct or incorrect, desirable or undesirable only relative to whether or not they conform to a common norm or to common acceptance.

The ideal government for this alignment is any social order that balances the needs of the state and the individual and allows beings to pursue their own interests as long as they do not violate the rights of others. True neutral beings want the benefits of the social order to be applied equally to all. Any form of justice that is fair and impartial is desirable.

CHAOTIC NEUTRAL

Above respect for life and good, or disregard for life and promotion of evil, the chaotic neutral places randomness and disorder. Good and evil are complimentary balance arms. Neither are preferred, nor must either prevail, for ultimate chaos would then suffer. This view of the cosmos holds that absolute freedom is necessary. Whether the individual exercising such freedom chooses to do good or evil is of no concern. After all, life itself is law and order, so death is a desirable end. Therefore, life can only be justified as a tool by which order is combated, and in the end it too will pass into entropy. (1)

Chaotic neutral characters believe that there is no order to anything, including their own actions. With this as a guiding principle, they tend to follow whatever whim strikes them at the moment. Good and evil are irrelevant when making a decision. Chaotic neutral characters are extremely difficult to deal with.

CHAOTIC NEUTRAL AND SOCIETY

A chaotic neutral being...

Is not concerned with the desires of family members.

Values flexible relationships with romantic partners.

Considers himself above the law.

Finds most people to be narrow-minded and inflexible.

Believes those who seek to rule others are, by nature, corrupt.

Seeks to undermine the authority figures of his community or nation.

Finds the legal procedures of his nation corrupt.

Believes luck determines wealth.

Will break any contract when he feels like it.

Will not betray a family member, unless the circumstances are dire.

Has few close friends and would never betray those he has, unless circumstances are dire.

Is generally well liked by his community, but normally will not seek to improve the community.

Will support his nation when profitable to do so, but will not act against his nation if profitable.

Believes people deserve the treatment they are willing to endure.

Is not concerned with those less fortunate.

Will not harm others for profit.

A chaotic neutral government is unpredictable, influencing the community in difference ways at different times. In a truly chaotic neutral society there is no government. Anarchy is the rule. A stranger to such a town may feel as if he has ridden into a town of total lawlessness.

Such characters have been known to cheerfully and for no apparent purpose gamble away everything they have on the roll of a single die. They are almost totally unreliable. In fact, the only reliable thing about them is that they cannot be relied upon! (2)

Chaotic neutral characters like to indulge in everything. This is the insurgent, the con-man, gambler, and high roller; the uncommitted freebooter seeking nothing more than self-gratification. This type of character will at least consider doing anything if they can find enjoyment or amusement. Life has meaning, but theirs has the greatest meaning. According to chaotic neutrals, laws and rules infringe on personal freedom and were meant to be broken. This character is always looking for the best deal, and will work with good, neutral, or evil to get it; as long as he comes out of the situation on top. The chaotic neutral is constantly teetering between good and evil, rebelling, and bending the law to fit his needs. (3)

Chaotic neutrals can also be completely random and unpredictable. They may shift allegiances at a moment's notice, or remain with a leader for years. The chaotic neutral character feels that there is no plan at all for the universe. Things just happen. They tend to believe in luck and chance, rather than fate or destiny. They don't care what happens to others, yet will not necessarily go out of their way to harm others. If someone stands in the way of their happiness, they may kill that individual or move on to something else. Their priorities tend to change as they experience new things in life. They may even appear to adhere to another alignment for some length of time, only to switch at an inappropriate moment. They can be the worst tricksters, conning people, not for gain, but for sheer amusement. The chaotic neutral may not be driven by fame or wealth, but may only take actions just to see what happens.

In direct opposition to the lawful neutral being, this character views ultimate freedom and disorder as most desirable. He sees good and evil in a secondary role, and neither should be allowed to interfere with pure chaos. Whether the individual chooses to do good or evil is of no concern. Violence is not a chaotic neutral trait, but adherents will often not hesitate to use intimidation and non-lethal violence to achieve their goals. These characters will almost always seek some selfish goal (such as acquiring wealth) in addition to the promotion of universal disorder, and are thus seen as "greedy" by others. Naturally, the chaotic neutral being won't see this as greed, but rather as "self-fulfillment."

Thus, respect for others does not stand in the way of the pursuit of individuality. Since death is inevitable anyway, the chaotic neutral being isn't averse to speeding certain creatures on their ways if it's deemed necessary, although he won't go out of his way to inflict pain and suffering like an evil being would. Life can only be justified as a tool by which order is combated. (4)

A chaotic neutral character will keep his word if it serves his interests. He may attack an unarmed foe if he feels it necessary. He will not kill, but may harm an innocent. He may use torture to extract information, but never for pleasure. He may kill for pleasure, but is not likely to do so. A chaotic neutral character may use poison. He may help those in need and he prefers to work alone, as he values his freedom. He does not respond well to higher authority, is distrustful of organizations, and will disregard the law in pursuing his self-interest. He may betray a family member, comrade, or friend, but only in the most dire of situations. Chaotic neutral characters do not respect the concepts of self-discipline and honor, because they believe such concepts limit freedom to advance their self-interest. (5)

Here are some possible adjectives describing chaotic neutral characters: unreliable, independent, greedy, inconsistent, unpredictable, selfish, disorderly, anarchic, self-centered, confusing, unfettered, free, and individualistic.

Well known chaotic neutral characters from film or literature include: Captain Jack Sparrow (Pirates of the Caribbean), Q (Star Trek), Peeves the Poltergeist (Harry Potter), and Conan the Barbarian.

THE PHILOSOPHY OF CHAOTIC NEUTRAL

Chaotic neutral is the philosophy that the pursuit of liberty and freedom is a desirable end in and of itself. It is a philosophy of pure equitistic individualism. This philosophy holds that the best way for all beings to pursue a rational self-interest is in a society devoid of social order. By putting the needs of the individual ahead of the needs of the state or social order, each being can advance its own self-interest with a minimum of interference from others. Chaotic neutral can also be associated with ethical equitism, ethical hedonism, and various forms of existentialism. As the philosophical "average" of altruism and egoism, equitism holds that harm to others should be minimized when advancing the self and that harm to the self should be minimized when advancing others.

THE TEN CHAOTIC NEUTRAL COMMANDMENTS

A list of Ten Commandments for a chaotic neutral religion may look like this:

1. You shall lie to promote your freedom.
2. You shall not kill the innocent.
3. You shall not murder.
4. You shall help the needy if such action promotes your freedom.
5. You shall honor no authority above yourself.
6. You shall break the law whenever convenient.
7. You shall not betray others unless your life is in jeopardy.
8. You shall not aid enemies of freedom or those who promote law.
9. You shall pursue pleasure.
10. You shall promote unlimited freedom for yourself.

TEN CHAOTIC NEUTRAL SINS

Likewise, a chaotic neutral religion may list the following as sins. This list is given in the order of least severe infraction to most severe.

1. Showing respect for self-discipline, authority, or institutions unless trickery is involved.
2. Failing to pursue pleasure.
3. Placing fear of the law or duty above personal desire.
4. Keeping your word to a peer when breaking your word would keep you out of danger or provide amusement.
5. Refusing to exert power over others or actively sow dissension when appropriate.
6. Following a law when opportunity for mischief, personal gain, or excitement presents itself.
7. Turning down a chance to trick, cheat, or lie to a being for personal gain or amusement.
8. Actively joining or maintaining an existing government, power structure, or other institution for reasons other than trickery, destruction, or mayhem.
9. Actively hindering change.
10. Actively inducing boredom. Aiding the forces of Law and Order.

THE CHAOTIC NEUTRAL ADVENTURER

The following two lists detail common actions undertaken during "adventuring" that are considered honorable and dishonorable for the chaotic neutral alignment. An honorable action is one that is in keeping with the spirit of this alignment, while dishonorable actions tend to be those which bring shame to the character in the eyes of his or her alignment peers. Note that an action which is considered honorable by one alignment may be considered dishonorable by another alignment and vice versa.

The following actions are honorable for this alignment:

Dirty Fighting
Fleeing a battle that's obviously going poorly
Gloating over a victory
Perpetrate humiliating prank on enemy
Refusing a fair contest/challenge
Taunting an enemy into fighting
Walking away from a challenge

The following actions are dishonorable for this alignment:

Allowing a disarmed enemy to pick up his weapon
Allowing the enemy to attack first
Being taken prisoner
Killing a host who has provided you food or shelter
Refusing medical treatment for the good of the party
Surrendering
Treason

The ideal government for this alignment is an minimalist state or anarchy supporting a social order in which they are allowed maximum freedom. Whether the social order supports altruistic actions or egoistic actions is of no concern to the followers of this alignment. Chaotic neutral beings want the power of the state to be as weak as possible, or preferably, non-existent. Chaotic neutrals generally support justice systems that allow maximum freedom for individuals to pursue their own personal agendas.

LAWFUL EVIL AND SOCIETY

A lawful evil being...

Respects the authority figures in his family and obeys their mandates.

Values lifelong commitment to a romantic partner.

Obeys all personal contracts.

Respects the laws and authority figures of the community and nation.

Considers public service in a leadership role an honor.

Supports the legal procedures of the nation, without regard to their own discomfort.

Seeks secure employment, believing hard work will pay off in the end.

Will betray law-breaking family members for personal gain. Will not betray family if loyal.

Will betray law-breaking friends if profitable. Will not betray loyal friends.

Will seek to undermine his community and nation, if profitable and legal.

Is not trusted by the community and may have enemies.

Will kill others to get ahead.

Uses any legal means necessary to evade justice.

Will use wealth to destroy others.

A community with a lawful evil government usually has a codified set of laws, which most people obey out of fear of harsh punishment. The government is marked by its severe laws, involving harsh punishments regardless of guilt or innocence. Laws are not intended to preserve justice so much as to maintain the status quo. Social class is crucial. Bribery and corruption are often ways of life. Adventurers, since they are outsiders who may be foreign agents, are viewed with great suspicion. Lawful evil kingdoms often find themselves quashing rebellions of oppressed peasants clamoring for humane treatment.

Chaotic neutral philosophers generally maintain that there is metaphysical chaos in the multiverse and thus may support doctrines of indeterminism, casualism, tychism, and/or accidentalism. They may believe that fortune or chance determine all outcomes. They tend to be moral subjectivists, holding that values are expressions of emotions, attitudes, reactions, feelings, thoughts, wishes, and desires, and have no independent objective or external reality or reference in the real world.

The ideal government for this alignment is an minimalist state or anarchy supporting a social order in which they are allowed maximum freedom. Whether the social order supports altruistic actions or egoistic actions is of no concern to the followers of this alignment. Chaotic neutral beings want the power of the state to be as weak as possible, or preferably, non-existent. Chaotic neutrals generally support justice systems that allow maximum freedom for individuals to pursue their own personal agendas.

LAWFUL EVIL

Creatures of this alignments are great respecters of laws and strict order, but life, beauty, truth, freedom, and the like are held as valueless, or at least scorned. By adhering to stringent discipline, those of lawful evil alignments hope to impose their yoke upon the world. Obviously, all order is not good, nor are all laws beneficial. Lawful evil creatures consider order as the means by which each group is properly placed in the cosmos, from the lowest to the highest, strongest first, weakest last. Good is seen as an excuse to promote the mediocrity of the whole and suppress the better and more capable, while lawful evilness allows each group to structure itself and fix its place as compared to others, serving the stronger, but being served by the weaker. (1)

These characters believe in using society and its laws to benefit themselves. Structure and organization elevate those who deserve to rule as well as provide a clearly defined hierarchy between master and servant. To this end, lawful evil characters support laws and societies that protect their own concerns. If someone is hurt or suffers because of a law that benefits lawful evil characters, too bad. Lawful evil characters obey the law out of fear of punishment. Because they may be forced to honor an unfavorable contract or oath they have made, lawful evil characters are usually very careful about giving their word. Once given, they break their word only if they can find a way to do it legally, within the laws of the society. (2)

The cliché that there is "No honor among thieves" is false when dealing with the lawful evil character. This is a person who is driven to attain his goals through force, power, and intimidation. Yet the lawful evil stands apart from the norm, with his own, personal, code of ethics. He expects loyalty from his minions, punishing disloyalty and treachery with a swift merciful death. A lawful evil character will define his terms and live by them, whether anyone else likes it or not. (3)

Lawful evil characters value the allegiances that they have with their cause, government, religion, or other organization. They also value those individuals that they call allies. Betraying a friend is just as much a transgression for the lawful evil as it is for the lawful good. Lawful evil characters always try to work within the law, since it's the safest way to ensure your own success. Breaking the law results in possible punishment and forfeiture of both wealth and power, and the lawful evil is loath to give up what he has attained through his own determination. These characters also like to use the law to destroy their enemies. If a lawful evil can find devastating evidence of a rival's wrongdoing, you can be assured that he will use this information to his own advantage.

This character seeks to increase his power over others within the hierarchy of the universe, with the strongest first and the weakest last. Naturally, most adherents of this alignment wish to be first. Like the other two lawful alignments, the lawful evil being normally holds that strict order is of utmost importance, but he sees it as necessary to further the ends of the deserving (strong) over the undeserving (weak and worthless). Usually it is that being's own ends that are to be promoted above all others, but he respects the will of the group and the power and authority of those above him--unless he believes his superiors are not deserving of that position. A lawful evil being is seldom subject to the secular laws of good society in general, as he sees those laws as restrictive and unfair because they deny the worthy their proper place. So-called "good" is seen as a means by which the undeserving are placed and maintained in positions of power, whereas each person should be allotted his place by his leaders according to personal merit. Life is valueless to the lawful evil character; those too weak to defend their possessions and positions don't deserve to have them in the first place. (4).

A lawful evil character will keep his word if he gives it and will never lie, although he may mislead or withhold information. He will attack and kill an unarmed foe and will harm an innocent. He will use torture to extract information, but never for pleasure.

THE LAWFUL EVIL CODE

A code of conduct for a lawful evil organization may look like this:

1. You shall not lie.
2. You shall harm the innocent to advance yourself or promote order.
3. You shall kill to advance yourself or promote order.
4. You shall not aid the weak.
5. You shall honor legitimate authority that promotes you and your comrades.
6. You shall follow the law.
7. You shall not betray others.
8. You shall not aid criminals or those who protect the weak.
9. You shall use the law to advance yourself and your comrades.
10. You shall seek unlimited power over others and unlimited order in society.

TEN LAWFUL EVIL SIGNS OF WEAKNESS

Likewise, a lawful evil character may consider the following as signs of weakness. A sign of weakness indicates that the character is straying from the cruel tenets of the lawful evil philosophy. This list is given in the order of least severe infraction to most severe.

1. Failing to use the law to harm others, even when there is no chance for personal gain.
2. Failing to assist or avenge a peer.
3. Failing to dominate those not worthy of respect.
4. Breaking your word to your peer or ally.
5. Refusing to punish the disobedient. Not pursuing vengeance when appropriate.
6. Failing to commit cruel acts that are in your best interest.
7. Failing to further your cause when opportunity presents.
8. Turning down a chance to gain power or wealth. Failing to corrupt an institution or being for material gain.
9. Betraying your superior without cause. Breaking your word to your superior.
10. Aiding the forces of Freedom and Goodness. Breaking a sacred oath.

THE LAWFUL EVIL ADVENTURER

The following two lists detail common actions undertaken during "adventuring" that are considered honorable and dishonorable for the lawful evil alignment. An honorable action is one that is in keeping with the spirit of this alignment, while dishonorable actions tend to be those which bring shame to the character in the eyes of his or her alignment peers. Note that an action which is considered honorable by one alignment may be considered dishonorable by another alignment and vice versa.

The following actions are honorable for this alignment:

Allowing a disarmed enemy to pick up his weapon
Allowing the enemy to attack first
Allowing the enemy to remove their dead/wounded from the field
Defeating a superior opponent
Delivering death blow to a helpless opponent
Desecrating an enemy's corpse
Gloating over a victory
Neglecting to properly bury a member of one's own race
Paying off an extortionist or shake-down
Reporting illegal actions to the authorities
Taking a bribe
Taking prisoners
Taunting an enemy into fighting
Unjustly slaying a prisoner or unarmed opponent who has yielded

The following actions are dishonorable for this alignment:

Accused of crime (innocent or not)
Being taken prisoner
Convicted of a crime
Defeated by an inferior opponent
Falsely claiming the 'bragging rights' that belong to another or outright lying
Fleeing a battle that's obviously going poorly
Fleeing a fight with a superior opponent
Fleeing a fight with an equal opponent
Killing a host who has provided you food or shelter
Picking up the funeral expenses of someone you slew in combat
Refusing a fair contest/challenge
Saving the life of another at great risk to own self
Surrendering
Taking an arrow or hit for someone else
Treason
Walking away from a challenge

He will kill only to advance himself, never for pleasure. A lawful evil character will use poison. He will not help those in need without a reward and he prefers to work with others. He responds well to higher authority, is trustful of organizations, and will always follow the law. He will never betray a family member, comrade, or friend. Lawful evil characters respect the concepts of self-discipline and honor. (5)

Here are some possible adjectives describing lawful evil characters: cruel, vengeful, proud, callous, hostile, taciturn, malevolent, calculating, plotting, merciless, domineering, severe, tyrannical, commanding, organized, and respectful of authority and power.

Well known lawful evil characters from film or literature include: Darth Vader (Star Wars), Magneto (Marvel Comics), Dolores Umbridge (Harry Potter), and the Borg (Star Trek, the Next Generation).

THE PHILOSOPHY OF LAWFUL EVIL

Lawful evil is the philosophy that the self is best advanced through the apparatus of the state. It is a philosophy of egoistic collectivism. This philosophy holds that people should behave egoistically and that the state exists to elevate the worthy to positions of power. Lawful evil can also be associated with rule egoism, universal ethical egoism, and social Darwinism.

Lawful evil philosophers generally maintain that there is metaphysical order in the multiverse and thus may support doctrines of hard determinism, predeterminism, fatalism, predestination, and/or necessitarianism. They may believe in fate or destiny. They tend to be moral objectivists, holding that values exist in the external world independently of and external to our comprehension of them; that they can be found and known; and that they must be used as principles for human judgments and conduct.

The ideal government for this alignment is an authoritarian state with codified laws supporting a social order in which radical egoism is rewarded and altruism is punished. Lawful evil beings want the power of the state to be used for the benefit of the self. Retributive justice is used to punish those who threaten the social order.

NEUTRAL EVIL

The neutral evil creature views law and chaos as unnecessary considerations, for pure evil is all-in-all. Either might be used, but both are disdained as foolish clutter useless in eventually bringing maximum evilness to the world. Similar to the neutral good alignment, that of neutral evil holds that neither groups nor individuals have great meaning. This ethos holds that seeking to promote weal for all actually brings woe to the truly deserving. Natural forces which are meant to cull out the weak and stupid are artificially suppressed by so-called good, and the fittest are wrongfully held back, so whatever means are expedient can be used by **the** powerful to gain and maintain their dominance, without concern for anything. (1)

Neutral evil characters are primarily concerned with themselves and their own advancement. They have no particular objection to working with others or, for that matter, going it on their own. Their only interest is in getting ahead. If there is a quick and easy way to gain a profit, whether it be legal, questionable, or obviously illegal, they take advantage of it. Although neutral evil characters do not have the every-man-for-himself attitude of chaotic characters, they have no qualms about betraying their friends and companions for personal gain. They typically base their allegiance on power and money, which makes them quite receptive to bribes. (2)

The neutral evil is an unscrupulous, self-serving character who is only out for himself. Power, glory, wealth, position, and anything that will make his life more comfortable is his goal. It matters not who gets caught in the middle, as long as he comes out smelling like a rose. This person will lie, cheat, and kill anyone to attain his personal goals. (3)

These characters willingly cooperate with anyone who will further their own ends. They often seek the easy road to fame and fortune, with little concern for the people they trample along the way. They value strength and ability alone. If the neutral evil can use laws to weaken those who stand in the way of his success, he will use them. If he must resort to breaking the law, he will. He has no preference for either method. The only important thing is that he gets what he wants. Laws are tools to use against people, as well as their own sense of honor.

For the neutral evil being, law and chaos are beneath consideration in this character's quest for pure evil in the universe. At the root of this character's personality is the word "wicked." Evil is his goal; natural and man-

NEUTRAL EVIL AND SOCIETY

A neutral evil being...

Values his family, but will not heed their requests necessarily.

Will provide for friends, and expects to be repaid in some manner.

Does not seek positions of authority over others.

Fits in with their society.

Supports their nation when profitable.

Supports the law when advantageous to do so.

Is not concerned with politics, most likely.

Will keep his word only if it is profitable.

Will take risks if the benefits are great.

Will betray family members for personal gain.

Will betray friends if profitable.

Will seek to undermine his community and nation, especially if profitable.

Is not trusted by the community and may have enemies.

Will kill others to get ahead.

Uses any means necessary to evade justice.

Will use wealth to destroy others.

The residents of a community with a neutral evil government are usually oppressed and subjugated, facing a dire future. Neutral evil societies tend to adopt whatever government seems most expedient at the moment. A particular form of government lasts as long as the ruler or dynasty in power can maintain it. Neutral evil countries tend to be brutal dictatorships. Transfers of power are usually marked by shifts in government, often bloody coups. There is a certain apathy about politics and government.

THE NEUTRAL EVIL CODE

The personal code of a neutral evil character may look like this:

1. You shall lie to advance yourself.
2. You shall harm the innocent to advance yourself.
3. You shall kill to advance yourself.
4. You shall not aid the weak.
5. You shall honor those who are stronger.
6. You shall follow the law only to advance yourself.
7. You shall betray friends, family, community, and nation to advance yourself.
8. You shall not aid those who protect the weak.
9. You shall not show mercy to enemies.
10. You shall seek unlimited power over others.

TEN NEUTRAL EVIL SIGNS OF WEAKNESS

Likewise, a neutral evil character may consider the following as signs of weakness. A sign of weakness indicates that the character is straying from the cruel tenets of the neutral evil philosophy. This list is given in the order of least severe infraction to most severe.

1. Failing to show malice or inflict pain upon an innocent when it would be pleasurable to do so.
2. Not challenging a clearly weak leader for leadership.
3. Keeping your word when doing so would interfere with personal gain.
4. Refusing to commit cruel act that would harm your enemy or rival when appropriate.
5. Making a sacrifice to help another when not important to your survival.
6. Failing to commit cruel acts that are in your best interest.
7. Refusing to kill for personal gain or wealth.
8. Turning down a chance to gain power or wealth.
9. Showing mercy to one who is opposed to you or your cause.
10. Aiding the servants of Goodness.

THE NEUTRAL EVIL ADVENTURER

The following two lists detail common actions undertaken during "adventuring" that are considered honorable and dishonorable for the neutral evil alignment. An honorable action is one that is in keeping with the spirit of this alignment, while dishonorable actions tend to be those which bring shame to the character in the eyes of his or her alignment peers. Note that an action which is considered honorable by one alignment may be considered dishonorable by another alignment and vice versa.

The following actions are honorable for this alignment:

Accused of crime (innocent or not)
Attacking an unarmed or obviously inferior opponent
Defeating a superior opponent
Delivering death blow to a helpless opponent
Desecrating an enemy's corpse
Dirty Fighting
Falsely claiming the 'bragging rights' that belong to another or outright lying
Fleeing a fight with a superior opponent
Gloating over a victory
Neglecting to properly bury a member of one's own race
Paying off an extortionist or shake-down
Perpetrate humiliating prank on enemy
Refusing a fair contest/challenge
Reporting the illegal actions of enemies to the authorities when profitable
Taking a bribe
Taunting an enemy into fighting
Unjustly slaying a prisoner or unarmed opponent who has yielded
Walking away from a challenge

The following actions are dishonorable for this alignment:

Allowing a disarmed enemy to pick up his weapon
Allowing the enemy to attack first
Defeated by an inferior opponent
Picking up the funeral expenses of someone you slew in combat
Refusing medical treatment for the good of the party
Saving the life of another at great risk to own self
Taking an arrow or hit for someone else
Taking prisoners

made forces, if allowed to take their course, weed out the weak and useless in society. The deserving should take advantage of this condition to further their own goals by any means possible, especially to destroy weaklings who put forward "good" actions to promote the well being of all, which is just an excuse used to deny the deserving their due. To the neutral evil being, life is of no value, for those who cannot take advantage of their superiority don't deserve it, and they'll only interfere with the rightful pursuits of those who do. (4)

A neutral evil character never feels compelled to keep his word. He will attack and kill an unarmed foe (those are the best kind). He will harm and may possibly kill an innocent. He will use torture to extract information and for pleasure. He may kill for pleasure. A neutral evil character will use poison. He will not help those in need without a reward and he works well alone or in a group. He responds well to higher authority until that authority attempts to use the law to hamper his ability to pursue his own agenda. He will follow the law unless breaking it is in his best interest and he's reasonably sure that he will not be caught. He may betray a family member, comrade, or friend if it is convenient to do so and it advances his agenda. Neutral evil characters are indifferent to the concepts of self-discipline and honor, finding them useful only if they can be used to advance their own interests or gain power over others. (5)

Here are some possible adjectives describing neutral evil characters: unfeeling, uncaring, insensitive, unkind, uncooperative (unless it suits them), self-reliant, wicked, cruel, depraved, corrupt, immoral, hateful, vicious, and destructive.

Well known neutral evil characters from film or literature include: Emperor Palpatine (Star Wars), Khan Noonien Singh (Star Trek), Saruman (Lord of the Rings), Peter Pettigrew (Harry Potter), and Lex Luthor (DC Comics).

THE PHILOSOPHY OF NEUTRAL EVIL

Neutral evil is the philosophy that the self is best advanced by using whatever means necessary. It is a philosophy of egoistic consequentialism. This philosophy holds that people should behave egoistically and embrace any social order that allows them to gain the most power. Neutral evil can also be associated with act egoism, personal ethical egoism, and social Darwinism.

Neutral evil philosophers generally maintain that there is metaphysical balance in the multiverse and thus may support doctrines of soft determinism, pragmatism, conventionalism, and/or instrumentalism. They may

believe in free will or choice. They could also embrace skepticism or suspend judgment on philosophical issues. They tend to be moral relativists, holding that values differ from society to society, from person to person; that they are conditioned by the peculiarities of the society in which they arise; that they are not universally applicable at all times or in all places; and that they are correct or incorrect, desirable or undesirable only relative to whether or not they conform to a common norm or to common acceptance.

The ideal government for this alignment is any social order in which radical egoism is rewarded and altruism is punished. Neutral evil beings will try to secure the most power for themselves and will use the power of the state to accomplish this or ~~the~~ act against the state, if more power can be gained in this manner. Retributive justice is favored by neutral evil beings.

CHAOTIC EVIL

The major precepts of this alignment are freedom, randomness, and woe. Laws and order, kindness, and good deeds are disdained. Life has no value. By promoting chaos and evil, those of this alignment hope to bring themselves to positions of power, glory, and prestige in a system ruled by individual caprice and their own whim. The chaotic evil creature holds that individual freedom and choice is important, and that other individuals and their freedoms are unimportant if they cannot be held by the individuals through their own strength and merit. Thus, law and order tends to promote not individuals but groups, and groups suppress individual volition and success. (1)

These characters are the bane of all that is good and organized. Chaotic evil characters are motivated by the desire for personal gain and pleasure. They see absolutely nothing wrong with taking whatever they want by whatever means possible. Laws and governments are the tools of weaklings unable to fend for themselves. The strong have the right to take what they want, and the weak are there to be exploited. When chaotic evil characters band together, they are not motivated by a desire to cooperate, but rather to oppose powerful enemies. Such a group can be held together only by a strong leader capable of bullying his underlings into obedience. Since leadership is based on raw power, a leader is likely to be replaced at the first sign of weakness by anyone who can take his position away from him by any method. (2)

This is the category where the megalomaniacs, and the violent and most despicable characters fall. This is the

CHAOTIC EVIL AND SOCIETY

A chaotic evil being...

Is not concerned with the desires of family members.

Values flexible relationships with romantic partners.

Considers himself above the law.

Finds most people to be narrow-minded and inflexible.

Believes those who seek to rule others are, by nature, corrupt.

Seeks to undermine the authority figures of his community or nation.

Finds the legal procedures of his nation corrupt.

Believes luck determines wealth.

Will break any contract when he feels like it.

Will betray family members for personal gain.

Will betray friends if profitable.

Will seek to undermine his community and nation, especially if profitable.

Is not trusted by the community and may have enemies.

Will kill others to get ahead.

Uses any means necessary to evade justice.

Will use wealth to destroy others.

The residents of a community with a chaotic evil government live in abject fear because of the unpredictable and horrific situations continually placed upon them. In a chaotic evil society, the people are ruled by, and live in fear of, those more powerful than themselves. Local government usually amounts to a series of strongarm bosses who obey the central government out of fear. People look for ways to gain power or keep the power they've got. Assassination is an accepted method of advancement, along with coups, conspiracies, and purges. Adventurers are often used as pawns in political power games, only to be eliminated when the adventurers themselves become a threat.

cruel, brutal killer who trusts no one and has no value for anyone or anything that gets in his way. Individual freedom and choice is important, and the freedom of other individuals are unimportant if they cannot be held by their own strength and merit. (3)

The chaotic evil also likes to corrupt the innocent and virtuous. People are play-things to the chaotic evil, to be used and manipulated for their own personal pleasure. A chaotic evil doesn't necessarily go after individuals just because they stand in the way of their success, they will harm or destroy people for the sheer pleasure of it.

The chaotic evil being seeks personal freedom at the expense of those who aren't smart, capable, or ruthless enough to get what they want. If what this being wants will come only at the price of the freedom and happiness (not to mention the lives) of others, so be it. Other individuals and their freedoms are unimportant if those freedoms cannot be held through their own strength and merit. All else being equal, the chaotic evil being is perhaps the most dangerous character of all, because one rarely knows how he might react to a given encounter. For reasons often known only to himself, he could ignore some situations, then suddenly explode in apparently identical ones. His behavior patterns are almost impossible to predict, for he has probably learned to curb and control his penchant for "evil" due to the constraints of civilization. A chaotic evil being is not expected to go about insanely slaughtering and torturing everyone he meets, for he isn't usually stupid. He will realize the consequences of such activities and will participate in such pleasurable distractions only when safe from discovery. To a chaotic-evil being, the lives of others have no value and are incidental in the pursuit of ultimate freedom and personal power. (4)

A chaotic evil character never feels compelled to keep his word. He will attack and kill an unarmed foe (those are the best kind). He will kill an innocent. He will use torture to extract information and for pleasure. He will kill for pleasure. A chaotic evil character will use poison. He will not help those in need. He prefers to work alone, as he values his freedom. He does not respond well to higher authority, is distrustful of organizations, and will disregard the law in pursuing his self-interest. He will betray a family member, comrade, or friend whenever it is convenient to do so. Chaotic evil characters do not respect the concepts of self-discipline and honor, because they believe such concepts limit their ability to gain power over others. (5)

THE CHAOTIC EVIL CODE

The personal code of a chaotic evil character may look like this:

1. You shall lie whenever convenient.
2. You shall harm the innocent whenever convenient.
3. You shall kill for pleasure.
4. You shall not aid the weak.
5. You shall not honor any other before yourself.
6. You shall break the law whenever convenient.
7. You shall betray friends, family, community, and nation whenever convenient.
8. You shall harm those who protect the weak or honor laws.
9. You shall pursue all forms of pleasure.
10. You shall seek unlimited power over others and unlimited freedom for yourself.

TEN CHAOTIC EVIL SIGNS OF WEAKNESS

Likewise, a chaotic evil character may consider the following as signs of weakness. A sign of weakness indicates that the character is straying from the cruel tenets of the chaotic evil philosophy. This list is given in the order of least severe infraction to most severe.

1. Failing to show contempt and disrespect for the virtuous and noble.
2. Failing to pursue a new form of pleasure.
3. Failing to give in to a sinful or chaotic impulse.
4. Avoiding injury to others at the cost of your own pleasure.
5. Refusing to display power over underling when appropriate.
6. Refusing to commit cruel acts that are in your best interest.
7. Refusing to kill when in your best interest.
8. Turning down a chance to gain power or wealth.
9. Acting altruistically.
10. Aiding the forces of Law and Goodness.

THE CHAOTIC EVIL ADVENTURER

The following two lists detail common actions undertaken during "adventuring" that are considered honorable and dishonorable for the chaotic evil alignment. An honorable action is one that is in keeping with the spirit of this alignment, while dishonorable actions tend to be those which bring shame to the character in the eyes of his or her alignment peers. Note that an action which is considered honorable by one alignment may be considered dishonorable by another alignment and vice versa.

The following actions are honorable for this alignment:

Accused of crime (innocent or not)
Attacking an unarmed or obviously inferior opponent
Convicted of crime
Delivering death blow to a helpless opponent
Desecrating an enemy's corpse
Dirty Fighting
Falsely claiming the 'bragging rights' that belong to another or outright lying
Fleeing a fight with a superior opponent
Gloating over a victory
Killing a host who has provided you food or shelter
Neglecting to properly bury a member of one's own race
Paying off an extortionist or shake-down
Perpetrate humiliating prank on enemy
Refusing a fair contest/challenge
Reporting the illegal actions of enemies to the authorities when profitable
Taking a bribe
Taunting an enemy into fighting
Treason
Unjustly slaying a prisoner or unarmed opponent who has yielded
Walking away from a challenge

The following actions are dishonorable for this alignment:

Allowing a disarmed enemy to pick up his weapon
Allowing the enemy to attack first
Being taken prisoner
Picking up the funeral expenses of someone you slew in combat
Refusing medical treatment for the good of the party
Saving the life of another at great risk to own self
Surrendering
Taking an arrow or hit for someone else
Taking prisoners

Here are some possible adjectives describing chaotic evil characters: violent, cruel, capricious, malicious, untrustworthy, unreliable, heartless, volatile, inconsistent, uncaring, unfeeling, deceitful, discourteous, selfish.

Well known chaotic evil characters from film or literature include: Gollum (Lord of the Rings), The Joker (DC Comics), Lord Voldemort (Harry Potter), and Lore (Star Trek).

THE PHILOSOPHY OF CHAOTIC EVIL

Chaotic evil is the philosophy that the self is best advanced through the freedom to act independently. It is a philosophy of egoistic individualism. This philosophy holds that people should behave egoistically and that society exists for the sake of its individual members. Chaotic evil can also be associated with egoistic hedonism, individual ethical egoism, and social Darwinism. Political and ethical nihilism also feature heavily in chaotic evil thought.

Chaotic evil philosophers generally maintain that there is metaphysical chaos in the multiverse and thus may support doctrines of indeterminism, casualism, tychism, and/or accidentalism. They may believe that fortune or chance determine all outcomes. They tend to be moral subjectivists, holding that values are expressions of emotions, attitudes, reactions, feelings, thoughts, wishes, and desires, and have no independent objective or external reality or reference in the real world.

The ideal government for this alignment is a minimalist state or anarchy supporting a social order in which radical egoism is rewarded and altruism is punished. Chaotic evil beings believe that the best way to advance themselves is by securing the most freedom to act as possible. Retributive justice is used to punish those who act against the chaotic evil.

COMPARISONS BETWEEN ALIGNMENT COMPONENTS

THE GOOD ALIGNMENTS

In situations where goodness must be advanced in society, this is how characters of these different alignments may respond. The lawful good character will promote weal throughout society through increased legislation or a more powerful government. They will work to provide laws and procedures to protect the population against every foreseeable ill in society. They will protect citizens against abuse from unscrupulous individuals. They will advocate and construct power structures and economic systems that provide the most benefit for the population as a whole. Lawful good characters will provide equality of result. The chaotic good character will promote happiness in society by increasing freedom and allowing its citizens to decide the best way to increase prosperity for all. They will promote systems which give maximum freedom and opportunity for citizens to increase their own happiness and the happiness of others. They will ensure that the population is protected against every possible abuse by the governing system. Chaotic good characters will provide equality of opportunity. Neutral good character will build a system that promotes both harmony and freedom. They will attempt to balance opportunity and results. They will use only enough laws and order to protect the freedom of its citizens to promote prosperity and happiness for all. They will guard the population against abuses from within the power structure, but also against abuses from individuals. Neutral good characters will build a flexible social order that allows both public and private action to increase goodness in society.

THE EVIL ALIGNMENTS

In a situation where a character must kill a rival, this is how characters of these different alignments may respond. The lawful evil character will use whatever the easiest, most direct method is. He will not be concerned primarily with the rival suffering before death, and will not want to prolong the killing. He will get it done, pay someone to do it, or use an underling. It is not important that the rival know who the attacker is, better that he doesn't in case the murder attempt fails. All that is important to the lawful evil character is that the rival is eliminated in such a way that he will not appear to have broken any law. The neutral evil character will find the most painful, yet direct way to kill his enemy. He may or may not

personally commit the act, depending on how much he hates his foe. The neutral evil character may wish to dispose of his rival in a poetic manner, if fitting. The method will be cruel and heavy-handed. The rival must be taken out, but other potential rivals must get a message from this also... The chaotic evil character may use any of the above methods, but will tend to prolong the suffering of the victim to provide him with amusement. He may destroy the victim's family first to see how it affects him. He may torture his rival and play at killing him for a great length of time before finally doing him in. As long as there is amusement to be had, the chaotic evil character will keep him around.

Creatures highly dedicated to the spread of evil likewise differ in their approach depending on the law-chaos component of their alignment.

Lawful evil characters believe that the only way to impose the tyranny of their alignment over all creation is to follow an ordered course of action. Their evil society is rigidly structured, each being knowing its place and cruelly dominating all beneath this station, while being just as bullied from those above. Each creature in this hierarchy strives to follow the orders from the stronger most painstakingly--both to avoid punishment and in hopes of bettering its position in the order. To those beneath each is as harsh and cruel as possible: fearful of failure in its tasks, of being replaced by an underling. The evil ends desired might be better obtained by actions which are actually less vile than other options, but the order of lawful evil will generally perceive the most useful course rather than merely the most baneful in the short term. Lawful evil characters hate chaotic good characters most vehemently, for they see threats there to both the structure of their social system and their proposed course. What worse than both total freedom and happiness brought about only by individual achievement and character? Therefore, a lawful evil character would certainly not hesitate to ally itself with virtually any other cause if this helped to abridge the scope and influence of those creatures typifying the chaotic good. (1)

A chaotic evil character certainly has the common denominator of banefulness with those creatures who follow the ordered path of woe. They likewise oppress and enslave, torture and kill for the pure pleasure of seeing suffering and death. But while lawful evil character sees these activities as part of the structured course towards a world ruled by evil, those of chaotic evil alignment see such activities as an end in themselves. While the weaker chaotic evil creatures fear and often hate the stronger, they are ruled by

them only insofar as the reach of the stronger extends -and possibly only as long as the stronger has interest in so doing. The individual evil is more important than the collective one. Let each evil being do its best to spread evil and chaos, and the ultimate result will be a cancerous spread of the alignment. Order is next to good in undesirability, so lawful good is the antithesis of chaotic evil. Yet creatures of this alignment will not long associate to combat their hated foes, except lesser creatures under the leadership of some mighty villain or in extreme situations where the very structure of chaotic evil is threatened by some great coalition of good. (1)

The neutral evil path becomes evident as the middle road between the two opposite approaches to the precept of banefulness. The neutral evil character values both order and freedom as useful tools in the acquisition of personal power through the spread of evil. Any means that further their own agenda are embraced by neutral evil beings. The flexibility of this alignment ensures that a course of maximum evil is pursued and is not limited by considerations of either law or chaos. Structured and random acts of evil are both part of the arsenal of the neutral evil villain, who is concerned with advancing evil in the short-term and long-term. Thus, the neutral evil character will work with anyone, lawful evil, chaotic evil, or otherwise, who can aid them in their quest for total power over others. The neutral good alignment is diametrically opposed to neutral evil, so the neutral evil being is opposed to any social order that allows goodness to flourish. By destroying the works of good creatures, neutral evil beings hope to create a world where the powerful and capable are able to secure maximum benefit for the self and maximum woe for all who oppose them.

THE LAWFUL ALIGNMENTS

When operating as leaders within society, this is how characters of these three alignments may behave. The lawful neutral character will advance the aims of society and apply the law impartially to all citizens. He will follow laws and fight to ensure that all citizens follow laws. He will use legitimate means to change to social order if the state would benefit more from the change. He will promote fairness, using the law to reward those who act in accordance with the social order and punish those who act to the detriment of the state. He will tolerate corruption as long as the strength of the state is not jeopardized. The lawful neutral character will enjoy his position and its perks, but will not abuse his authority. The lawful good character will view his position as an opportunity to selflessly serve his fellow citizens. He will work to

increase weal throughout society through the apparatus of the state. He will tirelessly fight corruption and work to eliminate social ills such as poverty, uneven wealth distribution, abuse by the state, and other problems. The lawful evil character will use his position of power over others to ruthlessly pursue his own agenda using the apparatus of the state. He will follow laws and encourage all citizens to follow laws by severely punishing criminals. He will increase his own wealth and power at the expense of the population as long as he can use legal means. The lawful evil character views his position as proof of his superiority over the common rabble.

THE CHAOTIC ALIGNMENTS

Freedom means a different thing to characters of these three alignments. For the chaotic neutral character, freedom means the freedom for all beings to pursue their own self-interest without interference from authority. The chaotic neutral character realizes that there will be chances for both conflict and cooperation, but they will always seek to advance their own self-interest. They believe in the right of all beings to do what they themselves are doing (namely, pursuing self-interest). If others are advanced while the chaotic neutral character is advancing himself, this is fine. If others are diminished when he is pursuing his own interest, so be it. He will help people that help him and harm people that harm him. The chaotic good character believes that freedom means the freedom for each individual to find his own way to promote happiness and prosperity in the world. He feels that the best way to promote goodness and weal for all is to provide the most freedom. The chaotic good character wants everyone to enjoy the same right to pursue happiness as freely as possible. Chaotic evil characters believe that freedom means the freedom to take whatever action is necessary to advance the self. In the eyes of the chaotic evil character, an important way of maximizing personal freedom is to minimize the opportunity for others to pursue their own self-interest. Thus, the chaotic evil character wants maximum freedom for himself, but minimum freedom and power for everyone else. The chaotic neutral character wants maximum freedom for everyone to pursue their own ends (for good or ill). The chaotic good character wants maximum freedom for everyone to find happiness and prosperity.

COMPARISONS BETWEEN ADJACENT ALIGNMENTS

LAWFUL GOOD VS. NEUTRAL GOOD

Since neutral good characters see no inherent worth in laws, other than how well they provide for the common good, they may disagree with lawful good characters on a number of issues. Conflicts between characters of these types will center around the lawful good character always wanting to work within the law to accomplish good, even if breaking the law might result in more good for people. They will not accept the neutral good character's argument that working around the law is sometimes a better way to accomplish the spirit of the law. To lawful good characters, the letter and spirit of good laws should not be violated. They see a legal system as something that should be followed, as long as it is good, even if an illegal, or shady way might accomplish better results. Neutral good characters will be disgusted by their lawful good allies' adherence to laws, when the path is clear for them--break the law. Lawful good characters will contend that if they do not follow the law to accomplish what is right, how are they different from criminals? Their ethical sensibilities will be offended by the way that a neutral good character might do things.

NEUTRAL GOOD VS. CHAOTIC GOOD

Neutral good characters will always attempt to work within the law, but sometimes recognize the need to disobey laws for the greater good. Chaotic good characters will never consider the law in any of their decisions. If they happen to work within the law, it isn't because they made a decision to do so. Chaotic good characters feel that they know what good is, so they don't need laws to force themselves to be good. Chaotic good characters are also individualists. They will find their own way in the world and live the way they want to. Neutral good characters will avoid lies, but the chaotic good character has no aversion. The neutral good character will try to keep his word once given, but the chaotic good character will discard an oath when it no longer is useful to him in doing what is right. The chaotic good character isn't primarily concerned with providing the greatest good for the greatest number of beings. He will always behave in a manner that is considered good, but he may only be interested in a select group of beings, or he may perform acts of goodness when the mood strikes him. You never know when a chaotic good character will

take up a cause, but you can be fairly certain of when a neutral good character will.

CHAOTIC GOOD VS. CHAOTIC NEUTRAL

Chaotic good characters feel that each person must find their own way and should have total freedom to act in any manner they choose as long as they hurt no one else in the process. Chaotic neutral characters believe that everyone should do what they want, regardless of whether the actions are good or hurt others. Both will lie and cheat. The chaotic good character will cheat and lie to others only when good comes of it or to trick the evil. The chaotic neutral character will lie, cheat, and trick anyone to achieve his goals, whether that goal is amusement, power, or wealth. Chaotic good characters value the individual freedom of all creatures, while the chaotic neutral character values his own freedom, and doesn't care about the freedom of others. Chaotic neutral characters do not necessarily want others to suffer as a result of their actions, but do not care if others do suffer. They tend to behave in a good manner towards friends and allies, unless their friends and allies do not agree with them. Chaotic good characters never want others to suffer because of their actions, except those who are evil or deserve to suffer in their eyes. Chaotic neutral characters don't understand why chaotic goods are so concerned about others, while chaotic good characters feel that chaotic neutral characters are hypocritical in believing in their own freedom, but not necessarily in the right for others to have the same freedom.

CHAOTIC NEUTRAL VS. CHAOTIC EVIL

Chaotic neutral and the chaotic evil characters will disagree on the nature of freedom. Both value their own freedom above that of other beings, but the chaotic neutral character feels all creatures should be free to pursue their goals, for good or ill. They do not feel that others have the right to restrict them of their freedom, but the chaotic neutral character may restrict others. The chaotic neutral character may not be malicious in the liberties he takes. He will generally leave others alone, any evil they suffer because of his actions is incidental. Chaotic evil characters believe that freedom should only exist for those creatures strong enough to keep it. They will go out of their way to corrupt the good and destroy their works. They see no value in any individual's life, other than whatever value it has to gratify that particular chaotic evil character. Chaotic neutral characters are not

concerned with life, but do not feel that others exist for their exploitation, necessarily.

CHAOTIC EVIL VS. NEUTRAL EVIL

Neutral evil characters are the ultimate pragmatists. They will embrace any cause, no matter how vile, which furthers their goals, usually the attainment of wealth and power. What bothers neutral evil characters concerning chaotic evil characters, is their apparent lack of pragmatism and their utter unpredictability. A neutral evil character will work with others, and call them allies, if it serves his needs. The chaotic evil character, on the other hand, will sometimes prey on those who would be able to help him further his goals. Neutral evil characters see the benefits of organization, but chaotic evil characters trust no one, and see everyone and everything as either obstacles to be overcome, or pawns to be manipulated. A chaotic evil character feels that the only way individuals get ahead is by causing others to fall behind. A neutral evil character realizes that sometimes, people can work together to achieve their goals. The chaotic evil character feels that the neutral evil character unnecessarily restricts or restrains himself in that neutral evil characters claim they are out for themselves, yet they do not reap the benefits of pure freedom.

NEUTRAL EVIL VS. LAWFUL EVIL

Conflicts between lawful evil and neutral evil characters will deal with the question of loyalty. The neutral evil character's loyalty is to himself and those who aid him currently. He will not go out of his way to help another, unless he needs that individual's help in the future. The lawful evil character recognizes the need for comrades and will help those that he considers allies, even at some personal risk and cost. Whoever a lawful evil character calls an ally can expect loyalty and aid, unless he fails to support the aims of the group or organization. Woe to the person who betrays the group! The lawful evil character will not be forgiving and will seek to cause injury or kill the offender, whatever is appropriate for their crime. The neutral evil character will also make an example of those who cross him, there is no question. The difference between the neutral evil character and lawful evil character is that the neutral evil character will betray an ally for gain when the ally has done him no wrong, whereas the lawful evil character will only betray a former ally who has proven himself unworthy or if that ally betrays the group.

LAWFUL EVIL VS. LAWFUL NEUTRAL

Lawful evil and lawful neutral characters will have conflicts over the nature of laws. Lawful evil characters will support laws that further their own cause, normally meaning the gaining of wealth and power. They will want laws which ensure that their regime gets the upper hand in society. Any laws that oppress the weak will not concern them, unless they receive no benefits from this oppression. A lawful neutral character will resent a lawful evil character's attempt to control laws to benefit their own group. Lawful neutral characters want all laws to apply equally to everyone, for good or ill. They will also have contempt for the way that lawful evil characters use laws to injure or harass their enemies. To lawful neutral characters, laws exist to provide order and stability for society. To lawful evil characters, laws exist to elevate the strong and cunning to positions of power over others.

LAWFUL NEUTRAL VS. LAWFUL GOOD

Conflict between lawful neutral and lawful good characters will center around the nature of laws. Lawful good characters want laws to protect the weak and punish the wicked, while lawful neutral characters are only interested in maintaining or expanding laws to cover every foreseeable problem within society without compassion or moral judgment. Lawful neutral characters will apply laws in a rigid manner, not worrying about whether the spirit of the law is upheld. It is the letter that is important to them. The language of the social compact and the wording of laws are all they are interested in, since that is all that is apparent from written documents. A lawful good character will be just as offended by a lawful neutral character's preference of letter over spirit as they are contemptuous of the neutral good character's insistence that the spirit is more important. The lawful good character will question the utility of laws that do not take into account all circumstances to provide a just and equitable settlement that coincides with their moral beliefs. The lawful neutral character does not consider morality when applying laws, only the effectiveness of the law to keep society stable.

NEUTRAL GOOD VS. TRUE NEUTRAL

Neutral good and true neutral characters both believe that any means should be used to achieve desirable outcomes, but they disagree on exactly what types of outcomes are desirable. The neutral good character uses a variety of means to promote and further the cause of goodness, but true neutral characters are not

interested in a selfless pursuit of beneficial results for others. Where neutral good characters are altruistic, true neutral characters are interested in their own affairs. True neutral characters will behave altruistically when it comes to friends, relatives, and allies, but for the most part will return the kind of treatment they receive from others. Neutral good characters, on the other hand, will behave altruistically even when dealing with others who are not friends or relatives, and may even forgive enemies that have done them grievous harm in the past (provided their enemy has truly mended his ways). True neutral characters will not extend the olive branch in such situations and may take advantage of their enemy's weakness to protect themselves from further machinations. True neutral characters follow a morality of reciprocity. Neutral good characters follow the Golden Rule.

NEUTRAL EVIL VS. TRUE NEUTRAL

Although true neutral and neutral evil characters are both primarily interested in their own advancement and welfare, neutral evil characters ruthlessly pursue their self-interest, even at the expense of others. The true neutral character will use any means to benefit themselves, but will not follow this philosophy to its extreme conclusion through an unrestrained pursuit of self-interest. The true neutral character understands that more benefit for the self can be garnered by behaving altruistically sometimes, especially when they have been the beneficiaries of the altruistic behavior of others. If someone treats a true neutral character well, they can expect that character to treat them well. The neutral evil character does not believe that one good turn deserves another, however. The neutral evil character will of course accept the altruistic generosity of others, and may even appear to return the favor on occasion. The neutral evil character will not behave altruistically for the benefit of others, only for the benefit of the self. Any actions which seem good are merely actions which the neutral evil character has determined will give him a greater benefit in the future, often to the detriment of their benefactor. If someone treats a neutral evil character well, they can only expect good treatment from that character as long as the current relationship offers the best advantage to him. As soon as the neutral evil character can benefit to a greater degree by betraying his benefactor, he will. True neutral characters see such behavior as detrimental to self-interest (and unfair to those who have helped them) and thus will not betray benefactors. Neutral evil characters have no such qualms about burning bridges if the reward is great enough.

LAWFUL NEUTRAL VS. TRUE NEUTRAL

Lawful neutral and true neutral characters are similar in their morality. Both of these types will tend to return the treatment they receive from others. They differ in their outlook concerning legitimate authority and the structure of society. True neutral characters believe that laws should be followed as long as the law benefits themselves. They will also follow laws out of fear of punishment. If they can break a law which does not support their self-interest, and there is a good chance that they will not be caught breaking the law, true neutral characters may break laws. However, true neutral characters prefer to follow the law, because usually it is in their best interest to follow laws. Lawful neutral characters follow laws not only for their own self-interest, but also because they believe that one should always follow the law, even laws that run counter to self-interest. The lawful neutral character takes issue with the true neutral because the true neutral character will readily admit that he mostly benefits from the law, but he will not go out of his way to support the law. True neutral characters feel that lawful neutral characters are too obsessed with established laws and customs to realize that they may be better able to support their own interests by advancing personal freedom as well as law and order.

CHAOTIC NEUTRAL VS. TRUE NEUTRAL

Chaotic neutral and true neutral characters have a similar moral outlook. They tend to follow a morality of reciprocity, behaving altruistically toward benefactors and egoistically toward malefactors. Their difference involves their outlook on laws and society. The true neutral character wants to work within the law and will observe most customs and mores because it is in their best interest to do so. True neutral characters don't want to "rock the boat" but will on occasion if their self-interest is overwhelmingly served by breaking the law or flouting custom. The chaotic neutral character sees no value in laws, customs, or mores. A chaotic neutral character may appear to follow many laws, but does not do so because they believe in any inherent value to such systems. The chaotic neutral character believes in the pure freedom to pursue their own self-interest (and for others to pursue their own interests in the same manner). Although the true neutral character does not believe that the law should be followed all of the time, neither do they believe that laws are completely useless. They believe that chaotic neutral characters actually limit themselves by refusing to consider that sometimes self-interest can best be served by order in society. Chaotic neutral characters feel that true neutral characters

limit themselves by paying lip service to laws and customs that they do not necessarily support.

ALIGNMENT TRACKING

The alignment system in *Dungeons and Dragons* is difficult to use because there are no definite game rules covering alignment. Vital to any alignment system are rules to govern alignment shifts. Normally, it is left to the DM to decide if a player portrays his character's alignment correctly. If the player's roleplaying is found lacking, then the DM must use his own judgment, and the few guidelines given in the rulebooks, to decide if an alignment shift is appropriate. There are no game mechanics to fall back on.

In this system, both the ethical (law-chaos) and moral (good-evil) components of alignment are given a score on a scale of 0 to 100.

CHART 1: ETHICAL ALIGNMENT SCORES

Ethical Alignment Component	Range	Starting Score
Lawful	71-100	85
(Transition)	66-70	--
Neutral	35-65	50
(Transition)	30-34	--
Chaotic	0-29	15

CHART 2: MORAL ALIGNMENT SCORES

Moral Alignment Component	Range	Starting Score
Good	71-100	85
(Transition)	66-70	--
Neutral	35-65	50
(Transition)	30-34	--
Evil	0-29	15

The charts above show the score ranges that correspond to the various alignments. Lawful ranges from 71 to 100, chaotic ranges from 0 to 29. Neutral with respect to law and chaos ranges from 35 to 65. Good ranges from 71 to 100, evil from 0 to 29, and

neutral with respect to good and evil from 35 to 65. Thus, a thoroughly chaotic good character would have an ethics score of 0 and a morality score of 100. Conversely, a diabolically lawful evil character would have a 100 in ethics and a 0 in morality. Starting scores for new characters are shown in the tables as well.

Score ranges from 30 to 34 and 66 to 70 are transition areas. In these areas, the alignment of the character is in question. The DM should use these areas to simulate a character who is in danger of an alignment shift. For example, a lawful good cleric allows his morality score to decrease to 70. He may find that he can no longer cast his highest level spells or he may experience nightmares involving excommunication. At this point, the character is not lawful good or lawful neutral, he is somewhere in between. All that can be said is that he is "non-evil."

THE ALIGNMENT CHECK

The DM determines when a character's action has alignment ramifications. For each action that the DM wishes to assess, do the following:

1. Determine the ethical and/or moral nature of the act. An act can be chaotic, evil, good, lawful, or an appropriate combination of an ethical and moral alignment (such as "lawful and good" or "chaotic and good").
2. Assign a strength (or severity) of the act on a scale of 1 to 5. A strength of 1 indicates a significant, but minor act. A strength of 2 should be assigned for a significant act common to the alignment. A significant, major act should be given a 3. An extreme act should be assigned a 4 while only the strongest of extreme acts should be given a 5. Most of the time, the DM should not assign a strength above 3. If the DM needs guidelines in assigning these strength scores to different alignment acts, consult the Sins and Signs of Weakness sections of each alignment description. Since these lists are given in order of severity, they provide good guidelines for alignment infractions.
3. Multiply the strength by -1 for an evil or chaotic act. Therefore, lawful or good acts are rated from +1 to +5 while chaotic or evil acts are rated from -1 to -5.
4. Have the player roll an "alignment check." The player rolls d100 and applies the positive (for lawful or good acts) or negative (for chaotic or evil acts) strength of the action. Note the result.
5. If the act was lawful or good, and the alignment check result is higher than the character's current

alignment score, add the strength of the act to the character's alignment score. If the act was chaotic or evil, and the alignment check is lower than the character's current alignment score, add the strength of the act to the character's alignment score (remember, this strength is negative, so the alignment score will decrease). If the alignment check result is exactly the character's alignment score, there is no change.

Some examples may clarify.

Example #1 - A paladin performs an act that the DM considers chaotic. The DM assigns a strength score of 1 (indicating a significant, but minor act of chaos). Since this act is chaotic, the strength becomes -1 (per step 3, above). The paladin's ethics score is 79. The player rolls d100 and gets a 52. The strength is applied to this roll bringing the result down to 51. Since this result is less than the character's ethics score (of 79), the DM orders the player to subtract 1 from the paladin's ethics score. The paladin now has an ethics score of 78. She's still lawful, for now.

Example #2 - This same paladin later performs a great act of heroism, risking her life to save hundreds of innocents. The DM determines that this act merits an alignment check. He determines that this was a major act of goodness and assigns a strength of 3. The player rolls d100 and adds 3 to the roll. The total result is 98. Since the paladin's morality score is 84, her morality is increased by 3 for a new total of 87.

Example #3 - A few days later, our paladin commits a minor act of evil (strength of 1). The player rolls d100 and gets a 93. The adjusted roll becomes 92. Since this roll is above the paladin's morality score of 87, the paladin does not lose a point of morality. Had the player rolled a 13, he would have been forced to subtract one from his character's morality (since he rolled below 87). The DM could, of course, declare that the character loses her paladinhood regardless of the alignment check, since the act committed was evil.

Example #4 - The paladin commits a significant act of goodness. The DM gives the act a strength of 2. The player rolls the dice and gets an adjusted result of 37. The player adds no points to his paladin's morality score, since his result was not greater than the paladin's morality score (which is 87).

the actions in keeping with your alignment count towards your alignment score. To become more good, you must beat your morality score when you make alignment checks for good acts. To become more evil, you must roll less than your morality score when you make alignment checks for evil acts. It is very easy to slip (with either an act of goodness or an act of cruelty) and start moving towards neutrality. This system makes it challenging to continue following an extreme alignment. Likewise, it is hard to remain neutral if the character consistently engages in behavior favoring one alignment over the other.

Bringing a "score" into the alignment system gives players an incentive to play alignment correctly. The DM calls for alignment checks, but a roll determines the results. This makes the job of the DM easier by giving alignment change an air of objectivity. Players are more likely to accept the results of a failed roll than the arbitrary judgment of a DM. Of course, even with this system, the DM ALWAYS retains the right to adjust a character's alignment. The DM may determine that a single act changes a character's alignment and force an alignment change.

The DM should remember to call for alignment checks when a player plays an alignment correctly. If alignment checks are called for only when a transgression occurs, all characters will eventually be forced to shift alignment. The DM should also call for alignment checks only for significant acts. A paladin who squashes an innocent bug is not risking his immortal soul by committing an evil act.

MORAL SUPPORT

This system is designed to make it increasingly harder to become more lawful, chaotic, good, or evil. The higher (or lower) your score, the harder it is to make

ALIGNMENT BIBLIOGRAPHY

The following is a list of books and magazine articles that were used in preparing this information. I borrowed heavily from J.R. Renaud's excellent article concerning alignment in *Dragon* #163 and made only minor changes to his prose when I used it in each alignment description. Carl Parlagreco's article in *The Dragon* #26 formed a solid foundation for describing the alignments in terms of a list of "do's and don't's" that will be familiar to Palladium gamers. Information from White Wolf's "viae" system for *Vampire: The Dark Ages* is found in my "Sins" and "Signs of Weakness" lists. Paragraphs from the Palladium alignments found in *Ninjas and Superspies* were used to further describe the D&D alignments. The alignment-based honor system in *Hackmaster* provided the information for the "adventurer" sections.

So, in no way do I consider myself to be an innovator when it comes to the alignment system, merely a compiler of the wealth of information concerning fantasy ethical systems in games. Some of the information, however, is my own. Many times, players have difficulty determining the differences between alignments, so I thought it would be helpful to provide information drawing some distinction between adjacent alignments and alignments sharing an ethical or moral component. I also created the "alignment philosophy" sections relying on my limited understanding of philosophical concepts. All other information is either heavily influenced by or pulled verbatim from the sources listed below.

BASIC D20

Basic d20 is a simplified version of the d20 system suitable for use in any d20-based campaign. This system has been designed for quick character generation and ease of play. The focus is to make it simpler for players. The GM, however, must be well-versed in the d20 system to make use of this set of rules. Of course, all d20 resources can be used with this set of rules, without conversion.

ABILITY SCORE MODIFIERS

Basic d20 uses the ability score modifiers for the six ability scores (normally ranging from -4 to +4). This makes it easier on the players to figure out what to add to a d20 roll (as in, “Everyone roll a d20 and add your Dexterity to see who goes first.”).

ABILITY SCORE DESCRIPTIONS

The table below is used to randomly generate each of the character’s ability score modifiers. Apply any racial bonuses and penalties to this roll (not the ability score modifier). Also, a descriptor for each score along with its meaning is given so that you can explain what these scores mean to your players in plain terms (such as, “You have a +2 Intelligence, this means your character is significantly above average.”).

Roll (3d6)	Ability Score Modifier	Descriptor	Meaning
1 or less	-5	Abysmal	Severely Handicapped
2-3	-4	Awful	Severely Impaired
4-5	-3	Bad	Impaired
6-7	-2	Poor	Significantly Below Average
8-9	-1	Mediocre	Below Average
10-11	+0	Fair	Average or Normal
12-13	+1	Good	Above Average
14-15	+2	Great	Significantly Above Average
16-17	+3	Exceptional	Gifted
18-19	+4	Amazing	Highly Gifted
20 or more	+5	Phenomenal	Exceptionally Gifted

Do not use more “favorable” methods of rolling on this table.

BROAD SKILLS

Basic d20 uses a broad skill system that groups traditional d20 skills into twelve broad skill areas. Furthermore, it adds four broad skills that define offensive and defensive combat ability (Fight, Shoot, Dodge, and Parry). Finally, the three save bonuses and hit dice are made into four additional broad skills (Fortitude, Reflex, Toughness, and Will). This totals 20 broad skills.

The full Basic d20 skill list is below. Not all campaigns will use all skills or use them the same way. For example, in a mainstream D&D-like campaign, Dodge and Parry will not be used, since these skills

provide a Defense Bonus. Also, GMs can change the “d20 Skill Equivalents” area as needed. Perhaps you’d like to put Appraise into the Awareness category?

Any traditional d20 skill is now referred to as a “specialty.” For example, Bluff is a specialty under the Interaction broad skill. Any feats or other types of bonuses that apply to normal d20 skills must be applied to the appropriate specialty. So, if a character gets Skill Focus (bluff), this applies only to Interaction skill rolls involving the Bluff specialty. For simplicity, the GM can avoid using specialties altogether, if desired. Note that a normal d20 skill can be part of more than one skill area (Ride is part of Athletics and Wilderness, for example).

Broad Skills	Default	d20 Skill Equivalents (Specialty Skills)
	Ability	D&D 3/3.5E, Pathfinder, Modern, CoC, Star Wars, Gamma World and M&M
Athletics	Dex	Acrobatics, Balance, Climb, Fly, Jump, Ride, Swim, Tumble
Awareness	Wis	Concentration, Investigate, Listen, Notice, Perception, Search, Sense Motive, Spot
Dodge	Dex	Ranged Defense (unless denied the Dex bonus to AC)
Fight	Str	Base Attack Bonus for Melee Attacks, “Fighter Level” for feats
Fortitude	Con	Fortitude Save
Interaction	Cha	Bluff, Diplomacy, Innuendo, Gamble, Gather Information, Knowledge (gossip), Intimidate, Read Lips
Knowledge	Int	Appraise, Knowledge (all subskills not mentioned elsewhere), Research
Languages	Int	Decipher Script, Linguistics, Read/Write Language, Speak Language, Speak Other Language
Parry	Dex	Melee Defense (unless denied the Dex bonus to AC)
Performance	Cha	Craft (artistic, visual art, writing), Disguise, Entertain, Perform
Profession	Wis	Profession (all subskills), Reputation (Ranks/4)
Reflex	Dex	Reflex Save
Science	Int	Alchemy, Craft (alchemy), Craft (pharmaceutical), Heal, Knowledge (architecture and engineering, behavioral sciences, earth and life sciences, physical sciences), Medicine, Psicraft, Psychoanalysis, Spellcraft, Treat Injury
Shoot	Dex	Base Attack Bonus for Ranged Attacks, “Fighter Level” for feats
Technology	Int	Computer Use, Computers, Craft (all not mentioned elsewhere), Demolitions, Knowledge (technology), Repair, Scry, Use Magic Device, Use Psionic Device
Thievery	Dex	Disable Device, Escape Artist, Forgery, Hide, Knowledge (streetwise), Move Silently, Open Lock, Pick Pocket, Sleight of Hand, Stealth
Toughness	Con	Toughness Save or Hit Dice (1d6 per rank) or Hit Points or Vitality (4 per rank)
Vehicles	Dex	Astrogate, Drive, Navigate, Operate Heavy Machinery, Pilot
Wilderness	Wis	Animal Empathy, Handle Animal, Intuit Direction, Knowledge (dungeoneering, nature), Ride, Survival, Use Rope, Wilderness Lore
Will	Wis	Will Save, Autohypnosis, Psychic Focus

The Default Ability is simply an aid to the GM. Obviously, not all d20 uses will call for the default ability. GMs can use any Ability + Skill add for a d20 check. For example, the GM could decide to call for an Int + Thievery roll if the character creates a forgery (instead of Dex + Thievery).

The Toughness skill is a special case, and its use varies according to the style of the campaign and the preference of the GM. Toughness ranks can be used to gain a bonus to the Toughness save, gain hit dice, hit points, or vitality points depending on the campaign. The Toughness feat is not used if the Toughness skill represents a save bonus (like in M&M). If the Toughness skill will behave as hit dice, then the default hit die is d6. If the Toughness skill is used to determine hit points or vitality points, then one rank gives four points to the character. Characters may purchase up to two Toughness feats per rank of Toughness skill (but no more). Each Toughness feat gives the character three additional hit points or vitality points. Therefore, the maximum number of hit points or vitality points a character can gain is ten per Toughness rank (if two Toughness feats are purchased per rank). If a character has no ranks in Toughness, then he has a +0 Toughness save bonus, 1 hit point, or 0 vitality points.

The Skill Focus feat (and equivalents) can still be used. Simply apply the feat to one particular specialty in the broad skill (like Use Rope for Wilderness). Most of the time, the Profession skill should be used this way. Also, you needn't have ranks in a skill to take Skill Focus. You could have zero ranks in Knowledge and take a Skill Focus feat for Appraise (for example) to make a character who is better at judging the value of items, but doesn't really know much about academics.

SKILL AND POWER DESCRIPTIONS

Use the tables below to describe to the players what certain skill ranks and resistances mean in plain language. For example, you could tell a player that "Your character is Tough and Nimble, but Unassertive," if his character has a Fort Save of +4, a Ref Save of +2, and a Will Save of -2. Most characters will start as Novices in their broad skills and powers, but as the campaign progresses they will become Experts and Masters. Descriptions bring the numbers alive and help the players imagine what their characters are like.

SKILL RANK AND POWER LEVEL DESCRIPTIONS

Skill Ranks or Power Level	Descriptor	Meaning
0	Unskilled	Has no training, just natural ability
1-2	Beginner	A true beginner at the skill
3-4	Novice	Some practice in the skill
5-6	Amateur	A dabbler in the skill, apprentice-level
7-8	Competent	Can complete most skill-related tasks
9-10	Proficient	Can earn a living with this skill
11-12	Adept	Produces good work and can teach this skill
13-14	Expert	Can earn a very successful living with this skill
15-16	Accomplished	Produces exceptional results with this skill
17-18	Master	Invents new techniques in using this skill
19-20	World-Class	One of the best in the world at this skill

RESISTANCE DESCRIPTIONS (OVERALL BONUS = ABILITY + RANKS)

Overall Bonus	Fortitude/Toughness	Dodge/Reflex/Parry	Will
-5	Decrepit	Unreactive	No Will
-4	Feeble	Lethargic	Spineless
-3	Frail	Sluggish	Weak
-2	Fragile	Slow	Unassertive
-1 or +0	Delicate	Hesitant	Diffident
+1 or +3	Sturdy	Nimble	Certain
+4 or +6	Tough	Fast	Confident
+7 or +9	Hardy	Quick	Determined
+10 or +12	Rugged	Rapid	Controlled
+13 or +15	Impervious	Lightning Fast	Iron-willed
+16 or +18	Nigh Invulnerable	Untouchable	Unshakeable
+19 or higher	Invulnerable	Perfect Reflexes	Closed Mind

ADVANTAGES (FEATS AND CLASS SPECIAL ABILITIES)

Use whatever feats you want from D&D, Pathfinder, M&M, Modern, etc. Don't forget these. Armor proficiencies must be purchased as well as the feats for weapons. Simple Weapons gives you all simple weapons, but Martial Weapon Proficiency only gives you one weapon. If you allow Archaic Weapons Proficiency (from M&M), then you get all "archaic" weapons for 1 PP. The Toughness feat is used as described above. The so-called "skill" feats add bonuses to specialties within each broad skill (not the whole area itself). Acrobatic, for example, gives a +2 to Jump and Tumble only. Skill Focus grants a +3 bonus on one specialty, such as Bluff. You can use Item Creation feats or Artificer (depending on whether you're more D&D or M&M in your campaign). Some feats will become less useful in some campaigns (like the Dodge feat in a campaign that features the Dodge skill). Eliminate Great Fortitude, Iron Will, and Lightning Reflexes (since you'd be getting a +2 to a save for only 1 PP, where it normally costs 1 PP for a +1), unless you allow these feats to be taken only once for "niche protection" reasons (i.e., the character's save bonus can be higher than that normally allowed at the campaign's PL).

Remember too that all class special abilities are advantages (like Turning, etc.). Use the D&D5E or Custom Characters rulebook to find all available class special abilities. To find a "class level" use the appropriate skill. Profession (class) is the default skill, but others may be appropriate. For example, for Turning, you could use the character's ranks in Profession (cleric) or Knowledge (religion). As a last resort, simply use the character level (since there really aren't any classes under this system).

POWERS

Use the system in M&M to develop the powers for your campaign. Players don't really have the ability to go in and build any power they want. The GM has to give players a list of approved powers.

For magic, you can default to Artificer and Ritualist feats. Ritualists who invest themselves with a ritual gain the ability to cast that ritual as a spell (i.e., they paid PP for it). Artificers who build permanent magic items gain Devices (i.e., they pay PP for it).

For d20-style spellcasting, refer to D&D5E or Custom Characters. To find the PP cost for anything from D&D5E/CC, divide the XP cost by 100 (do not round).

Powers	Cost (PP)	Per
Artificer	1	Artificer Feat from M&M
Bardic Spellcasting	1.5	Bard Spellcaster Level (3 PP for two levels)
Clerical Spellcasting	3	Cleric Spellcaster Level
Druidic Spellcasting	2	Druid Spellcaster Level
Psion Manifesting	5	Psion Manifester Level
Ritualist	1	Ritualist Feat from M&M
Sorcerer Spellcasting	5	Sorcerer Spellcaster Level
Wizardly Spellcasting	5	Wizard Spellcaster Level

Mutants & Masterminds can certainly be used for spellcasting if you do not desire to use d20-style spellcasters. Any power, with its appropriate PP cost, can be developed using M&M and made available for players in the campaign. Since this is a simplified system, the GM should construct the powers based on players' descriptions.

TRAIT COSTS

Use the table below for trait costs in Basic d20. Remember that Basic d20 uses ability score modifiers, so it costs 2 PP for each +1 in ability score modifier. Skills cost 1 PP per rank (since they are broad skills). Advantages (feats and class special abilities) cost 1 PP each. Powers have a variable cost.

Trait	Measured by	Default Cost (PP)	Per
Ability Scores	Modifier	2	+1 to ability score modifier
Skills	Rank	1	+1 skill rank
Advantages	--	1	Additional feat or class special ability
Powers	Level	Variable	All other powers and effects

CHARACTER GENERATION

This is about as basic as it can get. You have six ability scores and twenty skills. Roll 3d6 for your six ability scores (consulting Ability Score Descriptions above). Racial bonuses and penalties may lower the roll below 3 or raise it above 18. After that, you get 20 PP to spend on ability scores, skills, advantages, and powers. For characters starting at Level 1, ability scores cannot be raised above +4 with these points, powers cannot exceed Level 1, and skills cannot exceed 1 rank. After play begins, ability scores can be raised up to its starting value + 3. Skills and Powers can be raised up to 20 ranks or levels, respectively.

GENERIC STEPS TO CREATE A CHARACTER

1. Generate your character's ability score modifiers.
 - a. Random Generation - Roll 3d6 and consult "Ability Score Descriptions" to get each ability score modifier. If the GM allows, you may roll all six scores and then assign them to abilities as you desire. You may reroll if the sum of your modifiers is +0 or less or if your highest modifier is +1 or lower. Always roll 3d6, do not use a more "favorable" method.
 - b. Point Buy - If the GM is using a "point buy" system, give your character a total of +6 for ability score modifiers (such as a +1 in each score or perhaps a +4 in one score and a +3 in another, a -1 in one ability, leaving the other three at +0).
2. Choose or generate your character's characteristics according to the genre of the campaign. Some examples are: gender, race, occupation, profession, languages, alignment, allegiances, height, weight, coloration, age, starting wealth, military rank, mutations, etc. The GM will have specific information which will come from d20 source material (such as Pathfinder, Call of Cthulhu, Gamma World, Prime Directive, etc.). Some characteristics may be left uncommitted until Step 4, below.
3. Consult "Starting Character PP and Maximums" to find the number of PP you start with and the maximums for abilities, skills, and powers. Spend these PP to gain increased ability score modifiers, skill ranks, power levels, and advantages for your character. Abilities cannot be raised above racial maximums (normally +4 for humans). The GM will provide the source material for advantages and powers that are used in your campaign.
 - a. Skill Ranks – Purchase ranks in the 20 skills listed. Consult the appropriate d20 rulebook for your campaign to find specialties. Skills cost 1 PP per rank.
 - b. Advantages – Purchase feats from any d20 rulebooks allowed by your GM. Consult D&D5E or Custom Characters to find class special abilities to purchase (such as Turn Undead and Favored Enemy). Each advantage costs 1 PP.
 - c. Powers – Your GM will have information on the powers available for your campaign which could include spellcasting, psionics, superpowers, Force skills, psychic feats, cybernetics, mutations, etc. Powers have no set cost, but vary depending on the power.
4. Finish your character by recording Melee Defense (or AC), Ranged Defense (or AC), Skill Ranks, Advantages, Hit Points (or Toughness Bonus, Vitality Points), Power Levels and Power Effects. Record any special characteristics necessary for your campaign (such as Sanity for Call of Cthulhu or military rank for Prime Directive). Purchase equipment and determine any characteristics left uncommitted from Step 2.

STARTING CHARACTER PP AND MAXIMUMS

Most campaigns will start with 1st level characters. If higher-level characters are desired, use this table to determine starting PP and the maximums in ability score modifiers, skill ranks, and power levels.

Starting Character Level	Starting PP	Maximum Ability Score Modifier	Maximum Skill Rank	Maximum Power Level
0	10	Starting Value	0	0
1	20	Starting Value	1	1
2	30	Starting Value	2	2
3	40	Starting Value	3	3
4	50	Starting Value + 1	4	4
5	60	Starting Value + 1	5	5
6	70	Starting Value + 1	6	6
7	80	Starting Value + 1	7	7
8	90	Starting Value + 1	8	8
9	100	Starting Value + 1	9	9
10	110	Starting Value + 1	10	10
11	120	Starting Value + 1	11	11
12	130	Starting Value + 2	12	12
13	140	Starting Value + 2	13	13
14	150	Starting Value + 2	14	14
15	160	Starting Value + 2	15	15
16	170	Starting Value + 2	16	16
17	180	Starting Value + 2	17	17
18	190	Starting Value + 2	18	18
19	200	Starting Value + 2	19	19
20	210	Starting Value + 3	20	20

Zero level characters can buy ability score modifiers and advantages, but no skill ranks or power levels.

POWER LEVELS (CHARACTER LEVELS)

You'll note that the Power Level limits are different for Basic d20 as compared to Mutants & Masterminds. This is because most d20 style games are closer to D&D in power levels. For simplicity, the power level or "character level" itself is the limit on skill ranks and the levels for powers (such as spellcasting). Maximum ability score modifiers are based on the d20 system advancement of +1 to an ability score per four levels. This translates to a +1 to the ability score modifier every eight levels. GMs can, of course, change the maximums at each power level as desired.

RESOLUTION MECHANIC

Any ability score bonus can be paired with any skill. Thus, the normal roll is:

D20 + ABILITY SCORE MODIFIER + SKILL BONUS vs. DC

Note that different combinations of Ability Score Modifiers and Skill Bonuses can achieve the same effect. A character could roll Dex + Thievery to escape bonds, or he could roll Str + Athletics (for example). One character may make his horse riding checks with Dex + Wilderness while another may use Wis + Profession (knight). There is no one, correct, way to make checks. The GM is the final authority, as ever.

ACTIONS

The normal Difficulty Classes (DCs) from the d20 game remain unchanged for Basic d20.

Difficulty	DC	Example (Skill Used)
Very Easy	0	Notice something large in plain sight (Awareness)
Easy	5	Climb a knotted rope (Athletics)
Average	10	Hear an approaching guard (Awareness)
Tough	15	Rig a wagon wheel to fall off (Thievery)
Challenging	20	Swim in stormy water (Athletics)
Formidable	25	Open an average lock (Thievery)
Heroic	30	Leap across a 30-foot chasm (Athletics)
Superheroic	35	Bluff your way past very wary guards (Interaction)
Nearly Impossible	40	Track an orc across hard ground after 24 hours of rainfall (Wilderness)

ADVANCEMENT

“Plot Points” or “Power Points” (PP) are awarded to players based on role-playing considerations only. Follow the M&M guidelines. One per session is the minimum (the reward for showing up). Another for exceptional role-playing (everyone can get this). One more can be given for good “game playing” as well. If you’re using a D&D module, you can calculate the number of XP they would have earned, figure out how far along that would’ve gotten a party of the indicated level for the module (in percent to next level) and then give the players a number of PP equal to 10 times that percent. Also, consider using the “Hero Points for Advancement” section in the Mastermind’s Manual (page 85).

XP AND PP

If the GM is using a lot of D&D rules, then he needs to know how to handle the game when “XP” are called for. The basic rule is that 1 PP is equal to 100 XP times the character’s PL. For example, if a PL 17 character wants to cast a *wish* spell, then that normally costs 5,000 XP. This means that casting the spell will cost that character 3 PP (5,000 XP divided by 100 and then divided by 17, rounded as normal).

For example, a PL 10 character wishes to make a longsword +2. It has a base price of 8,000 gp, which means that the character needs to spend 320 XP. Since 1 PP for him equals 1,000 XP, he would sacrifice 1 PP and then have an additional 1,000 XP minus 320 XP, or 680 XP available in the future for such expenditures. Just keep track of those. The GM can also waive any XP requirements that would cost the character less than half a PP. Or you could just use the Device power in M&M (Device, easy to lose, Strike power, Mighty, etc.) and pay normal PP. The choice is yours, GM.

COMBAT STATISTICS

Combat statistics are derived from a combination of ability score modifiers and skill ranks.

Combat Statistic	Formula
Melee Attack Bonus	Fight + Str + Size Modifier
Ranged Attack Bonus	Shoot + Dex + Size Modifier + Range Penalty
Melee Defense	10 + Dex + Parry or Armor Bonus + Shield Bonus + Size Modifier
Ranged Defense	10 + Dex + Dodge or Armor Bonus + Shield Bonus + Size Modifier
Speed	30 feet/round (base for unarmored humans)
Hit Points (HP)	Toughness Skill Ranks X (4 + Con) + Toughness Feats X 3
Hit Points (HD)	(Toughness Ranks)d6 + Toughness Ranks X Con + Toughness Feats X 3
Number of Hit Dice	Number of Toughness Skill Ranks
Wound Points	(10 + Con X 2) X Wound Point Multiplier
Vitality Points	Toughness Skill Ranks X (4 + Con) + Toughness Feats X 3
Massive Damage Threshold	10 + 2 X (Con + Toughness Skill Ranks)
Natural Healing Rate	Toughness Skill Ranks per 8 hrs of rest (maximum 16 hrs per day)
Initiative	Dex
Fortitude Save	Fortitude Skill Ranks + Con
Reflex Save	Reflex Skill Ranks + Dex
Toughness Save	Toughness Skill Ranks + Con
Will Save	Will Save Ranks + Wis
Spell Save DC	10 + Level of Spell + Ability Score Modifier (Int, Wis, or Cha)
Spell Penetration	Spellcaster Level

ABILITY SCORE MODIFIERS IN COMBAT-ORIENTED CAMPAIGNS

For campaigns featuring large amounts of combat, the PP costs to raise the physical ability score modifiers should be higher.

Trait	Measured by	Cost (PP)	Per
Strength	Modifier	3	+1 to Strength modifier
Dexterity	Modifier	4	+1 to Dexterity modifier
Other Abilities	Modifier	2	+1 to ability score modifier

DODGE, PARRY, AND TOUGHNESS

The GM has some choice when implementing these skills. No doubt the type of game emulated will have a bearing on how these skills are used.

Use Dodge and Parry?	Toughness Option	Armor and Shield	Damage
No	Hit Dice or HP	As D&D	As D&D
Yes	Hit Dice or HP	As UA (Defense Bonus)	As D&D
No	Toughness Bonus	As D&D	As M&M
Yes	Toughness Bonus	As M&M	As M&M
No	Vitality Points	As D&D	As UA (Vitality and Wound Points)
Yes	Vitality Points	As UA (Defense Bonus)	As UA (Vitality and Wound Points)

If the Dodge and Parry skills are not used, then use the D&D rules for armor and shields. If the Dodge and Parry skills are used, then use the Unearthed Arcana rules for Defense Bonus (unless the Toughness Bonus is also used, in this case you have a system just like M&M). For your damage system, use D&D damage if hit dice or hit points are used. Use the M&M system for damage if the Toughness Bonus is used. Use the Unearthed Arcana entry on Vitality and Wound Points if this system is used. The default for the system should be Dodge, Parry, and Toughness Bonus for M&M-like campaigns and no Dodge or Parry skill along with Hit Dice or Hit Points for a D&D-like campaign. If Dodge and Parry are used along with D&D-style statistics for armor (armor bonus only, no DR), then the higher AC that results will be used (do not stack Dodge or Parry and the armor bonus, the ACs will be too high!). For example, if a character has a +2 Dexterity, Dodge 7 ranks, Parry 2 Ranks, and is wearing chain mail (armor bonus +5), then his Ranged AC should be 19 (10 + Dex + Dodge) because his Dodge is higher than his armor bonus and his Melee AC should be 17 (10 + Dex + Armor Bonus) because his armor bonus is higher than his Parry. If he raises his Parry to 6 ranks, then his Melee AC would be 18 (since Parry is now higher than the armor bonus; maybe he should get rid of the armor now!).

The default system in Basic d20 is to use the Dodge and Parry broad skills, normal armor bonuses from D&D (without DR), hit points, and normal dice damage. Anytime a character would be denied the Dexterity bonus to AC, they are also denied their Dodge and Parry rank bonus to AC (but they can still use their armor bonus). However, the Dodge and Parry rank bonus to AC applies to touch attacks (whereas the armor bonus doesn't apply).

MAKING THE CHARACTER SHEET

In Basic d20, everyone should make their own character sheet on notebook paper, by hand. It should contain:

Ability Scores: Strength, Dexterity, Constitution, Intelligence, Wisdom, and Charisma. Ability scores in Basic d20 are simply the ability score modifier (-5 to +5).

Skills: list your ranks in as many skills as are used by the campaign (default is 20 skills). You may want to put an area next to each number of ranks to list bonuses provided by equipment, powers, feats, etc. List skills that you don't have ranks in as well, since you can make untrained rolls.

Advantages: have a section to list your feats and class special abilities along with effects.

Powers: have a section to list your powers and effects.

Combat Statistics: record the relevant combat statistics for your campaign.

Equipment: have a section to list your equipment with relevant details.

PP/XP: make a section to list your game rewards.

Wealth: have an area to record your money, Wealth bonus, or whatever system you're using.

Try to keep it to one side of a page.

OTHER GAME CONSIDERATIONS

In general, default to the primary system that you're using for your campaign for all other game considerations. For example, for a Call of Cthulhu game, you'll need to use the Sanity rules. For a Mutants & Masterminds campaign, you'll want to award Hero Points. For Modern, you might use Action Points and the Wealth Bonus. GMs must be flexible and knowledgeable to use this system for the various d20 milieux.

SETTINGS

Basic d20 is suitable for all d20 game settings. A partial list is below:

- D&D 3/3.5E (High Fantasy, Low Fantasy, Fantasy Horror, etc.)
- Pathfinder (Fantasy)
- Modern (Action, Cinematic, Thriller, Drama)
- Future (Science Fiction, Space Opera)
- Past (Age of Sail, Pulp, Victorian)
- Cyberscape (Cybernetics)
- Urban Arcana (Modern Magic)
- Apocalypse (Dark Future, Armageddon)
- Gamma World (Science Fantasy, Post-Apocalyptic)
- Call of Cthulhu (Horror, Mystery)
- Star Wars Revised Edition (Star Wars Universe)
- Mutants & Masterminds (Superhero)
- Blue Rose (Romantic Fantasy)
- Prime Directive (Star Trek Universe)
- Ravenloft/Masque Of The Red Death (Fantasy Horror/Victorian Horror)
- Mythic Vistas (Antiquity, Biblical Times, Homeric Epics)

What we don't have is a clear Sword & Planet setting, but with the above influences, one could easily be constructed (maybe Dark Sun with science fiction trappings or Encounter Critical). At any rate, Basic d20 is now truly a Basic Universal Role Playing System (BURPS).

WHY DO THIS?

Basic d20 boils down the OGL system to its essential elements. Classes are gone and levels are less important. All of the traits that a character can have are broken down into ability score modifiers, skills, advantages, and powers. Gone are the strict calculations for the awarding of experience points. By using the Power Point system from Mutants & Masterminds, GMs can still control how fast characters advance without all of the hassle of designing encounters. In fact, the game should become less combat oriented with Basic d20, since players are awarded PP on the basis of roleplaying alone.

Since Basic d20 still uses all of the basic elements of the OGL system, modules, sourcebooks, and other game materials do not have to be altered at all. GMs should be familiar enough with the normal d20 system to use all reference materials with Basic d20. Also, players have an easier time constructing the exact types of characters they want. They don't have to plan out their character's level advancement for 20 levels just to find a new prestige class or feat that they would like, but can't get for their character due to restrictive level advancement schemes. GMs should consult D&D5E or Custom Characters and decide what class special abilities to offer players. In fact, Basic d20 is just a simpler version of these rulebooks.

BASIC D20 POWER LEVEL LIMITS

This document details what should be the default power level limits for all Basic d20 games. Gamemasters are, of course, free to set their own power level limits for traits as they see fit. The power level limits detailed here are in keeping with the spirit of most d20-based games.

POWER LEVEL LIMITS

Most campaigns will start with 1st level characters. If higher-level characters are desired, use this table to determine starting PP and the maximums in ability scores, skill ranks, advantages, and powers. This table also shows the trait limits that should be used based on the campaign's maximum character level as set by the GM.

Character Level	Starting PP	Maximum Ability Score	Maximum Skill Rank 'A'	Maximum Skill Rank 'B'	Maximum Skill Rank 'C'	Maximum Advantage and Power Level
0	10	SV	0	2	3	0th
1	20	SV	1	2	4	1st
2	30	SV	2	3	5	2nd
3	40	SV	3	3	6	3rd
4	50	SV + 1	4	4	7	4th
5	60	SV + 1	5	4	8	5th
6	70	SV + 1	6	5	9	6th
7	80	SV + 1	7	5	10	7th
8	90	SV + 1	8	6	11	8th
9	100	SV + 1	9	6	12	9th
10	110	SV + 1	10	7	13	10th
11	120	SV + 1	11	7	14	11th
12	130	SV + 2	12	8	15	12th
13	140	SV + 2	13	8	16	13th
14	150	SV + 2	14	9	17	14th
15	160	SV + 2	15	9	18	15th
16	170	SV + 2	16	10	19	16th
17	180	SV + 2	17	10	20	17th
18	190	SV + 2	18	11	21	18th
19	200	SV + 2	19	11	22	19th
20	210	SV + 3	20	12	23	20th

'Character Level' is the maximum character level set by the GM. It is analogous to the Mutants & Mastermind Power Level. 'Starting PP' shows how many Power Points a character starting at the given Power Level receives during character generation. 'Maximum Ability Score' is the maximum ability score

that the character can have. This maximum is based on the starting value of the ability score modifier (shown as 'SV'). This starting value is based on what ability score modifier the character had at 1st level.

For example, if a character started with a score of +0 in Strength at 1st level, then he could spend 2 PP to raise it to +1 when the GM raises the campaign's character level to 4th. He can spend an additional 2 PP to raise it to +2 when the campaign character level is 12th. Finally, he can raise it to +3 when the 20th character level is allowed. If his Intelligence started off at +4, then he could raise it to a maximum of +7 by 20th level.

The next three columns show the maximum broad skill ranks based on the campaign's character level. Column 'A' is for the Fight, Shoot, and Toughness skills. Column 'B' is for Dodge, Fortitude, Parry, Reflex, and Will skills. Column 'C' is for Athletics, Awareness, Interaction, Knowledge, Languages, Performance, Profession, Science, Technology, Thievery, Vehicles, and Wilderness.

The last column shows the maximum level for advantages and powers. For example, a campaign set at the 7th character level allows characters to have feats, class special abilities, talents, and powers of 7th level or lower.

These power level limits ensure that characters built using the Basic d20 system do not surpass the normal trait limits of most d20 characters. The base attack bonus is derived from the Fight and Shoot skills. The base attack bonus should never exceed the character level of the campaign. Actual attack bonuses can be much higher (once you add Strength, Dexterity, magical items, etc.) but the base attack bonus should never be higher than the maximum character level. Likewise, a character's number of hit dice, as represented by the Toughness skill, should not exceed the campaign's character level. By taking multiple Toughness feats, you can raise your character's hit points, but your character's hit dice are limited to the character level of the campaign.

For Dodge, Fortitude, Parry, Reflex, and Will, the limit is two plus half the campaign's character level (round down). Thus, you see the normal range of 'good' base save bonuses in Column 'B' above. Characters in Basic d20 should not have base save bonuses higher than what they could have under single-classed advancement in normal forms of d20. It is true that multi-classed characters in other d20 games could have base save bonuses higher than those shown, but the spirit of the rules is served better by sticking to the limits normally imposed on the 'good' saving throw.

Finally, all other skills fall under that normal maximum skill ranks for d20 characters. Three plus the campaign's character level shows the maximum number of skill ranks a character can have in the twelve other skills in Basic d20. There are no 'cross-class' skills at all in Basic d20, so this limit is ignored.

The last column simply indicates that a character cannot have a feat, class special ability, talent, spellcasting ability, or power that is higher than the campaign's character level.

BASIC D20 RULES CHECKLIST

It is quite obvious that Basic d20 is simply a modified version of Mutants & Masterminds that uses various optional rules from the Mastermind's Manual. This document spells out exactly what rules are used and gives an explanation of each. Page numbers in the Mastermind's Manual are given in parenthesis.

RANDOM ABILITY SCORES (20)

Basic d20 gives the GM the option of using randomly generated ability scores. Rolls to find your character's ability score modifiers should always be made with 3d6. More "favorable" rolling methods should not be used. GM's are encouraged to allow players to re-roll ability score modifiers if the sum of the modifiers is +0 or less or if the highest modifier is +1 or lower. In other words, characters should have a positive sum for all six ability score modifiers and the highest modifier should be +2 or higher.

SHORTHAND ABILITIES (20)

Basic d20 uses only the ability score modifier for numerical accounting of ability scores (such as -1, +0, or +2). Because of this, the normal cost to raise each ability score modifier is 2 PP.

INNATE ATTACK AND DODGE MODIFIERS (22)

If, in your campaign, the Strength ability score modifier is added to melee attack rolls, then it is suggested that Strength cost 3 PP per +1. If the Dexterity ability score modifier is applied to ranged attack rolls and the character's AC, Defense, or Dodge, then it is suggested that Dexterity cost 4 PP per +1.

AGING AND ABILITIES (22)

Use normal d20 rules for aging if appropriate to your campaign. For example, in a fantasy campaign, use the aging tables in D&D.

COMBAT SKILLS (29)

In Basic d20, Melee Attack is called Fight, Ranged Attack is called Shoot, Melee Defense is called Parry, and Ranged Defense is called Dodge. Each skill costs 1 PP per rank.

BROAD SKILLS (30)

The twelve broad skills detailed in the Mastermind's Manual are used and expanded upon in Basic d20.

SKILL SYNERGY (32)

Skill synergy is used. Look to your d20 source material (such as the SRD) to find particulars.

LANGUAGE CHECKS (35)

Language checks can be used for the Languages broad skill. If GMs prefer not to use this rule, then players should specify what language the character gains with each rank. Furthermore, characters can also use their skill ranks in Languages for Decipher Script checks if the campaign supports.

FEATS (36)

GMs can use any feats they desire from any d20 source for their campaign. As an example, consider weapon proficiency feats. If desired, the GM may simply offer the Archaic Weapon Proficiency feat (page 43) which allows a character to use all “archaic” weapons. This would, in essence, give a character proficiency with all weapons in the D&D game. Another option would be to use the normal SRD weapon proficiency feats. Simple Weapon Proficiency would grant a character proficiency in all simple weapons. The Martial and Exotic Weapon Proficiency feats would give the character proficiency in only one weapon each time one of these feats is purchased. Still another option is the use the Weapon Group feats from *Unearthed Arcana*. Depending on the complexity desired, and the amount of PP you want players to have to use for weapon proficiencies, any of the above choices could be used in a campaign.

Obviously, some feats should be removed from the game. Great Fortitude, Lightning Reflexes, and Iron Will give a character a +2 bonus to the appropriate saving throw at a cost of only 1 PP. Raising the base save bonus in each saving throw normally costs 1 PP per +1. GMs could allow these three feats to remain in the game, but count on every player purchasing them first before spending any more PP on saving throws! GMs should disallow any feats which “break” the system.

Another aspect to consider is feats that will have no effect in your campaign. If you don’t use attacks of opportunity, then no player should buy Combat Reflexes.

The Toughness feat has a special use in Basic d20. Each Toughness feat gives the character three additional hit points, as stated. However, it may only be purchased two times for every rank the character has in the Toughness skill. This serves the purpose of mimicking the various hit dice in most d20 games. Each rank in the Toughness skill grants one hit die (normally a d6) or four hit points. Since most d20 games have character classes with d4, d6, d8, d10, and d12 hit dice, a distinction had to be made between the number of hit dice a character has and the total number of hit points. Toughness skill ranks correspond to hit dice, pure and simple. Toughness feats are used to mimic higher types of hit dice. Consider a character with one rank in the Toughness skill. This character has one d6 hit die. If a Toughness feat is purchased, the character still has one hit die, but now has 1d6+3 hit points. If a second Toughness feat is purchased, the character has one hit die, but has 1d6+6 hit points. With this system, each hit die can have a range of hit points from 1 (if you roll a ‘1’ on a lone d6) to 12 (if you roll a ‘6’ and apply a +6 for two Toughness feats). In this way, a range of hit dice can be simulated without violating the normal maximum number of hit points per hit die (the barbarian’s d12).

POWERS (48)

Mutants & Masterminds can be used as-is for powers since everything in Basic d20 is calculated on a power point basis. A simple conversion of D&D spellcasting relies on the rules detailed in D&D5E and Custom Characters. Simply divide costs for spellcasting levels by 100 to find their corresponding PP costs. Bard spellcasting costs 1.5 PP per level, cleric spellcasting 3 PP per level, druid spellcasting 2 PP, sorcerer spellcasting 5 PP, and wizard spellcasting 5 PP. The spellcasting of the generic spellcaster described in Unearthed Arcana would cost 5 PP.

ENERGY POINTS (72)

If D&D-style spellcasting is used in your Basic d20 campaign, use spell slots or the spell point system.

CHARACTERISTICS (82)

Extra-effort and hero points are optional, but probably shouldn't be used since most d20 games don't have these features.

DEVICES & EQUIPMENT (92)

Most of the time, GMs should use the devices and equipment from their d20 source documents with corresponding statistics and costs. For example, if playing a fantasy game, use the gold piece standard and the equipment found in D&D. If playing a modern thriller campaign, use d20 Modern equipment and the wealth system.

COMBAT (104)

Many options found in this section (and corresponding sections of other rulebooks) can be used.

ITERATIVE ATTACKS (111)

Most d20 games use iterative attacks, so they should be used in Basic d20.

HIT POINTS (111)

Disregard what is written in this section and use the Basic d20 system. One Toughness skill rank grants either four hit points or 1d6 hit points (GM's option). Each Toughness skill rank corresponds to a hit die in d20. Up to two Toughness feats (but no more) may be purchased per Toughness skill rank. The normal maximum hit point total is equal to $200 + 20 \times$ the Constitution ability score modifier or $20d6 + 120 + 20 \times$ the Constitution ability score modifier. Most d20 games use hit points. A few use the wound/vitality system. Still fewer use the Toughness save.

BASIC D20 FANTASY RACES

If Basic d20 is used for a normal d20 fantasy campaign, some guidance is needed on how to handle ability score bonuses and penalties, racial skill bonuses, bonus racial skill points, bonus racial feats, racial languages, and other racial traits.

ABILITY SCORE BONUSES AND PENALTIES

The GM has two choices with racial bonuses and penalties. He can either use the bonus/penalty as a modifier to the 3d6 roll to determine the character's ability scores or he can allow players to roll 3d6 to determine ability scores normally and then halve the bonuses and penalties before applying. Either method produces the same ability score modifier.

For example, a player is rolling up a dwarf. If the player rolls a '13' on 3d6 to determine Constitution, the player could add two to the roll, making it a '15' and then consult the table. This would give the character a Con +2. He could also keep the '13' which gives him a Con +1. Halving the dwarf's Con bonus and then adding makes the Con +2. As you can see, either method works. Just don't make the mistake of adding the entire, normal bonus after the player has determined an ability score.

However, racial bonuses to ability checks apply directly. Thus, the full +4 for the dwarven stability racial trait applies to any ability checks made when resisting a bull rush or trip attack when standing on firm ground.

RACIAL SKILL BONUSES

Basic d20 uses a broad skill system that groups traditional d20 skills into twelve broad skill areas. Furthermore, it adds four broad skills that define offensive and defensive combat ability (Fight, Shoot, Dodge, and Parry). Finally, the three save bonuses and hit dice are made into four additional broad skills (Fortitude, Reflex, Toughness, and Will). This totals 20 broad skills.

Any bonus to a skill actually becomes a bonus to a specialty skill in Basic d20. For example, dwarves get a +2 racial bonus to Appraise checks that are related to stone or metal items. This translates to a +2 racial bonus to Awareness when appraising stone or metal items (not a blanket +2 bonus to all uses of the Awareness broad skill).

Any bonus to attack rolls applies to the Fight and Shoot broad skills. For example, dwarves have a +1 racial bonus on attack rolls against orcs and goblinoids. This translates to a +1 racial bonus to attack rolls using Fight and Shoot against orcs and goblinoids.

Any dodge bonus is applied to both the Dodge and Parry broad skills. Dwarves get a +4 dodge bonus to AC against monsters of the giant type. This bonus applied to Dodge and Parry when fighting against giant type monsters.

Any hit point bonus is applied directly to the hit point (or vitality point) total. If hit dice are gained, the Toughness skill rank is increased by one for each hit die.

Saving throw bonuses are applied to the appropriate broad skills when making a saving throw under the correct condition. Example: dwarves get a +2 saving throw bonus against poison.

BONUS RACIAL SKILL POINTS

Bonus racial skill points grant the character one additional Power Point during character generation for every 4 extra skill points granted. These extra Power Points cannot be used for the Dodge, Fight, Fortitude, Parry, Reflex, Shoot, Toughness, or Will broad skills.

In fact, for every 4 extra skill points granted due to Intelligence, Basic d20 characters are entitled to gain another Power Point that can only be used for the twelve “allowed” broad skills. Since starting characters get four times their Intelligence bonus in extra skill points according to the SRD, this translates to an extra Power Point per “plus” of your character’s Int at start. For example, if your character has Int +3, then he receives three extra Power Points during character generation that can be used for the twelve “allowed” broad skills (i.e., Athletics, Awareness, Interaction, Knowledge, Languages, Performance, Profession, Science, Technology, Thievery, Vehicles, and Wilderness).

Characters should not have their starting PP reduced due to low Intelligence.

BONUS RACIAL FEATS

Bonus racial feats are granted to the character during character generation. They cannot be “cashed in” for Power Points and used in another fashion.

RACIAL LANGUAGES

“Automatic languages” grant the appropriate number of skill ranks in Languages (one for each language).

Also, characters gain one skill rank in Languages for each “plus” in their Intelligence as well. They can choose one language that they may have been exposed to during their background for each skill rank.

FAVORED CLASSES

Favored classes do not apply in Basic d20. Rejoice.

WHY WAS THIS DOCUMENT NECESSARY?

It may have been a bit confusing to try to use Basic d20 for a fantasy campaign if there were no clear guidelines on how to apply racial traits when using this system. Hopefully, this document provides enough guidance that the GM will know what to do when allowing players to choose fantasy races for their characters.

BASIC D20 ALIGNMENT

The alignment system in d20 games is difficult to use because there are no definite game rules covering alignment. Vital to any alignment system are rules to govern alignment shifts. Normally, it is left to the DM to decide if a player portrays his character's alignment correctly. If the player's roleplaying is found lacking, then the DM must use his own judgment, and the few guidelines given in the rulebooks, to decide if an alignment shift is appropriate. There are no game mechanics to fall back on.

In this system, both the ethical (law-chaos) and moral (good-evil) components of alignment are given a score on a scale of 0 to 20. The number 10 represents neutrality on both axes. Scores of 20 indicate a maximum of law and good, while scores of 0 indicate a maximum of chaos and evil. Thus, a thoroughly chaotic good character would have an ethics score of 0 and a morality score of 20. Conversely, a diabolically lawful evil character would have a 20 in ethics and a 0 in morality.

ETHICS AND MORALITY

Ethical Alignment Component	Ethics Score Range
Lawful	14-20
Neutral	7-13
Chaotic	0-6

Moral Alignment Component	Morality Score Range
Good	14-20
Neutral	7-13
Evil	0-6

The tables above show the score ranges that correspond to the various alignments. Lawful ranges from 14 to 20, chaotic ranges from 0 to 6. Neutral with respect to law and chaos ranges from 7 to 13. Good ranges from 14 to 20, evil from 0 to 6, and neutral with respect to good and evil from 7 to 13.

Starting scores for new characters are shown in the table below.

Ethical Alignment Component	Starting Ethics Score
Lawful	17
Neutral	10
Chaotic	3

Moral Alignment Component	Starting Morality Score
Good	17
Neutral	10
Evil	3

THE ALIGNMENT CHECK

After every game session, the DM should determine each character's predominant behavior pattern during the adventure. The DM should determine if the character's action were in keeping with lawful, chaotic, or neutral behavior on the ethical scale and good, evil, or neutral on the morality scale. After this determination, make alignment checks. An alignment check consists of rolling a d20 and comparing it to the character's ethics or morality score. The process is as follows:

1. Lawful Behavior - If the character behaved in a predominantly lawful manner, roll a d20 and compare it to the character's ethics score. If the roll exceeds the character's ethics score, add one point to the

ethics score. If the roll is less than or equal to the ethics score, there is no change to the ethics score. A roll of natural '20' always results in adding one to the ethics score.

2. Chaotic Behavior - If the character behaved in a predominantly chaotic manner, roll a d20 and compare it to the character's ethics score. If the roll is less than the character's ethics score, subtract one from the ethics score. If the roll is greater than or equal to the ethics score, there is no change to the ethics score. A roll of natural '1' always results in subtracting one from the ethics score.

3. Ethically Neutral Behavior - If the character behaved in a predominantly neutral manner, roll a d20 and compare it to the ethics score. If the character's ethics score is higher than 10 and the roll is less than the ethics score, then subtract one from the ethics score. If the character's ethics score is less than 10 and the roll is greater than the ethics score, add one to the ethics score. If the character's ethics score is equal to 10, there is no change to the ethics score. And in all other cases, there is no change to the ethics score.

4. Good Behavior - If the character behaved in a predominantly good manner, roll a d20 and compare it to the character's morality score. If the roll exceeds the character's morality score, add one point to the morality score. If the roll is less than or equal to the morality score, there is no change to the morality score. A roll of natural '20' always results in adding one to the morality score.

5. Evil Behavior - If the character behaved in a predominantly evil manner, roll a d20 and compare it to the character's morality score. If the roll is less than the character's morality score, subtract one from the morality score. If the roll is greater than or equal to the morality score, there is no change to the morality score. A roll of natural '1' always results in subtracting one from the morality score.

6. Morally Neutral Behavior - If the character behaved in a predominantly neutral manner, roll a d20 and compare it to the morality score. If the character's morality score is higher than 10 and the roll is less than the morality score, then subtract one from the morality score. If the character's morality score is less than 10 and the roll is greater than the morality score, add one to the morality score. If the character's morality score is equal to 10, there is no change to the morality score. And in all other cases, there is no change to the morality score.

CHANGING ALIGNMENTS

When a character's alignment changes, the ethics or morality score becomes the score listed as the starting score above (which is in the middle of the range for that alignment). For example, if a character's ethics score goes from 13 to 14, indicating an alignment change from neutral to lawful, the character's ethics score immediately changes to 17. Thus, characters must dedicate themselves to their former alignment for quite some time if they wish to regain it.

Some examples may clarify.

Example #1 - A character performs a major act during the adventure that the GM considers chaotic. After the adventure, the GM rules that the character acted in a predominantly chaotic manner. The character's ethics score is 15. The player rolls a d20 and gets an 11. Since this result is less than the character's ethics score (of 15), the GM orders the player to subtract 1 from the character's ethics score. The character now has an ethics score of 14. She's still lawful, for now.

Example #2 - During the next adventure, this same character performs a great act of heroism, risking her life to save hundreds of innocents. The GM determines that this act merits an alignment check for good behavior after the adventure. The player rolls a d20 and the result is a 20. Since the character's morality score is 17, her morality is increased by one for a new total of 18.

Example #3 - A few adventures later, our character commits an act of evil. The player rolls a d20 and gets an 18. Since this roll is equal to the character's morality score, there is no change.

Example #4 - The character commits a significant act of chaos during the next session. The player rolls the dice and gets a result of 7. As a result, the character's ethics score is now 13. Since this indicates neutrality an alignment change has occurred. The character's ethics score becomes 10, the middle value for neutrality. Only consistent lawful behavior will allow the character to regain her old alignment.

MORAL SUPPORT

This system is designed to make it increasingly harder to become more lawful, chaotic, good, or evil. The higher (or lower) your score, the harder it is to make the actions in keeping with your alignment count towards increasing your alignment score. To become more good, you must beat your morality score when you make alignment checks for good behavior. To become more evil, you must roll less than your morality score when you make alignment checks for evil behavior. It is very easy to slip (with either an act of goodness or an act of cruelty) and start moving towards neutrality. This system makes it challenging to continue following an extreme alignment. Likewise, it is hard to remain neutral if the character consistently engages in behavior favoring one alignment over the other.

Bringing a "score" into the alignment system gives players an incentive to play alignment correctly. The GM calls for alignment checks, but a roll determines the results. This makes the job of the GM easier by giving alignment change an air of objectivity. Players are more likely to accept the results of a failed roll than the arbitrary judgment of a GM. Of course, even with this system, the GM ALWAYS retains the right to adjust a character's alignment. The GM may determine that a single act changes a character's alignment and force an alignment change.

The GM should remember to call for alignment checks when a player plays an alignment correctly. If alignment checks are called for only when transgressions occur, all characters will eventually be forced to shift alignment. The GM should also call for alignment checks only for significant behavior. A paladin who squashes an innocent bug is not risking his immortal soul by committing an evil act.

BASIC D20 SOCIAL CLASS

If desired, a social class system can be introduced into your Basic d20 campaign. The social classes listed below are suitable for use in typical d20 fantasy campaigns. Class Code gives the letter designation of the social class for shorthand purposes. The U, M, and L stand for Upper, Middle, and Lower. The underclass is designation by "UC" while the criminal underclass is "CUC." Class Name gives a plain language name for the class, such as "Esquire Class" or "Servant Class." Starting Wealth shows how much money a character from that social class receives during character generation. Monthly Upkeep shows how much a character of this social class must spend per month to maintain their lifestyle (or risk dropping to the next lower social class). Class Purchase Price shows how much money must be spent over and above normal monthly upkeep costs to raise their social class to that level from the next lower social class (subject to GM discretion). Price Multiple is a multiplier applied to everything the character purchases (even during character generation). The "% of Society" column shows the percentage of the population in that particular social class. The "% of PCs" column shows what percentage of player characters are from the indicated social class. The last column, Roll, can be used to randomly roll a character's social class during character generation.

Class Code	Class Name	Starting Wealth (gp)	Monthly Upkeep	Class		% of Society	% of PCs	Roll (d100)
				Purchase Price	Price Multiple			
UUC	Royal	8d4X100	800 gp	--	X 3	0.002%	1%	00
MUC	Noble	6d4X100	400 gp	32000 gp	X 2	0.010%	3%	97-99
LUC	Knighted	4d4X100	200 gp	16000 gp	X 2	0.988%	9%	88-96
UMC	Esquire	8d4X10	100 gp	8000 gp	X 1.5	2.5%	32%	56-87
MMC	Gentle	6d4X10	50 gp	4000 gp	X 1	6.5%	20%	36-55
LMC	Merchant	4d4X10	25 gp	2000 gp	X 1	12%	15%	21-35
ULC	Yeoman	8d4	12 gp	600 gp	X 1	22%	10%	11-20
MLC	Servant	6d4	6 gp	300 gp	X 1	26%	6%	05-09
LLC	Peasant	4d4	2 gp	100 gp	X 1	30%	4%	01-04
UC	Underclass	2d4	--	--	X 1	+10-20%	Var.	--
CUC	Criminal	6d4X10	50 gp	--	X 1	+5-10%	Var.	--

Player characters are exceptional individuals and the majority of adventurers are from higher social classes (sons and daughters of the middle class and upper class who will not inherit wealth or lands). At start, players can always choose a lower social class than the one rolled for their character, but cannot choose a higher one. Characters can always start out in the Criminal Class, but should record their originally rolled social class.

If a player does not wish to roll on this table at all, the default starting class is MMC.

A character's social class determines their station in the campaign world. More importantly to players, it determines Starting Wealth and Monthly Upkeep costs. The Class Purchase Price allows advancement

to the next higher social class in about thirteen years if a character spends twice his monthly upkeep the entire time each month. The Price Multiple gives the multiplier that must be applied to all purchases made by members of that social class. For example, a Noble Class character must pay double for all weapons, armor, clothing, and other items, or risk being ridiculed by his peers and treated as a lower social class individual by inferiors. You must dress the part. Enforcement of the Price Multiplier and campaign ramifications for being a “cheapskate” are left to the imagination of the GM.

Also, characters must pay Monthly Upkeep costs or they risk being reduced in social class. Once a character has failed to pay one year’s worth of Monthly Upkeep, they are reduced one social class. Keep a running total of the deficit. Thus, if a Knighted Class character falls behind 2,400 gp on Monthly Upkeep, they become members of the Esquire Class. This could occur by spending only 100 gp per month on expenses for two years, or spending nothing on Monthly Upkeep for one year. Exceptional circumstances can rapidly reduce a character’s social class if the GM desires. Spending over the normal amount should be kept track of as well. Once a total equal to the next higher social class’s Purchase Price has been spent, the character goes up one social class. Only one social class may be climbed per year. Any number of social classes can be lost in a year (GM’s judgment).

The names of the classes suggest the most common members of that class, but each class has a wide variety of types. Performers from the common classes can rise to the middle classes, extremely successful warriors can reach the upper classes, upper class individuals can enter monasteries to have their social classes reduced, etc.

Social class provides a clear indication of who gets precedence over whom. Within a party of adventurers, for example, if the character with the highest social class is not the leader and spokesman, NPCs will think it quite odd and wonder why that character allows his authority to be usurped. They may even question his courage. This is entirely a role playing function and the GM must enforce it. If characters violate precedence inside or outside their group, it should cause problems.

WHY USE A SOCIAL CLASS SYSTEM?

Using a social class system can give each player rich opportunities for role playing. The social class of a character, with its attendant behavior and ethos, has featured prominently in many types of fiction. It is only natural that a social class system should be a part of a role playing game. A lower class character isn’t necessarily worse than a higher class character; they just need to be played differently. It’s not like the player himself is a member of that class! It should be remembered that higher class characters cannot just order around characters of lower station. They should expect deference and respect, but in return they must act as good role models and exercise the proper responsibility of their status (*noblesse oblige*). In other words, it’s a two-way street. Every social class has its own rights and responsibilities and it is up to the GM to brief players on what is expected of their characters in the campaign milieu.

BASIC D20 SKILL ROLLS

Many times in a role playing game, characters find themselves at odds with GM-controlled Non-Player Characters (it's true!). It must be noted that a family game such as Basic d20 frowns upon narratives involving characters fighting to the death against humanoid monsters and collecting their various treasures and assorted magical artifacts. Normal d20 rules describe how to resolve such unsavory encounters as no doubt many uncouth and violence-loving "role players" will indulge in such storytelling. However, for a change of pace, basic processes for resolving other types of encounters are detailed below to round out the otherwise combat-oriented ruleset presented in D&D and other d20 games.

SIMPLE SKILL CHECKS

Simple skill checks simply consist of the GM setting a difficulty class for a certain action with the player rolling a d20, adding one ability score modifier and one skill bonus to the roll and comparing this result to the DC. If the result equals or is higher than the DC, the action succeeds. If it is less, the action does not succeed.

Simple skill checks follow the following formula:

$$\text{D20} + \text{ABILITY SCORE MODIFIER} + \text{SKILL BONUS VS. DC}$$

Standard difficulty classes are shown below.

Difficulty	DC	Example (Skill Used)
Very Easy	0	Notice something large in plain sight (Awareness)
Easy	5	Climb a knotted rope (Athletics)
Average	10	Hear an approaching guard (Awareness)
Tough	15	Rig a wagon wheel to fall off (Thievery)
Challenging	20	Swim in stormy water (Athletics)
Formidable	25	Open an average lock (Thievery)
Heroic	30	Leap across a 30-foot chasm (Athletics)
Superheroic	35	Bluff your way past very wary guards (Interaction)
Nearly Impossible	40	Track an orc across hard ground after 24 hours of rainfall (Wilderness)

To resolve a simple skill check:

1. The GM determines which ability score modifier applies.
2. The GM determines which skill applies.
3. The GM determines the difficulty class (DC) of the task.
4. The player (or GM) rolls a d20 and adds the ability score modifier and the skill bonus.
 - a. If the roll is greater than or equal to the DC, then the character succeeds.
 - b. If the roll is less than the DC, then the character fails.
5. The GM determines the result based on success or failure.

OPPOSED SKILL CHECKS

An opposed check is a check whose success or failure is determined by comparing the check result to another character's check result. In an opposed check, the higher result succeeds, while the lower result fails. In case of a tie, the higher skill modifier wins. If these scores are the same, roll again to break the tie.

Opposed skill checks follow the following formula:

$$\mathbf{D20 + ABILITY SCORE MODIFIER + SKILL BONUS \text{ VS. } D20 + ABILITY SCORE MODIFIER + SKILL BONUS}$$

Example opposed checks are shown below.

Task	Ability + Skill (specialty)	Ability + Skill (specialty)
Con someone	Cha + Interaction (bluff)	Wis + Awareness (sense motive)
Pretend to be someone else	Cha + Performance (disguise)	Wis + Awareness (spot)
Create a false map	Dex + Thievery (forgery)	Wis + Thievery (forgery)
Hide from someone	Dex + Thievery (hide)	Wis + Awareness (spot)
Make a bully back down	Str + Interaction (intimidate)	Cha + Will
Sneak up on someone	Dex + Thievery (move silently)	Wis + Awareness (listen)
Steal a coin pouch	Dex + Thievery (sleight of hand)	Wis + Awareness (spot)
Tie a prisoner securely	Dex + Wilderness (use rope)	Dex + Thievery (escape artist)

To resolve an opposed skill check:

1. The GM determines which ability score modifiers apply (for both sides, they need not be the same).
2. The GM determines which skills apply (for both sides, they need not be the same).
3. Each side rolls a d20 and adds the ability score modifier and skill bonus for their side.
4. Success and failure is determined:
 - a. The side with the higher roll is successful, the side with the lower roll is unsuccessful.
 - b. In the event of a tie, the side with the higher overall modifier wins.
 - c. If there is a tie, and both overall modifiers are equal, then each side rolls again.

EXTENDED CONTEST SKILL CHECKS

The previous two forms of conflict resolution are standard for d20-based games. The "extended contest" also exists in d20-based games but is normally used only for combat. To illustrate this point, consider the rules for melee combat. The attacker rolls a d20 and adds the Strength ability score modifier and the character's Fight skill bonus. The difficulty class for this roll is the target's Armor Class. In this respect, an attack roll is just like a simple skill check. However, if the attacker succeeds on this roll, the target does not immediately drop. The attacker then rolls damage and this damage is subtracted from the hit points of the target. If the target then attacks, the same procedure is used, with the first attacker possibly suffering damage. In Basic d20, the Toughness skill is used to determine a character's number of hit points (along with the Constitution modifier and Toughness feats). For the

purposes of the following discussion, the Attack Bonus will be defined as the ability score modifier and skill bonus that is used for the “attack” roll. In melee combat, the Attack Bonus is Str + Fight + other modifiers. The Defense Bonus will be defined as the ability score modifier and skill bonus that is used for defense plus 10. For melee combat, the Defense Bonus is the character’s Dex + Parry (or Armor Bonus) + other modifiers. “Contest points” will be defined as the ability score modifier and skill that provides the pool of points that are diminished as the extended contest continues as a result of “damage.” In melee combat, the contest points are known as “hit points” and are derived from Con + Toughness + other modifiers (like Toughness feats).

Now, let’s apply this same principle to a different form of combat. Let’s say you have a campaign set in ancient Greece and the characters must frequently confront different philosophers in a forum and engage in debate. Instead of requiring a simple skill check for the PCs or even opposed skill checks with enemy philosophers, you, as GM, decide that it would be much more entertaining to treat these encounters as combats with various possibilities for breaking off the debate before defeat along with the introduction of special feats just for this campaign that give the characters various bonuses when debating. Each round of debate will last for ten minutes and each philosopher gets the chance to make one attack roll during this time. You decide that the Debate Attack Bonus for PCs is Wis + Knowledge since the PCs are honest seekers of knowledge that do not resort to sophistry or verbal trickery to win their debates. If they were of a different, more unscrupulous school of thought that relies on suave oratory, he might allow them to use Cha + Interaction during debates. The PCs school of philosophy relies on critical logical analysis to refute their opponent’s arguments, so the GM makes the Debate Defense Bonus equal to Int + Awareness + 10. This is the “armor class” that is used during each round of the debate. For contest points, each character has “credibility points” that diminish as they engage in philosophical debate. In this case, when a character reaches zero “credibility points” he must concede that his opponent has won the debate (or it could mean that he has nothing left to say, or that the audience is not interested in hearing anything further from him). Credibility points are derived from Charisma and Profession (philosopher). For each rank in Profession (philosopher) the character gains 1d6 + Cha modifier credibility points. Each successful attack does 1d6 + Wis in damage. Credibility points are “healed” at a rate of one point per rank in Profession (philosopher) per week and no magic can speed up this healing! Now, this example may not sound exciting to a normal role playing group, but it does illustrate that just about any sort of extended conflict can be modeled with the d20 combat system.

Another example would be two diplomats vying to sway a monarch to commit his forces to their particular side in a war. The Attack Bonus could be Cha + Interaction (to make convincing statements while following court decorum) while the Defense Bonus could be Wis + Will + 10 (to maintain composure and determination in the face of their opponent’s intrigue). The contest points are “influence points” and each diplomat gains 1d6 + Cha modifier influence points per rank in Profession (diplomat). Damage is equal to 1d6 + Cha for each successful attack. One combat round takes a day. When one diplomat’s influence points drop to zero, he is effectively “dead” to that monarch, and may be expelled from court. The GM can then determine the monarch’s response based on how many influence points the winning diplomat retained.

The relevant formulae for extended contests are:

$$\mathbf{D20 + ATTACK BONUS VS. DEFENSE BONUS + 10}$$

$$\mathbf{CONTEST POINTS = 1D6 + ABILITY SCORE MODIFIER PER RANK FOR SKILL USED AS CONTEST POINTS}$$

$$\mathbf{DAMAGE = 1D6 + ATTACK ABILITY SCORE MODIFIER}$$

To resolve an extended contest:

1. The GM determines which ability score modifier and skill bonus will be used for the Attack Bonus.
2. The GM determines which ability score modifier and skill bonus will be used for the Defense Bonus.
3. The GM determines which ability score modifier and skill bonus will be used for Contest Points.
4. Combat takes place in rounds. Each round, each combatant has one chance to attack.
 - a. If an attacker succeeds during a round, the defender loses contest points.
 - b. If an attacker fails during a round, the defender does not lose contest points.
5. Once a contestant is reduced to zero contest points, the GM determines the result of the contest.

COMBAT AND CONTESTS IN BASIC D20

First of all, there's nothing wrong with having normal physical combat in a role playing game (especially if there's a possibility to get some treasure!). However, it doesn't have to be the only way that characters fight against adversaries. Sure, it's a stretch and most gamers won't be used to it, but introducing other forms of combat into your game can really add some variety and give non-combat oriented characters a chance to shine while using the standard conventions of d20 combat resolution. Your computer hacker can wear down a system's "firewall points" while trying to break into a government database, one character can chase down a murder suspect while both are losing "fatigue points" during the run, your character can win a national election by doing enough damage to take his opponent's "campaign points" to zero. The potential types of extended contests are limitless.

BASIC D20 DEFENSE

In Basic d20, there are two skills that relate to a character's defensive abilities, Dodge and Parry. A character's skill ranks in Dodge relate to his defense against ranged weaponry while skill in Parry relates to defense in melee combat. Characters can also use various armor and shield types to increase their defensive capabilities as well. The defense bonuses derived from skill ranks in Dodge and Parry operate like the Defense Bonus as described in *Unearthed Arcana* (among other places). The default system in Basic d20 is to use the higher of the character's Defense Score or Armor Class when an opponent attacks. Anytime the character would be denied the Dexterity bonus to AC, they are also denied their Dodge or Parry skill rank bonus to AC (but they can still use their armor and shield bonuses). However, the Dodge or Parry skill rank bonus to AC applies to touch attacks (whereas the armor and shield bonuses don't apply). This document will clarify the interaction between these various bonuses and offer a new way of combining a character's defense bonus from Dodge or Parry skill ranks with armor and shield bonuses.

DODGE AND PARRY DEFENSE BONUSES

The table below shows the recommended defense bonuses given a character's skill ranks in Dodge and Parry. The defense bonus derived from Dodge only applies when the character is under attack by a ranged or missile weapon. The defense bonus derived from Parry only applies when the character is under attack by a melee weapon or an unarmed opponent. The Dexterity ability score modifier is added to each of these defense bonuses. Characters with no skill ranks in Dodge or Parry only get their Dexterity ability score modifier as a defense bonus.

Parry and Dodge		Parry and Dodge	
Skill Rank	Defense Bonus	Skill Rank	Defense Bonus
1	Dex + 1	11	Dex + 7
2	Dex + 2	12	Dex + 8
3	Dex + 3	13	Dex + 8
4	Dex + 4	14	Dex + 9
5	Dex + 4	15	Dex + 9
6	Dex + 5	16	Dex + 10
7	Dex + 5	17	Dex + 10
8	Dex + 6	18	Dex + 11
9	Dex + 6	19	Dex + 11
10	Dex + 7	20	Dex + 12

ARMOR AND SHIELDS

The table below reproduces some parameters from the armor and shield tables in the SRD. Note the one change that has been made. In the SRD, there is a column for “Maximum Dex Bonus.” This has been changed to “Maximum Defense Bonus.” The significance of this change is that now armor, shield, and defense bonuses can be combined somewhat. A character with sufficient ranks in Dodge or Parry can apply the appropriate defense bonus derived from these skills to their AC while wearing armor (up to the limit of the armor type). Shields, other than tower shields, impose no limit to the defense bonus derived from Dodge and Parry.

Armor Table

Armor	Cost	Armor Bonus	Maximum Defense Bonus	Armor Check Penalty
Light Armor				
Padded	5 gp	+1	+8	0
Leather	10 gp	+2	+6	0
Studded Leather	25 gp	+3	+5	-1
Chain Shirt	100 gp	+4	+4	-2
Medium Armor				
Hide	15 gp	+3	+4	-3
Scale mail	50 gp	+4	+3	-4
Chainmail	150 gp	+5	+2	-5
Breastplate	200 gp	+5	+3	-4
Heavy Armor				
Splint mail	200 gp	+6	+0	-7
Banded mail	250 gp	+6	+1	-6
Half-plate	600 gp	+7	+0	-7
Full plate	1,500 gp	+8	+1	-6

Shield Table

Shield	Cost	Shield Bonus	Maximum Defense Bonus	Armor Check Penalty
Buckler	15 gp	+1	--	-1
Light (wd/stl)	3 gp / 9 gp	+1	--	-1
Heavy (wd/stl)	7 gp / 20 gp	+2	--	-2
Tower	30 gp	+4	+2	-10

APPLICATION

Not all bonuses apply all of the time. As stated before, anytime the character would be denied the Dexterity bonus to AC, they are also denied their Dodge or Parry skill rank bonus to AC (but they can still use their armor and shield bonuses). However, the Dodge or Parry skill rank bonus to AC applies to touch attacks (whereas the armor and shield bonuses don't apply). The Maximum Defense Bonus due to armor limits the character even in situations where they are defending against a touch attack.

PUTTING IT ALL TOGETHER

First, a couple of formulae:

Combat Statistic	Formula
Melee Defense	10 + Parry Defense Bonus + Armor Bonus + Shield Bonus + Size Modifier
Ranged Defense	10 + Dodge Defense Bonus + Armor Bonus + Shield Bonus + Size Modifier

Melee Defense is the Difficulty Class for an opponent to hit you in hand-to-hand combat. It is analogous to Armor Class but only for melee and unarmed attacks. Ranged Defense is the Difficulty Class for an opponent to hit you with a missile, thrown, or ranged weapon of any sort. It is analogous to Armor Class but only for attacks from a distance. The Dodge Defense Bonus consists of the Dexterity ability score modifier and the extra defense bonus gained from having skill ranks in Dodge. The Parry Defense Bonus consists of the Dexterity ability score modifier and the extra defense bonus gained from having skill ranks in Parry. Both the Dodge and Parry Defense Bonuses may have an upper limit depending on the type of armor a character is wearing or if the character is using a tower shield.

Now for some examples:

Example #1: A character has a +2 Dexterity, Dodge 7 ranks, Parry 2 Ranks, and is wearing chainmail (armor bonus +5). Chainmail has a Maximum Defense Bonus of +2. Therefore, the character's Melee Defense is 17 (10 + Parry Defense Bonus (normally 4, but limited to 2 from the chainmail) + Armor Bonus (5)). The character's Ranged Defense is also 17 (10 + Dodge Defense (normally 7, but limited to 2 from the chainmail) + Armor Bonus (5)). His defense against touch attacks is only 12. If this character is expecting to get into a whole lot of ranged combat, he should lose the chainmail, because his Ranged Defense would still be 17 and he'd have more mobility (but his Melee Defense would be 14).

Example #2: The player of the above character decides to find a better armor type, given his character's ranks in Dodge or Parry. His Defense Bonus from Dodge is 7 (Dex + 5) and his Defense Bonus from Parry is 4 (Dex + 2). Looking at the armor table, he notes that leather armor allows a Maximum Defense Bonus of +6. He decides to start wearing leather armor (even though it makes him look like a thief). His new Melee Defense is 16 (10 + Parry Defense Bonus (4) + Armor Bonus (2)) and his new Ranged Defense is 18 (10 + Dodge Defense Bonus (6, the maximum for leather armor) + Armor Bonus (2)). His Ranged Defense is a little better, his Melee Defense a little worse, but he's moving faster now, his defense against touch attacks is much better, and it's a lot of weight off his shoulders (literally).

BASIC D20 NATURAL ADVANCEMENT

Basic d20 is a simplified version of the d20 system suitable for use in any d20-based campaign. This system has been designed for quick character generation and ease of play. The focus is to make it simpler for players. The GM, however, must be well-versed in the d20 system to make use of this set of rules. The normal Basic d20 system uses the concept of Power Points from *Mutants & Masterminds* for player character advancement. This document details a simple, alternate advancement system for characters.

DEVELOPING ABILITIES

After each adventure, the GM should give each player twelve d4's to distribute among his character's six ability scores. The GM may choose how many dice are assigned to each ability or he can allow the player to assign dice. The number of dice assigned to each score is rolled and added to the advancement total for that ability score. When the campaign begins, the starting advancement total for all of the character's ability scores is zero. When a score reaches or exceeds 100, the ability score is raised to the next higher value and 100 is subtracted from the advancement total for that score. The maximum ability score modifier for a character is equal to his starting ability score modifier plus three.

For example, a character's ability score modifiers and advancement total are as follows:

Ability	Modifier	Advancement Total
Strength	+2	87
Dexterity	+2	23
Constitution	+3	45
Intelligence	+0	0
Wisdom	-1	51
Charisma	+2	0

After an evening of play, the GM awards the player twelve four-sided dice to distribute among his six ability scores. The player could assign two dice per ability score, but he really wants to raise his Strength. He assigns six dice to Strength and three dice to both Dexterity and Constitution each. He rolls 6d4 and gets '15' as a result. He adds 15 to 87 for a new total of 102. After notifying the GM, he changes his Strength to +3 and subtracts 100 from his advancement total, leaving it at 2. For Dexterity, he rolls 3d4 and gets a '7' which he adds to 23 for a new total of 30. For Constitution, he rolls 3d4 and is lucky to get a '10' which makes his new total 55. The modifiers above represent the character's starting ability score modifiers. Since the player has raised his character's Strength by one, he can only add two more before reaching his character's maximum ability score modifier.

Ability score modifiers can be raised to values higher than Starting Value + 3 through magic or other means, but cannot be naturally developed higher with advancement d4's.

BROAD SKILL ADVANCEMENT THROUGH ADVENTURING

If the character successfully uses a skill in a significant way during an adventure, the player is entitled to check to see if the character's rank in that skill increases by one rank after the adventure. The DC for the advancement check is listed below. For reference, the average number of total checks to reach a certain skill rank is shown as well. Note that for an advancement check to be granted, the skill must be used in a situation where failure would have been detrimental to the character. The character cannot simply climb a wall every adventure in order to gain a skill check in Athletics. However, if the character is climbing a wall to escape a pack of hungry wolves, and is successful, then the player is entitled to an advancement check. There is no limit to the number of broad skill areas that may be checked per adventure, but only one check for each broad skill area is allowed per adventure. Advancement rolls are simple d20 rolls with absolutely no modifiers to the roll.

Current Skill Ranks	DC to Advance to Next Rank	Average Number of Checks to Reach Rank
0	1	0
1	3	1
2	5	2
3	6	3
4	8	5
5	10	6
6	11	8
7	12	10
8	14	12
9	15	15
10	16	18
11	16	22
12	17	26
13	18	31
14	19	38
15	19	48
16	19	58
17	20	68
18	20	88
19	20	108
20	20	128

Example: a character successfully uses his Fight skill area during an adventure. He currently has 10 ranks in Fight. The GM allows the player to make an advancement roll for Fight after concluding the night's adventure. The DC for the roll is 16. The player rolls a '13' on a d20. Since this is lower than the DC, the character's Fight skill remains at 10 ranks.

BROAD SKILL ADVANCEMENT THROUGH TRAINING

Advancement through training costs time and money. To figure out the amount of time, simply find your current number of ranks on the table above. Note the “average total checks” for that rank. Next, find the desired skill rank and note the “average total checks” for that rank. Subtract the lower from the higher. This is how many quarters your character will need to train (there are four quarters in a year). Costs can vary from campaign to campaign, but for a normal “D&D-style” campaign, the cost for training starts at 50 gp per month, divided by the number of students training under the master. This figure allows the master to maintain a “common” level of upkeep (c.f. DMG 3.5, page 130). A master can train a number of students equal to one-fourth his Profession (teacher) rank and can only train up to his current rank in the skill being taught. Masters wishing to maintain better lifestyles will certainly charge more than a total of 50 gp per month. About 200 gp per month should be the upper limit. But how does one teach when enjoying that kind of lifestyle?

As a thought experiment, under this system it would take about 32 years of near-constant training and 19,200 to 76,800 gp to go from zero ranks in a skill to 20 ranks in only one broad skill area. It would take 640 years of constant training and up to 1,536,000 gp to go from zero to 20 ranks in all twenty skill areas. Obviously, it’s much better to advance through adventuring!

When using this system, the GM determines what, if any, masters are available for training characters and the skill ranks of those masters.

GAINING ADVANTAGES

At the discretion of the GM, a character may gain a particular, desired advantage when they would have gained a Power Point under the old system if the roleplaying narrative allows for it. For example, if a tracker is traveling with the characters and one of the characters convinces the tracker to teach him the secrets of tracking, the GM can award that character the Track feat at the end of the adventure. Or perhaps a player says that he wants his character to develop the Power Attack feat. The GM decides to apply the penalty from Power Attack to that character’s attack rolls (without an increase in damage) for the entire adventure. Should the character survive, the GM will grant that character Power Attack. Spot awards of advantages are always at the discretion of the GM and under his terms.

Otherwise, gaining an advantage costs time and money, just like skill training. Gaining one advantage takes one quarter of the year and 50 to 200 gp per month during those three months of training. The master can teach a number of characters equal to one-fourth his Profession (teach) rank and must possess the advantage being taught. A character may work on an advantage the same quarter they work on a broad skill area as long as he is working under the same master.

GAINING AND DEVELOPING POWERS THROUGH ADVENTURING

Characters that already have levels in powers can develop those powers through adventuring. The difference between developing powers and advancing skills is that you must accumulate a number of successful checks equal to the Power Point per Level cost of the power in order to advance that power one rank.

Current Level	DC for Successful Advancement Check
1	3
2	5
3	6
4	8
5	10
6	11
7	12
8	14
9	15
10	16
11	16
12	17
13	18
14	19
15	19
16	19
17	20
18	20
19	20
20	20

For example, a character with 7th level cleric spellcasting successfully uses his spells during the adventure. The GM says that the player is entitled to an advancement check. The DC for this check is 12. The player rolls a '17' which is a successful check. Since cleric spellcasting normally costs 3 PP per level, the player will need two more successful checks before 8th level cleric spellcasting is attained.

For exceptional use of powers during an adventure, the GM can authorize up to three checks for each power. In the example above, if the character had saved the party's bacon three times through clever use of clerical spellcasting, the GM might allow three checks instead of only one.

As with advantages, the GM always has the option of granting a level in a power outright as an adventuring reward. For example, a character discovers the Disks of Mishakal and spends time studying them. The GM then awards that character one spellcasting level in cleric (the equivalent of a 3 PP award).

GAINING AND DEVELOPING POWERS THROUGH TRAINING

Gaining and developing powers through training works much like skill training as described above. The difference is that the times are multiplied by the normal Power Point costs per level. Some common PP costs per level are shown in the table below.

Current Level	PP Cost 1 per Level	PP Cost 1.5 per Level	PP Cost 2 per Level	PP Cost 3 per Level	PP Cost 5 per Level
0	0	0	0	0	0
1	1	2	2	3	5
2	2	3	4	6	10
3	3	5	6	9	15
4	5	8	10	15	25
5	6	9	12	18	30
6	8	12	16	24	40
7	10	15	20	30	50
8	12	18	24	36	60
9	15	23	30	45	75
10	18	27	36	54	90
11	22	33	44	66	110
12	26	39	52	78	130
13	31	47	62	93	155
14	38	57	76	114	190
15	48	72	96	144	240
16	58	87	116	174	290
17	68	102	136	204	340
18	88	132	176	264	440
19	108	162	216	324	540
20	128	192	256	384	640

To use the table, find your character's current level in the power. Cross-reference to the cost per level and note the number in the table. Next, find the desired level, cross-reference to the cost per level and note this number. Subtract the lower number from the higher and this is the number of quarters your character must train to reach your desired level. The cost is 50 to 200 gp per month. A suitable master must be found, one who will train the character and has, at a minimum, the level desired.

For example, a character knows nothing of wizardry, but wishes to learn. He finds a suitable master. The master says he can train him for three years at a price of 3,000 gp and he will be a wizard spellcaster of 2nd level at the end of training. Even though it should only take 30 months, the character agrees.

ACCELERATED ADVANCEMENT

If the GM desires accelerated advancement for characters, simply change all training quarters to months (or even weeks for extremely accelerated advancement). Monthly costs should remain the same, unless the time interval is changed to weeks. In this case, training costs should always be 50 gp per week.

POWER LEVEL LIMITS

At no time can a character ever raise an ability score modifier, skill rank, or power level above the power or character level limit set by the GM regardless of the success of advancement checks. For example, the GM has set the current maximum character level at 3rd. A character with 3rd level druid spellcasting ability is not eligible to raise his druid spellcasting level until the GM sets the maximum character level to 4th level. Nor can he “save up” two successful advancement checks to raise his spellcasting ability to 4th as soon as the GM raises the campaign maximum character level.

DESIGNING ADVENTURES USING NATURAL ADVANCEMENT

Obviously, players are going to want opportunities to use just about every skill and power they have to accumulate successful advancement checks. This makes adventure design very, very easy. You want to plan your adventures to include a variety of challenges, maybe one for each broad skill area if you’re truly ambitious! You also have to have enough opportunities to give each character a chance to gain an advancement check in the same broad skill area. For example, you may need to include a half-dozen “thievery” challenges to give every character a chance to gain an advancement check in Thievery if the party is full of rogues. Combat is easy to stage, so there should always be opportunities for Dodge, Fight, Parry, and Shoot to get exercised. If magic and traps are involved, then Fortitude, Reflex, and Will will be challenged. A successful Toughness save or significant hit point loss (more than 50% at least) will gain the character an advancement check in that area as well.

WHY ALL THE FUSS?

The normal advancement system consists of the GM awarding a small number of Power Points per night’s adventure depending on character success, player roleplaying, and other factors. These PP are normally used as currency to buy additional ability score modifiers, skill ranks, advantages, and power levels with no bearing on what actions the character performed in the adventure. This system allows advancement only in traits which are used during the adventure or through specific training. This is a more “natural” system where the character develops those traits that he uses the most or those that he chooses to develop further through training and instruction. As always, but it bears repeating, the GM has total control over the advancement of all player characters in his campaign; the GM is the final arbiter of when an advancement check has been earned or when training is available under the natural advancement system.

BASIC D20 CLASS ADVANTAGES

In Basic d20, both feats and class special abilities are grouped together and called “advantages.” Each advantage costs 1 power point (PP). The Basic d20 rule book asks the GM to use either Custom Characters or D&D5E as a reference for class advantages. This document remedies that situation by presenting all class special abilities from the d20 Fantasy SRD as class advantages for Basic d20.

CHARACTER LEVEL

For the purposes of this document, a character’s “character level” is whatever the GM determines it to be. A good guideline to follow is that a character’s character level is equal to his highest rank or level from among all 20 broad skills or from among any powers the character possesses. Each class advantage is associated with a certain character level. This is the minimum character level at which the character may take that class advantage. A character must be at or above the minimum character level before the class advantage can be purchased.

CLASS LEVELS

Some class advantages require that a character’s class level in a certain class be known. It is suggested that the Profession broad skill be used to determine this. Each class can have its own specialty in the Profession broad skill area, like Profession (fighter) and Profession (assassin). In Basic d20, each skill rank in a specialty costs 0.25 PP. For spellcasting classes, having levels in the appropriate spellcasting power automatically grants class levels. Thus, a character with Wizard Spellcasting Level 10 is also considered to be a 10th level wizard for the purposes of advantage prerequisites. A character can never have more class levels in any single class than he has character levels. However, a character can have as many class levels in different classes as long as none of these class levels exceed his character level. For example, a 10th level character could have Profession (fighter) 10 ranks, Profession (rogue) 10 ranks, and Profession (ranger) 10 ranks, if desired.

Since characters taking levels in a prestige class must be of higher character level, apply the modifier shown to the character level to determine maximum class levels. For example, for our character above, he could take up to 5 ranks in Profession (assassin), 3 ranks in Profession (duelist) and no ranks in Profession (archmage).

BROAD SKILLS AND SPECIALTIES

The Basic d20 GM always retains the right to determine what broad skill a specialty falls under. The names of the SRD skills have not been changed in the class advantage descriptions to allow the GM maximum flexibility in assigning them to broad skill areas.

Prestige Class	Level Modifier
Arcane Archer	-7
Arcane Trickster	-8
Archmage	-13
Assassin	-5
Blackguard	-6
Dragon Disciple	-5
Duelist	-7
Dwarven Defender	-7
Hierophant	-13
Horizon Walker	-5
Loremaster	-7
Shadowdancer	-7
Thaumaturgist	-7

1ST-LEVEL SPECIAL ABILITIES

All 1st-Level Special Abilities are available to starting characters during character generation as long as the character meets the prerequisites.

ANIMAL COMPANION

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: Druid and Ranger (Half).

Description: The character gains an animal companion selected from the following list: badger, camel, dire rat, dog, riding dog, eagle, hawk, horse (light or heavy), owl, pony, snake (Small or Medium viper), or wolf. If the campaign takes place wholly or partly in an aquatic environment, the following creatures are also available: porpoise, Medium shark, and squid. This animal is a loyal companion that accompanies the character on her adventures as appropriate for its kind.

An animal companion is completely typical for its kind except as noted below. As the character advances in druid class levels, the animal's power increases as shown on the table. If the character releases her companion from service, she may gain a new one by performing a ceremony requiring 24 uninterrupted hours of prayer. This ceremony can also replace an animal companion that has perished.

A character with a druid class level of 4th level or higher may select from alternative lists of animals. Should she select an animal companion from one of these alternative lists, the creature gains abilities as if the character's druid class level were lower than it actually is. Subtract the value indicated in the appropriate list header from the character's druid class level and compare the result with the druid class level entry on the table to determine the animal companion's powers. (If this adjustment would reduce the druid's effective class level to 0 or lower, she can't have that animal as a companion.)

Each ranger class level counts as half of a druid class level when determining the animal companion's abilities. Consult The Druid's Animal Companion section of the System Reference Document for more information about animal companions.

AURA OF ALIGNMENT

Prerequisites: Chaotic, evil, good, or lawful alignment.

Ability Type: Extraordinary.

Class Levels: Cleric and Paladin.

Description: Choose a non-neutral component of the character's alignment, either chaotic, evil, good, or lawful. The character gains a particularly powerful aura corresponding to that alignment component (see the *detect evil* spell for details). The power of the aura corresponds to the character's class levels in cleric and paladin.

BARDIC KNOWLEDGE

Prerequisites: None.

Ability Type: Natural.

Class Levels: Bard and Loremaster.

Description: The character may make a special bardic knowledge check with a bonus equal to his bard and loremaster class levels + his Intelligence modifier to see whether he knows some relevant information about local notable people, legendary items, or noteworthy places. (If the character has 5 or more ranks in Knowledge (history), he gains a +2 bonus on this check.)

A successful bardic knowledge check will not reveal the powers of a magic item but may give a hint as to its general function. A character may not take 10 or take 20 on this check; this sort of knowledge is essentially random.

Types of knowledge with corresponding DC are shown below.

DC 10: Common, known by at least a substantial minority of the local population.

DC 20: Uncommon but available, known by only a few people, legends.

DC 25: Obscure, known by few, hard to come by.

DC 30: Extremely obscure, known by very few, possibly forgotten by most who once knew it, possibly known only by those who don't understand the significance of the knowledge.

BARDIC MUSIC

Prerequisites: None.

Ability Type: Natural.

Class Levels: Bard.

Description: Once per day per bard class level, the character can use his song or poetics to produce magical effects on those around him (usually including himself, if desired). While these abilities fall under the category of bardic music and the descriptions discuss singing or playing instruments, they can all be activated by reciting poetry, chanting, singing lyrical songs, singing melodies, whistling, playing an instrument, or playing an instrument in combination with some spoken performance. Each ability requires both a minimum bard class level and a minimum number of ranks in the Perform skill as prerequisites.

Starting a bardic music effect is a standard action. Some bardic music abilities require concentration, which means the character must take a standard action each round to maintain the ability. Even while using bardic music that doesn't require concentration, the character cannot cast spells, activate magic items by spell completion (such as scrolls), spell trigger (such as wands), or command word. Just as for casting a spell with a verbal component, a deaf character has a 20% chance to fail when attempting to use bardic music. If he fails, the attempt still counts against his daily limit.

COUNTERSONG

Prerequisites: Bardic Music special ability, 3 or more skill ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use his music or poetics to counter magical

effects that depend on sound (but not spells that simply have verbal components). Each round of the countersong, he makes a Perform check. Any creature within 30 feet of the character (including the character himself) that is affected by a sonic or language-dependent magical attack may use the character's Perform check result in place of its saving throw if, after the saving throw is rolled, the Perform check result proves to be higher. If a creature within range of the countersong is already under the effect of a noninstantaneous sonic or language-dependent magical attack, it gains another saving throw against the effect each round it hears the countersong, but it must use the bard's Perform check result for the save. Countersong has no effect against effects that don't allow saves. The character may keep up the countersong for 10 rounds.

DETECT ALIGNMENT

Prerequisites: None.

Ability Type: Spell-Like.

Class Levels: None.

Description: Choose an alignment component, either chaos, evil, good, or law. At will, the character can use *detect chaos*, *detect evil*, *detect good*, or *detect law* as the spell. The exact spell corresponds to the alignment component chosen.

FASCINATE

Prerequisites: Bardic Music special ability, 3 or more skill ranks in Perform.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can use his music or poetics to cause one or more creatures to become fascinated with him. Each creature to be fascinated must be within 90 feet, able to see and hear the character, and able to pay attention to him. The character must also be able to see the creature. The distraction of a nearby combat or other dangers prevents the ability from working. For every three bard class levels the character attains beyond 1st,

he can target one additional creature with a single use of this ability.

To use the ability, the character makes a Perform check. His check result is the DC for each affected creature's Will save against the effect. If a creature's saving throw succeeds, the character cannot attempt to fascinate that creature again for 24 hours. If its saving throw fails, the creature sits quietly and listens to the song, taking no other actions, for as long as the character continues to play and concentrate (up to a maximum of 1 round per bard class level). While fascinated, a target takes a -4 penalty on skill checks made as reactions, such as Listen and Spot checks. Any potential threat requires the character to make another Perform check and allows the creature a new saving throw against a DC equal to the new Perform check result.

Any obvious threat, such as someone drawing a weapon, casting a spell, or aiming a ranged weapon at the target, automatically breaks the effect. Fascinate is an enchantment (compulsion), mind-affecting ability.

FAST MOVEMENT

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's land speed is faster than the norm for his race by +10 feet. This benefit applies only when he is wearing no armor, light armor, or medium armor and not carrying a heavy load. Apply this bonus before modifying the character's speed because of any load carried or armor worn.

FAVORED ENEMY I

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character selects a type of creature from among those given on **Table: Ranger Favored Enemies** in the System Reference Document. The character gains a +2 bonus on Bluff, Listen, Sense Motive, Spot, and Survival checks when using

these skills against creatures of this type. Likewise, he gets a +2 bonus on weapon damage rolls against such creatures.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

FLURRY OF BLOWS I

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: When unarmored, the character may strike with a flurry of blows at the expense of accuracy. When doing so, she may make one extra attack in a round at her highest base attack bonus, but this attack takes a -2 penalty, as does each other attack made that round. This penalty applies for 1 round, so it also affects attacks of opportunity the character might make before her next action. The character must use a full attack action to strike with a flurry of blows.

When using flurry of blows, the character may attack only with unarmed strikes or with special weapons (kama, nunchaku, quarterstaff, sai, shuriken, and siangham). She may attack with unarmed strikes and special weapons interchangeably as desired. When using weapons as part of a flurry of blows, the character applies her Strength bonus (not Str bonus $\times 1\frac{1}{2}$ or $\times\frac{1}{2}$) to her damage rolls for all successful attacks, whether she wields a weapon in one or both hands. The character can't use any weapon other than a special weapon as part of a flurry of blows.

In the case of the quarterstaff, each end counts as a separate weapon for the purpose of using the flurry of blows ability. Even though the quarterstaff requires two hands to use, the character may still intersperse unarmed strikes with quarterstaff strikes, assuming that she has enough attacks in her flurry of blows routine to do so.

INSPIRE COURAGE I

Prerequisites: Bardic Music special ability, 3 or more skill ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use song or poetics to inspire courage in his allies (including himself), bolstering them against fear and improving their combat abilities. To be affected, an ally must be able to hear the character sing. The effect lasts for as long as the ally hears the character sing and for 5 rounds thereafter. An affected ally receives a +1 morale bonus on saving throws against charm and fear effects and a +1 morale bonus on attack and weapon damage rolls.

INTUITIVE DEFENSE I

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character adds her Wisdom bonus (if any) to her AC.

This bonus to AC applies even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

NATURE SENSE

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +2 bonus on Knowledge (nature) and Survival checks.

RAGE I

Prerequisites: Non-lawful alignment.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can fly into a rage one time per day. In a rage, the character temporarily gains a +2 bonus to the Strength modifier, a +2 bonus to the Constitution modifier, and a +2

morale bonus on Will saves, but he takes a -2 penalty to Armor Class. The increase in Constitution increases the character's hit points by 2 points per level, but these hit points go away at the end of the rage when his Constitution score drops back to normal. (These extra hit points are not lost first the way temporary hit points are.) While raging, a character cannot use any Charisma-, Dexterity-, or Intelligence-based skills (except for Balance, Escape Artist, Intimidate, and Ride), the Concentration skill, or any abilities that require patience or concentration, nor can he cast spells or activate magic items that require a command word, a spell trigger (such as a wand), or spell completion (such as a scroll) to function. He can use any feat he has except Combat Expertise, item creation feats, and metamagic feats. A fit of rage lasts for a number of rounds equal to 3 + the character's (newly improved) Constitution modifier. A character may prematurely end his rage. At the end of the rage, the character loses the rage modifiers and restrictions and becomes fatigued (-1 penalty to the Strength modifier, -1 penalty to the Dexterity modifier, can't charge or run) for the duration of the current encounter. Entering a rage takes no time itself, but a character can do it only during his action, not in response to someone else's action.

REBUKE UNDEAD

Prerequisites: Non-good alignment, cannot have Turn Undead special ability.

Ability Type: Supernatural.

Class Levels: Cleric.

Description: The character has the power to affect undead creatures by channeling the power of his faith through his unholy symbol (see Turn or Rebuke Undead in the System Reference Document).

The character may attempt to rebuke undead a number of times per day equal to 3 + his Charisma modifier. A character with 5 or more ranks in Knowledge (religion) gets a +2 bonus on rebuke checks against undead.

SMITE CHAOS I

Prerequisites: Aura of Alignment (Lawful).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite chaos with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not chaotic, the smite has no effect, but the ability is still used up for that day.

SMITE EVIL I

Prerequisites: Aura of Alignment (Good).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite evil with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not evil, the smite has no effect, but the ability is still used up for that day.

SMITE GOOD I

Prerequisites: Aura of Alignment (evil).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite good with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not good, the smite has no effect, but the ability is still used up for that day.

SMITE LAW I

Prerequisites: Aura of Alignment (Chaotic).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: Once per day, the character may attempt to smite law with one normal melee attack. She adds her Charisma bonus (if any) to her attack roll and deals 1 extra point of damage per paladin class level. If the character accidentally smites a creature that is not lawful, the smite has no effect, but the ability is still used up for that day.

SNEAK ATTACK I

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character's attack deals 1d6 extra damage any time her target would be denied a Dexterity bonus to AC (whether the target actually has a Dexterity bonus or not), or when the rogue flanks her target. Should the character score a critical hit with a sneak attack, this extra damage is not multiplied.

Ranged attacks can count as sneak attacks only if the target is within 30 feet.

With a sap (blackjack) or an unarmed strike, the character can make a sneak attack that deals nonlethal damage instead of lethal damage. She cannot use a weapon that deals lethal damage to deal nonlethal damage in a sneak attack, not even with the usual -4 penalty.

The character can sneak attack only living creatures with discernible anatomies—undead, constructs, oozes, plants, and incorporeal creatures lack vital areas to attack. Any creature that is immune to critical hits is not vulnerable to sneak attacks. The character must be able to see the target well enough to pick out a vital spot and must be able to reach such a spot. A character cannot sneak attack while striking a creature with concealment or striking the limbs of a creature whose vitals are beyond reach.

SUMMON FAMILIAR

Prerequisites: Ability to cast arcane spells.

Ability Type: Spell-Like.

Class Levels: Sorcerer and Wizard.

Description: The character can obtain a familiar. Doing so takes 24 hours and uses up magical materials that cost 100 gp. A familiar is a magical beast that resembles a small animal and is unusually tough and intelligent. The creature serves as a companion and servant.

The character chooses the kind of familiar he gets. As the character gains sorcerer and wizard class levels, his familiar also increases in power.

If the familiar dies or is dismissed by the character, the character must attempt a DC 15 Fortitude saving throw. Failure means he loses 200 experience points for every sorcerer and wizard class level; success reduces the loss to one-half that amount. However, a character's experience point total can never go below zero as the result of a familiar's demise or dismissal. A slain or dismissed familiar cannot be replaced for a year and day. A slain familiar can be raised from the dead just as a character can be, and it does not lose a level or a Constitution point when this happy event occurs.

TRAPFINDING

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character can use the Search skill to locate traps when the task has a Difficulty Class higher than 20.

Finding a nonmagical trap has a DC of at least 20, or higher if it is well hidden. Finding a magic trap has a DC of 25 + the level of the spell used to create it.

The character can use the Disable Device skill to disarm magic traps. A magic trap generally has a DC of 25 + the level of the spell used to create it.

A character who beats a trap's DC by 10 or more with a Disable Device check can study a trap, figure out how it works, and bypass it (with her party) without disarming it.

TURN UNDEAD

Prerequisites: Non-evil alignment, cannot have Rebuke Undead special ability.

Ability Type: Supernatural.

Class Levels: Cleric and Paladin.

Description: The character has the power to affect undead creatures by channeling the power of his faith through his holy symbol (see Turn or Rebuke Undead in the System Reference Document).

The character may attempt to turn undead a number of times per day equal to 3 + his Charisma modifier. A character with 5 or more ranks in Knowledge (religion) gets a +2 bonus on turning checks against undead.

UNARMED STRIKE I

Prerequisites: None.

Ability Type: Natural.

Class Levels: None.

Description: The character gains Improved Unarmed Strike as a bonus feat. This does not count as a base feat for the purposes of level determination. The character's attacks may be with either fist interchangeably or even from elbows, knees, and feet. This means that the character may even make unarmed strikes with her hands full. There is no such thing as an off-hand attack for the character when striking unarmed. The character may thus apply her full Strength bonus on damage rolls for all her unarmed strikes.

Usually the character's unarmed strikes deal lethal damage, but she can choose to deal nonlethal damage instead with no penalty on her attack roll. She has the same choice to deal lethal or nonlethal damage while grappling.

The character's unarmed strike is treated both as a manufactured weapon and a natural weapon for the purpose of spells and effects that enhance or improve either manufactured weapons or natural weapons.

A character also deals more damage with her unarmed strikes than a normal person would. A small character deals

1d4 damage, a medium character deals 1d6 damage, and a large character deals 1d8.

WILD EMPATHY

Prerequisites: None.

Ability Type: Extraordinary.

Class Levels: Druid and Ranger.

Description: The character can improve the attitude of an animal. This ability functions just like a Diplomacy check made to improve the attitude of a person. The character rolls 1d20 and adds her druid and ranger class levels along with her Charisma modifier to determine the wild empathy check result.

The typical domestic animal has a starting attitude of indifferent, while wild animals are usually unfriendly.

To use wild empathy, the character and the animal must be able to study each other, which means that they must be within 30 feet of one another under normal conditions. Generally, influencing an animal in this way takes 1 minute but, as with influencing people, it might take more or less time.

The character can also use this ability to influence a magical beast with an Intelligence score of 1 or 2, but she takes a -4 penalty on the check.

2ND-LEVEL SPECIAL ABILITIES

All 2nd-Level Special Abilities have "Character Level 2" as a prerequisite.

COMBAT STYLE: ARCHERY

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Rapid Shot feat, even if he does not have the normal prerequisites for that feat. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

COMBAT STYLE: TWO-WEAPON

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Two-Weapon Fighting feat, even if he does not have the normal prerequisites for that feat. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

DEADLY TOUCH

Prerequisites: Character Level 2, Cha 12, Aura of Alignment (Evil).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character can cause wounds with a successful touch attack. Each day she can deal a total number of hit points of damage equal to her paladin class level x her Charisma bonus. An opponent subjected to this attack can make a Will save (DC 10 + 1/2 paladin class level + character's Cha modifier) to halve the damage dealt.

Alternatively, the character can use any or all of this power to cure damage to undead creatures, just as an inflict wounds spell does. This power otherwise functions identically to the lay on hands ability.

DIVINE GRACE

Prerequisites: Character Level 2, Aura of Alignment (Any).

Ability Type: Supernatural.

Class Levels: None.

Description: The character gains a bonus equal to her Charisma bonus (if any) on all saving throws.

EVASION

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can avoid even magical and unusual attacks with great agility. If the character makes a successful Reflex saving throw against

an attack that normally deals half damage on a successful save, she instead takes no damage. Evasion can be used only if the character is wearing light armor or no armor. A helpless character does not gain the benefit of evasion.

LAY ON HANDS

Prerequisites: Character Level 2, Cha 12, Aura of Alignment (Good).

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character can heal wounds (her own or those of others) by touch. Each day she can heal a total number of hit points of damage equal to her paladin class level x her Charisma bonus. The character may choose to divide her healing among multiple recipients, and she doesn't have to use it all at once. Using lay on hands is a standard action.

Alternatively, the character can use any or all of this healing power to deal damage to undead creatures. Using lay on hands in this way requires a successful melee touch attack and doesn't provoke an attack of opportunity. The character decides how many of her daily allotment of points to use as damage after successfully touching an undead creature.

UNCANNY DODGE

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can react to danger before his senses would normally allow him to do so. The character retains his Dexterity bonus to AC (if any) even if he is caught flat-footed or struck by an invisible attacker. However, he still loses his Dexterity bonus to AC if immobilized.

WOODLAND STRIDE

Prerequisites: Character Level 2.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may move through any sort of undergrowth (such

as natural thorns, briars, overgrown areas, and similar terrain) at her normal speed and without taking damage or suffering any other impairment. However, thorns, briars, and overgrown areas that have been magically manipulated to impede motion still affect her.

3RD-LEVEL SPECIAL ABILITIES

All 3rd-Level Special Abilities have "Character Level 3" as a prerequisite.

AURA OF COURAGE

Prerequisites: Character Level 3, lawful good alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character is immune to fear (magical or otherwise). Each ally within 10 feet of her gains a +4 morale bonus on saving throws against fear effects.

This ability functions while the character is conscious, but not if she is unconscious or dead.

AURA OF DEBILITATION

Prerequisites: Character Level 3, chaotic evil alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character radiates a malign aura that causes enemies within 10 feet of her to take a -1 penalty to Armor Class.

This ability functions while the character is conscious, but not if she is unconscious or dead.

AURA OF DESPAIR

Prerequisites: Character Level 3, lawful evil alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character radiates a malign aura that causes enemies within

10 feet of him to take a -2 penalty on all saving throws.

This ability functions while the character is conscious, but not if she is unconscious or dead.

AURA OF RESOLVE

Prerequisites: Character Level 3, chaotic good alignment.

Ability Type: Supernatural.

Class Levels: None.

Description: The character is immune to compulsion effects. Each ally within 10 feet of him gains a +4 morale bonus on saving throws against compulsion effects.

This ability functions while the character is conscious, but not if she is unconscious or dead.

DIVINE HEALTH

Prerequisites: Character Level 3, Aura of Alignment (Any).

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains immunity to all diseases, including supernatural and magical diseases.

INSPIRE COMPETENCE

Prerequisites: Character Level 3, Bardic Music, Countersong, Fascinate, Inspire Courage I, 6 or more ranks in Perform.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can use his music or poetics to help an ally succeed at a task. The ally must be within 30 feet and able to see and hear the character. The character must also be able to see the ally.

The ally gets a +2 competence bonus on skill checks with a particular skill as long as he or she continues to hear the character's music. Certain uses of this ability are infeasible. The effect lasts as long as the character concentrates, up to a maximum of 2 minutes. The character can't inspire competence in himself. Inspire competence is a mind-affecting ability.

SPEED BONUS I

Prerequisites: Character Level 3.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains an enhancement bonus to her speed of +10 ft. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

SNEAK ATTACK II

Prerequisites: Character Level 3, Sneak Attack I.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 2d6 extra damage (instead of 1d6).

STILL MIND

Prerequisites: Character Level 3.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +2 bonus on saving throws against spells and effects from the school of enchantment.

TRACKLESS STEP

Prerequisites: Character Level 3, Woodland Stride.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character leaves no trail in natural surroundings and cannot be tracked. She may choose to leave a trail if so desired.

TRAP SENSE I

Prerequisites: Character Level 3.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +1 bonus on Reflex saves made to avoid traps and a +1 dodge bonus to AC against attacks made by traps.

4TH-LEVEL SPECIAL ABILITIES

All 4th-Level Special Abilities have “Character Level 4” as a prerequisite.

KI STRIKE: MAGIC

Prerequisites: Character Level 4.

Ability Type: Supernatural.

Class Levels: None.

Description: The character’s unarmed attacks are empowered with ki. Her unarmed attacks are treated as magic weapons for the purpose of dealing damage to creatures with damage reduction.

RAGE II

Prerequisites: Character Level 4, non-lawful alignment, Rage I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage two times per day. See Rage I for details.

RESIST NATURE’S LURE

Prerequisites: Character Level 4, Nature Sense.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +4 bonus on saving throws against the spell-like abilities of fey.

SLOW FALL I

Prerequisites: Character Level 4.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm’s reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 20 feet shorter than it actually is.

UNARMED STRIKE II

Prerequisites: Character Level 4, Unarmed Strike I.

Ability Type: Natural.

Class Levels: None.

Description: The character’s unarmed strikes increase in damage. A small character now deals 1d6 damage with unarmed strikes, a medium character 1d8 damage, and a large character 2d6 damage.

5TH-LEVEL SPECIAL ABILITIES

All 5th-Level Special Abilities have “Character Level 5” as a prerequisite.

FAVORED ENEMY II

Prerequisites: Character Level 5, Favored Enemy I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character’s bonuses do not stack; he simply uses whichever bonus is higher.

FLURRY OF BLOWS II

Prerequisites: Character Level 5, Flurry of Blows I.

Ability Type: Natural.

Class Levels: None.

Description: The character’s Flurry of Blows attack penalty lessens from -2 to -1.

IMPROVED UNCANNY DODGE

Prerequisites: Character Level 5, Uncanny Dodge.

Ability Type: Extraordinary.

Class Levels: Barbarian and Rogue.

Description: The character can no longer be flanked. This defense denies a rogue the ability to sneak attack the character by flanking him, unless the attacker has at least four more rogue class levels than the target has barbarian and rogue class levels.

INTUITIVE DEFENSE II

Prerequisites: Character Level 5, Intuitive Defense I.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +1 bonus to AC.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

PURITY OF BODY

Prerequisites: Character Level 5, Still Mind.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains immunity to all diseases except for supernatural and magical diseases.

SMITE CHAOS II

Prerequisites: Character Level 5, Smite Chaos I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos two times per day (instead of only once per day).

SMITE EVIL II

Prerequisites: Character Level 5, Smite Evil I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil two times per day (instead of only once per day).

SMITE GOOD II

Prerequisites: Character Level 5, Smite Good I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good two times per day (instead of only once per day).

SMITE LAW II

Prerequisites: Character Level 5, Smite Law I.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law two times per day (instead of only once per day).

SNEAK ATTACK III

Prerequisites: Character Level 5, Sneak Attack II.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 3d6 extra damage (instead of 2d6).

SPECIAL MOUNT

Prerequisites: Character Level 5, Aura of Alignment (Any).

Ability Type: Spell-Like.

Class Levels: Paladin.

Description: The character gains the service of an unusually intelligent, strong, and loyal steed to serve her in her crusade against evil (or goodness, law, or chaos). This mount is usually a heavy warhorse (for a Medium character) or a warpony (for a Small character).

Once per day, as a full-round action, the character may magically call her mount from the otherworldly realms in which it resides. This ability is the equivalent of a spell of a level equal to one-third the character's paladin class level. The mount immediately appears adjacent to the character and remains for 2 hours per paladin class level; it may be dismissed at any time as a free action. The mount is the same creature

each time it is summoned, though the character may release a particular mount from service.

Each time the mount is called, it appears in full health, regardless of any damage it may have taken previously. The mount also appears wearing or carrying any gear it had when it was last dismissed. Calling a mount is a conjuration (calling) effect.

Should the character's mount die, it immediately disappears, leaving behind any equipment it was carrying. The character may not summon another mount for thirty days or until she gains a paladin class level, whichever comes first, even if the mount is somehow returned from the dead. During this thirty-day period, the character takes a -1 penalty on attack and weapon damage rolls.

WILD SHAPE I

Prerequisites: Character Level 5.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to turn herself into any Small or Medium animal and back again once per day. Her options for new forms include all creatures with the animal type. This ability functions like the alternate form special ability, except as noted here. The effect lasts for 1 hour per druid class level, or until she changes back. Changing form (to animal or back) is a standard action and doesn't provoke an attack of opportunity. Each time you use wild shape, you regain lost hit points as if you had rested for a night.

Any gear worn or carried by the character melds into the new form and becomes nonfunctional. When the character reverts to her true form, any objects previously melded into the new form reappear in the same location on her body that they previously occupied and are once again functional. Any new items worn in the assumed form fall off and land at the character's feet.

The form chosen must be that of an animal the character is familiar with.

The character loses her ability to speak while in animal form because she is limited to the sounds that a normal, untrained animal can make, but she can communicate normally with other animals of the same general grouping as her new form. (The normal sound a wild parrot makes is a squawk, so changing to this form does not permit speech.)

The new form's Hit Dice can't exceed the character's druid class level.

6TH-LEVEL SPECIAL ABILITIES

All 6th-Level Special Abilities have "Character Level 6" as a prerequisite.

BESTOW CURSE I

Prerequisites: Character Level 6, Aura of Alignment (Chaos).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *bestow curse* effect, as the spell, once per week.

CAUSE DISEASE I

Prerequisites: Character Level 6, Aura of Alignment (Evil).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the *contagion* spell), once per week.

DEATH ATTACK

Prerequisites: Character Level 6, evil alignment, Disguise 4 ranks, Hide 8 ranks, Move Silently 8 ranks, the character must kill someone for no other reason than to become an assassin.

Ability Type: Natural.

Class Levels: Assassin.

Description: If the character studies his victim for 3 rounds and then makes a sneak attack with a melee weapon that successfully deals damage, the sneak attack has the additional effect of

possibly either paralyzing or killing the target (character's choice). While studying the victim, the character can undertake other actions so long as his attention stays focused on the target and the target does not detect the character or recognize the character as an enemy. If the victim of such an attack fails a Fortitude save (DC 10 + the character's assassin class level + the character's Int modifier) against the kill effect, she dies. If the saving throw fails against the paralysis effect, the victim is rendered helpless and unable to act for 1d6 rounds plus 1 round per assassin class level of the character. If the victim's saving throw succeeds, the attack is just a normal sneak attack. Once the character has completed the 3 rounds of study, he must make the death attack within the next 3 rounds.

If a death attack is attempted and fails (the victim makes her save) or if the character does not launch the attack within 3 rounds of completing the study, 3 new rounds of study are required before he can attempt another death attack.

IMPROVED COMBAT STYLE: ARCHERY

Prerequisites: Character Level 6, Combat Style: Archery.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Manyshot feat, even if he does not have the normal prerequisites for that feat. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

IMPROVED COMBAT STYLE: TWO-WEAPON

Prerequisites: Character Level 6, Combat Style: Two-Weapon.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Improved Two-Weapon Fighting feat, even if he does not have the normal prerequisites for that feat. The benefits of the character's style

apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

POISON USE

Prerequisites: Character Level 6, evil alignment, Hide 5 ranks.

Ability Type: Natural.

Class Levels: None.

Description: The character is trained in the use of poison and can never risk accidentally poisoning himself when applying poison to a blade.

REMOVE CURSE I

Prerequisites: Character Level 6, Aura of Alignment (Law).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove curse* effect, as the spell, once per week.

REMOVE DISEASE I

Prerequisites: Character Level 6, Aura of Alignment (Good).

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove disease* effect, as the spell, once per week.

SLOW FALL II

Prerequisites: Character Level 6, Slow Fall I.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 30 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall I.

SPEED BONUS II

Prerequisites: Character Level 6, Speed Bonus I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +20 ft. This replaces the enhancement bonus granted by Speed Bonus I. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

SUGGESTION

Prerequisites: Character Level 6, Bardic Music, Inspire Competence, 9 or more ranks in Perform.

Ability Type: Spell-Like.

Class Levels: Bard.

Description: The character can make a *suggestion* (as the spell) to a creature that he has already fascinated. Using this ability does not break the character's concentration on the fascinate effect, nor does it allow a second saving throw against the fascinate effect.

Making a suggestion doesn't count against a character's daily limit on bardic music performances. A Will saving throw (DC 10 + ½ the character's bard class level + the character's Cha modifier) negates the effect. This ability affects only a single creature (but see mass suggestion, below). Suggestion is an enchantment (compulsion), mind-affecting, language dependent ability.

TERRAIN MASTERY

Prerequisites: Character Level 6, Knowledge (geography) 8 ranks, Endurance feat.

Ability Type: Natural.

Class Levels: None.

Description: Choose one terrain type found below under Terrain Mastery Benefits. Terrain mastery gives the character a bonus on checks involving a skill useful in that terrain, or some other appropriate benefit. The character also knows how to fight dangerous creatures typically found in that terrain, gaining a +1 insight bonus on attack rolls and damage rolls against creatures with that terrain mentioned in the Environment entry of their descriptions. The character only gains

the bonus if the creature description specifically lists the terrain type.

Characters take their terrain mastery with them wherever they go. They retain their terrain mastery bonuses on skill checks, attack rolls, and damage rolls whether they're actually in the relevant terrain or not.

Terrain Mastery Benefits

Aquatic

You gain a +4 competence bonus on Swim checks, or a +10-foot bonus to your swim speed if you have one. You gain a +1 insight bonus on attack and damage rolls against aquatic creatures.

Desert

You resist effects that tire you. You are immune to fatigue, and anything that would cause you to become exhausted makes you fatigued instead. You gain a +1 insight bonus on attack and damage rolls against desert creatures.

Forest

You have a +4 competence bonus on Hide checks. You gain a +1 insight bonus on attack and damage rolls against forest creatures.

Hills

You gain a +4 competence bonus on Listen checks. You gain a +1 insight bonus on attack and damage rolls against hill creatures.

Marsh

You have a +4 competence bonus on Move Silently checks. You gain a +1 insight bonus on attack and damage rolls against marsh creatures.

Mountains

You gain a +4 competence bonus on Climb checks, or a +10-foot bonus to your climb speed if you have one. You gain a +1 insight bonus on attack and damage rolls against mountain creatures.

Plains

You have a +4 competence bonus on Spot checks. You gain a +1 insight

bonus on attack and damage rolls against plains creatures.

Underground

You have 60-foot darkvision, or 120-foot darkvision if you already had darkvision from another source. You gain a +1 insight bonus on attack and damage rolls against underground creatures.

Terrain Mastery can be taken multiple times. Each time it is taken choose a new terrain type.

TRAP SENSE II

Prerequisites: Character Level 6, Trap Sense I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +2 bonus on Reflex saves made to avoid traps and a +2 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense I.

WILD SHAPE II

Prerequisites: Character Level 6, Wild Shape I.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape twice per day.

7TH-LEVEL SPECIAL ABILITIES

All 7th-Level Special Abilities have "Character Level 7" as a prerequisite.

DAMAGE REDUCTION I

Prerequisites: Character Level 7.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains Damage Reduction. Subtract 1 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

POISON RESISTANCE I

Prerequisites: Character Level 7, Poison Use.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +1 natural saving throw bonus to all poisons.

SNEAK ATTACK IV

Prerequisites: Character Level 7, Sneak Attack III.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 4d6 extra damage (instead of 3d6).

WHOLENESS OF BODY

Prerequisites: Character Level 7, Purity of Body.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character can heal her own wounds. She can heal a number of hit points of damage equal to twice her current monk class level each day, and she can spread this healing out among several uses.

WILD SHAPE III

Prerequisites: Character Level 7, Wild Shape II.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape three times per day.

8TH-LEVEL SPECIAL ABILITIES

All 8th-Level Special Abilities have "Character Level 8" as a prerequisite.

CANNY DEFENSE

Prerequisites: Character Level 8, Base Attack Bonus +6, Perform 3 ranks,

Tumble 5 ranks, Dodge feat, Mobility feat, and Weapon Finesse feat.

Ability Type: Extraordinary.

Class Levels: Duelist.

Description: When not wearing armor or using a shield, the character adds 1 point of Intelligence bonus (if any) per duelist class level to her Dexterity bonus to modify Armor Class while wielding a melee weapon. If the character is caught flat-footed or otherwise denied her Dexterity bonus, she also loses this bonus.

DEFENDER AC BONUS I

Prerequisites: Character Level 8, dwarf, lawful alignment, base attack bonus +7, Dodge feat, Endurance feat, Toughness feat.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives a +1 dodge bonus to Armor Class. Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

DEFENSIVE STANCE I

Prerequisites: Character Level 8, dwarf, lawful alignment, base attack bonus +7, Dodge feat, Endurance feat, Toughness feat.

Ability Type: Natural.

Class Levels: None.

Description: When he adopts a defensive stance, the character gains phenomenal strength and durability, but he cannot move from the spot he is defending. He gains +1 to his Strength modifier, +2 to his Constitution modifier, a +2 resistance bonus on all saves, and a +4 dodge bonus to AC. The increase in Constitution increases the character's hit points by 2 points per level, but these hit points go away at the end of the defensive stance when the Constitution score modifier drops back 2 points. These extra hit points are not lost first the way temporary hit points are. While in a defensive stance, the character cannot use skills or abilities that would require him to shift his position. A defensive stance lasts for a number of rounds equal to 3 + the

character's (newly improved) Constitution modifier. The character may end his defensive stance voluntarily prior to this limit. At the end of the defensive stance, the character is winded and takes a -1 penalty to the Strength modifier for the duration of that encounter. The character can only use his defensive stance once per day as determined. Using the defensive stance takes no time itself, but the character can only do so during his action.

ENHANCE ARROW I

Prerequisites: Character Level 8, elf or half-elf, +6 base attack bonus, Point Blank Shot, Precise Shot, Weapon Focus (longbow or shortbow), ability to cast 1st-level arcane spells.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly becomes magical, gaining a +1 enhancement bonus. Unlike magic weapons created by normal means, the character need not spend experience points or gold pieces to accomplish this task. However, the character's magic arrows only function for her.

HIDE IN PLAIN SHADOW

Prerequisites: Character Level 8, Move Silently 8 ranks, Hide 10 ranks, Combat Reflexes feat, Dodge feat, Mobility feat.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can use the Hide skill even while being observed. As long as she is within 10 feet of some sort of shadow, the character can hide herself from view in the open without anything to actually hide behind. She cannot, however, hide in her own shadow.

IMPROVED ALLY

Prerequisites: Character Level 8, Spell Focus (conjuration), ability to cast *lesser planar ally*.

Ability Type: Natural.

Class Levels: None.

Description: When the character casts a *planar ally* spell (including the lesser and greater versions), he makes a Diplomacy check to convince the creature to aid him for a reduced payment. If the character's Diplomacy check adjusts the creature's attitude to helpful the creature will work for 50% of the standard fee, as long as the task is one that is not against its nature.

The character's improved ally class feature only works when the planar ally shares at least one aspect of alignment with the thaumaturgist.

The character can have only one such ally at a time, but he may bargain for tasks from other planar allies normally.

INSPIRE COURAGE II

Prerequisites: Character Level 8, Inspire Courage I.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's Inspire Courage increase by 1 and is now +2. See Inspire Courage I for details.

LOREMASTER SECRET

Prerequisites: Character Level 8, Knowledge (any two specialties) 10 ranks each, any three metamagic or item creation feats, Skill Focus (Knowledge [any specialty]), ability to cast seven different divination spells, one of which must be 3rd level or higher.

Ability Type: Natural.

Class Levels: Loremaster.

Description: The character chooses one secret from the table below. Her loremaster class level plus Intelligence modifier determines the secrets from which she can choose. She can't choose the same secret twice.

Loremaster Secret can be taken multiple times. Each time it is taken, choose a different secret from among those allowed.

LOREMASTER SECRETS

Level+Int Modifier	Secret	Effect
1	Instant mastery	4 ranks of a skill in which the character has no ranks
2	Secret health	+3 hit points
3	Secrets of inner strength	+2 bonus on Will saves
4	The lore of true stamina	+2 bonus on Fortitude saves
5	Secret knowledge of avoidance	+2 bonus on Reflex saves
6	Weapon trick	+1 bonus on attack rolls
7	Dodge trick	+1 dodge bonus to AC
8	Applicable knowledge	Any feat
9	Newfound arcana	1 bonus 1st-level spell
10	More newfound arcana	1 bonus 2nd-level spell

RAGE III

Prerequisites: Character Level 8, non-lawful alignment, Rage II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage three times per day. See Rage I for details.

SLOW FALL III

Prerequisites: Character Level 8, Slow Fall II.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 40 feet shorter than it actually is. This distance

replaces the distance gained from Slow Fall II.

SWIFT TRACKER

Prerequisites: Character Level 8, Track feat.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can move at his normal speed while following tracks without taking the normal -5 penalty. He takes only a -10 penalty (instead of the normal -20) when moving at up to twice normal speed while tracking.

UNARMED STRIKE III

Prerequisites: Character Level 8, Unarmed Strike II.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 1d8 damage with unarmed strikes, a medium character 1d10 damage, and a large character 2d8 damage.

WILD SHAPE: LARGE

Prerequisites: Character Level 8, Wild Shape III.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Large animal when using Wild Shape.

9TH-LEVEL SPECIAL ABILITIES

All 9th-Level Special Abilities have "Character Level 9" as a prerequisite.

BESTOW CURSE II

Prerequisites: Character Level 9, Aura of Alignment (Chaos), Bestow Curse I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *bestow curse* effect, twice per week (instead of once per week).

CAUSE DISEASE II

Prerequisites: Character Level 9, Aura of Alignment (Evil), Cause Disease I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the *contagion* spell), twice per week (instead of once per week).

DARKVISION

Prerequisites: Character Level 9, Hide in Plain Shadow.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can see in the dark as though she were permanently under the effect of a *darkvision* spell.

FLURRY OF BLOWS III

Prerequisites: Character Level 9, Flurry of Blows II.

Ability Type: Natural.

Class Levels: None.

Description: The character's Flurry of Blows attack penalty disappears (i.e., becomes +0 instead of -1).

IMBUE ARROW

Prerequisites: Character Level 9, Enhance Arrow I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character gains the ability to place an area spell upon an arrow. When the arrow is fired, the spell's area is centered on where the arrow lands, even if the spell could normally be centered only on the caster. This ability allows the character to use the bow's range rather than the spell's range. It takes a standard action to cast the spell and fire the arrow. The arrow must be fired in the round the spell is cast, or the spell is wasted.

IMPROVED EVASION

Prerequisites: Character Level 9, Evasion.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's evasion ability improves. She still takes no damage on a successful Reflex saving throw against attacks, but henceforth she takes only half damage on a failed save. A helpless character does not gain the benefit of improved evasion.

IMPROVED REACTION I

Prerequisites: Character Level 9, Canny Defense.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains a +2 bonus on initiative checks. This bonus stacks with the benefit provided by the Improved Initiative feat.

INSPIRE GREATNESS

Prerequisites: Character Level 9, Suggestion, 12 or more ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use music or poetics to inspire greatness in himself or a single willing ally within 30 feet, granting him or her extra fighting capability. For every three bard class levels the bard attains beyond 9th, he can target one additional ally with a single use of this ability (two at 12th level, three at 15th, four at 18th). To inspire greatness, the character must sing and an ally must hear him sing. The effect lasts for as long as the ally hears the character sing and for 5 rounds thereafter. A creature inspired with greatness gains 2 bonus Hit Dice (d10s), the commensurate number of temporary hit points (apply the target's Constitution modifier, if any, to these bonus Hit Dice), a +2 competence bonus on attack rolls, and a +1 competence bonus on Fortitude saves. The bonus Hit Dice count as regular Hit Dice for determining the effect of spells

that are Hit Dice dependant. Inspire greatness is a mind-affecting ability.

POISON RESISTANCE II

Prerequisites: Character Level 9, Poison Use, Poison Resistance I.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +2 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance I.

RANGED LEGERDEMAIN I

Prerequisites: Character Level 9, non-lawful alignment, Decipher Script 7 ranks, Disable Device 7 ranks, Escape Artist 7 ranks, Knowledge (arcana) 4 ranks, ability to cast *mage hand*, ability to cast one arcane spell of 3rd level or higher.

Ability Type: Natural.

Class Levels: None.

Description: The character can perform one of the following skills at a range of 30 feet: Disable Device, Open Lock, or Sleight of Hand. Working at a distance increases the normal skill check DC by 5, and the character cannot take 10 on this check. Any object to be manipulated must weigh 5 pounds or less.

He can make only one ranged legerdemain skill check each day, and only if he has at least 1 rank in the skill being used.

REMOVE CURSE II

Prerequisites: Character Level 9, Aura of Alignment (Law), Remove Curse I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove curse* effect, twice per week (instead of once per week).

REMOVE DISEASE II

Prerequisites: Character Level 9, Aura of Alignment (Good), Remove Disease I.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove disease* effect, as the spell, twice per week (instead of only once per week).

SNEAK ATTACK V

Prerequisites: Character Level 9, Sneak Attack IV.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 5d6 extra damage (instead of 4d6).

SPEED BONUS III

Prerequisites: Character Level 9, Speed Bonus II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +30 ft. This replaces the enhancement bonus granted by Speed Bonus II. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TRAP SENSE III

Prerequisites: Character Level 9, Trap Sense II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +3 bonus on Reflex saves made to avoid traps and a +3 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense II.

VENOM IMMUNITY

Prerequisites: Character Level 9, Wild Shape: Large.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains immunity to all poisons.

10TH-LEVEL SPECIAL ABILITIES

All 10th-Level Special Abilities have "Character Level 10" as a prerequisite.

DAMAGE REDUCTION II

Prerequisites: Character Level 10, Damage Reduction I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 1 point, for a new total of 2. Subtract 2 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

DEFENSIVE STANCE II

Prerequisites: Character Level 10, Defensive Stance I.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance twice per day (instead of only once per day).

ENHANCE ARROW II

Prerequisites: Character Level 10, Enhance Arrow I.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +2 enhancement bonus (instead of +1).

EXTEND SUMMONING

Prerequisites: Character Level 10, Improved Ally, Augment Summoning feat.

Ability Type: Natural.

Class Levels: None.

Description: All spells from the summoning subschool that the character casts have their durations doubled, as if the Extend Spell feat had been applied to them. The levels of the summoning spells don't change, however. This ability stacks with the

effect of the Extend Spell feat, which does change the spell's level.

ENHANCED MOBILITY

Prerequisites: Character Level 10, Improved Reaction.

Ability Type: Extraordinary.

Class Levels: None.

Description: When wearing no armor and not using a shield, the character gains an additional +4 bonus to AC against attacks of opportunity caused when she moves out of a threatened square.

FAVORED ENEMY III

Prerequisites: Character Level 10, Favored Enemy II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

INTUITIVE DEFENSE III

Prerequisites: Character Level 10, Intuitive Defense II.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +2 bonus to AC. This bonus replaces the bonus to AC granted by Intuitive Defense II.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries

a shield, or when she carries a medium or heavy load.

KI STRIKE: LAWFUL

Prerequisites: Character Level 10, lawful alignment, Ki Strike: Magic.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's unarmed attacks are empowered with ki. Her unarmed attacks are treated as magic weapons and lawful weapons for the purpose of dealing damage to creatures with damage reduction.

ROGUE SPECIAL ABILITY

Prerequisites: Character Level 10.

Ability Type: Varies (See Below).

Class Levels: None.

Description: The character gains a special ability of her choice from among the following options. Rogue Special Ability can be taken multiple times. Each time, choose a different special ability.

Crippling Strike (Ex)

A character with this ability can sneak attack opponents with such precision that her blows weaken and hamper them. An opponent damaged by one of her sneak attacks also loses 1 point of Strength ability score modifier. Ability score modifier points lost to damage return on their own at the rate of 1 modifier point per two days for each damaged ability.

Defensive Roll (Ex)

The character can roll with a potentially lethal blow to take less damage from it than she otherwise would. Once per day, when she would be reduced to 0 or fewer hit points by damage in combat (from a weapon or other blow, not a spell or special ability), the character can attempt to roll with the damage. To use this ability, the character must attempt a Reflex saving throw (DC = damage dealt). If the save succeeds, she takes only half damage from the blow; if it fails, she takes full damage. She must be aware of the attack and able to react to it in order to

execute her defensive roll—if she is denied her Dexterity bonus to AC, she can't use this ability. Since this effect would not normally allow a character to make a Reflex save for half damage, the character's evasion ability does not apply to the defensive roll.

Improved Evasion (Ex)

This ability works like evasion, except that while the character still takes no damage on a successful Reflex saving throw against attacks henceforth she takes only half damage on a failed save. A helpless character does not gain the benefit of improved evasion.

Opportunist (Ex)

Once per round, the character can make an attack of opportunity against an opponent who has just been struck for damage in melee by another character. This attack counts as the character's attack of opportunity for that round. Even a character with the Combat Reflexes feat can't use the opportunist ability more than once per round.

Skill Mastery

The character becomes so certain in the use of a certain broad skill that she can use it reliably even under adverse conditions.

Upon gaining this ability, she selects a broad skill from among those in this list: Athletics, Awareness, Interaction, Knowledge, Languages, Perform, Profession, Science, Technology, Thievery, Vehicles, or Wilderness. When making any skill checks with this broad skill, she may take 10 even if stress and distractions would normally prevent her from doing so. A character may gain this special ability multiple times, selecting additional broad skills for it to apply to each time.

Slippery Mind (Ex)

This ability represents the character's ability to wriggle free from magical effects that would otherwise control or compel her. If a character with slippery mind is affected by an enchantment spell or effect and fails her saving throw, she can attempt it again 1 round

later at the same DC. She gets only this one extra chance to succeed on her saving throw.

SHADOW ILLUSION

Prerequisites: Character Level 10, Hide in Plain Shadow, Darkvision.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can create visual illusions. This ability's effect is identical to that of the arcane spell *silent image* and may be employed once per day.

SLOW FALL IV

Prerequisites: Character Level 10, Slow Fall III.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 50 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall III.

SMITE CHAOS III

Prerequisites: Character Level 10, Smite Chaos II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos three times per day (instead of twice per day).

SMITE EVIL III

Prerequisites: Character Level 10, Smite Evil II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil three times per day (instead of twice per day).

SMITE GOOD III

Prerequisites: Character Level 10, Smite Good II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good three times per day (instead of twice per day).

SMITE LAW III

Prerequisites: Character Level 10, Smite Law II.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law three times per day (instead of twice per day).

SUMMON SHADOW

Prerequisites: Character Level 10, Hide in Plain Shadow, Darkvision.

Ability Type: Supernatural.

Class Levels: Shadowdancer.

Description: The character can summon a shadow, an undead shade. Unlike a normal shadow, this shadow's alignment matches that of the character, and the creature cannot create spawn. The summoned shadow cannot be turned, rebuked, or commanded by any third party. This shadow serves as a companion to the character and can communicate intelligibly with the character. Every third shadowdancer class level gained by the character adds +2 HD (and the requisite base attack and base save bonus increases) to her shadow companion.

If a shadow companion is destroyed, or the character chooses to dismiss it, the character must attempt a DC 15 Fortitude save. If the saving throw fails, the character loses 2 power points (PP). A successful saving throw reduces the loss by half, to 1 PP. The character's PP total can never go below zero as the result of a shadow's dismissal or destruction. A destroyed or dismissed shadow companion cannot be replaced for 30 days.

WILD SHAPE IV

Prerequisites: Character Level 10, Wild Shape III.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape four times per day.

11TH-LEVEL SPECIAL ABILITIES

All 11th-Level Special Abilities have "Character Level 11" as a prerequisite.

COMBAT STYLE MASTERY: ARCHERY

Prerequisites: Character Level 11, Improved Combat Style: Archery.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Improved Precise Shot feat, even if he does not have the normal prerequisites for that feat. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

COMBAT STYLE MASTERY: TWO-WEAPON

Prerequisites: Character Level 11, Improved Combat Style: Two-Weapon.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character is treated as having the Greater Two-Weapon Fighting feat, even if he does not have the normal prerequisites for that feat. The benefits of the character's style apply only when he wears light or no armor. He loses all benefits of his combat style when wearing medium or heavy armor.

CONTINGENT CONJURATION

Prerequisites: Character Level 11, Extend Summoning.

Ability Type: Natural.

Class Levels: None.

Description: The character can prepare a summoning or calling spell ahead of time to be triggered by some other event. This functions as described for the *contingency* spell, including having the character cast the summoning or

calling spell beforehand. The spell is cast instantly when the trigger event occurs.

The conditions needed to bring the spell into effect must be clear, although they can be general. If complicated or convoluted condition as are prescribed, the contingent conjuration may fail when triggered. The conjuration spell occurs based solely on the stated conditions, regardless of whether the thaumaturgist wants it to, although most conjurations can be dismissed normally. The character can have only one contingent conjuration active at a time.

DEFENDER AC BONUS II

Prerequisites: Character Level 11, Defender AC Bonus I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives an additional +1 dodge bonus to Armor Class. This bonus stacks with the dodge bonus granted by Defender AC Bonus I (for a new total of +2). Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

DIAMOND BODY

Prerequisites: Character Level 11, Wholeness of Body.

Ability Type: Supernatural.

Class Levels: None.

Description: The character gains immunity to poisons of all kinds.

FIENDISH SERVANT

Prerequisites: Character Level 11, evil alignment.

Ability Type: Spell-Like.

Class Levels: Blackguard.

Description: The character gains a fiendish servant. See the blackguard prestige class special ability in the System Reference Document for more details.

GRACE

Prerequisites: Character Level 11, Enhanced Mobility.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains an additional +2 competence bonus on all Reflex saving throws. This ability functions for the character only when she is wearing no armor and not using a shield.

GREATER FLURRY

Prerequisites: Character Level 11, Flurry of Blows III.

Ability Type: Natural.

Class Levels: None.

Description: In addition to the standard single extra attack the character gets from flurry of blows, she gets a second extra attack at her full base attack bonus.

GREATER RAGE

Prerequisites: Character Level 11, non-lawful alignment, Rage III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's bonuses to the Strength and Constitution ability score modifiers during his rage each increase to +3, and his morale bonus on Will saves increases to +3. The penalty to AC remains at -2.

IMPROMPTU SNEAK ATTACK I

Prerequisites: Character Level 11, non-lawful alignment, Decipher Script 7 ranks, Disable Device 7 ranks, Escape Artist 7 ranks, Knowledge (arcana) 4 ranks, ability to cast *mage hand*, ability to cast one arcane spell of 3rd level or higher..

Ability Type: Natural.

Class Levels: None.

Description: The character can declare one melee or ranged attack he makes to be a sneak attack (the target can be no more than 30 feet distant if the impromptu sneak attack is a ranged attack). The target of an impromptu sneak attack loses any Dexterity bonus to AC, but only against that attack. The power can be used against any target, but creatures that are not subject to

critical hits take no extra damage (though they still lose any Dexterity bonus to AC against the attack). The character can use this ability once per day.

PLANAR TERRAIN MASTERY

Prerequisites: Character Level 11, five Terrain Mastery advantages.

Ability Type: Natural.

Class Levels: None.

Description: Choose one terrain type found below under Planar Terrain Mastery Benefits. Planar terrain mastery gives the character a bonus on checks involving a skill useful in that planar terrain, or some other appropriate benefit. The character also knows how to fight dangerous creatures typically found in that planar terrain, gaining a +1 insight bonus on attack rolls and damage rolls against creatures with that terrain mentioned in the Environment entry of their descriptions. The character only gains the bonus if the creature description specifically lists the terrain type.

Characters take their planar terrain mastery with them wherever they go. They retain their planar terrain mastery bonuses on skill checks, attack rolls, and damage rolls whether they're actually in the relevant terrain or not.

Planar Terrain Mastery can be taken multiple times. Each time, choose a different terrain type.

Planar Terrain Mastery Benefits

Fiery (Planar)

This kind of planar terrain mastery provides you with resistance to fire 20. You gain a +1 insight bonus on attack and damage rolls against outsiders and elementals with the fire subtype.

Weightless (Planar)

You gain a +30-foot bonus to your fly speed on planes with no gravity or subjective gravity. You gain a +1 insight on attack and damage rolls against creatures native to the Astral Plane, the Elemental Plane of Air, and the Ethereal Plane.

Cold (Planar)

This kind of planar terrain mastery provides you with resistance to cold 20. You gain a +1 insight bonus on attack and damage rolls against outsiders and elementals with the cold subtype.

Shifting (Planar)

You instinctively anticipate shifts in the reality of the plane that bring you closer to your destination, giving you the spell-like ability to use dimension door (as the spell cast at your character level) once every 1d4 rounds. You gain a +1 insight bonus on attack and damage rolls against outsiders and elementals native to a shifting plane.

Aligned (Planar)

You have the instinctive ability to mimic the dominant alignment of the plane. You incur none of the penalties for having an alignment at odds with that of the plane, and spells and abilities that harm those of the opposite alignment don't affect you. You have the dominant alignment of the plane with regard to magic, but your behavior and any alignment-related Class Features you have are unaffected.

Cavernous (Planar)

You gain tremorsense with a 30-foot range.

Other (Planar)

If other planes are in use additional Planar Terrains can be created by the DM.

POISON RESISTANCE III

Prerequisites: Character Level 11, Poison Use, Poison Resistance II.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +3 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance II.

SEEKER ARROW

Prerequisites: Character Level 11, Enhance Arrow II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can launch an arrow once per day at a target known to her within range, and the arrow travels to the target, even around corners. Only an unavoidable obstacle or the limit of the arrow's range prevents the arrow's flight. This ability negates cover and concealment modifiers, but otherwise the attack is rolled normally. Using this ability is a standard action (and shooting the arrow is part of the action).

SHADOW JUMP I

Prerequisites: Character Level 11, Shadow Illusion, Summon Shadow.

Ability Type: Supernatural.

Class Levels: None.

Description: The character gains the ability to travel between shadows as if by means of a *dimension door* spell. The limitation is that the magical transport must begin and end in an area with at least some shadow. The character can jump up to a total of 20 feet each day in this way; this may be a single jump of 20 feet or two jumps of 10 feet each.

SNEAK ATTACK VI

Prerequisites: Character Level 11, Sneak Attack V.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 6d6 extra damage (instead of 5d6).

WILD SHAPE: TINY

Prerequisites: Character Level 11, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Tiny animal when using Wild Shape.

12TH-LEVEL SPECIAL ABILITIES

All 12th-Level Special Abilities have "Character Level 12" as a prerequisite.

ABUNDANT STEP

Prerequisites: Character Level 12, Diamond Body.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character can slip magically between spaces, as if using the spell *dimension door*, once per day. Her caster level for this effect is one-half her monk class level (rounded down).

BESTOW CURSE III

Prerequisites: Character Level 12, Aura of Alignment (Chaos), Bestow Curse II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *bestow curse* effect, three times per week (instead of twice per week).

CAUSE DISEASE III

Prerequisites: Character Level 12, Aura of Alignment (Evil), Cause Disease II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the *contagion* spell), three times per week (instead of twice per week).

DEFENSIVE STANCE III

Prerequisites: Character Level 12, Defensive Stance II.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance three times per day (instead of twice per day).

ENHANCE ARROW III

Prerequisites: Character Level 12, Enhance Arrow II.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +3 enhancement bonus (instead of +2).

PLANAR COHORT

Prerequisites: Character Level 12, Contingent Conjunction.

Ability Type: Natural.

Class Levels: None.

Description: The character can use any of the *planar ally* spells to call a creature to act as his cohort. The called creature serves loyally and well as long as the character continues to advance a cause important to the creature.

To call a planar cohort, the character must cast the relevant spell, paying the XP costs normally. It takes an offering of 1,000 gp × the HD of the creature to convince it to serve as a planar cohort, and the Improved Ally advantage can't be used to reduce or eliminate this cost. The planar cohort can't have more Hit Dice than the character has, and must have an ECL no higher than the thaumaturgist's character level -2.

The character can have only one planar cohort at a time, but he can continue to make agreements with other called creatures normally. A planar cohort replaces the character's existing cohort, if he has one by virtue of the Leadership feat.

PRECISE STRIKE I

Prerequisites: Character Level 12, Grace.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains the ability to strike precisely with a light or one-handed piercing weapon, gaining an extra 1d6 damage added to her normal damage roll.

When making a precise strike, the character cannot attack with a weapon in her other hand or use a shield. The character's precise strike only works against living creatures with discernible

anatomies. Any creature that is immune to critical hits is not vulnerable to a precise strike, and any item or ability that protects a creature from critical hits also protects a creature from a precise strike.

RAGE IV

Prerequisites: Character Level 12, non-lawful alignment, Rage III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage four times per day. See Rage I for details.

REMOVE CURSE III

Prerequisites: Character Level 12, Aura of Alignment (Law), Remove Curse II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove curse* effect, three times per week (instead of two times per week).

REMOVE DISEASE III

Prerequisites: Character Level 12, Aura of Alignment (Good), Remove Disease II.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove disease* effect, as the spell, three times per week (instead of twice per week).

SLOW FALL V

Prerequisites: Character Level 12, Slow Fall IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 60 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall IV.

SONG OF FREEDOM

Prerequisites: Character Level 12, Inspire Greatness, 15 or more ranks in Perform.

Ability Type: Spell-Like.

Class Levels: Bard.

Description: The character can use music or poetics to create an effect equivalent to the *break enchantment* spell (caster level equals the character's bard class level). Using this ability requires 1 minute of uninterrupted concentration and music, and it functions on a single target within 30 feet. The character can't use song of freedom on himself.

SPEED BONUS IV

Prerequisites: Character Level 12, Speed Bonus III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +40 ft. This replaces the enhancement bonus granted by Speed Bonus III. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TRAP SENSE IV

Prerequisites: Character Level 12, Trap Sense III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +4 bonus on Reflex saves made to avoid traps and a +4 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense III.

UNARMED STRIKE IV

Prerequisites: Character Level 12, Unarmed Strike III.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 1d10 damage with unarmed strikes, a medium character

2d6 damage, and a large character 3d6 damage.

WILD SHAPE: PLANT

Prerequisites: Character Level 12, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character is able to use wild shape to change into a plant creature with the same size restrictions as for animal forms. (The character can't use this ability to take the form of a plant that isn't a creature.)

13TH-LEVEL SPECIAL ABILITIES

All 13th-Level Special Abilities have "Character Level 13" as a prerequisite.

A THOUSAND FACES

Prerequisites: Character Level 13, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to change her appearance at will, as if using the *disguise self* spell, but only while in her normal form. This affects the character's body but not her possessions. It is not an illusory effect, but a minor physical alteration of the character's appearance, within the limits described for the spell.

ACROBATIC CHARGE

Prerequisites: Character Level 13, Precise Strike.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains the ability to charge in situations where others cannot. She may charge over difficult terrain that normally slows movement. Depending on the circumstance, she may still need to make appropriate checks to successfully move over the terrain.

DAMAGE REDUCTION III

Prerequisites: Character Level 13, Damage Reduction II or Defensive Stance III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains damage reduction 3/-. This damage reduction replaces the damage reduction gained from Damage Reduction I and Damage Reduction II. Subtract 3 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

CAMOUFLAGE

Prerequisites: Character Level 13.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can use the Hide skill in any sort of natural terrain, even if the terrain doesn't grant cover or concealment.

DIAMOND SOUL

Prerequisites: Character Level 13, Abundant Step.

Ability Type: Extraordinary.

Class Levels: Monk.

Description: The character gains spell resistance equal to her current monk class level + 10. In order to affect the character with a spell, a spellcaster must get a result on a caster level check (1d20 + caster level) that equals or exceeds the character's spell resistance.

GREATER LORE

Prerequisites: Character Level 13, three Loremaster Secrets.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character gains the ability to understand magic items, as with the *identify* spell.

PHASE ARROW

Prerequisites: Character Level 13, Enhance Arrow III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can launch an arrow once per day at a target known to her within range, and the arrow travels to the target in a straight path, passing through any nonmagical barrier or wall in its way. (Any magical barrier stops the arrow.) This ability negates cover, concealment, and even armor modifiers, but otherwise the attack is rolled normally.

Using this ability is a standard action (and shooting the arrow is part of the action).

POISON RESISTANCE IV

Prerequisites: Character Level 13, Poison Use, Poison Resistance III.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +4 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance III.

RANGED LEGERDEMAIN II

Prerequisites: Character Level 13, non-lawful alignment, Ranged Legerdemain I.

Ability Type: Natural.

Class Levels: None.

Description: The character can now make two ranged legerdemain skill checks each day. See details under Ranged Legerdemain I.

SHADOW JUMP II

Prerequisites: Character Level 13, Shadow Jump I.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can now shadow jump up to a total of 40 feet each day in this way; this may be a single jump of 40 feet, two jumps of 20 feet each, four jumps of 10 feet each, etc.

SNEAK ATTACK VII

Prerequisites: Character Level 13, Sneak Attack VI.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 7d6 extra damage (instead of 6d6).

14TH-LEVEL SPECIAL ABILITIES

All 14th-Level Special Abilities have "Character Level 14" as a prerequisite.

DEFENDER AC BONUS III

Prerequisites: Character Level 14, Defender AC Bonus II.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives an additional +1 dodge bonus to Armor Class. This bonus stacks with the dodge bonuses granted by previous Defender AC Bonus special abilities (for a new total of +3). Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

DEFENSIVE STANCE IV

Prerequisites: Character Level 14, Defensive Stance III, Damage Reduction III.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance four times per day (instead of three times per day).

ELABORATE PARRY

Prerequisites: Character Level 14, Acrobatic Charge.

Ability Type: Extraordinary.

Class Levels: Duelist.

Description: If the character chooses to fight defensively or use total defense in melee combat, she gains an additional +1 dodge bonus to AC for each class level of duelist she has.

ENHANCE ARROW IV

Prerequisites: Character Level 14, Enhance Arrow III.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +4 enhancement bonus (instead of +3).

HIEROPHANT SPECIAL ABILITY

Prerequisites: Character Level 14, Knowledge (religion) 15 ranks, any metamagic feat, ability to cast 7th-level divine spells.

Ability Type: Varies.

Class Levels: None.

Description: The character gains a special ability of his choice from among the following. Hierophant Special Ability can be taken multiple times. Each time, choose a different special ability or a different version of a special ability that has multiple applications.

Blast Infidel (Su)

The character can use negative energy spells to their maximum effect on creatures with an alignment opposed to the character. Any spell with a description that involves inflicting or channeling negative energy cast on a creature of the opposed alignment works as if under the effect of a Maximize Spell feat (without using a higher-level spell slot). Undead affected by this ability heal the maximized amount of damage.

Divine Reach (Su)

A character with this ability can use touch spells on targets up to 30 feet away. If the spell requires a melee touch attack, the character must make a ranged touch attack instead. Divine reach can be selected a second time as a special ability, in which case the range increases to 60 feet.

Faith Healing (Su)

The character can use healing spells to their maximum effect on creatures of the same alignment as the character

(including the character himself). Any spell with the healing descriptor cast on such creatures works as if under the effects of a Maximize Spell feat (without using a higher-level spell slot).

Gift of the Divine (Su)

Available only to characters with cleric class or spellcaster levels, this ability allows the character to transfer one or more uses of his turn undead ability to a willing creature. (Characters who rebuke undead transfer uses of rebuke undead instead.) The transfer lasts anywhere from 24 hours to one week (chosen at the time of transfer), and while the transfer is in effect, the number of turning attempts per day allowed to the character is reduced by the number transferred. The recipient turns undead as a cleric of the character's cleric class level but uses her own Charisma modifier.

Mastery of Energy (Su)

Available only to characters with cleric class or spellcaster levels, this ability allows the character to channel positive or negative energy much more effectively, increasing his ability to affect undead. Add a +4 bonus to the character's turning checks and turning damage rolls. This ability only affects undead, even if the character can turn other creatures, such as with a granted power of a domain.

Power of Nature (Su)

Available only to characters with druid class or spellcasting levels, this ability allows the character to temporarily transfer one or more of his druid special abilities (those appearing in the druid basic class description in the System Reference Document) to a willing creature. The transfer lasts anywhere from 24 hours to one week (chosen at the time of transfer), and while the transfer is in effect, the character cannot use the transferred power. He can transfer any of his druid powers except spellcasting and the ability to have an animal companion.

The wild shape ability can be partially or completely transferred. The character chooses how many uses of wild shape per day to give to transfer

and retains the rest of the uses for himself. If the character can assume the form of Tiny or Huge animals, the recipient can as well.

As with the imbue with spell ability spell, the character remains responsible to his deity for any use to which the recipient puts the transferred abilities.

Spell Power

This special ability increases the character's effective caster level by 1 for purposes of determining level-dependent spell variables and for caster level checks. This ability can be selected more than once, and changes to effective caster level are cumulative.

Spell-Like Ability

A character who selects this special ability can use one of his divine spell slots (or an appropriate number of spell points) to permanently prepare one of his divine spells as a spell-like ability that can be used twice per day. The character does not use any components when casting the spell, although a spell that costs XP to cast still does so, and a spell with a costly material component instead costs him 10 times that amount in XP.

The spell normally uses a spell slot of the spell's level (or higher, if the character chooses to permanently attach a metamagic feat to the spell chosen). The character can use an available higher-level spell slot to use the spell-like ability more than twice per day. Allocating a slot three levels higher allows him to cast the spell four times per day, and a slot six levels higher lets him cast it six times per day. If selected more than one time as a special ability, this ability can apply to the same spell (increasing the number of times per day it can be used) or to a different spell.

HIGH ARCANA

Prerequisites: Character Level 14, Knowledge (arcana) 15 ranks, Spellcraft 15 ranks, Skill Focus (Spellcraft), Spell Focus in two schools of magic, ability to cast 7th-level arcane spells, knowledge of 5th-level or higher spells from at least five schools.

Ability Type: Varies.

Class Levels: None or Archmage.

Description: The character gains the opportunity to select a special ability from among those described below by permanently eliminating one existing spell slot (she cannot eliminate a spell slot of higher level than the highest-level spell she can cast). Each special ability has a minimum required spell slot level, as specified in its description.

The character may choose to eliminate a spell slot of a higher level than that required to gain a type of high arcana.

High Arcana can be taken multiple times. Each time, choose a different special ability or a different version of a special ability that has multiple applications.

Arcane Fire (Su)

The character gains the ability to change arcane spell energy into arcane fire, manifesting it as a bolt of raw magical energy. The bolt is a ranged touch attack with long range (400 feet + 40 feet/class level of archmage) that deals 1d6 points of damage per class level of the archmage plus 1d6 points of damage per level of the spell used to create the effect. This ability costs one 9th-level spell slot.

Arcane Reach (Su)

The character can use spells with a range of touch on a target up to 30 feet away. The character must make a ranged touch attack. Arcane reach can be selected a second time as a special ability, in which case the range increases to 60 feet. This ability costs one 7th-level spell slot.

Mastery of Counterspelling

When the character counterspells a spell, it is turned back upon the caster as if it were fully affected by a spell turning spell. If the spell cannot be affected by spell turning, then it is merely counterspelled. This ability costs one 7th-level spell slot.

Mastery of Elements

The character can alter an arcane spell when cast so that it utilizes a different element from the one it normally uses. This ability can only alter a spell with the acid, cold, fire, electricity, or sonic descriptor. The spell's casting time is unaffected. The caster decides whether to alter the spell's energy type and chooses the new energy type when he begins casting. This ability costs one 8th-level spell slot.

Mastery of Shaping

The character can alter area and effect spells that use one of the following shapes: burst, cone, cylinder, emanation, or spread. The alteration consists of creating spaces within the spell's area or effect that are not subject to the spell. The minimum dimension for these spaces is a 5-foot cube. Furthermore, any shapeable spells have a minimum dimension of 5 feet instead of 10 feet. This ability costs one 6th-level spell slot.

Spell Power

This ability increases the character's effective caster level by +1 (for purposes of determining level-dependent spell variables such as damage dice or range, and caster level checks only). This ability costs one 5th-level spell slot.

Spell-Like Ability

A character who selects this type of high arcana can use one of her arcane spell slots (other than a slot expended to learn this or any other type of high arcana) to permanently prepare one of her arcane spells as a spell-like ability that can be used twice per day. The character does not use any components when casting the spell, although a spell that costs XP to cast still does so and a spell with a costly material component instead costs her 10 times that amount in XP. This ability costs one 5th-level spell slot.

The spell-like ability normally uses a spell slot of the spell's level, although the character can choose to make a spell modified by a metamagic feat into a spell-like ability at the appropriate spell level.

The character may use an available higher-level spell slot in order to use the spell-like ability more often. Using a slot three levels higher than the chosen spell allows her to use the spell-like ability four times per day, and a slot six levels higher lets her use it six times per day.

If spell-like ability is selected more than one time as a high arcana choice, this ability can apply to the same spell chosen the first time (increasing the number of times per day it can be used) or to a different spell.

INDOMITABLE WILL

Prerequisites: Character Level 14, non-lawful alignment, Greater Rage.

Ability Type: Extraordinary.

Class Levels: None.

Description: While in a rage, the character gains a +4 bonus on Will saves to resist enchantment spells. This bonus stacks with all other modifiers, including the morale bonus on Will saves he also receives during his rage.

INSPIRE COURAGE III

Prerequisites: Character Level 14, Song of Freedom.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's Inspire Courage increases by 1 and is now +3. See Inspire Courage I for details.

SLOW FALL VI

Prerequisites: Character Level 14, Slow Fall V.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 70 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall V.

WILD SHAPE V

Prerequisites: Character Level 14, Wild Shape IV.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape five times per day.

15TH-LEVEL SPECIAL ABILITIES

All 15th-Level Special Abilities have "Character Level 15" as a prerequisite.

BESTOW CURSE IV

Prerequisites: Character Level 15, Aura of Alignment (Chaos), Bestow Curse III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *bestow curse* effect, four times per week (instead of three times per week).

CAUSE DISEASE IV

Prerequisites: Character Level 15, Aura of Alignment (Evil), Cause Disease III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the *contagion* spell), four times per week (instead of three times per week).

FAVORED ENEMY IV

Prerequisites: Character Level 15, Favored Enemy III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific

creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

HAIL OF ARROWS

Prerequisites: Character Level 15, Enhance Arrow IV.

Ability Type: Spell-Like.

Class Levels: Arcane Archer.

Description: In lieu of her regular attacks, once per day the character can fire an arrow at each and every target within range, to a maximum of one target for every arcane archer class level. Each attack uses the character's primary attack bonus, and each enemy may only be targeted by a single arrow.

IMPROMPTU SNEAK ATTACK II

Prerequisites: Character Level 15, non-lawful alignment, Impromptu Sneak Attack I.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use impromptu sneak attack twice per day.

IMPROVED REACTION II

Prerequisites: Character Level 15, Improved Reaction I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's bonus from Improved Reaction I increases to +4. This replaces the bonus gained from Improved Reaction I. This bonus stacks with the benefit provided by the Improved Initiative feat.

INSPIRE HEROICS

Prerequisites: Character Level 15, Inspire Courage III, 18 or more ranks in Perform.

Ability Type: Supernatural.

Class Levels: Bard.

Description: The character can use music or poetics to inspire tremendous heroism in himself or a single willing ally within 30 feet. For every three bard

class levels the character attains beyond 15th, he can inspire heroics in one additional creature. To inspire heroics, the character must sing and an ally must hear the character sing for a full round. A creature so inspired gains a +4 morale bonus on saving throws and a +4 dodge bonus to AC. The effect lasts for as long as the ally hears the character sing and for up to 5 rounds thereafter. Inspire heroics is a mind-affecting ability.

INTUITIVE DEFENSE IV

Prerequisites: Character Level 15, Intuitive Defense III.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +3 bonus to AC. This bonus replaces the bonus to AC granted by Intuitive Defense III.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

MOBILE DEFENSE

Prerequisites: Character Level 15, Defensive Stance IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can adjust his position while maintaining a defensive stance. While in a defensive stance, he can take one 5-foot step each round without losing the benefit of the stance.

POISON RESISTANCE V

Prerequisites: Character Level 15, Poison Use, Poison Resistance IV.

Ability Type: Natural.

Class Levels: None.

Description: The character gains a +5 natural saving throw bonus to all poisons. This bonus replaces the bonus granted by Poison Resistance IV.

QUIVERING PALM

Prerequisites: Character Level 15, Ki Strike: Lawful, Diamond Soul.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character can set up vibrations within the body of another creature that can thereafter be fatal if the character so desires. She can use this quivering palm attack once a week, and she must announce her intent before making her attack roll. Constructs, oozes, plants, undead, incorporeal creatures, and creatures immune to critical hits cannot be affected. Otherwise, if the character strikes successfully and the target takes damage from the blow, the quivering palm attack succeeds. Thereafter the character can try to slay the victim at any later time, as long as the attempt is made within a number of days equal to her monk class level. To make such an attempt, the character merely wills the target to die (a free action), and unless the target makes a Fortitude saving throw (DC 10 + ½ the character's monk class level + the character's Wis modifier), it dies. If the saving throw is successful, the target is no longer in danger from that particular quivering palm attack, but it may still be affected by another one at a later time.

REMOVE CURSE IV

Prerequisites: Character Level 15, Aura of Alignment (Law), Remove Curse III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove curse* effect, four times per week (instead of three times per week).

REMOVE DISEASE IV

Prerequisites: Character Level 15, Aura of Alignment (Good), Remove Disease III.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove disease* effect, as the

spell, four times per week (instead of three times per week).

SHADOW JUMP III

Prerequisites: Character Level 15, Shadow Jump II.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can now shadow jump up to a total of 80 feet each day in this way; this may be a single jump of 80 feet, two jumps of 40 feet each, four jumps of 20 feet each, etc.

SMITE CHAOS IV

Prerequisites: Character Level 15, Smite Chaos III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos four times per day (instead of three times per day).

SMITE EVIL IV

Prerequisites: Character Level 15, Smite Evil III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil four times per day (instead of three times per day).

SMITE GOOD IV

Prerequisites: Character Level 15, Smite Good III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good four times per day (instead of three times per day).

SMITE LAW IV

Prerequisites: Character Level 15, Smite Law III.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law four times per day (instead of three times per day).

SNEAK ATTACK VIII

Prerequisites: Character Level 15, Sneak Attack VII.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 8d6 extra damage (instead of 7d6).

SPEED BONUS V

Prerequisites: Character Level 15, Speed Bonus IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +50 ft. This replaces the enhancement bonus granted by Speed Bonus IV. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TIMELESS BODY: DRUIDIC

Prerequisites: Character Level 15, Wild Shape V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character no longer takes ability score penalties for aging and cannot be magically aged. Any penalties she may have already incurred, however, remain in place.

Bonuses still accrue, and the character still dies of old age when her time is up.

TRAP SENSE V

Prerequisites: Character Level 15, Trap Sense IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +5 bonus on Reflex saves made to avoid traps and a +5 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense IV.

WILD SHAPE: HUGE

Prerequisites: Character Level 15, Wild Shape V.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Huge animal when using Wild Shape.

16TH-LEVEL SPECIAL ABILITIES

All 16th-Level Special Abilities have "Character Level 16" as a prerequisite.

DAMAGE REDUCTION IV

Prerequisites: Character Level 16, Damage Reduction III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 1 point, for a new total of 4. Subtract 4 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

DEFENSIVE STANCE V

Prerequisites: Character Level 16, Mobile Defense.

Ability Type: Natural.

Class Levels: None.

Description: The character can now use a defensive stance five times per day (instead of four times per day).

DEFLECT ARROWS: DUELIST

Prerequisites: Character Level 16, Elaborate Parry.

Ability Type: Natural.

Class Levels: None.

Description: The character gains the benefit of the Deflect Arrows feat when using a light or one-handed piercing weapon.

ENHANCE ARROW V

Prerequisites: Character Level 16, Enhance Arrow IV.

Ability Type: Supernatural.

Class Levels: None.

Description: Every nonmagical arrow the character nocks and lets fly now gains a +5 enhancement bonus (instead of +4).

KI STRIKE: ADAMANTITE

Prerequisites: Character Level 16, Ki Strike: Lawful.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's unarmed attacks are empowered with ki. Her unarmed attacks are treated as magic weapons and lawful weapons for the purpose of dealing damage to creatures with damage reduction. Also, her unarmed attacks are treated as adamantite weapons for the purpose of dealing damage to creatures with damage reduction and bypassing hardness.

RAGE V

Prerequisites: Character Level 16, non-lawful alignment, Rage IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage five times per day. See Rage I for details.

SLOW FALL VII

Prerequisites: Character Level 16, Slow Fall VI.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 80 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall VI.

UNARMED STRIKE V

Prerequisites: Character Level 16, Unarmed Strike IV.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small

character now deals 2d6 damage with unarmed strikes, a medium character 2d8 damage, and a large character 3d8 damage.

WILD SHAPE: ELEMENTAL I

Prerequisites: Character Level 16, Wild Shape V.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character able to use wild shape to change into a Small, Medium, or Large elemental (air, earth, fire, or water) once per day. These elemental forms are in addition to her normal wild shape usage. In addition to the normal effects of wild shape, the character gains all the elemental's extraordinary, supernatural, and spell-like abilities. She also gains the elemental's feats for as long as she maintains the wild shape, but she retains her own creature type.

17TH-LEVEL SPECIAL ABILITIES

All 17th-Level Special Abilities have "Character Level 17" as a prerequisite.

ARROW OF DEATH

Prerequisites: Character Level 17, Enhance Arrow V.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can create an arrow of death that forces the target, if damaged by the arrow's attack, to make a DC 20 Fortitude save or be slain immediately. It takes one day to make an arrow of death, and the arrow only functions for the character that created it. The arrow of death lasts no longer than one year, and the character can only have one such arrow in existence at a time.

DAMAGE REDUCTION: DEFENDER

Prerequisites: Character Level 17, Defensive Stance V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 3 points, for a new total of 6. Subtract 6 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

DEFENDER AC BONUS IV

Prerequisites: Character Level 17, Defender AC Bonus III.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character receives an additional +1 dodge bonus to Armor Class. This bonus stacks with the dodge bonuses granted by previous Defender AC Bonus special abilities (for a new total of +4). Dodge bonuses stack with all other bonuses to AC, even other dodge bonuses.

PRECISE STRIKE II

Prerequisites: Character Level 17, Precise Strike I.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage bonus from a precise strike increases to +2d6. This bonus replaces the bonus granted by Precise Strike I.

HIDE IN PLAIN SIGHT

Prerequisites: Character Level 17, Camouflage.

Ability Type: Extraordinary.

Class Levels: None.

Description: While in any sort of natural terrain, the character can use the Hide skill even while being observed.

RANGED LEGERDEMAIN III

Prerequisites: Character Level 17, non-lawful alignment, Ranged Legerdmain II.

Ability Type: Natural.

Class Levels: None.

Description: The character can now make three ranged legerdmain skill checks each day. See details under Ranged Legerdmain I.

SHADOW JUMP IV

Prerequisites: Character Level 17, Shadow Jump III.

Ability Type: Supernatural.

Class Levels: None.

Description: The character can now shadow jump up to a total of 160 feet each day in this way; this may be a single jump of 160 feet, two jumps of 80 feet each, four jumps of 40 feet each, eight jumps of 20 feet each, etc.

SNEAK ATTACK IX

Prerequisites: Character Level 17, Sneak Attack VIII.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 9d6 extra damage (instead of 8d6).

TIMELESS BODY: ASCETIC

Prerequisites: Character Level 17, Diamond Soul.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character no longer takes penalties to her ability scores for aging and cannot be magically aged. Any such penalties that she has already taken, however, remain in place. Bonuses still accrue, and the character still dies of old age when her time is up.

TIRELESS RAGE

Prerequisites: Character Level 17, non-lawful alignment, Indomitable Will.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character no longer becomes fatigued at the end of his rage.

TONGUE OF THE SUN AND THE MOON

Prerequisites: Character Level 17, Diamond Soul.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can speak with any living creature.

TRUE LORE

Prerequisites: Character Level 17, five Loremaster Secrets.

Ability Type: Extraordinary.

Class Levels: None.

Description: Once per day the character can use her knowledge to gain the effect of a *legend lore* spell or an *analyze dweomer* spell.

18TH-LEVEL SPECIAL ABILITIES

All 18th-Level Special Abilities have "Character Level 18" as a prerequisite.

BESTOW CURSE V

Prerequisites: Character Level 18, Aura of Alignment (Chaos), Bestow Curse IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *bestow curse* effect, five times per week (instead of four times per week).

CAUSE DISEASE V

Prerequisites: Character Level 18, Aura of Alignment (Evil), Cause Disease IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can inflict disease with her touch (as the *contagion* spell), five times per week (instead of four times per week).

MASS SUGGESTION

Prerequisites: Character Level 18, Inspire Heroics, 18 or more ranks in Perform.

Ability Type: Spell-Like.

Class Levels: None.

Description: This special ability functions like Suggestion, above, except that the character can make the suggestion simultaneously to any

number of creatures that he has already fascinated. Mass suggestion is an enchantment (compulsion), mind-affecting, language-dependent ability.

REMOVE CURSE V

Prerequisites: Character Level 18, Aura of Alignment (Law), Remove Curse IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove curse* effect, five times per week (instead of four times per week).

REMOVE DISEASE V

Prerequisites: Character Level 18, Aura of Alignment (Good), Remove Disease IV.

Ability Type: Spell-Like.

Class Levels: None.

Description: The character can produce a *remove disease* effect, as the spell, five times per week (instead of four times per week).

SLOW FALL VIII

Prerequisites: Character Level 18, Slow Fall VII.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent. When falling, she takes damage as if the fall were 90 feet shorter than it actually is. This distance replaces the distance gained from Slow Fall VII.

SPEED BONUS VI

Prerequisites: Character Level 18, Speed Bonus V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has an enhancement bonus to her speed of +60 ft. This replaces the enhancement bonus granted by Speed Bonus V. If the character is in armor or carrying a medium or heavy load, she loses this extra speed.

TRAP SENSE VI

Prerequisites: Character Level 18, Trap Sense V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character now has a +6 bonus on Reflex saves made to avoid traps and a +6 dodge bonus to AC against attacks made by traps. This bonus replaces the bonus gained from Trap Sense V.

WILD SHAPE VI

Prerequisites: Character Level 18, Wild Shape V.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use wild shape six times per day.

WILD SHAPE: ELEMENTAL II

Prerequisites: Character Level 18, Wild Shape: Elemental I.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use Wild Shape: Elemental twice per day.

19TH-LEVEL SPECIAL ABILITIES

All 19th-Level Special Abilities have "Character Level 19" as a prerequisite.

DAMAGE REDUCTION V

Prerequisites: Character Level 19, Damage Reduction IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's damage reduction rises by 1 point, for a new total of 5. Subtract 5 from the damage the character takes each time he is dealt damage from a weapon or a natural attack.

EMPTY BODY

Prerequisites: Character Level 19, Timeless Body: Ascetic.

Ability Type: Supernatural.

Class Levels: Monk.

Description: The character gains the ability to assume an ethereal state for 1 round per monk class level per day, as though using the spell *etherealness*. She may go ethereal on a number of different occasions during any single day, as long as the total number of rounds spent in an ethereal state does not exceed her monk class level.

SNEAK ATTACK X

Prerequisites: Character Level 19, Sneak Attack IX.

Ability Type: Natural.

Class Levels: None.

Description: The character's sneak attack now deals 10d6 extra damage (instead of 9d6).

20TH-LEVEL SPECIAL ABILITIES

All 20th-Level Special Abilities have "Character Level 20" as a prerequisite.

FAVORED ENEMY V

Prerequisites: Character Level 20, Favored Enemy IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character may select an additional favored enemy from those given on **Table: Ranger Favored Enemies** in the System Reference Document. In addition, the bonus against any one favored enemy (including the one just selected, if so desired) increases by 2.

If the character chooses humanoids or outsiders as a favored enemy, he must also choose an associated subtype, as indicated on the table. If a specific creature falls into more than one category of favored enemy, the character's bonuses do not stack; he simply uses whichever bonus is higher.

INSPIRE COURAGE IV

Prerequisites: Character Level 20, Mass Suggestion.

Ability Type: Supernatural.

Class Levels: None.

Description: The character's Inspire Courage increases by 1 and is now +4. See Inspire Courage I for details.

INTUITIVE DEFENSE V

Prerequisites: Character Level 20, Intuitive Defense IV.

Ability Type: Extraordinary.

Class Levels: None.

Description: When unarmored and unencumbered, the character gains a +4 bonus to AC. This bonus replaces the bonus to AC granted by Intuitive Defense IV.

This bonus to AC apply even against touch attacks or when the character is flat-footed. She loses this bonus when she is immobilized or helpless, when she wears any armor, when she carries a shield, or when she carries a medium or heavy load.

MIGHTY RAGE

Prerequisites: Character Level 20, non-lawful alignment, Tireless Rage.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character's bonuses to the Strength and Constitution ability score modifiers during his rage each increase to +4, and his morale bonus on Will saves increases to +4. The penalty to AC remains at -2.

PERFECT SELF

Prerequisites: Character Level 20, Empty Body.

Ability Type: Natural.

Class Levels: None.

Description: The character becomes a magical creature. She is forevermore treated as an outsider rather than as a humanoid (or whatever the character's creature type was) for the purpose of spells and magical effects. Additionally, the character gains damage reduction

10/magic, which allows her to ignore the first 10 points of damage from any attack made by a nonmagical weapon or by any natural attack made by a creature that doesn't have similar damage reduction. Unlike other outsiders, the character can still be brought back from the dead as if she were a member of her previous creature type.

RAGE VI

Prerequisites: Character Level 20, non-lawful alignment, Rage V.

Ability Type: Extraordinary.

Class Levels: None.

Description: The character can now rage six times per day. See Rage I for details.

SMITE CHAOS V

Prerequisites: Character Level 20, Smite Chaos IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite chaos five times per day (instead of four times per day).

SMITE EVIL V

Prerequisites: Character Level 20, Smite Evil IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite evil five times per day (instead of four times per day).

SMITE GOOD V

Prerequisites: Character Level 20, Smite Good IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite good five times per day (instead of four times per day).

SMITE LAW V

Prerequisites: Character Level 20, Smite Law IV.

Ability Type: Supernatural.

Class Levels: Paladin.

Description: The character may now smite law five times per day (instead of four times per day).

SLOW FALL IX

Prerequisites: Character Level 20, Slow Fall VIII.

Ability Type: Extraordinary.

Class Levels: None.

Description: If the character is within arm's reach of a wall, she can use it to slow her descent and fall any distance without harm.

UNARMED STRIKE VI

Prerequisites: Character Level 20, Unarmed Strike V.

Ability Type: Natural.

Class Levels: None.

Description: The character's unarmed strikes increase in damage. A small character now deals 2d8 damage with unarmed strikes, a medium character 2d10 damage, and a large character 4d8 damage.

WILD SHAPE: ELEMENTAL III

Prerequisites: Character Level 20, Wild Shape: Elemental II.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to use Wild Shape: Elemental three times per day.

WILD SHAPE: ELEMENTAL (HUGE)

Prerequisites: Character Level 20, Wild Shape: Elemental I.

Ability Type: Supernatural.

Class Levels: Druid.

Description: The character gains the ability to take the shape of a Huge elemental when using Wild Shape: Elemental.

ADDING NEW SPECIAL ABILITIES

Adding new special abilities is quite simple. First determine the minimum character level a character can get the special ability under the standard rules. This will become the level of the special ability. Then, determine what prerequisites are required. Usually, prerequisites are based on how related special abilities are gained as a character progresses. Lower-level special abilities having the same name or effect as higher-level special abilities should be made prerequisites of the higher-level abilities. Special abilities that seem to be more powerful than other special abilities in your campaign should have more prerequisites.

Ensure that any requirements for entry into a prestige class are made prerequisites. Determining the level of special abilities that appear in prestige class descriptions can be tricky. Just find the minimum character level that a character could enter the prestige class and use that as a basis for determination.

After that, determine whether the special ability is an extraordinary, spell-like, or supernatural ability. If it is not one of these, make it "natural." If class levels are used to determine the effectiveness of the special ability, include the appropriate classes in the special ability description.

Finally, write up the description of the class advantage. Normally, the description will already be written in whatever game book you're pulling it from.

BASIC D20 MAGIC SKILLS

Basic d20 assumes that you will use the normal D&D spellcasting system to create characters. A more basic, generic system is detailed here that allows each character to be customized as the player desires. Old class distinctions are discarded in favor of a unified approach to spellcasting.

MAGIC SKILLS

There are eight Magic skills, one for each school of magic. Each rank in a Magic skill costs the same as one rank in a normal Basic d20 broad skill area (1 Power Point per skill rank). Purchasing ranks in a Magic skill confers certain spellcasting benefits to the character. Each Magic skill represents the character's knowledge and mastery of one of the schools of magic. These schools are listed in the table.

Check: Normally associated with caster level checks only. The key ability does not figure into caster level checks. The key ability does affect the saving throw DC for spells of that school.

Action: Not Applicable.

Try Again: Not Applicable.

The Magic skills do not work like other skills. Each Magic skill grants the character the following advantages:

Magic Skills
Abjuration
Conjuration
Divination
Enchantment
Evocation
Illusion
Necromancy
Transmutation

Spellcaster Level: the character's level for the purposes of spellcasting is equal to the number of skill ranks the character has in a Magic skill. Each Magic skill counts separately. Thus, a character can potentially have eight different spellcaster levels, since there are eight different Magic skills. Spellcaster level governs the highest level of spell the character can use, the maximum number of spell points the character can use for one spell, and is used for all situations where a caster level is required. The character's caster level in each school is based on the number of skill ranks in Magic skill the character has in that particular school. For game effects requiring a class caster level (or some other "generic" caster level), use the highest caster level from among the character's eight different Magic skills. For example, the character's highest caster level is used when meeting the prerequisites for Item Creation feats. For caster level checks, use the appropriate Magic skill to determine caster level.

Spell Lists: Each Magic skill allows the character to access spells of the appropriate school. These spells become part of the character's personal spell list, representing the breadth of the character's magical knowledge and training. They are taken from all spell lists (bard, cleric, druid, sorcerer/wizard, etc.). If a spell has different spell levels for different classes, use the lowest from among cleric, druid, and sorcerer/wizard (excluding domain lists). For example, *true seeing* becomes a 5th level spell under this system. If a spell is not found on any of these three lists, use the lowest level listed for any class.

It is important to note that not all of these spells become automatically known by the character immediately. They must be found and learned through normal means (as determined by the GM).

Being on the character's personal spell list simply makes them available to be learned by the character, much like all sorcerer/wizard spells are available to be learned by sorcerers and wizards.

All spells of the appropriate school up to a level equal to the number of Magic skill ranks plus one, divided by two, become part of the character's spell list. See the chart below.

Ranks	Spell Levels in List	Ranks	Spell Levels in List
Special	0th	9	1st-5th
1	1st	11	1st-6th
3	1st-2nd	13	1st-7th
5	1st-3rd	15	1st-8th
7	1st-4th	17	1st-9th

For example, a character with 7 ranks in Evocation would include all evocation spells from 1st to 4th level in his personal spell list. A character with 17 ranks in Illusion would have every illusion spell (1st-9th) in his personal spell list. The "Special" for 0th level spells indicates that a character with at least one rank in any Magic skill is eligible to learn and cast any 0th level spell from any school. For example, if a character has only one rank in Enchantment and ranks in no other Magic skills, he still has all cantrips and orisons in his personal spell list.

Spell Knowledge: Each time a character gains an odd-numbered rank in a Magic skill, he gains knowledge of one spell of the appropriate school. If the character finds additional spells during the normal course of the campaign that are included in his personal spell list, he can learn them as well. A character must know a spell before he is able to cast it. In order to know a certain spell, the character must have learned the spell from another character, a spell scroll, a spell book, or by some other method (as determined by the GM). A known spell can be cast as long as the character has enough spell points to do so. It bears repeating: access to spell lists is simply a prerequisite to learning spells.

Spell Points: Every rank gained in a Magic skill adds a number of points to a character's total spell points. The table to the right shows the number of spell points in the character's total for each Magic skill. For example, if a character has five Magic skills at 7 ranks, two Magic skills at 5 ranks, and one at 3 ranks, then that character's spell point total is equal to $5 \times 5.33 + 2 \times 2.66 + 1 \times 1.33 = 34$ spell points. Always round all fractions up to the nearest integer.

Synergy: If you have 5 or more ranks in a Magic skill, you get a +2 bonus on Science (spellcraft) checks relating to the appropriate school.

Ranks	Spell Points	Ranks	Spell Points
1	0.33	11	14.66
2	0.66	12	17.33
3	1.33	13	20
4	2	14	22.66
5	2.66	15	25.33
6	4	16	28
7	5.33	17	30.66
8	7.33	18	33.33
9	9.33	19	36
10	12	20	38.66

KEY ABILITIES FOR MAGIC SKILLS

The GM determines the key ability for all Magic skills in his campaign. He can vary the key ability by character, allowing the player to determine the nature and “feel” of his particular spellcaster. The GM can also choose different key abilities for different Magic skills, such as Wisdom for Abjuration and Charisma for Enchantment. He could rule that the highest of the character’s mental abilities (i.e., Int, Wis, and Cha) is always that character’s key ability.

Regardless of the key ability chosen for each Magic skill, certain uses are standard. The key ability is added to the Difficulty Class of the saving throws for spells cast by the character. The key ability also determines the highest spell level the character can learn.

$$\text{HIGHEST SPELL LEVEL ABLE TO BE LEARNED} = \text{KEY ABILITY} \times 2 + 1$$

A simple table summarizes this formula:

Key Ability for Magic Skill	Highest Spell Level Able to be Learned
+0	1st
+1	3rd
+2	5th
+3	7th
+4	9th

BONUS SPELL POINTS

The table below shows the number of bonus spell points a character receives based on the character’s key ability and the rank of his highest Magic skill. For example, the GM determines that for his campaign, the key ability for all Magic skills is Intelligence. The character’s Int is +3 and he has 10 ranks in his highest Magic skill. This character receives a bonus of 9 SP.

Ability	Number of Ranks in Highest Magic Skill												
	1	2	3	4	5	6	7	8	9	10	11	12	13+
+0	0	0	0	0	0	0	0	0	0	0	0	0	0
+1	1	1	1	1	1	1	1	1	1	1	1	1	1
+2	1	2	4	4	4	4	4	4	4	4	4	4	4
+3	1	2	4	6	9	9	9	9	9	9	9	9	9
+4	1	2	4	6	9	12	16	16	16	16	16	16	16
+5	2	3	5	7	10	13	17	21	26	26	26	26	26
+6	2	5	8	10	13	16	20	24	29	34	40	40	40
+7	2	5	8	13	18	21	25	29	34	39	45	51	58

SPELL POINT COST BY SPELL LEVEL

Spell point costs by spell level are shown below.

Spell Level	Spell Point Cost	Spell Level	Spell Point Cost
0th	0.5	5th	9
1st	1	6th	11
2nd	3	7th	13
3rd	5	8th	15
4th	7	9th	17

LEARNING NEW SPELLS

Characters gain one new spell every time an odd-numbered rank is purchased in a Magic skill (1, 3, 5, 7, and so on). The cost of this new spell in Power Points is already included in the cost of each skill rank. Learning additional spells, beyond the “free” one learned during each odd-numbered rank increase, is possible. It costs one Power Point to learn a new spell. First, the character must have access to the spell to be learned. Spell scrolls, spellbooks, characters or creatures knowing the spell, writings on temple walls, and other sources of information are all valid in meeting this requirement. Second, the player must make a successful Science (spellcraft) roll for the character to be able to learn the spell. If successful, the 1 PP is spent and the character now knows the spell. The time to learn the spell is determined by the GM and should be driven by campaign pacing and dramatic necessity.

Alternatively, new spells can be learned using the Natural Advancement method if the character does not have Power Points to spend. Each spell, regardless of spell level, takes three months to learn. The character can seek out a teacher or attempt to learn a spell alone. A teacher must know the spell being taught. Spellcasters will always charge at least 600 gp to teach the new spell plus the market price of the spell itself (determined by the GM). The advantage to this method is that as long as the character’s key ability for the appropriate Magic skill is high enough, a Science (spellcraft) roll is not needed. Successful learning is automatic. If the character wishes to learn the spell on his own, he spends three months studying it from its source (scroll, spellbook, obelisk, etc.). At the end of three months, a Science (spellcraft) check is made to see if the spell has been learned. If successful, the character has learned the spell. If unsuccessful, the character must spend additional time to learn the spell. For each additional week, another Science (spellcraft) roll can be attempted.

The DC for Science (spellcraft) rolls to learn a spell is equal to 15 + the spell’s level. Intelligence should always be used for this Science (spellcraft) roll. However, characters cannot learn spells having levels greater than twice their key ability plus one.

UNIVERSAL SPELLS

As long as a character can learn and cast spells of the appropriate level in any school, he can learn universal spells. For example, as long as a character has at least 13 ranks in any Magic skill and a key ability of +3 or higher, that character can learn and cast *limited wish*.

SPELL PREPARATION AND SPELL SLOTS

There is no spell preparation in this system. All spells are known in the manner of bards and sorcerers. As long as a character has enough spell points to cast a known spell, he may cast it normally.

If you absolutely must have spells per day “slots” for your campaign (maybe you despise the spell point system), then use these guidelines. Give your character one spell slot for each of the spell levels he can cast for every school, up to a maximum of six spell slots for each spell level. Using the previous example, a character has five Magic skills at 7 ranks, two Magic skills at 5 ranks, and one at 3 ranks. This would indicate that he receives 5/5/5/5 for the Magic skills at 7 ranks, 2/2/2 for the Magic skills at 5 ranks, and 1/1 for his one Magic skill with one rank. This adds up to 8/8/7/5. Because the maximum is six spell slots per level, his final spells per day are 6/6/6/5. This is comparable to the spells per day for a 9th level sorcerer. By contrast, a spellcaster with 17 ranks in only one school would receive one spell slot for each spell level (1/1/1/1/1/1/1/1/1). Characters always receive six cantrip spell slots as long as they have one rank in any Magic skill. Award spell slots even if the spellcaster cannot cast spells of that level due to a low key ability; they can use those slots for lower level spells. Add bonus spell slots based on the character’s key ability and highest level of spell able to be cast.

SPELL POINTS VARIANT RULES

See the SRD for more information on the Spell Points Variant Rules. The GM should choose the options that he desires for his campaign from among those offered (such as Vitalizing and rules for metamagic feats).

ARCANE AND DIVINE SPELLCASTER DISTINCTION

Under this system, disregard the arcane/divine distinction in spellcasting. For any game effects that require the source of the character’s spellcasting ability be known (whether arcane or divine), the GM should exercise good judgment. Spellcasters are not affected by the arcane spell failure chance when wearing armor in which they are proficient. Spellcasters wearing armor in which they are not proficient suffer the normal arcane spell failure chances.

THREE FEATS ESPECIALLY SUITED FOR CAMPAIGNS USING MAGIC SKILLS

The feats detailed below are found in a number of d20 supplements and can be used to expand the spellcasting capabilities of characters in your campaign.

Arcane Preparation [General]

You can prepare an arcane spell ahead of time as a wizard does.

Prerequisite: You must be able to cast spells as a bard or sorcerer before you can take this feat.

Benefit: Each day, you are able to prepare one or more spells as a wizard does. If you are a sorcerer or a bard, this means that you can prepare a spell with a metamagic feat ahead of time, instead of casting it as a full-round action. The prepared spell remains in your mind and occupies one of your spell slots until you cast it or change it. A prepared spell uses a spell slot of the spell's normal level, modified by any other metamagic feats.

Extra Slot [General]

You can cast an extra spell.

Prerequisites: Spellcaster level 4th+.

Benefit: You gain one extra spell slot in your daily allotment. This extra slot can be at any level up to one level lower than the highest-level spell you can cast. For example, a 4th level sorcerer gains either an extra 0-level or 1st-level slot, allowing him to cast any known spell of the chosen level one more time each day. A 4th-level wizard can prepare any extra 0-level or 1st-level spell she knows. Once selected, the extra spell slot never migrates up or down in level.

Special: You can gain this feat multiple times. Each time, you gain an extra spell slot at any level up to one level lower than the highest-level spell you can cast.

Extra Spell [General]

You can learn one more spell.

Prerequisites: Spellcaster level 3rd+.

Benefit: You learn one additional spell at any level up to one level lower than the highest-level spell you can cast. Thus, a 4th-level sorcerer gains a new 0-level or 1st-level spell, expanding his repertoire. A 4th-level wizard can likewise learn an extra 0-level or 1st-level spell, but since wizards learn spells far more easily than sorcerers, this feat is of less use to her.

Special: You can gain this feat multiple times. Each time, you learn a new spell at any level up to one lower than the highest-level spell you can cast.

HOW SHOULD THIS BE USED?

Like many other variants that have come before, this Basic d20 Magic system does away with all class distinctions between spellcasters. Mechanically, all spellcasters are the same under this system. It is up to the GM and players to determine what types of spellcasters exist in the campaign world. Different types of spellcasters can be created by varying key abilities, school choices, spell choices, and by choosing certain advantages. Alchemists, bards, clerics, cultists, druids, enchanters, exorcists, fakirs, geomancers, hedge mages, infernalists, loremasters, miracle workers, necromancers, oracles, prestidigitators, qabalists, seers, shaman, sorcerers, thaumaturgists, theurgists, warlocks, wise ones, and wizards can all be conceived of and created with this system.

For example, let's say you like the illusionist class from AD&D. You make Dexterity the key ability for illusionists. Dexterity will govern the spell save DCs and the highest level of spell that illusionists can cast ("a high manual dexterity is required in casting of the spells used by this class" – PHB, page 26). Intelligence will still be added to Science (spellcraft) rolls to see if spells can be learned. As GM, you also determine that illusionists normally take ranks in the Conjunction, Divination, Enchantment, Illusion, and Transmutation schools. Illusionists also take the Spell Focus (illusion) and Greater Spell Focus (illusion) feats as soon as possible. You can make these school choices and advantage purchases mandatory if you desire. Through defining a key ability, recommending school choices, and listing certain advantages, many distinct types of magic-users can be created for the campaign.

BASIC D20 SPELLCASTING

Basic d20 assumes that you will use the normal D&D spellcasting system to create characters. Characters will have a number of class-based spellcasting systems to choose from, such as cleric, druid, and wizard. A previous document, Basic d20 Magic Skills, detailed how each school of magic could be made into its own skill, thus eliminating class-based spellcasting entirely. Basic d20 Spellcasting offers an even simpler system: spellcasting based on the generic spellcaster from the SRD.

POWER: SPELLCASTING (5 PP PER LEVEL)

Spellcasters learn and cast spells as a sorcerer. They may select their spells known from the cleric, domain, druid, sorcerer/wizard spell lists and any other spell lists permitted by the GM. If a spell has different spell levels for different classes, use the lowest from among cleric, druid, and sorcerer/wizard classes (excluding domain lists). For example, *true seeing* becomes a 5th level spell under this system and *refuge* is a 7th level spell for the spellcaster. If a spell is not found on any of these three lists, use the lowest level listed for any class. For example, *heal mount* is only found on the paladin spell list. If the GM permits this spell to be learned by spellcasters, then it is a 3rd level spell. *Order's wrath* is only found on the Law Domain spell list, so it is a 4th level spell for spellcasters.

Under this system, disregard the arcane/divine distinction in spellcasting. For any game effects that require the source of the character's spellcasting ability be known (whether arcane or divine), the GM should exercise good judgment. Spellcasters are not affected by the arcane spell failure chance when wearing armor in which they are proficient. Spellcasters wearing armor in which they are not proficient suffer the normal arcane spell failure chances.

A character's key ability is the highest of the character's Intelligence, Wisdom, or Charisma ability score modifiers. The key ability is added to the Difficulty Class of the saving throws for spells cast by the character. Bonus spell slots are based on the key ability according to the table below. The key ability also determines the highest spell level the character can learn.

$$\text{HIGHEST SPELL LEVEL ABLE TO BE LEARNED} = \text{KEY ABILITY} \times 2 + 1$$

A simple table summarizes this formula:

Key Ability Score Modifier for Spellcasting	Highest Spell Level Able to be Learned or Cast
+0	1st
+1	3rd
+2	5th
+3	7th
+4	9th

A spellcaster's number of spells per day by spellcaster level and bonus spell slots are listed below.

Level	Spells per Day									
	0th	1st	2nd	3rd	4th	5th	6th	7th	8th	9th
1	4	2								
2	5	3								
3	5	4								
4	6	5	2							
5	6	5	3							
6	6	6	4	2						
7	6	6	5	3						
8	6	6	5	4	2					
9	6	6	6	5	3					
10	6	6	6	5	4	2				
11	6	6	6	6	5	3				
12	6	6	6	6	5	4	2			
13	6	6	6	6	6	5	3			
14	6	6	6	6	6	5	4	2		
15	6	6	6	6	6	6	5	3		
16	6	6	6	6	6	6	5	4	2	
17	6	6	6	6	6	6	6	5	3	
18	6	6	6	6	6	6	6	5	4	2
19	6	6	6	6	6	6	6	6	5	3
20	6	6	6	6	6	6	6	6	6	5

Key Ability Score Modifier	Bonus Spells (By Spell Level)									
	0th	1st	2nd	3rd	4th	5th	6th	7th	8th	9th
-1 or lower	Can't cast spells									
+0	-	-	-	-	-	-	-	-	-	-
+1	-	1	-	-	-	-	-	-	-	-
+2	-	1	1	-	-	-	-	-	-	-
+3	-	1	1	1	-	-	-	-	-	-
+4	-	1	1	1	1	-	-	-	-	-
+5	-	2	1	1	1	1	-	-	-	-
+6	-	2	2	1	1	1	1	-	-	-
+7	-	2	2	2	1	1	1	1	-	-
+8	-	2	2	2	2	1	1	1	1	-
+9	-	3	2	2	2	2	1	1	1	1
+10	-	3	3	2	2	2	2	1	1	1

A spellcaster's number of spells known by spellcaster level is listed below.

Level	Spells Known									
	0th	1st	2nd	3rd	4th	5th	6th	7th	8th	9th
1	4	2								
2	4	2								
3	5	3								
4	5	3	1							
5	6	4	2							
6	6	4	2	1						
7	7	5	3	2						
8	7	5	3	2	1					
9	8	5	4	3	2					
10	8	5	4	3	2	1				
11	9	5	5	4	3	2				
12	9	5	5	4	3	2	1			
13	9	5	5	4	4	3	2			
14	9	5	5	4	4	3	2	1		
15	9	5	5	4	4	4	3	2		
16	9	5	5	4	4	4	3	2	1	
17	9	5	5	4	4	4	3	3	2	
18	9	5	5	4	4	4	3	3	2	1
19	9	5	5	4	4	4	3	3	3	2
20	9	5	5	4	4	4	3	3	3	3

THREE FEATS ESPECIALLY SUITED FOR SPELLCASTING

The feats detailed below are found in a number of d20 supplements and can be used to expand the spellcasting capabilities of characters in your campaign.

Arcane Preparation [General]

You can prepare an arcane spell ahead of time as a wizard does.

Prerequisite: You must be able to cast spells as a bard or sorcerer before you can take this feat.

Benefit: Each day, you are able to prepare one or more spells as a wizard does. If you are a sorcerer or a bard, this means that you can prepare a spell with a metamagic feat ahead of time, instead of casting it as a full-round action. The prepared spell remains in your mind and occupies one of your spell slots until you cast it or change it. A prepared spell uses a spell slot of the spell's normal level, modified by any other metamagic feats.

Extra Slot [General]

You can cast an extra spell.

Prerequisites: Spellcaster level 4th+.

Benefit: You gain one extra spell slot in your daily allotment. This extra slot can be at any level up to one level lower than the highest-level spell you can cast. For example, a 4th level sorcerer gains either an extra 0-level or 1st-level slot, allowing him to cast any known spell of the chosen level one more time each day. A 4th-level wizard can prepare any extra 0-level or 1st-level spell she knows. Once selected, the extra spell slot never migrates up or down in level.

Special: You can gain this feat multiple times. Each time, you gain an extra spell slot at any level up to one level lower than the highest-level spell you can cast.

Extra Spell [General]

You can learn one more spell.

Prerequisites: Spellcaster level 3rd+.

Benefit: You learn one additional spell at any level up to one level lower than the highest-level spell you can cast. Thus, a 4th-level sorcerer gains a new 0-level or 1st-level spell, expanding his repertoire. A 4th-level wizard can likewise learn an extra 0-level or 1st-level spell, but since wizards learn spells far more easily than sorcerers, this feat is of less use to her.

Special: You can gain this feat multiple times. Each time, you learn a new spell at any level up to one lower than the highest-level spell you can cast.

CAN IT GET ANY SIMPLER THAN THIS?

The answer is probably “No.” All spellcasting has been reduced to a 5 PP per level spellcasting power based on the generic spellcaster class in the System Reference Document. Arcane and divine classifications are discarded as well as all class-based spellcasting distinctions. Every spellcaster functions as a sorcerer but has access to all spell lists. Extra spells can be learned and extra spell slots can be purchased for 1 PP each with the Extra Spell and Extra Slot feats. Spells can be prepared ahead of time if Arcane Preparation is taken. GMs can make any other feats available to expand the versatility of this power. By adding the theurgy series of spells from D&D5E or the sorcery series of spells from Custom Characters to your campaign, the spellcaster can also have the ability to spontaneously cast low level spells thus increasing versatility even further.

BASIC D20 THE MAGIC SKILL

Basic d20 assumes that you will use the normal D&D spellcasting system to create characters. An extremely basic, generic system is detailed here that allows each character to be customized as the player desires. Old class distinctions are discarded in favor of a unified approach to spellcasting.

THE MAGIC SKILL

There is one Magic skill. Each rank in the Magic skill costs the same as one rank in a normal Basic d20 broad skill area (1 Power Point per skill rank). Purchasing ranks in the Magic skill confers certain spellcasting benefits to the character. The Magic skill represents the character's knowledge and mastery in all forms of magic. If this broad skill area is introduced into the campaign, then the Spellcraft specialty becomes a part of the Magic skill (and is removed from the Science broad skill area).

Check: Normally associated with caster level checks only. The key ability does not figure into caster level checks. The key ability does affect the saving throw DC for spells cast by the character.

Action: Not Applicable.

Try Again: Not Applicable.

The Magic skill does not work like other skills. The Magic skill grants the character the following advantages:

Spellcaster Level: the character's level for the purposes of spellcasting is equal to the number of skill ranks the character has in the Magic skill. Spellcaster level governs the highest level of spell the character can use, how many spell slots the character has, and is used for all situations where a caster level is required. The character's caster level is equal to the number of skill ranks in the Magic skill. For game effects requiring a class caster level (or some other "generic" caster level), use this caster level.

Spell Lists: Each rank in the Magic skill allows the character to access spells of the appropriate spell level based on the character's caster level. These spells become part of the character's personal spell list and are taken from all spell lists (bard, cleric, druid, sorcerer/wizard, etc.). If a spell has different spell levels for different classes, use the lowest from among cleric, druid, and sorcerer/wizard (excluding domain lists). For example, *true seeing* becomes a 5th level spell under this system. If a spell is not found on any of these three lists, use the lowest level listed for any class.

It is important to note that not all of these spells become automatically known by the character immediately. They must be found and learned through normal means (as determined by the GM). Being on the character's personal spell list simply makes them available to be learned by the character, much like all sorcerer/wizard spells are available to be learned by sorcerers and wizards.

All spells up to a level equal to the number of Magic skill ranks divided by two, become part of the character's spell list (with the exception of cantrips/orisons and 1st level spells). See the chart below.

Ranks	Spell Levels in List	Ranks	Spell Levels in List
1	0th-1st	12	0th-6th
4	0th-2nd	14	0th-7th
6	0th-3rd	16	0th-8th
8	0th-4th	18	0th-9th
10	0th-5th	20	0th-10th

For example, a character with 8 ranks in Magic would include all spells from 1st to 4th level in his personal spell list. A character with 18 ranks in Magic would have every spell from 1st to 9th level in his personal spell list.

Spell Slots: Each time the character gains one rank in the Magic skill, he gains one spell slot in the highest level spell he can cast. The table below summarizes these spell slots.

Level	Spells per Day										
	0th	1st	2nd	3rd	4th	5th	6th	7th	8th	9th	10th
1	0	1									
2	0	2									
3	0	3									
4	0	3	1								
5	0	3	2								
6	0	3	2	1							
7	0	3	2	2							
8	0	3	2	2	1						
9	0	3	2	2	2						
10	0	3	2	2	2	1					
11	0	3	2	2	2	2					
12	0	3	2	2	2	2	1				
13	0	3	2	2	2	2	2				
14	0	3	2	2	2	2	2	1			
15	0	3	2	2	2	2	2	2			
16	0	3	2	2	2	2	2	2	1		
17	0	3	2	2	2	2	2	2	2		
18	0	3	2	2	2	2	2	2	2	1	
19	0	3	2	2	2	2	2	2	2	2	
20	0	3	2	2	2	2	2	2	2	2	1

This table assumes that the character has a key ability score modifier high enough to cast the indicated level. If not, all spell slots of spell levels higher than those able to be cast are added to the highest spell level the character can cast. For example, if a character has eight ranks in the Magic skill and a key

ability score modifier of +1 (limiting him to 3rd level spells), then his one 4th level spell slot becomes a 3rd level spell slot. Characters receive bonus spell slots based on their key ability. Additional spell slots can be gained by purchasing the Extra Slot feat (included here for convenience).

Extra Slot [General]

You can cast an extra spell.

Prerequisites: Spellcaster level 4th+.

Benefit: You gain one extra spell slot in your daily allotment. This extra slot can be at any level up to one level lower than the highest-level spell you can cast. For example, a 4th level sorcerer gains either an extra 0-level or 1st-level slot, allowing him to cast any known spell of the chosen level one more time each day. A 4th-level wizard can prepare any extra 0-level or 1st-level spell she knows. Once selected, the extra spell slot never migrates up or down in level.

Special: You can gain this feat multiple times. Each time, you gain an extra spell slot at any level up to one level lower than the highest-level spell you can cast.

Spell Knowledge: Characters gaining their first rank in the Magic skill gain knowledge of one spell, *read magic*. This spell is mastered, and as such, is cast in the manner of a sorcerer. That is, this spell can be cast by expending an open spell slot of 0-level or higher. Characters do not automatically gain knowledge of spells as they further increase their ranks in the Magic skill. The Magic skill simply represents a character's knowledge of magic and spellcasting itself. Characters having ranks in the Magic skill must fulfill additional requirements if they wish to cast additional spells. The first requirement is to take the Arcane Preparation feat (included here for convenience).

Arcane Preparation [General]

You can prepare an arcane spell ahead of time as a wizard does.

Prerequisite: You must be able to cast spells as a bard or sorcerer before you can take this feat.

Benefit: Each day, you are able to prepare one or more spells as a wizard does. If you are a sorcerer or a bard, this means that you can prepare a spell with a metamagic feat ahead of time, instead of casting it as a full-round action. The prepared spell remains in your mind and occupies one of your spell slots until you cast it or change it. A prepared spell uses a spell slot of the spell's normal level, modified by any other metamagic feats.

The character meets the prerequisite due to the ability to cast *read magic* in the manner of a sorcerer. If taken, characters can then use their spell slots to prepare spells as a wizard does. Characters using this method of spellcasting must find, learn, and record spells in spellbooks in the manner of a wizard. To learn a spell, a character must make a Magic (spellcraft) skill check. The DC to learn a spell this way is equal to 15 + the spell's level. See the entry for Spellcraft in the SRD for more details.

Once a spell is learned it can be prepared normally by the character as a wizard does. After a spell has been learned, a character can then master the spell by taking the Mastered Spell feat. This allows the character to use an open slot to cast the spell in the manner of a sorcerer.

Mastered Spell [General]

You can spontaneously cast one spell.

Prerequisites: Spellcaster level 3rd+.

Benefit: Choose one spell you can cast as a prepared spell. This spell can be at any level up to one level lower than the highest-level spell you can cast. You may now cast this spell without preparation in the manner of a sorcerer. You must expend an open spell slot of the same or higher level as the mastered spell to cast it.

Special: You can gain this feat multiple times. Each time, you master a new spell at any level up to one lower than the highest-level spell you can cast.

As you can see, this skill only gives extremely limited spellcasting ability. The character gains the *read magic* spell and can cast it by using their only 1st level spell slot when the first rank is gained. Thereafter, characters must find spells, learn them, and record them into their spellbooks to expand their repertoires. They do not automatically gain additional spells like sorcerers and wizards. Characters also receive a limited amount of spell slots as they gain ranks in the Magic skill. The Extra Slot feat must be used multiple times to approximate the spells per day charts of SRD spellcasters. Characters can build their slate of spontaneous spells by taking Mastered Spell feats. Even though the “start-up” cost is low for magical ability, it takes a lot of dedication (and Power Points) to reach the power levels of clerics, sorcerers, and wizards.

KEY ABILITY FOR THE MAGIC SKILL

The GM determines the key ability for the Magic skill in his campaign. He can vary the key ability by character, allowing the player to determine the nature and “feel” of his particular spellcaster. He could rule that the highest of the character’s mental abilities (i.e., Int, Wis, and Cha) is always that character’s key ability.

Regardless of the key ability chosen for each Magic skill, certain uses are standard. The key ability is added to the Difficulty Class of the saving throws for spells cast by the character. The key ability also determines the highest spell level the character can learn.

$$\text{HIGHEST SPELL LEVEL ABLE TO BE LEARNED} = \text{KEY ABILITY} \times 2 + 1$$

This yields: 1st level spells for +0, 3rd level spells for +1, 5th level spells for +2, 7th level spells for +3, and 9th level spells for +4. 10th level spells require a key ability score modifier of +5.

ARCANE AND DIVINE SPELLCASTER DISTINCTION

Under this system, disregard the arcane/divine distinction in spellcasting. For any game effects that require the source of the character’s spellcasting ability be known (whether arcane or divine), the GM should exercise good judgment. Spellcasters are not affected by the arcane spell failure chance when wearing armor in which they are proficient. Spellcasters wearing armor in which they are not proficient suffer the normal arcane spell failure chances.

BASIC D20 PSIONIC SKILLS

Basic d20 assumes that you will use the normal D&D manifesting system to create psionic characters. A more basic, generic system is detailed here that allows each character to be customized as the player desires.

PSIONIC SKILLS

There are six Psionic skills, one for each discipline of psionics. Each rank in a Psionic skill costs the same as one rank in a normal Basic d20 broad skill area (1 Power Point per skill rank). Purchasing ranks in a Psionic skill confers certain manifesting benefits to the character. Each Psionic skill represents the character's knowledge and mastery of one of the disciplines of psionics. These skills are listed below.

Check: Normally associated with manifester level checks only. The key ability does not figure into manifester level checks. The key ability does affect the saving throw DC for powers of that discipline.

Action: Not Applicable.

Try Again: Not Applicable.

Psionic Skills
Clairsentience
Metacreativity
Psychokinesis
Psychometabolism
Psychoportation
Telepathy

The Psionic skills do not work like other skills. Each Psionic skill grants the character the following advantages:

Manifester Level: the character's level for the purposes of manifesting is equal to the number of skill ranks the character has in a Psionic skill. Each Psionic skill counts separately. Thus, a character can potentially have six different manifester levels, since there are six different Psionic skills. Manifester level governs the highest level of power the character can use, the maximum number of power points the character can use for one power, and is used for all situations where a manifester level is required. The character's manifester level in each discipline is based on the number of skill ranks in Psionic skill the character has in that particular discipline. For game effects requiring a class manifester level (or some other "generic" manifester level), use the highest manifester level from among the character's six different Psionic skills. For manifester level checks, use the appropriate Psionic skill to determine manifester level.

Power Lists: Each Psionic skill allows the character to access powers of the appropriate discipline. These powers become part of the character's personal power list, representing the breadth of the character's psionic knowledge and training. They are taken from all power lists (psion, psychic warrior, etc.). If a power has different power levels for different classes, use the psion level. For example, *telepathy* becomes a 7th level power under this system. If a power is not found on the psion power list, use the lowest level listed for any class.

It is important to note that not all of these powers become automatically known by the character immediately. They must be found and learned through normal means (as determined by the GM).

Being on the character's personal power list simply makes them available to be learned by the character, much like all psychic warrior powers are available to be learned by psychic warriors.

All powers of the appropriate discipline up to a level equal to the number of Psionic skill ranks plus one, divided by two, become part of the character's power list. See the chart below.

Ranks	Power Levels in List	Ranks	Power Levels in List
1	1st	11	1st-6th
3	1st-2nd	13	1st-7th
5	1st-3rd	15	1st-8th
7	1st-4th	17	1st-9th
9	1st-5th		

For example, a character with 7 ranks in Psychokinesis would include all psychokinesis powers from 1st to 4th level in his personal power list. A character with 17 ranks in Metacreativity would have every metacreativity power (1st-9th) in his personal power list.

Power Knowledge: Each time a character gains an odd-numbered rank in a Psionic skill, he gains knowledge of one power of the appropriate discipline. If the character takes Expanded Knowledge feats during the normal course of the campaign, he can learn additional powers on his personal power list as well. A character must know a power before he is able to manifest it. In order to know a certain power through Expanded Knowledge, the character must have learned the power from another character, studied a psionic item containing the power, or by some other method (as determined by the GM). A known power can be manifested as long as the character has enough power points to do so. It bears repeating: a power must appear on a character's personal power list before he is able to learn it.

Power Points: Every rank gained in a Psionic skill adds a number of points to a character's total power points. The table to the right shows the number of power points in the character's total for each Psionic skill. For example, if a character has three Psionic skills at 7 ranks, two Psionic skills at 5 ranks, and one at 3 ranks, then that character's power point total is equal to $3 \times 8 + 2 \times 4 + 1 \times 2 = 34$ power points. Always round all fractions up to the nearest integer.

Ranks	Power Points	Ranks	Power Points
1	0.33	11	18
2	1	12	21
3	2	13	24
4	3	14	28
5	4	15	32
6	6	16	37
7	8	17	42
8	10	18	47
9	12	19	52
10	15	20	57

Synergy: If you have 5 or more ranks in a Psionic skill, you get a +2 bonus on Science (psicraft) checks relating to the appropriate discipline.

KEY ABILITIES FOR PSIONIC SKILLS

The GM determines the key ability for all Psionic skills in his campaign. He can vary the key ability by character, allowing the player to determine the nature and “feel” of his particular psion. The GM can also choose different key abilities for different Psionic skills, such as Wisdom for Clairvoyance and Charisma for Telepathy. He could rule that the highest of the character’s mental abilities (i.e., Int, Wis, and Cha) is always that character’s key ability.

Regardless of the key ability chosen for each Psionic skill, certain uses are standard. The key ability is added to the Difficulty Class of the saving throws for powers manifested by the character. The key ability also determines the highest power level the character can learn.

$$\text{HIGHEST POWER LEVEL ABLE TO BE LEARNED} = \text{KEY ABILITY} \times 2 + 1$$

A simple table summarizes this formula:

Key Ability for Psionic Skill	Highest Power Level Able to be Learned
+0	1st
+1	3rd
+2	5th
+3	7th
+4	9th

BONUS POWER POINTS

The formula for bonus power points remains:

$$\text{BONUS POWER POINTS} = \text{KEY ABILITY} \times \text{HIGHEST RANKS IN A PSIONIC SKILL} \times \frac{1}{2}$$

POWER POINT COST BY POWER LEVEL

The base power point costs by power level are shown below.

Power Level	Power Point Cost	Power Level	Power Point Cost
1st	1	6th	11
2nd	3	7th	13
3rd	5	8th	15
4th	7	9th	17
5th	9		

BASIC D20 FORCE SKILLS

FORCE SKILLS

Basic d20 uses a broad skill system that groups traditional d20 skills into twelve broad skill areas. Furthermore, it adds four broad skills that define offensive and defensive combat ability (Fight, Shoot, Dodge, and Parry). Finally, the three save bonuses and hit dice are made into four additional broad skills (Fortitude, Reflex, Toughness, and Will). This totals 20 broad skills.

The Star Wars Revised Core Rulebook has additional Force skills for use by Force-using characters. The broad skill equivalents for Basic d20 are listed below with appropriate specialties.

Force Skills	Default Ability	d20 Star Wars Skill Equivalents (Specialty Skills)
Alter	Var	Affect Mind, Drain Energy*, Force Grip*, Force Lightning*, Force Strike, Heal Another**, Illusion, Move Object
Control	Cha	Battlemind, Force Defense, Force Stealth, Heal Self
Force-Sensitive	Var	Empathy, Enhance Ability, Friendship
Sense	Wis	Enhance Senses, Farseeing, Fear*, See Force, Telepathy

Specialties with one asterisk are Dark Side specialties while Heal Another is a Light Side Force specialty and cannot be used by characters with Dark Side points. Characters must still possess the appropriate Force feats to take ranks in the associated Force skills.

VITALITY POINT EXPENDITURES FOR FORCE POWERS

In a true Basic d20 game based on the Star Wars Revised Edition, vitality points should be used (along with wound points naturally). If the vitality point system is not used in a campaign featuring Force powers, the GM should consider giving Force-users spell points as a wizard with bonus points based on Constitution to be used as vitality. This may increase the power of Force-using characters, as they will be able to count on their full hit points for taking damage and a separate pool of points for powering Force effects, whereas normally vitality is used for both. If there is any doubt, please remember that a high level wizard would probably be able to annihilate a Jedi of equal level (and then you shouldn't feel so bad about giving Force-users more "points").

BASIC D20 TO D&D

Basic d20 is a simplified version of the d20 system suitable for use in any d20-based campaign. This system has been designed for quick character generation and ease of play. The focus is to make it simpler for players. The GM, however, must be well-versed in the d20 system to make use of this set of rules. The system cannot be used with older forms of Dungeons & Dragons without conversion, however. This document explains how to convert your Basic d20 character for use in older D&D modules and adventures.

ABILITY SCORE CONVERSION

Convert your Basic d20 ability score modifiers to D&D ability scores according to the table below.

If you have this Ability Score in Basic d20	Then you have this Ability Score in forms of D&D							
	D&D B/X/C/M	AD&D Str	AD&D Int	AD&D Wis	AD&D Dex	AD&D Con	AD&D Cha	D&D 3/3.5/3.75
-4	3	3	3	3	3	3	3	3
-3	3	3	3	3	4	3	3	4-5
-2	4-5	4-5	3-4	4	5	3	3-4	6-7
-1	6-8	6-7	5-7	5-7	6	4-6	5-6	8-9
+0	9-12	8-15	8-10	8-14	7-14	7-14	7-13	10-11
+1	13-15	16-17	11-12	15	15	15	14-15	12-13
+2	16-17	18-18/50	13-14	16	16	16	16	14-15
+3	18	18/51-18/90	15-16	17	17	17	17	16-17
+4	18	18/91-18/99	17-18	18-19	18-20	18	18-20	18-19
+5	18	18/00-19	19-20	20-21	21-23	19-20	21-22	20-21
+6		20	21-22	22-23	24-25	21-23	23-24	22-23
+7		21-22	23-24	24-25		24-25	25	24-25
+8		23	25					26-27
+9		24						28-29
+10		25						30-31

To use the table, simply take your Basic d20 ability score modifiers and read across until you find the appropriate ability score in the D&D system of your choosing. If a range is given, the GM can assign a number or make the player roll to see exactly what ability score the character has.

For example, the GM decides to run module T1 from AD&D. One character has Str +2, Dex +2, Con +3, Int +0, Wis -1, and Cha +2. These scores become Str 18 to 18/50, Dex 16, Con 17, Int 8 to 10, Wis 5 to 7, and Cha 16. Since Strength, Intelligence, and Wisdom show a range of values, the fiendish GM makes the player roll 1d100 divided by two to find exceptional Strength, 1d3 + 7 for Intelligence, and 1d3 + 4 for Wisdom.

HIT POINT CONVERSION

Find your character's hit points based on his Toughness skill ranks and number of Toughness feats.

Hit Points for Advanced Dungeons & Dragons (1st and 2nd Editions)					
Toughness Skill Ranks	Hit Points	Toughness Feats	Extra Hit Points	Toughness Feats	Extra Hit Points
0	1d2	0	+0	21	+61
1	1d4	1	+3	22	+62
2	2d4	2	+6	23	+63
3	3d4	3	+9	24	+64
4	4d4	4	+12	25	+65
5	5d4	5	+15	26	+66
6	6d4	6	+18	27	+67
7	7d4	7	+21	28	+68
8	8d4	8	+24	29	+69
9	9d4	9	+27	30	+70

COMBAT CONVERSION

Average your character's Fight and Shoot ranks and consult the tables below to find equivalent combat capability.

Fight and Shoot Average Ranks	D&D (B/X/C/M) Fighter Level	AD&D (1st & 2nd) Fighter Level	AD&D 1st Edition Fighter Column	AD&D 2nd Edition ThACO	D&D (3/3.5/3.75) Base Attack Bonus
0	0	0	0	21	+0
1	1	1	1-2	20	+1
2	2	2	1-2	19	+2
3	3	3	3-4	18	+3
4	4	4	3-4	17	+4
5	5	5	5-6	16	+5
6	6	6	5-6	15	+6
7	7	7	7-8	14	+7
8	8	8	7-8	13	+8
9	9	9	9-10	12	+9
10	10	10	9-10	11	+10
11	11	11	11-12	10	+11
12	12	12	11-12	9	+12
13	13-15	13	13-14	8	+13
14	16-18	14	13-14	7	+14
15	19-21	15	15-16	6	+15
16	22-24	16	15-16	5	+16
17	25-27	17	17+	4	+17
18	28-30	18	17+	3	+18
19	31-33	19	17+	2	+19
20	34-36	20	17+	1	+20

So, by using the average your character's number of ranks in Fight and Shoot, you can figure out your character's fighting ability in all versions of D&D. For example, if a character has 17 ranks in Fight and 13 ranks in Shoot, then the average is 15 ranks. Consulting the table, we see that your character has the fighting ability of a 19th-21st level fighter in Basic D&D, the fighting ability of a 15th level fighter in AD&D, a ThACO of 6 in AD&D 2nd Edition, and a Base Attack Bonus of +15 in D&D 3/3.5. If desired, the GM can keep the character's melee and ranged fighting abilities separate, even though previous versions of D&D do not separate fighting ability in this manner.

Parry and Dodge skill ranks can also be converted to other traits.

Parry and Dodge Average Ranks	D&D (B/X/C/M) Parry	AD&D 1st Edition "Monk" AC	AD&D 2nd Edition Parrying Bonus	D&D (3/3.5/3.75) Defense Bonus
0	0	10	+0	+0
1	0	10	+1	+1
2	0	9	+2	+2
3	0	8	+2	+3
4	0	7	+3	+4
5	0	7	+3	+4
6	0	6	+4	+5
7	0	5	+4	+5
8	0	4	+5	+6
9	-4	3	+5	+6
10	-4	3	+6	+7
11	-4	2	+6	+7
12	-4	1	+7	+8
13	-4	0	+7	+8
14	-4	-1	+8	+9
15	-4	-1	+8	+9
16	-4	-2	+9	+10
17	-4	-3	+9	+10
18	-4	-3	+10	+11
19	-4	-3	+10	+11
20	-4	-3	+11	+12

Dodge and Parry are a little more difficult to convert into meaningful traits in old D&D. It is suggested that ranks in Dodge and Parry be averaged and this result used when consulting the table. In Basic D&D, 9th level fighters get the ability to parry, giving them a -4 bonus to their AC. In AD&D 1st Edition, Dodge and Parry may be analogous to the monk's AC progression. In AD&D 2nd Edition, the Parrying Bonus was implemented and the character's ranks in Dodge and Parry can be used to assign this trait. In Third Edition D&D, a Defense Bonus can be given.

OTHER BROAD SKILL CONVERSION

The uses for various broad skills have already been detailed in the main Basic d20 document for D&D 3/3.5. Listed below are possible uses of the remaining broad skills for AD&D 1st Edition.

Skill Area	Possible Uses (AD&D1)
Athletics	Thief (Ranks = Thief Level for Climb Walls)
Awareness	Thief (Ranks = Thief Level for Hear Noise)
Interaction	Bonus to Reaction Adjustment = Ranks X 1%
Knowledge	Bard (Legend Lore and Item Knowledge), Sage Ability (Ranks X 5% = Dice Score for Fields, DMG 31)
Languages	Thief (Ranks = Thief Level for Read Languages), Bard (Additional Languages Known)
Performance	Bard (Charm)
Profession	Jeweler-Gemcutter (Ranks X 5% = Skill Level Roll, DMG 30)
Science	Sage Ability (Ranks X 5% = Dice Score for Fields, DMG 31)
Technology	Armorer (Ranks X 5% = Skill Level Roll, DMG 29), Sage Ability (Ranks X 5% = Dice Score for Fields, DMG 31)
Thievery	Thief (Rank = Thief Level for Pick Pockets, Open Locks, Find/Remove Traps, Move Silently, and Hide in Shadows)
Vehicles	--
Wilderness	Sage Ability (Ranks X 5% = Dice Score for Fields, DMG 31)

Also, if a character has at least 9 skill ranks in an appropriate area, they may have “Expert Hireling” status in the appropriate profession.

Skill Area	Possible Uses (AD&D1)
Athletics	--
Awareness	--
Interaction	Steward/Castellan
Knowledge	Sage
Languages	Sage, Scribe
Performance	--
Profession	Jeweler-Gemcutter, Steward/Castellan
Science	Alchemist, Engineer-Architect, Engineer-Artillerist, Engineer-Sapper/Miner, Sage
Technology	Armorer, Blacksmith, Sage, Weapon Maker
Thievery	Spy
Vehicles	Ship Crew, Ship Master
Wilderness	Sage

Also, these areas correspond to Non-Weapon Proficiencies. Players should choose one NWP slot for each rank in the appropriate area for their characters. Note that some of these ranks may need to apply to thief skills for the character, if appropriate.

Skill Area	Non-Weapon Proficiency Equivalents (AD&D 1st Edition)
Athletics	Endurance, Horsemanship, Juggling, Riding (airborne), Riding (land-based), Running, Slow Respiration, Swimming
Awareness	Alertness, Blind-fighting, Sound Analysis
Interaction	Etiquette, Gaming
Knowledge	Heraldry, Religion
Languages	Calligraphy, Reading/Writing, Signaling
Performance	Animal Noise, Chanting, Dance, Flower Arranging, Music, Noh, Origami, Painting, Poetry, Singing, Tea Ceremony
Profession	Animal Handling, Animal Trainer, Brewer, Carpenter, Cooking, Gem Cutter, Iaijutsu, Landscape Gardening, Leatherworker, Potter, Rope Use, Seamstress/Tailor, Smelter, Weaver
Science	Healing, Herbalist
Technology	Armorer, Boatwright, Bowyer/Fletcher, Blacksmith, Civil Engineer, Miner, Stonemason, Weaponsmith
Thievery	(Thief Skills)
Vehicles	Boating, Charioteering, Navigator, Sailing Craft, Small Water Craft
Wilderness	Agriculture, Animal Lore, Direction Sense, Falconry, Fire-building, Fishing, Foraging, Fungus Identification, Hunting, Husbandry, Mountaineering, Plant Lore, Snare Building, Survival (all types), Tracking, Weather Sense

Skill Area	Non-Weapon Proficiency Equivalents (AD&D 2nd Edition)
Athletics	Endurance, Juggling, Jumping, Riding (Airborne), Riding (Land-based), Running, Swimming, Tightrope Walking, Tumbling
Awareness	Appraising, Blind-fighting, Reading Lips
Interaction	Etiquette, Gaming, Local History
Knowledge	Ancient History, Astrology, Heraldry, Religion
Languages	Languages (Ancient), Languages (Modern), Reading/Writing
Performance	Artistic Ability, Dancing, Disguise, Musical Instrument, Singing, Ventriloquism
Profession	Animal Handling, Animal Training, Brewing, Carpentry, Cobbling, Cooking, Gem Cutting, Leatherworking, Pottery, Rope Use, Seamstress/Tailor, Weaving
Science	Healing, Herbalism, Spellcraft
Technology	Armorer, Bowyer/Fletcher, Blacksmithing, Engineering, Mining, Stonemasonry, Weaponsmithing
Thievery	Forgery, (Thief Skills)
Vehicles	Charioteering, Navigation, Seamanship
Wilderness	Agriculture, Animal Lore, Direction Sense, Fire-building, Fishing, Hunting, Mountaineering, Set Snares, Survival, Tracking, Weather Sense

CONVERTING ADVANTAGES

Although there are no feats in older editions, class special abilities are also advantages and can be converted into older class abilities. Rather than provide an extensive list of equivalencies, it will be left to the GM to determine what, if any, advantages convert over to class special abilities found in previous editions. Examples of obvious conversions are the Track feat to the ranger track ability, druid class specials to their equivalents, paladin class specials to their equivalents, etc. Even if a certain class special ability may not correspond directly to the class specials found in previous editions, some latitude can be given. For example, there is no direct feat or class ability that grants a bonus to damage when attacking “giant-class” creatures, but if a character is clearly a “ranger type” due to choices in feats and abilities, you may want to give that character this class special ability when adventuring in a 1st Edition module, for example.

CONVERTING POWERS

Likewise, a table with all possible conversions will not be listed when it comes to powers. Keep in mind that spellcasting levels can convert almost directly (make sure the character still has access to commonly used spell levels). Sorcerers should convert to magic-users that need not “memorize” their spells. Psionics could be a problem, but if you’re using psionics in your campaign, you’re probably adventurous enough to plan the proper conversions between systems!

The table below shows the quick conversions between ranks in spellcasting and the number of levels of equivalent spellcasting in different D&D systems.

Powers	D&D (B/X/C/M)	AD&D (1st Edition)	AD&D (2nd Edition)	D&D (3/3.5/3.75)
Bardic Spellcasting	As Wizard X $\frac{1}{3}$	Rank = Level	Rank = Level	Rank = Level
Clerical Spellcasting	Basic Formula	Rank = Level	Rank = Level	Rank = Level
Druidic Spellcasting	Basic Formula	Rank = Level	Rank = Level	Rank = Level
Psion Manifesting	No Conversion	Special	Rank = Level	Rank = Level
Sorcerer Spellcasting	As Wizard	As Wizard	As Wizard	Rank = Level
Wizardly Spellcasting	Basic Formula	Rank = Level	Rank = Level	Rank = Level

“Rank = Level” means that you convert the number of ranks your character has in spellcasting directly to spellcasting levels in the appropriate class.

The “Basic Formula” for D&D (B/X/C/M) is Rank = Level up to 12th level and then each additional rank adds another three levels. This means that having 20 ranks in spellcasting yields 36 levels in D&D spellcasting. Bardic spellcasting is equal to one-third of this result in magic-user spellcasting levels.

“Special” means that the GM will have the lovely task of trying to convert your psionicist to an AD&D 1st Edition character. You may just want to use the psionicist from AD&D 2nd Edition!

EXPERIENCE POINT TO POWER POINT CONVERSION

When converting D&D experience points earned from a module to Power Points, you must take into account the level of the module (for Basic D&D and AD&D) or the EL of the encounter (for D&D 3/3.5). If a range of levels is given for a module (which occurs most of the time), use the average level in the range. Once you have the level or EL, consult the table below and find the divisor that is needed. All XP will be divided by this divisor to find the number of Power Points earned. This system should only be used if the GM wants to convert XP to PP directly. The GM can always ignore any experience points awards as listed and simply hand out Power Points as desired.

Level or EL	D&D (B/X/C/M)	AD&D (1st)	AD&D (2nd)	D&D (3/3.5)	D&D 3.75 (Slow)	D&D 3.75 (Medium)	D&D 3.75 (Fast)
1	200	200	200	100	300	200	130
2	200	200	200	200	450	300	200
3	400	400	400	300	650	400	270
4	800	1,000	800	400	900	600	400
5	1,600	1,700	1,600	500	1,200	800	500
6	3,200	3,500	3,200	600	1,800	1,200	800
7	5,600	5,500	6,100	700	2,400	1,600	1,100
8	12,000	12,500	12,500	800	3,800	2,400	1,600
9	12,000	25,000	25,000	900	4,500	3,000	2,100
10	12,000	25,000	25,000	1,000	7,500	5,000	3,400
11	12,000	25,000	25,000	1,100	9,500	6,500	4,000
12	12,000	25,000	25,000	1,200	14,500	9,500	6,500
13	12,000	25,000	25,000	1,300	19,000	13,000	8,500
14	12,000	25,000	25,000	1,400	29,000	19,000	13,000
15	12,000	25,000	25,000	1,500	39,500	25,500	17,500
16	12,000	25,000	25,000	1,600	55,000	41,000	25,000
17	12,000	25,000	25,000	1,700	80,000	50,000	35,000
18	12,000	25,000	25,000	1,800	115,000	75,000	50,000
19	12,000	25,000	25,000	1,900	150,000	105,000	70,000
20	12,000	25,000	25,000	2,000	235,000	150,000	100,000

So, let's say that you're running the original Ravenloft module for your group. This is an AD&D 1st Edition module for levels 5-7. The average level in that range is 6th. Therefore, after computing all of the AD&D 1st Edition experience that the group has earned for the night, consult the "AD&D (1st)" column and the "6" row. This gives a divisor of 3,500. This means that the total XP is divided by 3,500 to find the number of Power Points that the group has earned. These points should be divided by the number of characters and each character should receive an equal share.

Obviously, fractional PP will enter into this system. Power Points should be rounded to the nearest 0.25 (which is the cost to buy one rank for one specialty). GMs can also wait until a substantial number of PP are earned before awarding them.

Also note that this system assumes that characters are taking on modules that are appropriate to their power level. If not, characters will easily earn large amounts of PP if they “slum” because the divisors are based on the expected levels of the participants. If characters go slumming, then the proper row to use in the table is the actual “level” of the characters themselves, and not necessarily the level of the module. For example, if characters that are obviously the equivalent of 10th level characters decide to take on Ravenloft, all XP should be divided by 25,000 instead of 3,500.

CONVERTING POWER POINTS SPENT TO CHARACTER LEVEL

To figure out an approximate character level for your Basic d20 character, use the following formulae. Use the total number of Power Points spent on your character for the calculation.

For AD&D 1st/2nd Editions and D&D 3/3.5/3.75 use:

$$\text{CHARACTER LEVEL} = (\text{PP SPENT} - 10) \div 10 (\text{DROP FRACTION})$$

For D&D (B/X/C/M) with 130 PP or less use:

$$\text{CHARACTER LEVEL} = (\text{PP SPENT} - 10) \div 10 (\text{DROP FRACTION})$$

For D&D (B/X/C/M) with greater than 130 PP use:

$$\text{CHARACTER LEVEL} = (\text{PP SPENT} - 10) \div 10 + (\text{PP SPENT} - 130) \times \frac{3}{10} (\text{DROP FRACTION})$$

WHY BOTHER WITH ALL OF THIS?

Through this document, you can use the Basic d20 system as a *lingua franca* for all forms of D&D and d20 gaming systems. In essence, you have a method for allowing the same character to adventure across multiple versions of D&D rules and even across multiple settings without having to engage in extensive conversions. The Basic d20 system acts as the base for each player to describe their characters’ abilities and traits which can then be converted into another gaming system for play in a specific campaign-world. This concept is very similar to that of the AMAZING ENGINE™ Role-Playing System devised by TSR in the early 90’s. Characters can be “re-imagined” in radically different settings by reassigning any Power Points spent on traits that do not exist in the current setting (such as when converting a fantasy wizard character into a technology-savvy or engineering-heavy character in a science-fiction setting). Naturally, such conversions are subject to the GM’s approval under close supervision.

BASIC D20 TO CHAOSIUM BRP

Basic d20 is a simplified version of the d20 system suitable for use in any d20-based campaign. This system has been designed for quick character generation and ease of play. The focus is to make it simpler for players. The GM, however, must be well-versed in the d20 system to make use of this set of rules. The system cannot be used with other gaming systems without conversion, however. This document explains how to convert your Basic d20 character for use in Chaosium's Basic RolePlaying Game modules and adventures.

ABILITY SCORE CONVERSION

Convert your Basic d20 ability score modifiers to Chaosium characteristics according to the table below.

Ability Score in Basic d20	Chaosium BRP Characteristic
-4	3
-3	4-5
-2	6-7
-1	8-9
+0	10-11
+1	12-13
+2	14-15
+3	16-17
+4	18-19
+5	20-21

Ability or Statistic in Basic d20	Characteristic in Chaosium BRP
Strength	STR
Dexterity	DEX
Constitution	CON
Intelligence	INT
Wisdom	POW
Charisma	APP
Height & Weight (See Table)	SIZ
13 + Int + Wis	EDU

To use the table, simply take your Basic d20 ability score modifiers and read across until you find the appropriate characteristic in the Chaosium BRP. If a range is given, the GM can assign a number or make the player roll to see exactly what ability score the character has.

For example, the GM decides to run the Masks of Nyarlathotep campaign in Call of Cthulhu. One character has Str +2, Dex +2, Con +3, Int +0, Wis -1, and Cha +2. The generous Keeper decides to give the player a 50% chance to have the higher of the two scores listed for each characteristic. After rolling for each characteristic, these scores become STR 14, CON 17, INT 10, POW 8, DEX 15, and APP 14. Looking at the character's listed height and weight, he assigns SIZ 12. He decides to make EDU equal to 13 plus the character's Basic d20 Intelligence and Wisdom ability score modifiers, for a total of 12. Well, at least he graduated from high school!

As gleaned above, it is recommended that you use the following formula for EDU:

$$\text{EDU SCORE} = 13 + \text{BASIC D20 INT} + \text{BASIC D20 WIS}$$

Use the chart below to determine the character's SIZ score. To use the chart, find the row containing the character's listed height in either inches or centimeters. Note the SIZ score given for that height. On the same row, look to the right to find the range of weights associated with that SIZ score. If your character's weight falls within the range given, keep the SIZ that you noted. If your character's weight is not within the range, move up or down until you find the first range containing your character's weight. Use this row to find your character's SIZ.

SIZ Score	Character Height Inches	Character Height Centimeters	Character Weight Pounds	Character Weight Kilograms
1	0-12	0-30	0-20	0-10
2	13-24	31-60	11-40	5-20
3	25-36	61-90	21-60	10-30
4	37-42	91-104	31-80	16-40
5	43-48	105-120	41-100	21-50
6	49-54	121-135	51-120	26-60
7	55-60	136-150	61-140	31-70
8	61-62	151-155	71-160	36-80
9	63-64	156-160	81-180	41-90
10	65-66	161-165	91-200	46-100
11	67-68	166-170	101-220	51-110
12	69-70	171-175	111-240	56-120
13	71-72	176-180	121-260	61-130
14	73-74	181-185	131-280	66-140
15	75-76	186-190	141-300	71-150
16	77-78	191-195	151-320	76-160
17	79-80	196-200	161-340	81-170
18	81-82	201-205	171-360	86-180
19	83-84	206-210	181-380	91-190
20	85-86	211-215	191-400	96-200
21	87-88	216-220	201-420	101-210
22	89-90	221-225	211-440	106-220
23	91-92	226-230	221-460	111-230
24	93-94	231-235	231-480	116-240
25	95-96	236-240	241-500	121-250

Example #1: Your character is a half-elf that's 5'4" and weighs 145 lbs. This is 64 inches. The player finds that 64 inches is in the "9" row for SIZ. Looking right, he notices the weight range for SIZ 9 is "81-180." Since 145 lbs. falls within this weight range, his character has SIZ 9.

Example #2: Your character is an extremely tall valley elf. He is 6' and weighs 115 lbs. The player finds that a 72 inch character should have a SIZ of 13, but since 115 lbs. is not within the weight range for that SIZ, he must record 12 for his character's SIZ (since 115 lbs. is found in the range for SIZ 12).

Example #3: A large, short dwarf is 47" tall and 144 lbs. His SIZ is 8.

HIT POINT CONVERSION

Find your character's hit points based on his Toughness skill ranks only. Toughness feats don't count. Round numbers normally.

Toughness Skill Ranks	Chaosium BRP	Average PC Hit Points
0	(CON+SIZ) X 50%	12
1	(CON+SIZ) X 55%	13
2	(CON+SIZ) X 60%	14
3	(CON+SIZ) X 65%	16
4	(CON+SIZ) X 70%	17
5	(CON+SIZ) X 75%	18
6	(CON+SIZ) X 80%	19
7	(CON+SIZ) X 85%	20
8	(CON+SIZ) X 90%	22
9	(CON+SIZ) X 95%	23
10	CON+SIZ (or "Total Hit Points")	24
11	CON+SIZ+1	25
12	CON+SIZ+2	26
13	CON+SIZ+3	27
14	CON+SIZ+4	28
15	CON+SIZ+5	29
16	CON+SIZ+6	30
17	CON+SIZ+7	31
18	CON+SIZ+8	32
19	CON+SIZ+9	33
20	CON+SIZ+10	34

CONVERTING POWER POINTS SPENT TO SKILL POINTS

To figure out the number of skill points your Basic d20 character has for use in a Chaosium adventure, use the following formula.

$$\text{SKILL POINTS} = (\text{PP SPENT ON BROAD SKILLS} \div 400) \times 5000$$

These skill points should be put into Chaosium skills at levels that closely approximate the character's Basic d20 broad skills.

BROAD SKILL CONVERSION

The uses for various broad skills are detailed below for the Chaosium BRP. Skills found in all eras of Call of Cthulhu are also listed. Please note that percentiles in the Cthulhu Mythos skill must be earned the hard way.

Chaosium Basic RolePlaying Game, Call of Cthulhu, and Stormbringer	
Broad Skills	Skill Equivalents
Athletics	Climb, Fly, Jump, Ride, Swim, Tumble
Awareness	Awareness, Balance, Insight, Listen, Scent, Search, See, Sense, Spot, Spot Hidden, Taste, Track
Dodge	Dodge, Shield
Fight	Brawl, Fist/Punch, Grapple, Head Butt, Kick, Martial Arts, Melee Weapon
Fortitude	--
Interaction	Bargain, Command, Etiquette, Fast Talk, Gaming, Orate, Persuade
Knowledge	Anthropology, Archaeology, Evaluate Treasure, History, Knowledge, Library Use, Make Map, Memorize, Music Lore, Natural History, Navigate, Occult, Plant Lore, Poison Lore, Psychology, Research
Languages	'pande, Common Tongue, Language (Other), Language (Own), Literacy, Melnibonean (High), Melnibonean (Low), Orgjenn, Other Language, Own Language
Parry	Parry, Shield
Performance	Art, Disguise, Juggle, Perform, Photography, Sing
Profession	Accounting, Credit, Credit Rating, Law, Status, Strategy, Teach, Tie Knot
Reflex	--
Science	Astronomy, Biology, Chemistry, First Aid, Geology, Medicine, Pharmacy, Physics, Psychoanalysis, Psychotherapy, Science
Shoot	Energy Weapon, Firearm, Handgun, Heavy Weapon, Machine Gun, Missile Weapon, Projection, Rifle, Shotgun, Submachine Gun, Throw
Technology	Computer Use, Craft, Demolition, Electrical Repair, Electronics, Mechanical Repair, Repair, Technical Skill
Thievery	Ambush, Conceal, Cut Purse, Fine Manipulation, Hide, Locksmith, Move Quietly, Pick Lock, Set Trap, Sleight of Hand, Sneak, Stealth
Toughness	(See Hit Points)
Vehicles	Artillery, Drive, Drive Auto, Drive Carriage, Heavy Machine, Operate Heavy Machine, Pilot, Pilot Balloon, Pilot Boat
Wilderness	--
Will	--

CONVERTING ADVANTAGES

Although there are really no feats or class special abilities in Chaosium's BRP, the GM can consider any advantages a Basic d20 character has and (perhaps) incorporate them in a roleplaying sense into the campaign. Some advantages may convert to Powers, but this is at the discretion of the GM.

CONVERTING POWERS

The Chaosium BRP rulebook has a Powers section. In this section, Magic, Mutations, Psychic Abilities, Sorcery, and Super Powers are detailed. There are too many variations or equivalencies to list here. What will be detailed is a quick conversion that can be used, with significant GM oversight, to convert Power Points spent on Powers in Basic d20 to skill points spent on Powers in the Chaosium BRP.

If you decide to convert Basic d20 Power Points to be used with the Magic Power, use the following formulae to figure out how many skill points your character receives to spend on Magic Power skills.

SKILL POINTS FOR MAGIC POWERS

Game Power Level	Start with	And then multiply by
Normal	PP Spent on Basic d20 Magical Powers	10
Heroic	PP Spent on Basic d20 Magical Powers	15
Epic	PP Spent on Basic d20 Magical Powers	20
Superhuman	PP Spent on Basic d20 Magical Powers	25

For example, if a player has spent 5 PP to gain 1st level wizard spellcasting ability for his character in Basic d20, then he should receive 50 skill points to be spent on Magic in a Normal Power Level Game in the BRP. This closely corresponds to a Chaosium character with INT 13 starting a Normal Power Level Game with his four initial spells at INT X 1 beginning skill.

If you decide to convert Power Points for use with Psychic Abilities, use the following formulae to find the number of skill points your character receives for Psychic Abilities.

SKILL POINTS FOR PSYCHIC ABILITIES

Game Power Level	Start with	And then multiply by
Normal	PP Spent on Basic d20 Psionic Powers	4
Heroic	PP Spent on Basic d20 Psionic Powers	8
Epic	PP Spent on Basic d20 Psionic Powers	12
Superhuman	PP Spent on Basic d20 Psionic Powers	20

If you decide to convert Power Points for use with the Sorcery Power, use the following formulae.

LEVELS OF SORCERY POWERS

Game Power Level	Start with	And then multiply by	Then add
Normal	PP Spent on Basic d20 Powers	10%	INT ÷ 2
Heroic	PP Spent on Basic d20 Powers	25%	INT
Epic	PP Spent on Basic d20 Powers	50%	INT × 2
Superhuman	PP Spent on Basic d20 Powers	100%	INT × 4

If you decide to convert Power Points for use with Super Powers, use the following formula for Super Powers in all Power Level Games:

$$\text{CHARACTER POINTS (FOR SUPER POWERS)} = \text{PP SPENT ON BASIC D20 POWERS}$$

WHAT CAN I USE THIS FOR?

Well, assuming that you've decided to go ahead and use the Basic d20 system to describe your player characters, you may find that you want to have them adventure in one of Chaosium's many fine roleplaying games. Perhaps you are running a d20 Modern campaign and you want to shake things up a little by running a Call of Cthulhu adventure. Or maybe you just purchased a copy of Stormbringer on eBay and you think it'd be neat to have your characters run into Elric (and experiment with that game system for a bit).

You can also reverse engineer Chaosium products and run them in Basic d20, if you desire. Simply "reverse" the conversion as described in this document. Translate BRP characteristics into Basic d20 ability score modifiers. Add up the Chaosium skill points that a non-player character has and multiply these by 0.08 (or divide by 12.5) to find the number of Basic d20 skill points that NPC has (round normally). For powers, use Basic d20 equivalents. Remember, most Call of Cthulhu spells and creatures appear in the d20 version rulebook.

Since Basic d20 is really the "Esperanto of gaming systems" and previous documents have already shown you how to use it for all manner of D&D and d20 systems, it is only natural that later supplements show you how to convert Basic d20 into other gaming systems. This is the first supplement along those lines. So, have fun fighting Cthulhu!

Rules Cyclopeda Addendum

The purpose of this document is to detail how race and class can be separated when using the D&D Rules Cyclopeda. This document also details very simple class options that can be employed to mimic classes found in other forms of Dungeons and Dragons.

The first section gives details for seven standard player character races that can be used in your game. The ability score requirements for playing a member of that race are listed first. After that, it is noted in each description that a character's prime requisites, experience bonus criteria, and hit dice are always a function of the character's class. The maximum level for all characters is 36th. However, all non-humans have different advancement tables showing the experience points needed for each level. Humans have the fastest advancement tables; they are based on the four human character classes found in the Rules Cyclopeda. Demi-human advancement tables have been derived by taking into account the experience point "addition" each race receives in the Variant Rules section of the Cyclopeda. The allowed armor and weapons are listed for that race next. Any special abilities and damage resistances come after. All languages known by characters of that race are shown next. The last section details the adjustments that apply to a character's saving throws. This number is not a penalty, even though it is negative. Lower the character's saving throw by this amount, with the base saving throw coming from the character's class saving throw chart. Demi-human minimum saving throws are not always '2' either. The lowest saving throw a member of that race can have is shown. For example, dwarves have a -4 adjustment to their Magic Wands saving throw. This means that a dwarven cleric will start with an 8 (12 - 4), a dwarven fighter with a 9 (13 - 4), and a dwarven thief with a 10 (14 - 4). The lowest saving throw that any dwarven character can have in Magic Wands is '3' as listed in the entry for dwarves.

Following this section is a similar section for humanoids. Humanoids have ability score adjustments and maximums, unlike humans and demi-humans. This section is primarily for DMs who may want to create NPCs of humanoid races that also have a character class. The Orcs of Thar gazetteer supplement was used as inspiration.

The five basic classes from the Rules Cyclopeda are detailed next. After this, six multi-class options are listed. Four basic classes are paired with one another to simulate a class that is actually a multi-class as presented in other early forms of D&D. Following these two sections, a number of class options are described. These entail some of the higher level options described, such as knight and druid, that should be made available to 1st level characters. Other options represent simplified "sub-classes" that can be taken as options at 1st level, such as bard, illusionist, and assassin. For hit dice and top out hit points, two values are listed for each class. The first represents the standard hit dice and top out hit points found in the Rules Cyclopeda. The second values represent the higher hit dice found in AD&D. Either can be used, depending on the preference of the DM. A short discussion on using all of the options presented in this document follows. Finally, experience point charts for the various races are given. The illusionist spell list and a note about the mystic's acrobatics special ability ends the document.

Although this document details quite a number of changes and additions, DMs can ignore most of these various options and simply use this document to divorce race from class. If this is desired, use only the dwarf, elf, halfling, and human races along with the cleric, fighter, magic-user, and thief classes. Then you will have sixteen race-class combinations as opposed to the seven that are described in the Rules Cyclopeda.

Races

Dwarf

Ability Score Requirements:	Constitution 9 or better.
Prime Requisites:	By Class.
Experience Bonus:	By Class.
Hit Dice:	By Class.
Maximum Level:	36th. Dwarven advancement tables are different from human advancement tables.
Armor:	By Class.
Weapons:	By Class. Furthermore, dwarves are limited to Small and Medium melee/thrown weapons, shortbows, and crossbows.
Special Abilities:	Infravision, 1 in 3 chance to detect traps, sliding walls, sloping corridors, and new construction.
Damage Resistance:	Half damage from spells at 1,400,000 XP.
Languages:	Common, dwarf, gnome, goblin, kobold, alignment language.
Saving Throw Adjustment	Adjustment / Minimum Saving Throw
Death Ray or Poison:	-4 / 2
Magic Wands:	-4 / 3
Paralysis or Turn to Stone:	-4 / 4
Dragon Breath:	-2 / 4
Rod, Staff, or Spell:	-4 / 3

Elf

Ability Score Requirements:	Intelligence 9 or better.
Prime Requisites:	By Class.
Experience Bonus:	By Class.
Hit Dice:	By Class.
Maximum Level:	36th. Elven advancement tables are different from human advancement tables.
Armor:	By Class.
Weapons:	By Class.
Special Abilities:	Infravision, 1 in 3 chance to detect secret and hidden doors, immunity to ghoul paralysis.
Damage Resistance:	Half damage from dragon breath at 1,600,000 XP.
Languages:	Common, elf, gnoll, hobgoblin, orc, alignment language.
Saving Throw Adjustment	Adjustment / Minimum Saving Throw
Death Ray or Poison:	-0 / 2
Magic Wands:	-0 / 4
Paralysis or Turn to Stone:	-0 / 4
Dragon Breath:	-0 / 3
Rod, Staff, or Spell:	-0 / 3

Gnome

Ability Score Requirements:	Dexterity of 9 or better and a Constitution of 9 or better.
Prime Requisites:	By Class.
Experience Bonus:	By Class.
Hit Dice:	By Class.
Maximum Level:	36th. Gnomish advancement tables are different from human advancement tables.
Armor:	By Class.
Weapons:	By Class. Furthermore, gnomes are limited to Small melee/thrown weapons, shortbows, and light crossbows.
Special Abilities:	Infravision, 1 in 3 chance to detect traps, sliding walls, sloping corridors, and new construction, -2 AC vs. monsters larger than man-size, +1 to attack roll with missile weapons, +1 to individual initiative.
Damage Resistance:	Half damage from spells at 300,000 XP. Half damage from dragon breath at 2,100,000 XP.
Languages:	Common, dwarf, gnome, goblin, kobold, alignment language.
Saving Throw Adjustment	Adjustment / Minimum Saving Throw
Death Ray or Poison:	-4 / 2
Magic Wands:	-4 / 3
Paralysis or Turn to Stone:	-4 / 4
Dragon Breath:	-2 / 4
Rod, Staff, or Spell:	-4 / 3

Halfling

Ability Score Requirements:	Dexterity of 9 or better and a Constitution of 9 or better.
Prime Requisites:	By Class.
Experience Bonus:	By Class.
Hit Dice:	By Class.
Maximum Level:	36th. Halfling advancement tables are different from human advancement tables.
Armor:	By Class.
Weapons:	By Class. Furthermore, halflings are limited to Small melee/thrown weapons, shortbows, and light crossbows.
Special Abilities:	-2 AC vs. monsters larger than man-size, +1 to attack roll with missile weapons, +1 to individual initiative, 90% chance to hide motionless in woodlands, 33% chance to hide motionless in dimly lit building interiors.
Damage Resistance:	Half damage from spells at 300,000 XP. Half damage from dragon breath at 2,100,000 XP.
Languages:	Common and alignment language.
Saving Throw Adjustment	Adjustment / Minimum Saving Throw
Death Ray or Poison:	-4 / 2
Magic Wands:	-4 / 3
Paralysis or Turn to Stone:	-4 / 4
Dragon Breath:	-2 / 5
Rod, Staff, or Spell:	-4 / 4

Half-Elf

Ability Score Requirements:	Intelligence of 6 or better.
Prime Requisites:	By Class.
Experience Bonus:	By Class.
Hit Dice:	By Class.
Maximum Level:	36th. Half-elven advancement tables are different from human advancement tables.
Armor:	By Class.
Weapons:	By Class.
Special Abilities:	Infravision, 1 in 3 chance to detect secret and hidden doors.
Damage Resistance:	None
Languages:	Common, elf, gnoll, hobgoblin, orc, alignment language.
Saving Throw Adjustments:	None.

Half-Orc

Ability Score Requirements:	Strength of 6 or better and an Intelligence of 17 or lower.
Prime Requisites:	By Class.
Experience Bonus:	By Class.
Hit Dice:	By Class.
Maximum Level:	36th. Half-orcish advancement tables are different from human advancement tables.
Armor:	By Class.
Weapons:	By Class.
Special Abilities:	Infravision.
Damage Resistance:	None
Languages:	Common, orc, alignment language.
Saving Throw Adjustments:	None.

Human

Ability Score Requirements:	None.
Prime Requisites:	By Class.
Experience Bonus:	By Class.
Hit Dice:	By Class.
Maximum Level:	36th. Humans have the best advancement tables.
Armor:	By Class.
Weapons:	By Class.
Special Abilities:	None.
Damage Resistance:	None.
Languages:	Common, alignment language.
Saving Throws Adjustments:	None.

Humanoid Races

When rolling ability scores for humanoids, any score of 17 or 18 in Intelligence and Wisdom is rerolled until 16 or lower is obtained. After all scores are rolled, apply the racial adjustments.

Bugbear

Ability Score Adj./Max: Str +1/18; Int -3/13; Wis -2/14; Dex +0/18; Con +1/18; Cha +0/18*
Experience Bonus: By Class. Furthermore, halve all XP earned.
Hit Dice: Three hit dice at 1st level. By class thereafter.
Maximum Level: 36th. Bugbears use the gnome/halfling advancement tables.
Armor: By Class. Base armor class is 9.
Weapons: By Class.
Special Abilities: None.
Languages: Bugbear.

Gnoll

Ability Score Adj./Max: Str +1/18; Int -3/13; Wis -2/14; Dex +1/18; Con +0/18; Cha +0/18*
Experience Bonus: By Class.
Hit Dice: Two hit dice at 1st level. By class thereafter.
Maximum Level: 36th. Gnolls use the gnome/halfling advancement tables.
Armor: By Class. Base armor class is 9.
Weapons: By Class.
Special Abilities: None.
Languages: Gnoll.

Goblin

Ability Score Adj./Max: Str -3/15; Int -1/15; Wis +0/16; Dex +1/18; Con +1/18; Cha +0/18*
Experience Bonus: By Class.
Hit Dice: By Class.
Maximum Level: 36th. Goblins use the gnome/halfling advancement tables.
Armor: By Class. Base armor class is 9.
Weapons: By Class. Furthermore, goblins are limited to Small melee/thrown weapons, shortbows, and light crossbows.
Special Abilities: Infravision. -1 to attack rolls when fighting in daylight.
Languages: Goblin.

Hobgoblin

Ability Score Adj./Max: Str +1/18; Int +0/16; Wis +0/16; Dex -1/17; Con +1/18; Cha +0/18*
Experience Bonus: By Class.
Hit Dice: By Class.
Maximum Level: 36th. Hobgoblins use the gnome/halfling advancement tables.
Armor: By Class. Base armor class is 9.
Weapons: By Class.
Special Abilities: None.
Languages: Hobgoblin.

Kobold

Ability Score Adj./Max:	Str -4/14; Int -1/15; Wis +0/16; Dex +3/18; Con +0/18; Cha +0/18*
Experience Bonus:	By Class.
Hit Dice:	By Class.
Maximum Level:	36th. Kobolds use the gnome/halfling advancement tables.
Armor:	By Class. Base armor class is 9.
Weapons:	By Class. Furthermore, kobolds are limited to Small melee/thrown weapons, shortbows, and light crossbows.
Special Abilities:	Infravision.
Languages:	Kobold.

Ogre

Ability Score Adj./Max:	Str +2/18; Int -4/12; Wis -1/15; Dex -1/17; Con +1/18; Cha +0/18*
Experience Bonus:	By Class. Furthermore, award one-third normal XP.
Hit Dice:	Four hit dice at 1st level. By class thereafter.
Maximum Level:	36th. Ogres use the gnome/halfling advancement tables.
Armor:	By Class. Base armor class is 9.
Weapons:	By Class.
Special Abilities:	None.
Languages:	Ogre.

Orc

Ability Score Adj./Max:	Str +1/18; Int -3/13; Wis +0/16; Dex -1/17; Con +0/18; Cha +0/18*
Experience Bonus:	By Class.
Hit Dice:	By Class.
Maximum Level:	36th. Orcs use the gnome/halfling advancement tables.
Armor:	By Class. Base armor class is 9.
Weapons:	By Class.
Special Abilities:	Infravision. -1 to attack rolls when fighting in daylight.
Languages:	Orc.

Troll

Ability Score Adj./Max:	Str +2/18; Int -4/12; Wis -2/14; Dex -2/16; Con +0/18; Cha -2/16*
Experience Bonus:	By Class. Furthermore, award one-fifth normal XP.
Hit Dice:	Six hit dice at 1st level. By class thereafter.
Maximum Level:	36th. Trolls use the gnome/halfling advancement tables.
Armor:	By Class. Base armor class is 9.
Weapons:	By Class.
Special Abilities:	Regeneration (see Troll monster entry in the Rules Cyclopeda).
Languages:	Troll.

* Consider a humanoid's Charisma to be 21 minus the actual Charisma score when dealing with humanoid races and the listed score when dealing with humans and demi-humans. Therefore, "low" Charisma humanoids are the leaders in humanoid society and those who would be able to interact better with humans and demi-humans are the outcasts and freaks.

Classes

Cleric

Prime Requisites:	Wisdom.
Experience Bonus:	If Wis is 13 or better, +5%; if Wis is 16 or better, +10%. If Wis is 6-8, -10%; if Wis is 3-5, -20%.
Standard Hit Dice:	d6 with +1 per level after 9th.
Higher Hit Dice:	d8 with +2 per level after 9th.
Maximum Level:	36th, use cleric advancement charts.
Alignment:	Lawful, chaotic, or neutral.
Armor:	Any, plus shield.
Weapons:	No edged or pointed weapons; all other weapons permitted. Racial limitations apply.
Attack Progression:	As cleric.
Saving Throws:	As cleric.
Special Abilities:	See the Rules Cyclopeda for rules concerning clerics.

Fighter

Prime Requisites:	Strength.
Experience Bonus:	If Str is 13 or better, +5%; if Str is 16 or better, +10%. If Str is 6-8, -10%; if Str is 3-5, -20%.
Standard Hit Dice:	d8 with +2 per level after 9th.
Higher Hit Dice:	d10 with +3 per level after 9th.
Maximum Level:	36th, use fighter advancement charts.
Alignment:	Lawful, chaotic, or neutral.
Armor:	Any, shields allowed.
Weapons:	Any. Racial limitations apply.
Attack Progression:	As fighter.
Saving Throws:	As fighter.
Special Abilities:	See the Rules Cyclopeda for rules concerning fighters.

Magic-user

Prime Requisites:	Intelligence.
Experience Bonus:	If Int is 13 or better, +5%; if Int is 16 or better, +10%. If Int is 6-8, -10%; if Int is 3-5, -20%.
Standard Hit Dice:	d4 with +1 per level after 9th.
Higher Hit Dice:	d4 with +1 per level after 9th.
Maximum Level:	36th, use magic-user advancement charts.
Alignment:	Lawful, chaotic, or neutral.
Armor:	None, no shield permitted.
Weapons:	Dagger only.
Attack Progression:	As magic-user.
Saving Throws:	As magic-user.
Special Abilities:	See the Rules Cyclopeda for rules concerning magic-users.

Mystic

Prime Requisites: Strength and Dexterity. Both Wisdom and Dexterity must be 13 or higher.
Experience Bonus: If Str is 13 or better, +5%; if Str is 16 or better, +10%.
If Str is 6-8, -10%; if Str is 3-5, -20%.
Standard Hit Dice: d6 with +2 per level after 9th.
Higher Hit Dice: d8 with +2 per level after 9th.
Maximum Level: 36th, use fighter advancement charts.
Alignment: Lawful, chaotic, or neutral. Most are lawful.
Armor: None, no shield permitted.
Weapons: Any. Racial limitations apply.
Attack Progression: As fighter.
Saving Throws: As fighter.
Special Abilities: See the Rules Cyclopedia for rules concerning mystics. Consult the Variant Rules section for progression to 36th level. However, do allow the mystic's saving throws to improve beyond 16th level.

Thief

Prime Requisites: Dexterity.
Experience Bonus: If Dex is 13 or better, +5%; if Dex is 16 or better, +10%.
If Dex is 6-8, -10%; if Dex is 3-5, -20%.
Standard Hit Dice: d4 with +2 per level after 9th.
Higher Hit Dice: d6 with +2 per level after 9th.
Maximum Level: 36th, use thief advancement charts.
Alignment: Lawful, chaotic, or neutral.
Armor: Leather armor only, shield not permitted.
Weapons: Any missile weapon, any one-handed melee weapon. Racial limitations apply.
Attack Progression: As thief.
Saving Throws: As thief.
Special Abilities: See the Rules Cyclopedia for rules concerning thieves.

Multi-Classes

The following six multi-class combinations with suggested one-word names are available.

Gish (Fighter/Magic-user)

Prime Requisites:	Strength and Intelligence.
Experience Bonus:	If Str and Int are 13 or better, +5%; if both are 16 or better, +10%. If at least one prime requisite is 6-8, -10%; if at least one is 3-5, -20%.
Standard Hit Dice:	d6 with +1 per level after 9th.
Higher Hit Dice:	d7 with +2 per level after 9th. To roll a d7, roll a d8 and re-roll any '8.'
Maximum Level:	36th, use "F/M" advancement charts.
Armor:	Any, plus shield. A gish can cast magical spells while wearing armor or using a shield.
Weapons:	Any weapon. Racial limitations apply.
Attack Progression:	As cleric or thief.
Saving Throws:	Better of fighter or magic-user.
Special Abilities:	As fighter and magic-user.

Templar (Fighter/Cleric)

Prime Requisites:	Strength and Wisdom.
Experience Bonus:	If Str and Wis are 13 or better, +5%; if both are 16 or better, +10%. If at least one prime requisite is 6-8, -10%; if at least one is 3-5, -20%.
Standard Hit Dice:	d7 with +2 per level after 9th.
Higher Hit Dice:	d9 with +2 per level after 9th. To roll a d9, roll a d10 and re-roll any '10.'
Maximum Level:	36th, use "F/C" advancement charts.
Armor:	Any, plus shield.
Weapons:	Any weapon. Racial limitations apply.
Attack Progression:	As fighter.
Saving Throws:	Better of fighter or cleric.
Special Abilities:	As fighter and cleric.

Scout (Fighter/Thief)

Prime Requisites:	Strength and Dexterity.
Experience Bonus:	If Str and Dex are 13 or better, +5%; if both are 16 or better, +10%. If at least one prime requisite is 6-8, -10%; if at least one is 3-5, -20%.
Standard Hit Dice:	d6 with +2 per level after 9th.
Higher Hit Dice:	d8 with +2 per level after 9th.
Maximum Level:	36th, use "F/T" advancement charts.
Armor:	Any, plus shield. However, a maximum of leather armor and no shield if performing thieving skills.
Weapons:	Any weapon. Racial limitations apply.
Attack Progression:	As fighter.
Saving Throws:	Better of fighter or thief.
Special Abilities:	As fighter and thief.

Theurge (Cleric/Magic-user)

Prime Requisites:	Intelligence and Wisdom.
Experience Bonus:	If Int and Wis are 13 or better, +5%; if both are 16 or better, +10%. If at least one prime requisite is 6-8, -10%; if at least one is 3-5, -20%.
Standard Hit Dice:	d5 with +1 per level after 9th. To roll a d5, roll a d10 and halve (round up).
Higher Hit Dice:	d6 with +1 per level after 9th.
Maximum Level:	36th, use "C/M" advancement charts.
Armor:	Any, plus shield. A theurge can cast magical spells while wearing armor or using a shield.
Weapons:	No edged or pointed weapons (however, daggers are permitted); all other weapons permitted. Racial limitations apply.
Attack Progression:	As magic-user.
Saving Throws:	Better of cleric or magic-user.
Special Abilities:	As cleric and magic-user.

Stalker (Cleric/Thief)

Prime Requisites:	Wisdom and Dexterity.
Experience Bonus:	If Wis and Dex are 13 or better, +5%; if both are 16 or better, +10%. If at least one prime requisite is 6-8, -10%; if at least one is 3-5, -20%.
Standard Hit Dice:	d5 with +2 per level after 9th.
Higher Hit Dice:	d7 with +2 per level after 9th.
Maximum Level:	36th, use "C/T" advancement charts.
Armor:	Any, plus shield. However, a maximum of leather armor and no shield if performing thieving skills.
Weapons:	Any missile weapon; any one-handed melee weapon; any two-handed melee weapon that isn't edged or pointed (such as staff). Racial limitations apply.
Attack Progression:	As cleric or thief.
Saving Throws:	Better of cleric or thief.
Special Abilities:	As cleric and thief.

Rogue (Magic-user/Thief)

Prime Requisites:	Intelligence and Dexterity.
Experience Bonus:	If Int and Dex are 13 or better, +5%; if both are 16 or better, +10%. If at least one prime requisite is 6-8, -10%; if at least one is 3-5, -20%.
Standard Hit Dice:	d4 with +1 per level after 9th.
Higher Hit Dice:	d5 with +1 per level after 9th.
Maximum Level:	36th, use "M/T" advancement charts.
Armor:	Leather armor only, shields not permitted. A rogue can cast magical spells while wearing leather armor.
Weapons:	Any missile weapon; any one-handed melee weapon. Racial limitations apply.
Attack Progression:	As magic-user.
Saving Throws:	Better of magic-user or thief.
Special Abilities:	As magic-user and thief.

Class Options

All class options listed below can be taken at 1st level. If the DM permits, options can be chosen at later levels by characters having the class listed in parenthesis. Characters may only choose one option for that class, multiple options are not allowed. For example, a thief can choose to be a bard or an assassin, but not both. Multi-class characters may choose two options, one for each class as long as they are compatible. A fighter/thief cannot, for instance, become a paladin/assassin.

Avenger (Fighter)

Prime Requisites: Strength.
Experience Bonus: If Str is 13 or better, +5%; if Str is 16 or better, +10%.
If Str is 6-8, -10%; if Str is 3-5, -20%.
Standard Hit Dice: d8 with +2 per level after 9th.
Higher Hit Dice: d10 with +3 per level after 9th.
Maximum Level: 36th, use fighter advancement charts.
Alignment: Chaotic only. Some avengers are "good" but most are not.
Armor: Any, shields allowed.
Weapons: Any. Racial limitations apply.
Attack Progression: As fighter.
Saving Throws: As fighter.
Special Abilities: See the Rules Cyclopeda for rules concerning avengers.

Assassin (Thief)

Prime Requisites: Dexterity.
Experience Bonus: If Dex is 13 or better, +5%; if Dex is 16 or better, +10%.
If Dex is 6-8, -10%; if Dex is 3-5, -20%.
Standard Hit Dice: d4 with +2 per level after 9th.
Higher Hit Dice: d6 with +2 per level after 9th.
Maximum Level: 36th, use thief advancement charts.
Alignment: Lawful, chaotic, or neutral. All assassins are "evil" however.
Armor: Leather armor only, shield not permitted.
Weapons: Any missile weapon, any one-handed melee weapon. Racial limitations apply.
Attack Progression: As thief.
Saving Throws: As thief.
Special Abilities: As thief of two-thirds assassin level (round up). Assassins also have special abilities derived from the Headsman (Thug) monster listed in the Rules Cyclopeda. Assassins of 6th level or higher may disguise themselves and are 90% undetectable in their disguises. At 10th level, assassins may use all three alignment languages. Assassins can surprise on a 1-3 roll of a d6 (not the normal 1-2) if they make preparations beforehand as listed in the Headsman entry. If a prepared assassin gains surprise, an opponent may be slain with a single blow, as a Thug. However, the DM may rule that an assassination attempt cannot be made or is unsuccessful regardless of any roll. Assassins are typically neutral, but can be lawful or chaotic. All are evil, regardless of alignment, as the secret killing of intelligent beings is almost always at odds with the ethos of goodness.

Bard (Thief)

Prime Requisites:	Intelligence and Dexterity.
Experience Bonus:	If Int and Dex are 13 or better, +5%; if both are 16 or better, +10%. If at least one prime requisite is 6-8, -10%; if at least one is 3-5, -20%.
Standard Hit Dice:	d4 with +2 per level after 9th.
Higher Hit Dice:	d6 with +2 per level after 9th.
Maximum Level:	36th, use thief advancement charts.
Alignment:	Lawful, chaotic, or neutral.
Armor:	Leather armor only, shield not permitted.
Weapons:	Any missile weapon, any one-handed melee weapon. Racial limitations apply.
Attack Progression:	As thief.
Saving Throws:	As thief.
Special Abilities:	As thief of two-thirds bard level (round up), as magic-user of one-third bard level (round down). Bards can cast spells from both the magic-user and illusionist spell lists. Bards can counter the effects of sound-based attacks by playing their instrument. This applies to the attacks of harpies, shriekers, banshees and the like. Bards are immune to sound-based attacks.

Berserker (Fighter)

Prime Requisites:	Strength.
Experience Bonus:	If Str is 13 or better, +5%; if Str is 16 or better, +10%. If Str is 6-8, -10%; if Str is 3-5, -20%.
Standard Hit Dice:	d8 with +2 per level after 9th.
Higher Hit Dice:	d10 with +3 per level after 9th.
Maximum Level:	36th, use fighter advancement charts.
Alignment:	Neutral or chaotic. Berserkers cannot be lawful.
Armor:	Any, shields allowed.
Weapons:	Any. Racial limitations apply.
Attack Progression:	As fighter.
Saving Throws:	As fighter.
Special Abilities:	Berserker is an option much like paladin and avenger. A berserker cannot be lawful. The berserker's special ability is rage . If the berserker decides to rage, he receives a +2 to attack rolls and must attack an opponent once per round, fighting to the death. If no enemies are available to attack, the berserker must attack allies. The berserker must make a saving throw vs. spells to come out of a rage once it is begun. The berserker may decide to come out of a rage at any time after initiating it. Berserkers may become land-owning or traveling fighters at 9th level or above but never any of the fighter sub-class options (such as knight, avenger, or ranger).

Druid (Cleric)

Prime Requisites:	Wisdom.
Experience Bonus:	If Wis is 13 or better, +5%; if Wis is 16 or better, +10%. If Wis is 6-8, -10%; if Wis is 3-5, -20%.
Standard Hit Dice:	d6 with +1 per level after 9th.
Higher Hit Dice:	d8 with +2 per level after 9th.
Maximum Level:	36th, use cleric advancement charts.
Alignment:	Neutral only. Druids cannot be lawful or chaotic.
Armor:	Leather armor, shield permitted if made of only wood and leather (but see below).
Weapons:	No edged or pointed weapons; all other weapons permitted as long as they are not made of metal (but see below). Racial limitations apply.
Attack Progression:	As cleric.
Saving Throws:	As cleric.
Special Abilities:	See the Rules Cyclopedia for most rules concerning druids. There are a few changes, however. Druids have the ability to use polymorph self (as the magic-user spell) a number of times per day equal to their level divided by three (round down). When using this special ability, druids are limited to taking the forms of normal animals, giant animals, prehistoric animals, humanoids, dragons, or lowlives. All of the druid's equipment melds into the new form, unless it is made of "dead" material. Contrary to what is listed in the Rules Cyclopedia, druids can use "dead" weapons and armor, but are loath to do so because of this limitation. Refer to the Rules Cyclopedia for additional details on the druid class.

Illusionist (Magic-user)

Prime Requisites:	Intelligence and Dexterity.
Experience Bonus:	If Int and Dex are 13 or better, +5%; if both are 16 or better, +10%. If at least one prime requisite is 6-8, -10%; if at least one is 3-5, -20%.
Standard Hit Dice:	d4 with +1 per level after 9th.
Higher Hit Dice:	d4 with +1 per level after 9th.
Maximum Level:	36th, use magic-user advancement charts.
Alignment:	Lawful, chaotic, or neutral.
Armor:	None, no shield permitted.
Weapons:	Dagger only.
Attack Progression:	As magic-user.
Saving Throws:	As magic-user.
Special Abilities:	As magic-user of the same level. However, illusionists have their own spell list, which is distinct from that of magic-users. DMs can use either the AD&D illusionist spell list, with appropriate conversions or the Labyrinth Lord Advanced Edition Companion illusionist spell list. At any rate, "standard" illusionist spells of 8th and 9th level are not readily available in the campaign world as illusionists are a secretive lot and do not ever reveal the exact nature of their most powerful spells. Player character illusionists are encouraged to conduct spell research to fill their spellbooks with 8th or 9th level spells when they reach appropriate experience levels.

Knight (Fighter)

Prime Requisites:	Strength.
Experience Bonus:	If Str is 13 or better, +5%; if Str is 16 or better, +10%. If Str is 6-8, -10%; if Str is 3-5, -20%.
Standard Hit Dice:	d8 with +2 per level after 9th.
Higher Hit Dice:	d10 with +3 per level after 9th.
Maximum Level:	36th, use fighter advancement charts.
Alignment:	Lawful, chaotic, or neutral.
Armor:	Any, shields allowed.
Weapons:	Any. Racial limitations apply.
Attack Progression:	As fighter.
Saving Throws:	As fighter.
Special Abilities:	See the Rules Cyclopeda for most rules concerning knights. One additional special ability applies. As the most elite of fighters, knights use the monster attack tables when wielding melee weapons. Treat a knight's level as his "hit dice" and use the attack roll table for monsters. If the knight has a Constitution bonus (a positive modifier) then use the "plus" row. For example, a 1st level knight with Constitution 13 uses the "1+ to 2" row and needs an 18 to hit armor class zero with melee weapons. All other rules concerning knights from the Rules Cyclopeda applies.

Paladin (Fighter)

Prime Requisites:	Strength.
Experience Bonus:	If Str is 13 or better, +5%; if Str is 16 or better, +10%. If Str is 6-8, -10%; if Str is 3-5, -20%.
Standard Hit Dice:	d8 with +2 per level after 9th.
Higher Hit Dice:	d10 with +3 per level after 9th.
Maximum Level:	36th, use fighter advancement charts.
Alignment:	Lawful only. Paladins are almost always "good" as well.
Armor:	Any, shields allowed.
Weapons:	Any. Racial limitations apply.
Attack Progression:	As fighter.
Saving Throws:	As fighter.
Special Abilities:	See the Rules Cyclopeda for rules concerning paladins.

Ranger (Fighter)

Prime Requisites:	Strength.
Experience Bonus:	If Str is 13 or better, +5%; if Str is 16 or better, +10%. If Str is 6-8, -10%; if Str is 3-5, -20%.
Standard Hit Dice:	d8 with +2 per level after 9th.
Higher Hit Dice:	d10 with +3 per level after 9th.
Maximum Level:	36th, use fighter advancement charts.
Alignment:	Neutral only. Rangers are almost always "good" as well.
Armor:	Any, shields allowed.
Weapons:	Any. Racial limitations apply.
Attack Progression:	As fighter.
Saving Throws:	As fighter.
Special Abilities:	Ranger is an option much like paladin and avenger. The prerequisites and special abilities of the ranger are listed below: <ol style="list-style-type: none">1. The ranger makes a pact of mutual aid and protection with a neutral druidical order. A ranger must always remain neutral.2. The ranger gains the ability to detect danger (as the druid spell) as often as once per round simply by concentrating.3. The ranger gains spellcasting ability as a druid of one-third his fighter level (round down) if his Wisdom is 13 or better.4. Rangers gain no ability to turn undead.5. A ranger can travel with a number of hirelings equal to or less than his druid spellcasting level.6. A ranger must assist decent and honest folk (as paladins do). Although he is neutral with respect to law and chaos, he is still good-hearted.7. The DM may determine that the ranger gains additional special abilities that relate to overland travel and woodcraft.

Using Races, Classes, Multi-Classes, and Class Options

During character generation, the player has a lot more options now when using the Rules Cyclopedia. Players must choose a race for their character as well as a class or multi-class. Furthermore, there are various class options, normally available at 9th level, that should be considered at start.

Implement these options in the following manner:

1. Choose a race for your character.
2. Decide whether you want a character with a single class or two classes.
3. Choose your class or multi-class.
4. Once you have chosen your class or classes, decide if you want to choose one (or two) option(s) for your character's class(es).

Allowed Race, Class, Multi-Class, and Class Option Combinations

Race

Under these basic rules, there are no racial limitations on class selection. Your DM may have restrictions depending on the nature of the campaign world. Some typical restrictions are listed below.

Dwarf	Limited to cleric, fighter, and thief.
Elf	Limited to cleric, fighter, magic-user, and thief.
Gnome	Limited to cleric, fighter, illusionist (magic-user option), and thief.
Halfling	Limited to cleric, fighter, and thief.
Half-Elf	Limited to cleric, fighter, magic-user, and thief.
Half-Orc	Limited to cleric, fighter, and thief.
Humans	All classes (cleric, fighter, magic-user, mystic, and thief).

Non-humans may choose any multi-class based on two classes that are permitted. A typical restriction for humans is that they may not pursue a multi-class. It is worth repeating that these are merely typical restrictions based on previous versions of D&D. This document does not necessarily advocate using these restrictions.

Multi-Class

Any two of the cleric, fighter, magic-user, and thief classes may be combined as a multi-class. It is suggested that due to the nature of the mystic class, no character should pursue a multi-class option using mystic. However, if the DM desires to use multi-class mystics, then the mystic can take the place of the fighter class in any multi-class combination. Use the appropriate advancement charts (such as "F/M" for mystic/magic-users and "F/C" for mystic/clerics). If the DM allows the fighter/mystic multi-class, then use the "C/M" advancement charts.

Class Options

All class options are listed below:

Cleric	Land-Owning Cleric, Traveling Cleric, and Druid. These three are mutually exclusive. This means that a cleric can choose only one of these options.
Fighter	Land-Owning Fighter, and Traveling Fighter (Paladin, Knight, Avenger, Berserker, or Ranger). Land-Owning and Traveling are mutually exclusive. Paladin, Knight, Avenger, Berserker, and Ranger are mutually exclusive. This means that a fighter can choose to be a paladin, knight, avenger, berserker, ranger or (eventually) a land-owning fighter, but can choose only one of these options.
Magic-user	Independent Wizard, Magist, and Magus. These three are mutually exclusive. Any of these can be coupled with illusionist, however.
Thief	Land-Owning Thief and Traveling Thief. These two are mutually exclusive. A thief also has the options of being an assassin, bard, or remaining a classic thief. These options are also mutually exclusive. An option from the first set can be combined with an option from the second set, such as "land-owning assassin" and "traveling bard."
Mystic	Mystics have no class options.

Class Options and Multi-Classes

A character with a multi-class can choose one class option for each of his classes unless the DM deems the two options incompatible. Some examples of possible incompatibility include: choosing a land-owning option from one class and a traveling option from the other; choosing two options with seemingly incompatible alignments (such as paladin/assassin and druid/avenger); and choosing two options that don't "feel right" together (like berserker/magic-user or druid/knight). DMs, as always, reserve the right to allow or forbid any combination of options.

Examples

A simple list of character type examples might prove helpful. Note that these represent just a few of the many options available.

1. Dwarven berserker (a dwarf fighter with the berserker option)
2. Elven druid/magic-user (an elven cleric/magic-user with the druid option)
3. Gnomish illusionist/assassin (a gnomish character that has taken two options)
4. Halfling ranger/thief (a halfling fighter/thief with the ranger option)
5. Half-elven paladin/cleric (a half-elven fighter/cleric with the paladin option)
6. Half-orc fighter (just a straight up half-orc fighter. He can be a land-owner at higher levels)
7. Human illusionist (a human character with the illusionist option)
8. Half-orc avenger/assassin (a nasty character)
9. Human mystic/magic-user (unarmored, unarmed, and exceptionally deadly)

There are many, many combinations and character types that can be created with this system. The DM exercises final authority on what's allowed in the campaign, as ever.

Human Advancement Charts

Level	Cleric	Fighter	M-U	Thief	F/M	F/C	F/T	C/M	C/T	M/T

Illusionist Spell List

The illusionist spell list below is taken from the Labyrinth Lord Advanced Edition Companion. Because illusionists in this Rules Cyclopeda Addendum are modeled on the magic-user class, there are nine levels of spells for illusionists instead of seven. However, there are currently no spells of 8th or 9th level on the illusionist list. Player character illusionists can invent spells of such power using the normal spell research rules. Consult the Labyrinth Lord AEC for spell descriptions.

LEVEL 1

1. Auditory Illusion
2. Color Spray
3. Dancing Lights
4. Darkness Globe
5. Detect Illusion
6. Detect Invisibility
7. Doppelganger
8. Hypnotism
9. Light
10. Phantasmal Force
11. Refraction
12. Wall of Vapor

LEVEL 2

1. Blindness
2. Blur
3. Deafness
4. Detect Magic
5. Fog Cloud
6. Hypnotic Pattern
7. Invisibility
8. Magic Mouth
9. Mirror Image
10. Misdirection
11. Phantasmal Force, Greater
12. Ventriloquism

LEVEL 3

1. Continual Light (reversible)
2. Dispel Phantasm
3. Fear
4. Hallucinatory Terrain
5. Illusionary Script
6. Invisibility 10' Radius
7. Nondetection
8. Paralyze
9. Rope Trick
10. Spectral Force
11. Suggestion

LEVEL 4

1. Confusion
2. Illusory Stamina
3. Implant Emotion
4. Invisibility, Greater
5. Massmorph
6. Minor Creation
7. Phantasmal Killer
8. Phantasmal Monsters

LEVEL 5

1. Confusion, Greater
2. Major Creation
3. Maze
4. Phantasmal Door
5. Phantasmal Monsters, Greater
6. Project Image
7. Shadow Evocation
8. Summon Shadow

LEVEL 6

1. Conjure Animals
2. Phantasmal Monsters, Advanced
3. Shadow Evocation, Greater
4. Spectral Force, Permanent
5. Spectral Force, Programmed
6. Suggestion, Mass
7. True Seeing
8. Veil

LEVEL 7

1. Astral Spell
2. Limited Wish
3. Prismatic Spray
4. Prismatic Wall
5. Vision

Acrobatics

The mystic's acrobatics special ability can be added on to another class by raising the experience point total of that class' advancement table. Use the following additions. This would be especially appropriate for thieves if you want to simulate the thief-acrobat class.

Level	XP Add-On						
1	+0	10	+90,000	19	+360,000	28	+630,000
2	+500	11	+120,000	20	+390,000	29	+660,000
3	+1,000	12	+150,000	21	+420,000	30	+690,000
4	+2,000	13	+180,000	22	+450,000	31	+720,000
5	+4,000	14	+210,000	23	+480,000	32	+750,000
6	+8,000	15	+240,000	24	+510,000	33	+780,000
7	+16,000	16	+270,000	25	+540,000	34	+810,000
8	+30,000	17	+300,000	26	+570,000	35	+840,000
9	+60,000	18	+330,000	27	+600,000	36	+870,000

Thus, the experience points required for a 36th level human thief-acrobat would be 3,400,000 XP plus 870,000 XP for a total of 4,270,000 XP. The experience point total for a 36th level halfling or gnome fighter/magic-user with acrobatics is 11,820,000 XP and is the most required for 36th level in the entire game.

Using Material from Other Editions of D&D

It is obvious that a wealth of information and additional gaming materials can be gleaned from other editions of D&D, *vis.* AD&D. What should be used from other editions, and how should it be used?

Spells

There are thousands of spells detailed for other editions of D&D. All difficulties in converting spells from AD&D or D&D Third Edition cannot be anticipated. When deciding to use a spell, the DM should read the spell description carefully and compare that spell to others in the Rules Cyclopeda of the same level and for the same class. Range, Duration, and Effect are the only spell statistics, all others should be ignored. These statistics should remain the same, if possible. If this is not possible, find spells that are close to the spell you want to use in your campaign and adjust the spell statistics accordingly. Make sure that the new spell is neither too weak nor too powerful and obeys all of the established conventions for spells in the Rules Cyclopeda.

All spells should convert to the same spell level as the source material. For 8th and 9th level cleric and druid spells converted from D&D Third Edition, use the following guideline. Make these spells 7th level and require the cleric or druid to be at least 22nd level to use spells that were formerly 8th level and 27th level to use spells that were formerly 9th level. The precedent for such a guideline is the cleric version of the **wish** spell on page 40 which requires that the cleric be 36th level.

Because the illusionist in this Addendum is based on the magic-user class, you may have some difficulty finding high level spells. Illusionists in AD&D have seven levels of spells, while specialist illusionists in D&D Third Edition have nine. The spell level of illusionist spells found in AD&D should take precedence over their equivalents in D&D Third Edition. Also check the effects of spells having the same name. The **shades** spell in AD&D is a 6th level illusionist spell and is the equivalent of **shadow conjuration, greater** in D&D Third Edition. The **shades** spell in Third Edition actually has no equivalent in other forms of D&D and would make a good 9th level spell for illusionists in this system. The 7th level illusionist spell **weird** in AD&D and the 9th level illusionist spell **weird** in Third Edition are entirely different spells and both can be used, for instance.

One last note, if the spell already has a version in the Rules Cyclopeda, use that version.

Monsters

When using a monster from another version of D&D, make sure that you keep its "power level" the same during the conversion. You can do this by first comparing the instances of one type of monster that appears in both versions (such as hill giant or chimera). The monster chosen should be roughly the same hit dice as the monster that you're converting. You can also check other monster types with similar abilities or roles. Another method is to find two monsters that have equivalents in both the Rules Cyclopeda and the system you're taking the new monster from. One monster should be slightly more powerful while the other slightly less. Once you've converted the monster for use with the Rules Cyclopeda make sure that your creation's power level is still in between the two monsters you chose for comparison.

If a monster already has a version in the Rules Cyclopeda, use that version. Appendix 2 in the Rules Cyclopeda offers good information on conversions from AD&D 2nd Edition.

Magical Items

It should be fairly easy to convert magical items from other forms of D&D. Many magical items are more complicated, but this should be a problem for most groups. As always, if an item already exists in the Rules Cyclopeda, just use that item. Experience points are never gained for magical items according to the Rules Cyclopeda.

Skills

If you wish to use the skills found in D&D Third Edition, then use the following guidelines. Assume that the character has the number of indicated ranks in each skill:

Class Skill Ranks = 3 + 1 rank per level (1st to 12th level) + 1 rank per three levels (13th to 36th)

Cross-Class Skill Ranks = 1 rank per two levels (1st to 12th) + 1 rank per six levels (13th to 36th)

The table below summarizes these formulae:

Level	Class Skill Ranks	X-Class Skill Ranks	Level	Class Skill Ranks	X-Class Skill Ranks	Level	Class Skill Ranks	X-Class Skill Ranks	Level	Class Skill Ranks	X-Class Skill Ranks
1	4	0	10	13	5	19	17	7	28	20	8
2	5	1	11	14	5	20	17	7	29	20	8
3	6	1	12	15	6	21	18	7	30	21	9
4	7	2	13	15	6	22	18	7	31	21	9
5	8	2	14	15	6	23	18	7	32	21	9
6	9	3	15	16	6	24	19	8	33	22	9
7	10	3	16	16	6	25	19	8	34	22	9
8	11	4	17	16	6	26	19	8	35	22	9
9	12	4	18	17	7	27	20	8	36	23	10

To determine whether a skill is a class skill or a cross-class skill, simply find the closest character class in Third Edition matching a character's class as detailed in this Addendum. For multi-classed characters, use the class lists from both classes, but subtract three from each class skill unless it appears on both class skill lists.

Feats and Class Special Abilities

Most feats from Third Edition are unnecessary, because the game presented in the Rules Cyclopeda is so different from that of Third Edition. However, you may wish to use certain class special abilities to further round out their equivalents in this addendum. Take care that you do not make one class dominate all others. For example, if you were to grant rangers all of the special abilities found in AD&D, they would instantly become better than any other fighting character class. Use class abilities sparingly, if at all, and always tie their acquisition to something actually occurring in the game world. For instance, perhaps a ranger character learns the secret of tracking from an extremely high level ranger and thus, you introduce "tracking" into your campaign.

Alignment

If you wish to use the two-axis alignment system, you certainly can. Look to AD&D for inspiration on the new alignments for each of your monsters. The recommended alignments for character classes are listed below. You may, of course, allow any alignment desired.

Class	Recommended Alignments	Class	Recommended Alignments
Cleric	Any	Magic-user	Any
Druid	True Neutral	Illusionist	Any
Fighter	Any	Thief	Any (most are non-good)
Avenger	any chaotic (most are non-good as well)	Assassin	any evil
Berserker	any non-lawful	Bard	any neutral
Knight	Any	Mystic	Any (most are lawful)
Ranger	Neutral Good and True Neutral	Multi-classed	alignments that will meet both restrictions
Paladin	Lawful Good and Lawful Neutral		

Equipment

Equipment found in other editions should translate directly. If a player must have his fighter use a Bohemian Ear-Spoon, then let him. For weapons, always use the S-M damage. Keep in mind that the armor class system in the Rules Cyclopeda is slightly different than the system found in other forms of D&D. If you want to use an armor type found in another variant of D&D, make sure the AC of that type translates appropriately. Suggested armor classes are listed below. Costs should be based on the cost of the armor providing the same AC in the Rules Cyclopeda. For example, a chain shirt costs the same as scale mail. Encumbrance is likewise the same. Essentially, the game effects of other armor types are the same, it is the flavor that is different.

An unarmored character by the Rules Cyclopeda is AC 9. However, in other forms of D&D the unarmored character is AC 10. To account for this difference, two new armor types are created. Padded armor gives its wearer AC 8 and can be worn by all characters except for magic-users. However, AC 9 is granted by heavy clothing, an adventurer's outfit, heavy robes, and the like. It is assumed now that all "unarmored" characters are actually wearing this type of garment, which magic-users can take full advantage of. Thus the "unarmored" AC remains 9. However, for the truly unarmored (the naked, the scantily clad, or the pajama wearer) the DM should make that AC 10. Thus, the 10-point / 9-point AC discrepancy is solved.

Armor	Armor Class	Cost	Enc	Armor	Armor Class	Cost	Enc
Heavy Clothing	9	5 gp	50 cn	Elfin Chain Mail	5	--	200 cn
Padded	8	10 gp	100 cn	Splint Mail	4	50 gp	450 cn
Leather (<i>cuir bouilli</i>)	7	20 gp	200 cn	Banded Mail	4	50 gp	450 cn
Studded Leather	7	20 gp	200 cn	Bronze Plate Mail	4	50 gp	450 cn
Hide	7	20 gp	200 cn	Plate Mail	3	60 gp	500 cn
Ring Mail	7	20 gp	200 cn	Half-Plate	3	60 gp	500 cn
Chain Shirt	6	30 gp	300 cn	Field Plate	2	100 gp	550 cn
Scale Mail	6	30 gp	300 cn	Full Plate (3rd Ed.)	2	100 gp	550 cn
Chain Mail	5	40 gp	400 cn	Full Plate (UA)	1	150 gp	600 cn
Breastplate	5	40 gp	400 cn	Suit Armor	0	250 gp	750 cn

Game Settings

All of the other D&D game settings can be used with the Rules Cyclopeda coupled with this addendum. There is a class equivalent for all classes found in AD&D (original and 2nd Edition). You must keep in mind that high level characters in the Rules Cyclopeda have higher levels than those in other forms of D&D. After 12th level, a Rules Cyclopeda character has three levels for every level an AD&D character would have. Most classes from Third Edition are represented as well, though the sorcerer class poses some difficulty. All of the important monsters you need are listed in the Rules Cyclopeda. Most game settings contain flavor which can be used with any sort of rules system. Thus, a DM should have no difficulty running a Rules Cyclopeda campaign set in the World of Greyhawk, the Forgotten Realms, or even more exotic settings. Settings that are psionic-heavy, like Dark Sun, may not be especially suitable for a Rules Cyclopeda campaign, however.

Modules

Modules written for AD&D can be used almost as-is for a Rules Cyclopeda game. NPCs of all classes except for magic-user should have one hit point subtracted per hit die. Keep in mind that traits like ThAC0, saving throws, spells, AC, and other factors are slightly different between editions, but not frightfully so. Using modules from Third Edition would be a greater challenge because the game system is extremely different compared to other forms of D&D existing in the 20th century. For the most part, running an old module shouldn't be a problem.

Game Books

There are probably thousands of game books pertaining to D&D that can be used for inspiration. Actual changes in rules should not be used, but other types of information might prove useful. For instance, the AD&D 2nd Edition class kits may not be suitable from a rules standpoint, but may be useful for ideas for different character types that can be roleplayed.

Dragon Magazines

Another source of inspiration are the 360 or so issues of Dragon Magazine. These magazines contain countless character classes, spells, monsters, rulings, modules, and other game materials. Because the differences in earlier D&D are so miniscule, most material should be suitable for a game featuring the Rules Cyclopeda, if the DM wants to add complexity.

Final Word

The intent is not to make the D&D Rules Cyclopeda a lesser clone of AD&D. If you find that you're adding so many rules and drawing so many things from AD&D, you may just want to switch over to that system. The idea is that you start with a campaign that draws straight from the Rules Cyclopeda while adding one change - divorcing character race from character class. After that, as DM, add whatever elements you want to your particular game such that it represents exactly the kind of D&D you want to play. By starting with something simple, you can add complexity as the campaign progresses and as the players are ready for it. With this, you can essentially reinvent D&D, having the progress of your campaign mimic the slow incremental changes that the game has seen over four decades. What you end up with will be uniquely yours and your group's. By the end of a campaign, you will have made an entirely new game just for your group, with its own idiosyncrasies, house rulings, ideas, and flavor. This effort is not unlike the original campaigns that took place in the beginning days of Dungeons & Dragons.
